1960-74 Reproduction AGM Maintenance-Free Battery

Reproduction AGM series battery for 1960-74 Dodge and Plymouth models. These reproduction batteries offer you enhanced performance and reliability while maintaining an authentic vintage appearance. AGM series batteries come fully charged and ready for installation. Features an incorporated valve regulated design that pressurizes the battery to keep it from drying out while the absorbent gas mat separators eliminate gassing and leaking even if the case is broken. Correct markings and lettering are specific to each battery group, along with the correctly colored top caps. Officially Licensed by Mopar and made in the USA.

Red Top Battery

The OPTIMA RedTop high-performance AGM battery is the ultimate high CCA starting battery designed to deliver the strongest 5 second ignition power for a reliable start-up every time. The RedTop outperforms and outlasts traditional batteries in demanding cranking/starting applications. With ultimate power delivery and durability, the RedTop is ideal for luxury cars, hot rods, off-road vehicles, and other applications that require a leakproof starting battery.

Yellow Top Battery

With premium cranking power, low internal resistance, and unparalleled cycling capability (rechargeability), the YellowTop AGM battery is a true dual purpose automotive battery. It handles deep power drains and recharges to full capacity so it can power plenty of electronics and still start the engine time after time. Perfect for vehicles with multiple electronic systems or high demand audio.

Universal Battery Cables

Underhood or trunk mount battery cable sets. Each cable is 1 gauge and features lead die-cast top post terminals with a steel ring insert. This feature prevents cracking or breaking the terminal due to tightening. Each version comes in either top post or side post sets. Trunk mount sets measure 18' while underhood sets measure 6' in length. Negative cables feature pre-assembled 36" long 6 gauge secondary lead. Each set includes: crimping tool, extra lugs, and shrink tubing.

- For 12V Applications

Smart Charger 800

The OER® Authorized Smart Charger 800 battery charger and maintainer for classic cars and trucks provides high frequency automatic intelligent charging for 12V lead acid, flooded, or sealed maintenance-free (AGM and Gell Cell) batteries. Microprocessor controlled unit plugs into 120V AC current and provides 0.8 amp output through a 4 stage charging program. Features 4 safety functions: over load, over heat, short circuit and reverse polarity, and is spark proof. Designed to be used with ring terminal output or with the optional clamp set as a portable unit. Has GS/CE/ETL/CEC Certifications. Ideal for cold weather battery maintenance, or vehicle storage.

Priority Start Battery Protector

The PriorityStart! 12 Volt ProMax has a surge "spike" protection circuit that adds additional protection to the electrical system. Transient voltage "spikes" can cause damage to computers, 2 way radios, MDT equipment, cameras, and a host of other electrical equipment. The ProMax can be used on all 12 Volt vehicles including those with such aftermarket accessories.

Battery Carrying Strap

This handy tool is a must for your tool box. Allows you to easily carry bulky automotive batteries without getting acid on your clothes and hands. Each end is marked and sized to fit the positive or negative terminals allowing a secure, tight fit onto the post. Battery acid won't harm the strap! For top post batteries only.

X205	carries top mount.....	7.99 ea
------	------------------------	---------

Battery Mat – Acid Neutralizer

The Battery Mat offers protection against undetected battery acid leaks. Once installed, the mat will trap and neutralize any battery acid that leaks from the terminals or top side of the battery, preventing corrosion and expensive damage. Each mat is made of super absorbent polypropylene needle punch felt, with one side heat treated to give it additional strength. The mat is inserted under the battery between the battery and the battery tray. It can easily be installed at any time either when replacing the battery tray or battery.

Cell Saver Battery Insulation Kit

DEI cell saver battery insulation kit is designed to solve the problem of heat soak into batteries preventing premature failure due to heat. Batteries are very susceptible to heat and vibration that could cause premature failure and hazardous leaks. Cell Saver is very capable of damping vibration and will absorb and neutralize any damaging leaky battery acids. Cell Saver is easy-to-install and excess material can be trimmed to accommodate batteries of most sizes and shapes.

Battery Accessories & Tools

Protect Your Vehicle from Corrosive Battery Acid!

Prolong battery life and protect your vehicle's battery tray, underhood and radiator support area with the world's only acid-neutralizing heat barrier mat. It reflects over 90% of radiant heat, traps and neutralizes battery acid, protects against corrosion, is recyclable, protects the environment, and is inexpensive and easy-to-install. The Battery Heat Barrier™ set is completely safe to handle before and during installation. So effective, it is used by all branches of the United States military. Set consists of: one 8" x 40" acid absorbing/neutralizing felt and one adhesive backed 8" x 40" aluminized thermal barrier to wrap around the battery, plus an 8" x 12" acid absorbing/neutralizing pad to put beneath the battery. Install one on your vehicle NOW, before it's too late.

TT1001 battery heat shield..... 29.99 set

Battery Switch

These battery switches are easy-to-install on the negative battery post and disconnect the battery by simply loosening the knob a few turns. To reconnect just retighten the knob. The knob can be removed completely to deter theft. Rated at 500 amps surge and 125 continuous at 12 Volts. Available with a 15 amp fused bypass that maintains computer settings, radio, clock etc., while the battery is disconnected.

Lifeline Memory Retention System

The Lifeline enables users of a Master Disconnect Switch to retain a small amount of power for memory circuits common in fuel injection computers, radio presets and clocks. The Lifeline is a memory circuit retainer that will automatically reset after the electrical load is significantly reduced or if the Master Disconnect Switch has been switched to the on position. Available for standard or remote battery disconnects.

500778 standard disconnect 32.99 ea
500837 remote disconnect..... 41.99 ea

Quick-Disconnect Battery Terminal

This brass, quick-disconnect battery terminal isolates the vehicle's battery, allowing the clock, radio etc., to remain functional when combined with a fused bypass. Designed for both round and square battery lugs.

W203507 6.99 ea

Master Disconnect Battery Switch

Taylor's 2 post battery disconnect switch completely shuts off all of the current from the battery in the event of an accident or electrical short. The 2 post switch is rated at 180 amps continuous capacity and is especially useful when charging the battery. Includes vinyl on/off decal.

Note: The NHRA requires a master battery disconnect switch on all modified and super stock class vehicles to comply with their rule 8.4.

TP1032 180 amps..... 44.99 ea

Battery Cutout Switch

Make sure your battery maintains the precious power you need by disconnecting the battery from the vehicle during storage. Your choice of an inexpensive standard duty cutout or a heavy-duty unit. Works on any 12 Volt system or vehicle. Splices into positive battery cable to provide a switch for turning power on or off.

1962-74 Engine Harness

Engine wiring harness which is ready-to-install and features correct colored wires and connectors, making installation as easy as possible. Harnesses include connections for the following: temperature sending unit, oil light, coil power, horn relay, and washer pump motor. All wiring harnesses available are wrapped in non-adhesive vinyl wrap tape for an authentic factory appearance.

Important: *Features a connector to which federal inspectors could attach a testing device, allowing them to check the brake light warning system. For vehicles without this addition, simply tape the connector out of the way.

1962-72 Modified Engine Harness

This engine harness is designed for 1962-72 Dodge and Plymouth models that have been upgraded to electronic ignition. Each harness features correct color wires, factory style connectors, and is wrapped in non-adhesive vinyl wrap. Requires use of 1970 or later style alternator with electronic voltage regulator and a 4 terminal ballast resistor (MN1134) to accommodate all three types of electronic box.

Note: *Uses factory alternator, voltage regulator, and 2 term ballasts.

T-56 Magnum All-In-One Harness

The Bowler Performance All-in-One harness solution for the Tremec T-56 Magnum transmission comes equipped with all the connections pre-wired into one harness for a simple installation and ease of use. The small epoxy sealed controller is mounted to the VSS output using the existing bolt, and once the unit is powered up you will be able to connect via Bluetooth to your Apple or Android smartphone using (Bowler Transmissions) free app. The app will give you the ability to customize their input and output settings for each feature to ensure proper operation in your vehicle. This harness eliminates the need for any additional equipment to operate the reverse lock out or generate the correct speedometer signals coming from your Tremec T-56 Magnum.

For Borg Warner GM Non-Magnum T-56 (1993-02)

7000099	with speedo port plug	94.99 set

Wiring Harnesses

1966-74 Fusible Link

Replacement fusible links are made with the same high-quality materials and workmanship as our wiring harnesses. These fusible links are offered separately for minor repairs that require changing only the fusible link. Wiring harness part numbers, in parentheses, are given here to help you find the correct application from our wiring harness applications below.

Note: Fusible links are included with all wiring harnesses where applicable. *For models with 59 and 60 amp alternators. **With standard ignition, air pump and 60 amp alternator.

1964-74 Under Dash Harness

Replacement under dash harness for various 1964-74 Dodge and Plymouth models. Harnesses feature correct color wires, factory style connectors and are wrapped in non-adhesive vinyl wrap tape. Under dash harnesses connect to various switches and sensors related to the dash. The harness also connects to the engine harness and runs down the side cowl panel and connects to the rear body harness.

Important: When ordering a new wiring harness, inspect the original harness on the vehicle. Chrysler often added separate wire assemblies depending on the vehicle's final configuration. Many of these separate harnesses are not available and if needed they will have to be reused. Owners of early 1972 models that do not have the seat belt warning system should disregard the connector and tape it off out of the way.

Wiring Harnesses

1962-74 Front Light Harness

Front light harness for 1962-74 Dodge and Plymouth models. Front light harnesses are for vehicles that required a separate engine harness. Each harness features correct color wires, factory style connectors and is wrapped in non-adhesive vinyl wrap tape. Harnesses attach to the firewall as original. The firewall connectors will vary depending by model as some models use a single style plug while others use two.

1962-72 Fender Mounted Turn Signal Indicator Wires

Turn signal indicator wires/ground strap for 1962-72 A, B, & E-Body models. Each wire features an original style cadmium-plated cap, with dimples, that helps ground the turn signal circuit.

Note: *Extension harness for Belvedere/Satellite models. Assembly required, includes connectors and heat shrink tubing for proper installation through holes.

1967-72 Back-Up Lamp MT Harness

Back-up lamp harness for 1967-72 A, B, & E-Body models. The back-up lamp harness connects the bulkhead to the transmission back-up switch. Other connections may vary depending on your particular model. Harness does not fit any Hemi model. Hemi back-up lamp harness is incorporated into the positive battery cable. Back-up lamp harness is for manual transmissions only. Neutral safety switch incorporates the back-up lamp feature.

1968-74 Back-Up Lamp/Neutral Safety Switch Harness

Back-up lamp/neutral safety switch harness for 1968-74 A, B, & E-Body models with automatic transmission and 1968-74 B & E-Body models with clutch safety switch. The back-up lamp/neutral safety switch harness connects the back-up lamp/neutral safety switch to the bulkhead connector. The 1968 B-Body has a wire connecting the neutral safety switch to the starter relay. The clutch safety switch lead wire connects the clutch switch on the pedal to the starter relay. Harness will not fit any Hemi model.

Wiring Harnesses

1964-74 Rear Lamp Harness

Replacement rear body lamp harness for various 1964-74 Dodge and Plymouth models. The rear lamp harness powers all accessories on the rear end of the vehicle and connects to the under dash harness. These harnesses feature correct color wires, factory style connectors and are wrapped in non-adhesive vinyl wrap tape.

Important: *Except Charger and convertible models. None of these harnesses will fit station wagon models. ⚠

Aftermarket Halogen Headlamp Harness

Some factory headlamp wiring is not designed to handle high power Halogen headlamps, especially when upgrading to a higher wattage. Our headlamp harnesses draw power directly from the battery, through a relay, to the headlamps, providing full power to your H4 conversion headlamps or Halogen sealed beams. They are made with TXL high temp wire, weather resistant 30 amp fuse, and two 40 amp weather resistant relays capable of handling up to 150 watts. #30816 is for vehicles with a 2 headlamp system using dual filament sealed beams or H4 headlamp conversions. 30817 is for vehicles with a 9005 and 9006 bulb on each side.

1970-71 E-Body Overhead Console Harness

Overhead console wiring harness and extensions for 1970-71 E-Body models equipped with overhead console. The console to body harness needs three other harness extensions to operate all overhead console functions. You will need the console to fuel relay extension ME8105 which connects the overhead console to the low fuel relay harness. The low fuel relay harness connects the dash harness with the fuel relay extension. Then the door ajar switch extension connects the right door ajar switch to the body harness and completes the overhead console wiring.

Universal Wiring Harnesses

Classic Update kits are designed for projects that require more circuits than would have been available in an original chassis harness. Each kit includes all the basics needed to rewire a vehicle from headlight to taillight, and will accommodate popular add-on items such as electronic fuel injection, aftermarket gauges and common supporting modifications.

MB51634

1967-75 A, B, & E-Body Classic Update Wiring Harness

Classic Update wiring harness for 1967-75 A, B, & E-Body models. These complete car wiring harness systems not only allow you to power your essentials, but also add accessories such as aftermarket air conditioning or power windows. The main harness includes turn signal and hazard flashers mounted on the ATO style fuse panel, which installs in the factory location (minor firewall modification required), original switch connector bodies, steering column connector, under dash courtesy lamps, an instrument cluster harness disconnect, a rear body harness, and a new floor mounted dimmer switch. A bulkhead connector is used to connect the engine and front light wiring harness for easy installation. The engine harness includes connectors for original points type distributors, OE style starter relay connection, tach, and ignition leads, and is supplied with high powered 1 wire alternator connection. The front light harness includes extra long leads to allow for custom routing. Includes original style lamp bulb sockets, connectors, and terminals. Also includes full color diagrams and instructions.

Note: This system is intended for use on customized vehicles. Does not support factory ammeter. Requires one wire alternator. Must use original or reproduction dash switches. Use of original AC will require original AC harness.

- 18 Circuits on 16 Fuses
- 4 Select-A-Circuits
- Handles 100 Amp Alternators
- Includes the Proper Connectors and Terminals
- Clear, Simple, Color Coded Instructions
- Clear Coated, Polished Stainless Steel Finish
- Faster Installation with New Style Terminal Block
- Cooling Fan Relay Included
- Serial Number

1961-75 A, B, & E-Body Express Wiring Harness

This express wiring harness for one wire alternator applications has been improved over previous models to simplify installation. Kit includes: a headlight switch, isolated cooling fan relay, and wiring for high and low beams, indicator lights, brake, turn signal, parking, and third brake light. It will accommodate points, aftermarket and electronic (factory or dealer supplied) distributors, and can be connected to the Chrysler starter relay for use of the factory transmission mounted neutral safety switch. A multi-connection battery junction block reduces the number of wires needed for add-ons. Our printed and color coded high temperature fire resistant wiring is supplied for all circuits, including for the lighting needed for most safety inspections, and features a unique serial number. Applications available for 1961-75 Challenger, Barracuda, Satellite, Challenger, Charger, Dart, Coronet.

Wiring

Timed Cooling System Shutdown

Timed cooling system shutdown features adjustable relays that keep power to the cooling fan and electric water pump (if equipped) when the key is shut off. This reduces the block temperature as much as possible without the risk of killing the battery. This is a timed circuit and does not use a thermostat or other fan control to operate.

Note: Not compatible with probe style fan sensor controls that mount on the radiator or radiator support.

Mopar Bare Bonz Wiring Set

Mopar Powered Rodders with the need for only a simple electrical system will love this model. We don't use an old GM fuse block and call it universal. We do it right. This set has 8 fuses and 10 circuits and plenty of wire needed to take care of your basic engine, dash and lighting, gauges, and some accessories yet built well enough to be compatible with electronic fuel injection. This panel measures: 7-1/2" x 3-1/8" x 2-7/8".

Mopar Access 24/7 Wiring Set

This fuse system comes standard with 24 fuses and 3 relays, along with a unique mounting system and room for 4 additional relays. The Access 24/7 allows you to consolidate even additional aftermarket products' relays to clean up the under dash area. Fuse panel can be conveniently placed under the dashboard for easy servicing or maintenance. Additional wires simply plug into labeled connectors in the fuse panel. No hard wiring is necessary to add accessories or other circuits to the fuse panel.

Universal Wiring Harnesses

Universal Chassis Wiring Harnesses

Starting from a blank slate is a daunting task, especially with wiring. Trying to keep your electrical systems running smoothly on a patchwork of old wiring can be a troubleshooting hassle and possibly even a fire hazard. Whether you are planning a series of electrical upgrades or simply need to replace aging, brittle wiring, build your electrical system on a fresh foundation with a quality universal harness. For basic builds, start with a simple kit with wiring provisions for all lamps, horn, fan, wiper, gauges, and all lamps. For more elaborate builds, choose from a selection of advanced wiring solutions. Need to integrate your aftermarket air conditioning? Need extra circuits for a multitude of electronic accessories? With Classic Industries®, there's no limit to what you can do with your wiring.

PAINLESS

21-Circuit Universal Wiring Harness

This universal 21-circuit harness is configured for 1966-76 Mopar vehicles and features OEM color codes and a unique covered micro-fuse block. Harness includes an auxiliary circuit with 20 amp relay for accessories such as fog lights, electric seats, electric window/lock, or an electric fuel pump. This harness does not include that troublesome bulkhead connector that most Mopar vehicles came with throughout the 1960's and 1970's. The circuit that is known for burning up was the Ammeter circuit going through the firewall bulkhead. So, to solve this problem Painless does not support the Ammeter on these vehicle and we provide you with a 3-1/2" x 3-1/2" black powder coated plate to cover up the original bulkhead hole in the firewall.

Important: This is for non-fuel injected motor and non-electronic transmission.

21-Circuit Harness

This 21-circuit universal harness is adaptable to fit the 1960-80's GM, and Chrysler muscle cars where a bulkhead connector is required. Some minor bulkhead modification may be required. Included with this harness are the following parts: GM turn signal and column mounted ignition switch connectors, pre-wire plugs for the headlights and dimmer switch. Each wire is custom printed with the circuit identification as well as color codes for easy installation.

Trunk Mount Chassis Harness

In many street rods and custom cars there is little or no room to mount the fuse block under the dash, forcing modifications to either the car or the harness. Our 12 circuit trunk mount wiring harness provides additional wire from the fuse block to the dash and from the fuse block to the front end, allowing the remote installation of the fuse block in the trunk or behind the rear seat. Like all Painless kits, these fuse blocks come completely pre-wired and terminated for a simple, painless installation. Includes GM column mounted ignition and turn signal plugs.

Highway Series Modular Fuse Panel Systems

Each universal fuse panel is constructed in heat resistant nylon and features anti-push back locks and single side wire access with self-locking, screw down connections. Includes a starter/alternator 175 amp mega fuse for extra protection. The panel is fed through an 8 gauge power feed wire and features a battery and accessory stud connection. Includes: color coded wiring for ignition, alternator, headlight, steering column, accessories and gauges, relays, fuses, flashers, circuit breakers, and all necessary power connections and terminals. Also includes a full color schematic and step-by-step instructions.

Power Door Components

12 Volt Exterior Door Handles ⚠️

Elevate your vehicle's style with these electronic exterior door handles from Lokar! Each billet door handle utilizes a weatherproof 12 Volt pressure pad switch to supply power to an electronically actuated door latch (door popper). Its 2 piece design and available 0 degree or 10 degree mounting surface allows the insert to be removed, and door handle positioned for ultimate customization. The XL design provides 7/8" of clearance between the door and the switch, allowing for easier mounting and less modifications to the door. Made in the USA from 6061-T6 billet aluminum.

Important: Requires electronic door latch actuators which are not included.

Note: *Installation requires hand pocket for clearance.

Remote Battery Disconnect

With this setup, one click of the key fob completely shuts down your vehicle's entire electrical system. It's accomplished by routing your main battery cable through a remote cutoff solenoid that you've stashed in a place inaccessible to a thief. For even more security, the 4 channel "Safe-n-Sound" system not only shuts off all power from the battery, but will also control 3 other items, like closing the windows, triggering the power door locks, and interrupting electrical power to the fuel pump, all separate from the main battery cutoff. The 4 channel package can handle up to 30 amps worth of electrical equipment.

Wiring Accessories

Easy Loom Split Wire Sleeve

DEI Easy Loom is the answer to those ugly plastic stock wire looms. These split loom sleeves from DEI offer a clean, classy way to protect exposed wires, cables, and hoses. They are easy-to-install and resistant to abrasion, chemicals, and the elements. Available in 8 different diameters and include a 2 foot roll of silicone tape to seal the ends.

Thermo-Flex Hose and Wiring Covering

The combination of aluminum, silica, and stainless steel is combined to produce a sleeve that is flexible lightweight, and strong. The aluminum-silica combination can be slit for applications such as wire looms or hose covering, without disconnecting the ends of the wire or hoses. Thermo-Flex aluminum can withstand extreme temperatures up to 750 degrees F.

Semi-Rigid Wrappable Split Braided Tube

Clean up and protect any wiring harness with this black braided wire wrap. The semi-rigid tube opens along a lateral split to accommodate a variety of harness configurations, then simply closes without any need for fasteners. A 25% overlap ensures complete coverage. Retains shape and rigidity from -94 degrees to 257 degrees F. For 18-14 gauge wire.

Express Sleeve

Express sleeving is a combination of a high temperature insulation material and a highly reflective Mylar foil

with a Velcro closure. The sleeving is designed to simply and effectively protect wire, hoses, and cables from harmful effects of radiant heat. Just pull apart the Velcro, wrap around the wire, and re-close the sleeve. Express Sleeves reflect over 90% of radiant heat bursts up to 2000 degrees F, and can easily withstand direct temperatures up to 750 degrees F.

HT719307

Fabric Heat Shrink Tubing

Shrinkflex fabric tubing is the only product of its kind. The unique weave of poly olefin and polyester easily installs over wiring harness bundles, connectors and splices, as well as rubber hoses and plastic pipes. When heated to 176 degrees, it shrinks to 1/2 the original diameter while remaining flexible, even at high temperatures!

XT101

XT102

XT103

X-Treme Tape

X-Treme Tape was developed for the military and has some very unusual properties. The silicone based tape will stick only to itself, and only when placed under tension. Once wrapped around an object, it forms a non-conductive, air and watertight, insulating seal that remains flexible within a temperature range of -60 degrees to 500 degrees F. Insulates to 8000 Volts. Stretches to 3X's its length. Conforms to irregular shapes. When wrapped upon itself, it bonds together immediately and becomes completely fused after 24 hours at room temperature.

Universal Wire Grommet

Sometimes you are forced to punch a hole in your firewall to get additional wires into the engine compartment, but that hole you cut is sharp and can potentially sever wires. To help prevent this, install one of these universal wire grommets. In addition to the added protection, these grommets also give the hole in the firewall a cleaner appearance.

Note: *Can be drilled out up to a 1/4" opening.
