1979-86 Rectangular Headlamps with LED Halo

RedLine LumTronix headlamps allow 50% more light to shine through thanks to their crystal clear lenses and a special side lens that extends past the retaining ring. This side lens is a true safety innovation and was designed to provide additional side light and increase visibility. Each headlamp features a Euro style diamond cut reflective base, diamond crystal glass, and a heat resistant composite housing. Headlamps are available with either a single color halo (white) or multi-color halo (with 16 selectable colors plus the ability to adjust brightness), and blue H4 halogen bulbs. The halo or "Angel Eyes" can also be wired as a daytime running lamp and features 23 low-temp LEDs with a 100,000+ hour life, along with "fade", "flash", "strobe", and "smooth" modes that you can choose with the included wireless remote. Headlamps plug directly into your stock harness for a simple and easy installation. Each pair includes: 2 headlamps, 2 bulbs, dust boots, ceramic tip pigtail harness adapter, and instructions. Multi-color halo sets also include the RGB harness and wireless remote.

Important: Will fit most vehicles (cars, trucks, motorcycles, and motor homes) that use a universal rectangular style headlight.

Note: Blue Halogen bulbs are blue in color when off and bright white when on (no blue tint).

H4 LED Headlight Bulbs

Upgrade your stock Halogen bulbs with a pair of premium LED headlight bulbs from Redline Lumtronix. With a 50,000 hour lifespan, you won't have to change the bulbs as frequently, meaning you'll spend more time on the road than in the garage. Each bulb is 300% brighter than your stock halogen bulbs as well as a direct-fit, "Plug and Play" upgrade that requires no modification to your electrical wiring. LED bulbs include colored film to change the look and temperature color of your lights.

1964-73 Round Headlamps with LED Halo

RedLine Lumtronix headlamps allow 50% more light to shine through thanks to their crystal clear lenses and a special side lens that extends past the retaining ring. This side lens is a safety innovation and was designed to provide additional side light and increased visibility. Each headlamp features a Euro style diamond cut reflective base, diamond crystal glass, and a heat resistant composite housing. Even though no paint or tint is applied to the glass or reflector, the Black Illusion headlamps look blacked out when off thanks to the halo and lamp shields that are painted black. Headlamps are available with or without a halo, either single color halo (white) or multi-color halo (with 16 selectable colors plus the ability to adjust brightness), with or without turn signals and your choice of clear or blue H4 Halogen bulbs or H4 LED bulbs. The halo or "Angel Eyes" can also be wired as a daytime running lamp and features 23 low temp LEDs with a 100,000+ hour life, along with "fade", "flash", "strobe", and "smooth" modes that you can choose with the included wireless remote. Headlamps plug directly into your stock harness for a simple and easy installation. Each pair includes: 2 headlamps, 2 bulbs, dust boots, ceramic tip pigtail harness adapter and instructions. Multi-color halo sets also include the RGB harness and wireless remote.

Important: Will fit most vehicles made from 1936 to 1979, as well as many vehicles made after 1979 that use a universal round style headlight.

Note: Blue Halogen bulbs are blue in color when off, and bright white when on (no blue tint). Clear Halogen bulbs are clear in color when off and bright white when on. LED bulbs include colored film to change the look and temperature color of your lights.

LED7 Projector Headlamps

Dapper Lighting 7" LED projector headlamps provide the classic look while substantially upgrading the quality and spread of light. These replacement bulbs feature OE style glass lenses, Bi-LED projectors, and a slim flat base design (3.2" deep without bulb). These features eliminate the extra wiring and bucket modifications associated with HID lighting. They offer a quick and clean install and a significant increase in performance, reliability, and safety. Available with chrome or black housings and with or without halos. The halos are available in solid, dashed, and HDR styles.

Note: RGB halos require a controller sold separately.

Headlamp Components

OE Style LED Projector Headlamps ⚠

Dapper Lighting LED projector headlamps provide the classic look while substantially upgrading the quality and spread of light. If you are looking for stock replacements, you can't go wrong with the OE7 or the OE5. The OE7 delivers up to 3X more light than a traditional H4 conversion, 65% less draw than a sealed beam. OE7 headlamps feature day-time running/park lights, and measure 3-1/2" deep. The OE5 is designed to retain the stock appearance of a factory H4 bulb while delivering up to 300% more light with 65% less draw than a sealed beam. They feature an advanced passive cooling system, adaptive power control, and progressive low/high outputs for increased longevity, performance and visibility.

FourSix Projector Headlamps ⚠

Dapper Lighting FourSix projector headlamps are the slimmest 4" x 6" projector headlamp design on the market. Designed to be a replacement for stock sealed beams, these lights fit into most classic car headlight buckets without any modification. The wiring plugs right into your OEM socket and there's no need to modify your existing wiring. They feature a 10,000 RPM cooling system and adaptive power control for increased longevity, performance, and visibility. The factory original look is achieved with their unique curved glass partial Fresnel lens with a special clear center to ensure the output is clean and crisp. If you are looking for stock replacements, you can't go wrong with a FourSix.

Headlamp Wiring Harness Upgrade ⚠

Redline Lumtronix wire harness kit upgrades the stock headlamp wiring on your vehicle to provide your new bulbs with maximum power and decrease the chance of overloading the stock wiring and connectors. Power will be drawn directly from your battery, eliminating voltage drops and ensuring headlamp system reliability. The upgrade kit installs easily in 5-10 minutes without any cutting or splicing. Simply plug into your factory headlamp sockets, attach positive connectors to battery terminal and ground wires to the body of your vehicle. Two 30 amp relays provide added protection for your headlamp switch and wiring harness.

1974-78 Fiberglass Front Bumper

Fiberglass front bumpers offer the ultimate in lightweight durability while retaining an original appearance. Bumpers with OE trim will be able to retain the OE bumper trim, while the trim delete bumpers offer a smooth, custom look. Available in 2 versions, skin or bolt-on. The skin is a fiberglass bumper skin only and will require fabrication to bond directly to the stock brace. The bolt-on bumper has mounting studs bonded to the bumper, and attaches directly to the stock brace. Made in USA.

Note: There is a seam on each end where the mold bolts together, requires light sanding and filler to get it ready for paint. Shipped double oversize.

1974-78 R-Apron Fiberglass Front Bumper

Give your 1974-78 Mustang II race inspired styling with a fiberglass R-Apron front bumper. Inspired by the 1965 GT350R, this apron features a wide opening in the front to ensure maximum airflow to your radiator or intercooler. The R-Apron attaches to the flat part at the front of the fenders just like the header panel. The middle opening is made a little longer to accommodate all years, even 1974, but can be trimmed down if it interferes with the radiator. Stock bumper assembly and front valance will need to be removed. This R-Apron replaces both. Made in USA.

Note: Drilling required. Shipped double oversize.

FM291028B

1974-78 Mid-Tucked Fiberglass Front Bumper

Give your 1974-78 Mustang II exterior a sleek upgrade with these new mid-tucked fiberglass front bumpers. Each bumper still looks similar to stock, but is actually shaved back about 3-1/2" for a clean, custom look. This design allows you to keep the stock cross brace and bumper shocks, they just need to be relocated back 3-1/2" on the frame (as simple as drilling 2 holes). Bumpers with stock trim will be able to retain the stock bumper trim, while the trim delete bumpers offer a smooth, custom look. Available in 2 versions, bolt-on or skin. The bolt-on bumper has mounting studs bonded to the bumper, and attaches directly to the stock brace. The skin is a fiberglass bumper skin only and will require fabrication to bond directly to the stock brace. Made in USA.

Note: Shipped double oversize.

MADE IN USA

1975-78 Fiberglass Front Valance

Replacement front valance for 1975-78 Mustang II models. The front valance shipped standard on all Mustang II's and was located beneath the bumper. Each valance mounted directly to the front edge of the fenders and was attached to thick hangers on either side of the radiator. The chin spoiler (if equipped) attaches to the underside edge of the valance. Manufactured in fiberglass to factory specifications. Made in USA.

Important: Correct valance for 1975-78 models which can also be used on a 1974. The 1974 model valance was different as it did not have to accommodate a front chin spoiler.

Note: Some drilling may be required for installation. Shipped double oversize.

Monroe Handler 7 Piece Wide Body Set

Built by Monroe Shocks and Hot Rod magazine in Hot Rod's 1977 June, July, and August issues, the original Monroe Handler was designed to showcase Monroe's new Handler line of shocks. This one-off production featured an upgraded exterior with steel IMSA style fenders and other enhancements that drastically changed the look of the Mustang II. Highly desired ever since, you now have a chance to recreate this one of a kind vehicle with our Monroe Handler 7 piece wide body set. Manufactured from fiberglass with a smooth gel coat finish, set includes the front nose, left and right front fenders, left and right rear quarter panels, rear roll pan, and rear spoiler. Available as a 7 piece set or sold individually as well. Made in USA.

Important: Fits hatchback models only. Does not fit coupes. Gel coat finish will either be black or white.

*Rear roll pan is smooth.

Note: Drop ship. Parts are made to order. Please allow 4-6 weeks for delivery. Shipped truck freight.

Important Information Before Attempting to Install Sheet Metal!

Regarding Minor Imperfections in Panels:

The sheet metal you receive may have scratches, dings, small dents and other minor imperfections which are considered normal sheet metal characteristics due to the nature of the product. These minor imperfections will be easily corrected during the filling, priming and sanding phase of your sheet metal installation. Classic Industries® does not consider dings, scratches, minor dents or other imperfections on the sheet metal to be defects in the panel nor are they considered damaged. All sheet metal panels will require some sort of preparation and manipulation during installation. Every panel that we sell is inspected and then carefully packaged to protect against damage that may occur during transit.

Test Fit All Panels Prior to Paint and Installation:

Classic Industries® recommends test fitting all sheet metal panels prior to final paint and installation. Minor modifications including elongating mounting holes, adding additional shims, etc. are normal and may be necessary when installing sheet metal. It is important to note that hard driving conditions, like racing, can twist bodies and frames out of original tolerances. Poor body work from previous collisions can cause problems with the body structure that the panels are attached to. Some vehicles were manufactured with a unitized body (no frame) thus causing even the most minor accident to twist the body creating a situation that would cause sheet metal panel misalignments. Take into consideration that tolerances on classic vehicles are not nearly as exact as they are on modern vehicles. This is primarily due to the hand fitting of panels at the factory on most antique and classic cars as opposed to the robotics used in today's modern factories. All of these factors will affect the way your new reproduction sheet metal will install and fit on the car. There is really no such thing as a direct fit body panel when it comes to older vehicles.

Returns and Defects:

Prior to returning any defective body panel or sheet metal item to Classic Industries®, please contact our customer service department. Classic Industries® will not replace a panel, nor will we be responsible for freight on returns should it be deemed that the panel is not defective. See policies for more information.

For Best Results, Hire a Professional to Install the Panels:

Classic Industries® recommends that you hire a professional paint and body technician that has the skills, knowledge and experience necessary to install the new panels on your vehicle. A professional body technician will be able to prepare the panels for installation and repair any imperfections.

When Welding Sheet Metal Products . . .

Save time when replacing sheet metal by using Classic Industries® new, innovative "Weld-Thru™" primed sheet metal products. Our all new coating process is designed to eliminate the unnecessary process of grinding or sanding the EDP coating off to ensure a solid and rust free weld. This "Weld-Thru™" primer requires minimal preparation and eliminates corrosion problems between overlapped panels and layered spot welds. It also minimizes heat zone problems, reduces panel distortion, and allows better penetration into the dense replacement steel to compensate for the older metal's impurities. Look for the "Weld-Thru™" logo when purchasing sheet metal products to save time during installation of weld-on sheet metal repair panels.

Some Guidelines on EDP Coating

Many sheet metal products are delivered with a black electrophoretically deposited coating (EDP, or E-coat) for superior long-term corrosion protection, while others use a similar lacquer-based coating designed to provide protection for storage and shipping. Before panel installation, Classic Industries® recommends applying lacquer thinner with a shop towel to determine the type of coating. If the coating is removed by lacquer thinner, then it should be completely stripped from the product before any primer or paint is applied. If the lacquer thinner does not remove the EDP coating, it can simply be prepped, primed and painted without stripping.

Classic Industries® The Restorer's Choice™

Count on the Classic Industries® Restorer's Choice™ symbol whenever purchasing reproduction parts and accessories. You can be sure that each and every product displaying this symbol is manufactured correctly to exact specifications and fits the way the factory intended. Products denoted throughout the catalog with this symbol are officially approved by Classic Industries® as a genuine restoration product. Look for the Restorer's Choice™ logo. The Classic Industries® symbol is your assurance of quality.

Made in USA

Look for the "Made in USA" logo for products that are proudly manufactured in the United States.

1987-93 Twin Turbo Hood

If you are looking to turn heads then the twin Turbo hood by Cervini's is just what the doctor ordered for your 1987-93 Fox body! Features 2 front air ducts to let cool air in, screened rear vents to let allow the hot air out and a 2-1/2" lifted cowl. Manufactured from steel reinforced fiberglass with a finished underside that can be painted for a show quality appearance. Hood comes unfinished, should be test fitted, prepped, and painted prior to installation. Installs with OEM hinges, latch and hardware. Includes full instructions and additional hardware.

Note: Shipped truck freight.

Aftermarket Hoods

1987-93 Lift Off 5-1/2" Cowl Hood ⚠

Cervini's extended cowl hood will give your 1987-93 Mustang models a serious race look and create room for clearance under the hood. Features a 5-1/2" raised cowl with a screenless rear vent. This hood extends to the windshield and eliminates stock hinges and must be lifted off for access to the engine bay. Constructed of lightweight fiberglass, a white gel coat finish and an unfinished underside for weight savings. Hood is unfinished, should be test fitted, prepped, and painted prior to installation.

Important: Not recommended for street use. Must use hood pins.

Note: Shipped truck freight.

1999-04 Stalker 2 Hood ⚠

Cervini's 1999-04 Mustang Stalker 2 Hood is designed with form and function in mind. Not only does the Ram Air scoop add modern styling, it delivers fresh cool air to your engine compartment. Twin heat extractor vents remove excess heat for cooler engine temperatures and circulating cool airflow translates into more consistent power and performance. Manufactured from premium hand laid fiberglass with a fully finished underside. Hood comes unfinished, should be test fitted, prepped, and painted prior to installation. Installs with OEM hinges, latch, and hardware. Includes additional installation hardware.

1965-66 Shelby Style Hood Scoop ⚠

Make your stock hood look like a 1965-66 Shelby with a "bolt-on" or "bond-on" Shelby style GT 350 hood scoop. This hood scoop is a great replacement for your original Shelby GT350 hood scoop or as an upgrade for your 1964-66 Mustang. The mounting location is 2" from the rear edge of the hood. This fiberglass piece will require prepping, priming, and painting prior to installation. The "bolt-on" installation requires drilling 8 holes into the hood to mount to molded studs. The "bond-on" installation will require professional installation by bonding or riveting the scoop to the hood.

Note: All fiberglass parts require special preparation and fitting. Purchaser assumes all responsibility for correct installation.

Bond-On Type

16025 1965-66 bond-on type 76.99 ea

1965-66 GT350 Hood Scoop Stamped Steel ⚠

Add the authentic look of a Shelby GT350 hood scoop to any 1965-66 Mustang model with this new stamped steel GT350 style hood scoop. This perfectly contoured hood scoop design is an exact replica of the original GT350 hood scoop. Each stamping is made on new tooling that was created using a digital scan taken from an extremely rare 1966 GT350 all steel hood. The new scoop can be brazed, welded or bonded to an original or aftermarket steel hood with superior results compared to a fiberglass hood scoop. The precision stamped steel form requires less installation work and is easier to blend than a thicker fiberglass scoop. For a more custom appearance, the stamped steel scoops can also be riveted in place like those found on classic Shelby Cobras. Each scoop comes ready to prep and paint with a semi-gloss black finish.

Adjustable Hood Prop

High-quality aluminum and stainless steel, adjustable hood props offer great looks as well as functionality. When the hood is raised, the hood prop will automatically lock itself into position. A quick release allows the hood to be opened to its max for easy engine access. Choose from 3 position or 6 position. Each level of the 6 position prop increases the opening of the hood by approximately 6". Each level of the 3 level prop increases the opening of the hood by approximately 12". They also work great for cooling your engine in the staging lanes.

New!

Clinched Fender Flares

Add an aggressive, wide body look to your muscle car with clinched flares universal fender flare sets. These versatile flares can be installed on most makes and models with minor modifications. Flares are made from automotive grade, impact resistant 3mm ABS plastic for great looks and durability. Each set includes: 1 pair of flares, rubber gaskets, and type 3 installation hardware. Flares can be blended in with your fenders or left with open rivets. Available in a variety of styles and sizes to suit any virtually any build.

Note: Installs with rivets/bolts and will require drilling/cutting of the fender/quarter panels in order to install. Lowered suspension and wider wheels are suggested to achieve the right stance. Dimensions are approximate.

Classic Style

Classic style features "pointy" tips and work very well not just on the classics but also on the more modern cars where the owners are going for a more subtle look.

Part#	A	B	C	D	Price

1966 2-Speed Wiper Conversion ⚠

Raingear wiper system is a modern, high-quality replacement for the old system. It fits under the dash in the original location. The drive unit is about 1/3 the size of the original, allowing you much better access beneath the dash. This system does not reuse any of the original parts except the arms and blades, the wiper switch cup spacer, and the interior trim pieces. This Raingear unit cannot be controlled by the original wiper switch. You must use the included switch. Wiring diagrams and installation instructions included.

1964-70 Selecta-Speed Wiper System ⚠

Bring your Mustang into the 21st Century! Specifically designed for your 1964-70 models, the Selecta-Speed wiper system contains a low profile, 7-speed wiper motor (with five different delays, a low and a high speed), rotary switch, and a new wiring harness as well as a new wiper motor cover. These sets will also utilize your factory wiper knob and bezel. The wiper switch and wiring harness plug into a wiper control module located under the dash. Compact for a clean look on the firewall and additional clearance for your brake booster, valve covers, etc. The rotary wiper switch features a push button function for a windshield washer option. The wiring harness includes a weather pack connector/harness for an inline windshield washer pump.

Note: Washer pump set sold separately. Washer tank is not included.

--------	---------	-------	-----------

1994-04 Convertible Wind Deflector

Reduce wind and noise for front seat passengers with the Wind-Gard™ deflector. For use without tonneau cover. Installs easily in our convertible light bar, also removes quickly if desired. Made of clear, UV protected polycarbonate which has been treated for scratch resistance. Instructions and all mounting hardware included. Wind guards do not work with our styling sport bars.

96L169	1994-04	337.99 ea
--------	---------	-------	-----------

1994-04 Convertible Lamp Bar

High-quality fit and finish. Manufactured to fit the curves and lines of the vehicle. The high mounted LED light provides added safety with the highly visible taillight. The light bar is constructed of a sturdy 1-1/4" round steel tube, with a 1/8" wall thickness. The polyurethane mold is then wrapped in vinyl. The bar bolts to the B-pillar for a sturdy mount and also stiffens the body. Complete with mounting hardware, wiring and instructions. (Installation requires drilling).

Important: Like all light and styling bars, these bars are not intended for rollover protection.

Sailcloth Vinyl

01 white 02 saddle 09 black 10 parchment

1994-14 Mustang Economy 1 Piece Convertible Top with Rear Window ⚠

Quality 1 piece convertible tops offer a superb fit and durability in a 1 piece design for the best possible value in a replacement convertible top. Each top features a plastic rear window heat-sealed into place. The Sailcloth vinyl material is an upgrade for 1994-96 models, and the correct grain for the 1997-14 Mustang model.

Note: Please add the two digit color code when ordering.

Convertible Tops and Rear Windows ⚠

Quality replacement convertible top offers superior fit and durability. Top features "Sailcloth Grain" single texture vinyl fabric, which has the correct appearance and texture for 1995-1/2 and later models. Each top is sold without rear window which is sold separately.

Note: Although this top will fit 1994-04 models, Sailcloth Grain is correct for mid-year 1995 and later models. In the middle of the 1995 model year, Ford changed from Pinpoint Grain to Sailcloth Grain vinyl. Please add the two digit color code when ordering.

1964-66 Door Hinge Mounting Plates

Reproduction of the steel plates that mount to the A-pillar with the door hinges. It is common for bolts to seize and break off in the original plates. Each steel plate is drilled and tapped for 5/16" x 18 hardware and finished in black paint for corrosion protection. Sold as a pair. 1 pair required per door.

Note: The 1964 and early 1965 vehicles (1st design) used larger 3/8" x 16 bolts. These plates can be drilled and tapped for the 3/8" x 16 bolts if using original bolts is desired on early production cars. These plates can be used on early vehicles as long as you use the later bolts.

1967-68 Steel Upper & Lower Side Scoop

Upper and lower Shelby style quarter panel and roof line side scoops for 1967-68 Mustang models. These die-stamped steel scoops feature accurate contour details and built-in mounting studs just like the originals. The lower scoops will fit any body style while the uppers are for fastbacks only. Sold as a pair.

Note: *Upper scoops are for fastback models only.

1974-78 Shelby Style Side Scoops

Add the early Shelby look to your 1974-78 Mustang II/ Cobra II with a pair of quarter panel side scoops. These fiberglass scoops are designed to bond to the quarter panel indentions located on the driver and passenger side, giving you that classic muscle car look. Features a smooth gel coat finish which reduces the amount of time required to prep for paint. Sold as a pair. Paint to match. Made in USA.

Note: Gel coat finish will either be black or white.

New!

1971-73 Trunk Floor Pan

Reproduction trunk floor pan assembly for 1971-73 Ford Mustang Sports Roof models. This direct replacement panel is manufactured from thicker than OE sheet metal with the correct shape, size, bends, holes and ribs for these specific applications. The floor pan is one of the most common areas for rust on classic cars and if not repaired early the corrosion can spread to other areas of the vehicle. Arrives EDP coated to help protect against rust and corrosion.

Note: Shipped truck freight.

FAQ: What Exactly is Mass Backing?

As part of the manufacturing process, a special latex coating is thermo-bonded to the back of the carpet to substantially increase the insulating and sound deadening properties of the basic carpet set. Then 36 oz. jute padding is attached to the underside of the carpet.

423A42A	1971-73	86.99 ea

1999-04 Rear Honeycomb Panel

Give your 1999-04 Mustang more performance style with the Honeycomb trim panel. This component is sure to spice up your vehicle's rear end and catch a lot of attention! Includes the left, right and center honeycomb textured panels, all made from Ford OEM tooling to provide a superior fit and finish. The CDC Honeycomb trim panel requires the removal and reuse of your factory Ford Oval and "GT" emblems. All trim panels come standard with the appropriate cutouts, no modifications are necessary. The injected molded parts are applied between the taillights in approximately 30 minutes using 3M 2 way acrylic bonding tape.

Sheet Metal Tools

Blaircutter

When you don't have a lot of holes to make, Blaircutters provide fast, accurate holes in materials up to 3/16" thick. Blaircutters are annular cutting tools that cut around the edge of the hole and eject the center as a slug. Because they're hollow there's no dead zone as with twist drills. And unlike hole saws, that rip and tear through the material, they quickly give you a quality, virtually burr-free hole. Sold individually.

Note: D.O.C. = depth of cut. Arbors and Cutters sold separately.

Premium Spotweld Cutters

When you have a lot of spotwelds to remove, step up to the premium spotweld cutters for longer life in today's high strength body steels. These cutters have a heavier wall (.090") for extreme durability and two step geometry that splits the chips and helps clear them. Premium spotweld cutters have a fast cutting action and lasts for hundreds of spotwelds. They are for use in 3/8" or larger drill chucks. The spotweld cutters are available individually or in sets containing arbor, 3 cutters, your choice of 2 skip proof or 2 standard pilots.

Stick Lubricant

Ideal for all Blair hole cutters. Softer than standard stick lubricants, it provides superior adhesion to the tool and can be used in place of cutting fluids on ferrous and non-ferrous metals to increase tool life, improve cutting performance and easier slug removal.

11750 1.68 oz..... 12.99 ea

Double-End Spotweld Cutter

Double-end spotweld cutters makes removing body panels fast and easy. Their hollow design cuts around the spotweld so weld hardness does not affect tool sharpness. When one end becomes dull, simply unscrew the cutter and flip it over using the new teeth on the other end. An adjustable depth rod sets the tool so only the outer panel is cut, leaving the underlying panel undamaged.

Holcutter

Produce holes 3 times faster and cleaner than hole saws in sheet metal up to 1/8" thick and have dramatically extended tool life. Holcutters produce holes from 11/16" up to 3" diameter in sheet metal, rubber, gasket or fiber materials, and some plastics. Ideal for aftermarket installations, custom fabrication, trailers, or gauge installation. Arbor fits 3/8" drill chucks. Holcutters have a new, patented Quad-Lead Thread System for quick cutter changes. Buy the set and save! Holcutter set includes: arbor, hex washer, extra pilot and the following sizes of cutters, 7/8", 1-1/8", 1-1/4", 1-3/8", 1-3/4", 2", and 2-1/2".

Note: D.O.C. = depth of cut. Arbors and cutters sold separately.

Rotabroach Cutter Set

Rotabroach annular cutters are ideal for sheet metal fabrication, paintless dent removal and for cutting rustproofing access holes without clogging. Unlike hole saws and twist drills that push and tear through materials, these cutters will make hundreds of holes in steel, sheet metal or plastics up to 1/2" thick with no deforming of stock, jagged edges or out-of-round holes. Arbors for Rotabroach cutters fit 3/8" and 1/2" handheld drill chucks and use either spring loaded pilots or skip proof pilots which eliminate predrilling operations. Each set includes: arbor, Hex wrench, center punch, extra pilot, and a variety of cutters as listed.

Note: D.O.C. = depth of cut. Arbors and cutters sold separately.

Body Tools

The Filler Detective

New!
The Filler Detective will find hidden body damage and body filler on a car, truck, or motorcycle. It will tell you where body filler is and how deep it is. This simple 1 button tool lights up and sounds when it detects body filler and features a visual alert with bright, daylight visible LEDs. The meter doesn't miss and it indicates exactly where the body filler is and includes a test plate to confirm accuracy. Never again wonder whether or not a vehicle has been in a wreck! The Filler Detective solves the mystery every time.

EZ Rest Door Hanger

The EZ Rest door hanger enables a single person to quickly remove and/or install vehicle doors. The padded, removable side rails and plastic, ribbed base inserts allow for accurate positioning of the door. The easy on/off design quickly adapts to most floorjacks with a removable saddle and 30mm (1.18") diameter saddle hole.

Note: Floor jack is not included.

S21870 179.99 ea

Door Spring Tool

Compresses spring for easy safe removal. Slides safely over spring. Constructed of heat treated, high carbon steel.

S21900 25.99 ea

Door Hinge Adjuster Tool

You can now easily adjust the hinges without the aggravation of trying to align by eyesight with this handy tool. Specifically designed to help adjust the hinges so they help to align the door.

Y65800 52.99 ea

Door Hinge Pin Popper

The ultimate solution for removing door pins fast. Drives out even stubborn hinge pins. Works on most GM vehicles with removable hinge pins. Includes pin puller to remove loosened pins.

S21835 43.99 set

Door Bushing Tool

If you've ever tried removing a door hinge bushing with just a regular punch, you know it's a hassle. This tool makes it easy to punch out bushings and align bushings when reinstalling. Offset design allows for easy access to all door hinges.

S21825 20.99 ea

Door Aligning Bar

Finally, a convenient door aligning tool that will fit in your tool drawer! Features a Hex stub to use with a breaker bar and socket for additional leverage.

S21845 46.99 ea

Pro Paint Gauge

The Pro Gauge is a device which measures paint thickness. Factory paint is usually four to five mils in thickness. By using the Pro Gauge you can determine if the vehicle has been repainted. For instance, you can take measurements of about 4.5 mil around the vehicle but the hood may read seven mils on the Pro Gauge. That tells you the hood has been repainted.

PG2437 84.99 ea

Eliminator Rust Remover

Before touching up paint, you first must remove all rust, wax, and dirt or the rust will return and the paint won't adhere. This unique tool will scrub away all dirt, rust, and wax. The results are touch up paint adheres, seals and blends smoothly into the rest of the paint.

E3437 9.99 ea

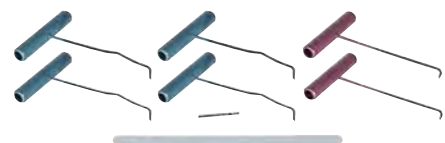

Spot Weld Chisel

Chisel tool to separate panels after the spot weld has been drilled out. Drive the blade with a hammer from the end or the side through the panel seam. Panels are separated without damage. The blade is sharpened on three sides, and offset for clearance.

Note: The sharpened edges will wear with use. Resharpener on a grinding wheel.

Y51900 15.99 ea

Body Dent Removal Tools

The pull rod set includes: 4 pull rods with formed shank, 2 pick pulls with straight shank, straight edge and HS split point drill bit.

S20000 pull rods..... 47.99 set

Cleco Sheet Metal Fastener Kit

Everything you need to secure sheet metal panels during the fit and alignment stage. The pliers can be used with all standard spring loaded fasteners and clamps. The kit contains: one pair of Cleco pliers, twenty-five 1/8" Kwik-Lok Clecos and four side grip fastener clamps. Also available are individual components so you can add to your kit as necessary.

Body Chemicals

BlackTop Top Coat

BlackTop is a permanent, moisture cured, UV stable coating primarily used for top coating surfaces previously sealed with RustSeal or any other paint/primer application. BlackTop is a high-performance protective coating specifically formulated to withstand dulling and fading caused by prolonged sunlight exposure. BlackTop may be used alone as a resilient coating but offers the ultimate rust protection when used in combination with the RustSeal corrosion barrier coating as step 1. For the best stop rust and ultraviolet protection, first apply RustSeal to permanently seal the surface and then top coat with BlackTop for an incredibly tough and professional looking finish. Like RustSeal, BlackTop dries to a rock hard yet flexible coating that can be readily applied to chassis, coil springs, and lightweight panels. BlackTop also has high heat resistance and can be applied to almost all automotive applications except exhaust systems. BlackTop is intended as a final finish for parts that have been coated with RustSeal. BlackTop will retain its color and sheen even after repeated or prolonged exposure to direct UV light and will not degrade.
