Radiators

1964-78 Aluminum Radiator

Keep your Mustang cool without spending a small fortune on a radiator! Each Champion high-performance aluminum radiator is specifically designed for each application and features a billet aluminum filler neck, 100% TIG welded construction, aluminum brackets, brazed core, aircraft grade 2mm thick fittings and tanks, 14-16 cooling fins per inch, and 3/8" spaced tubes. Radiators also includes a brass o-ring petcock and high-performance 16 pound radiator cap. Available in 2, 3, and 4 row applications with natural or high polished finish.

Note: *Both inlet/outlet in passenger side. All other inlet in passenger, outlet in driver side. Dimensions listed are for radiator core only (H x W).

1964-70 Maxcore Aluminum Radiator

ACP utilizes the perfect blend of premium aluminum grades to form an OE look while maintaining excellent high pressure strength and corrosion resistance. Fully TIG welded with a billet filler neck for continuous durability. Keep your Classic Mustang looking classic. Inspired by OE radiators Ford had manufactured, ACP has designed a product that captures the original appearance while improving performance. Along with OE styling comes a direct fit for easy installation. ACP Radiators are made specifically for the Mustang stated in each application listing. No universal fitments.

Note: Dimensions listed are for radiator core only (W x H x D).

Radiators

1964-78 Aluminum Radiator

Improve your cooling capacity of your Mustang with Cold-Case performance radiators for 1964-78 models. Radiators feature an all-aluminum construction that efficiently dissipates heat, with 2 oversized cooling rows, and polished original style stamped tanks. All Cold-Case radiators are 100% TIG welded, pressure tested, and includes OE style fittings for both automatic and manual applications. All radiators manufactured by Cold Case are guaranteed to be free from material and workmanship defects for the life of your installation.

1979-04 Aluminum Radiator

Improve the cooling capacity of your engine with Cold-Case performance radiators for 1979-04 Mustang models. Feature an all aluminum construction that is good at dissipating heat and saving energy, with 2 oversized cooling rows, and polished original style stamped tanks. All Cold-Case radiators are 100% TIG welded, pressure tested, and includes OE style fittings for both automatic and manual applications.

1979-04 Aluminum Radiator

Finally, an affordable all aluminum performance radiator designed specifically for 1979-04 Mustang models! Features include: billet fill neck, 100% TIG welded construction, aluminum brackets, brazed core, aircraft grade 2mm thick fittings and tanks, 14-16 fins per inch, and 3/8" spaced tubes. O-ring brass petcock and high-performance 16 pound radiator cap included. We offer 3 and 4 row applications for most 1979-04 4, 6, and 8 cylinder Mustangs and most sizes are available in natural aluminum or highly polished finishes.

PROFORM

Universal Slim-Fit Radiator System

PROFORM has completely rethought how the radiator, fan, thermostat, and shroud can come together seamlessly to create a unified radiator system that is under 4" thick, looks and works great, and is pre-assembled right out-of-the-box, ready for a custom fit into your muscle car or sport truck. With revolutionary engineering we flipped the motor around so instead of hanging on the outside, it's integrated directly into a uniquely designed core made with state-of-the-art brazing technology (with no meaningful cooling compromise). The core itself is a hybrid combination of traditional dual 1" tubes, and full core width extruded tubes. Combine this with a high-performance fan blade inserted into a smooth aluminum shroud, the result is the industry's thinnest, most streamlined look. Every PROFORM Slim-Fit Radiator includes a shroud, electric fan with adjustable thermostat, wiring harness, and radiator cap.

Radiator Components

1964-70 Aluminium Radiator Filler Panel

Dress-up your 1964-70 Mustang engine bay with these custom aluminium upper radiator filler panels! These durable show panels direct the air that normally escapes over the core support straight into the radiator to improve cooling. Features precut holes for the hood latch. Offered in your choice of black anodized, clear anodized, or polished finishes.

Important: If your horns are still mounted on the core support, they will need to be relocated to a point below the top of your grill.

"Liquid Chill" Engine Coolant and Additive

Mishimoto's Liquid Chill is a universal, synthetic coolant that will provide premium cooling and protection for your vehicle. Liquid Chill protects from boil over to 265 degrees F and from freezing down to -26 degrees F, inhibits corrosion, and reduces operating temps. Made with propylene glycol base and unique poly organic additives to allow for extended life of 2+ years or 250,000 miles before needing service in gasoline applications. One gallon jugs are available in full strength formula or 50/50 blend. For up to 30 degrees F cooler over just coolant alone, the universal Liquid Chill additive is available in 4 oz. bottles.

Super Coolant

 ROYAL PURPLE
SYNTHETIC OIL

Purple Ice is a high-performance, synthetic, radiator coolant additive. It reduces engine heat by reducing the surface tension of the radiator fluids for improved heat transfer. Purple Ice fosters optimum coolant flow by helping to prevent formation of scale deposits in the radiator. Purple Ice is recommended for any water/glycol pressurized cooling system, including those using the traditional green silicate based glycols or the newer OAT or HOAT based glycols.

HP Racer's Tape

Heatshield HP Racer's Tape is a self-emulsifying silicone tape that provides rugged heat protection for up to 450 degrees Fahrenheit. This tape can even be used to temporarily fix holes in radiator hoses, lines, etc. for a quick roadside or pit repair. Using the guide line to wrap, the tape will stick to itself forming a bond that can only be cut with a knife. The race tape does not harden; it remains flexible but will not unravel. Sold in 1 inch wide rolls.

Fan Clutch Fan

This standard rotation fan clutch fan is designed to replace the factory fan, features an 8 hole dual bolt pattern center hub that fits most fan clutches. Manufactured from sturdy steel hubs and fan blades, it produces maximum airflow and is rated up to 8000 RPM. Available in a durable, attractive black powder coated finish.

Stainless Steel Flex Fan

Flex-a-lite fan blades are designed to flex or flatten out as the RPM's climb, helping to reduce engine drag for better performance and improved fuel economy. Fan features a premium, high tech silver coating that won't degrade or lose its luster in the harsh environment of an engine compartment. Available in standard or reverse rotation along with four different diameters and six or seven blades.

Important: Must be used with a Flex-a-lite spacer or warranty will be voided. Fans features 5/8" pilot hole with a 1-3/4" to 2-1/2" slotted bolt pattern.

Brushless Electric Fan Powerpacks

Derale brushless powerpacks provide the best Performance when it comes to cooling performance for your engine. Derale's NEW, high performing brushless fans with integrated fan controller, combined with their high performing shrouds is a combination that just can't be beat. These units feature a fully welded aluminum shroud measuring only 2-13/16" in depth and combined with the installed electric fan, the overall thickness is only 3-1/2". The dual 12", brushless electric fans are some of the most proven and reliable fans in our line-up and are specifically designed to thrive on thick, tight fin radiator cores. Offering a total of 4400 CFM. Don't forget they also have the built-in PWM fan controller with soft start technology. The controller utilizes Pulse Width Modulation to constantly adjust electric fan speeds from 0-100% to maintain temperature. This allows electric fans to operate at the percentage needed, instead of 100% all the time. This results in extra longevity, increasing component life and eliminating amperage spikes.

Electric Dual Fan & Shroud Powerpack

This Derale dual high output RAD fan powerpack assembly is part of the HO Aluminum Shrouded Fan Series that is designed with the application in mind. Based on some of the most common radiator core sizes sold today, this unit features an aluminum shroud and is only 4" in overall depth to offer an adjustable yet precision fit. The natural, non-finished aluminum shroud gives the user the freedom to polish, anodize, paint, or simply leave it raw to create a truly custom look for an affordable price. The dual 12" high output electric fans are some of the most proven and reliable fans in our line-up. Offering a total of 4000 cfm, this dual electric fan assembly generates the most real-world airflow in the smallest package on the market. Now add the digital PWM fan controller with built-in soft start technology. The controller utilizes Pulse Width Modulation to constantly adjust electric fan speeds from 0-100%, maintaining the optimal engine operating temperature.

12" Electric Engine Cooling Fan Kit

Thermostatically controlled, it only operates when forced airflow is required (such as when idling, during stop and go traffic, pulling a load, driving up a grade, etc.). Can be mounted either in front or in back of the radiator. Kit includes: one 12" fan, thermostat fan control, and all mounting hardware (nothing else to buy).

Note: Requires 5-1/4" clearance between radiator and water pump shaft (or belt driven fan). For extreme use, add a second fan (fan control will operate up to 2 electric fans).

Flex-a-lite

Black Magic S-Blade

If your vehicle is still running the factory engine driven fan, you're losing vital horsepower and not even getting the full cooling effect you should! By replacing your engine driven fan with an efficient electric unit, you can reduce unneeded drag on your engine to free up horsepower and improve your fuel economy. An engine driven fan can cost up to 17 HP to operate! This universal fit Flex-a-lite electric fan features computer engineered blades that are extremely quiet and efficient, and moves 3000 cfm of air to provide consistent cooling, regardless of engine RPM. Ring fans like this provide better blade support for impact resistance. This electric fan fits vehicles with 16" or wider radiator cores, and requires a mounting surface of 18" x 16" x 4-1/4" for an easy, bolt-in installation. Universal mounting brackets are included.

Improves Horsepower, Extends Water Pump Life and Cools Faster! ⚠

Used as a primary fan, this unit frees up wasted horsepower and increases fuel mileage by eliminating drag caused by your standard engine mounted fan. Also increases water pump life by reducing strain on the water pump bearing assembly. When mounted in front of the radiator and used as an auxiliary fan in addition to your stock belt driven fan, this electric fan provides better cooling in any engine prone to overheating.

Cooling Fan Components

16" Fan Mounting Gasket

SPAL fan gasket is a specifically designed rubber gasket for use exclusively with the 16" fan line. The gasket provides an additional 1/4" clearance from the cooler core and is ideal for mounting our pusher style fans.

Note: Will not fit SP2056 and SP2057.

SP2070 16" 16.99 ea

Cooling System Zinc Anode

Used in heavy-duty and marine applications to protect the cooling systems and its many components from damage due to electrolysis or coolant additive failure/breakdown. The introduction of the zinc anode will protect your cooling system from galvanic action as it "eats" the zinc rather than your cooling system. To be installed in the radiator as a replacement for the drain petcock in radiators that are equipped with a 1/4" NPT hole or any 1/4" NPT hole that is available in the cooling system.

FL32060 21.99 ea

Fan Temperature Sending Unit

The temperature sending unit screws into the side of the cylinder head or on the intake manifold to operate the Champion or Challenger Series fans.

Universal Electric Fan Relay Wiring Kit ⚠

Lock down superior cooling and eliminate bothersome noise and vibration with a Champion Cooling electric fan relay kit. Featuring heavy-duty, 1 piece construction with a permanent magnet motor and computer balanced, reversible swept blades, this top-of-the-line kit enables you to run your fan as a puller or pusher. 1-year warranty.

CCFKRL with thermostatic switch 89.99 ea

Electric Fan Relay Wiring Kit ⚠

Cold Case electric fan wiring kit for single or dual electric cooling fans. Includes thermostatic switch that turns on the fan(s) at 190 degrees F and turns them off at 170 degrees F. Operates single or dual fan setups. Includes: 12' wiring, thermostatic switch, weather resistant relay, and fan pigtail connectors.

CC46179 with thermostatic switch 96.99 ea

Single Fan Pigtail Connector ⚠

Single male fan pigtail connector for Northern or SPAL single fans. Required when not using Northern relay harness.

Note: This same pigtail is included on Northern relay harnesses. Use part #40080 for Northern relay harness.

Z40079 pigtail connector 9.99 ea

PCM Controlled Fan Relay Set ⚠

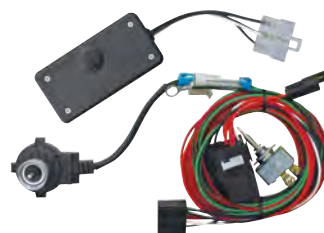

This PCM controlled, weatherproof fan relay set is inexpensive protection for an electric fan and a vehicle's wire harness. Relay activation by grounding the relay coil can be provided by most Powertrain Control Modules. Provides direct battery power, protects PCM from voltage spikes and prevents the fan from back feeding through the vehicle's wire harness.

30133 weatherproof 35 amp 44.99 set

Delayed Cooling System Shutdown ⚠

Timed cooling system shutdown features adjustable relays that keep power to the cooling fan and electric water pump (if equipped) when the key is shut off. This reduces the block temperature as much as possible without the risk of killing the battery. This is a timed circuit and does not use a thermostat or other fan control to operate.

TF900632 shutdown 172.99 ea

Cooling Fan Shutdown ⚠

This cooling fan shutdown set shuts down your electric cooling fan above 50-60 MPH to improve engine cooling by preventing the electric fan from fighting airflow through the radiator at highway speeds. The unit is adjustable and may be overridden by using the supplied dash mounted toggle switch. This set is designed to be used with the supplied signal generator which must be installed into the speedometer cable.

TF900627 shutdown 214.99 set

Thermo Switch — Screw-In ⚠

Wire your dual electric fan/shroud assembly the easy way with this dual shroud wiring harness with relay and sender specifically designed dual electric fan setups. This wiring harness and relay kit will protect your vehicle's electrical system from the added draw of dual electric fans and proper gauge wiring ensures a stable electrical connection. The temperature switch activates "on" at 185 degrees F and shuts off when the temperature drops to 165 degrees F.

Intellitronix
Variable Speed

Variable Speed Fan Controller

Turns your electric fan on and off at your desired temperature. The control is right where it belongs, in your hands. Fans turn on at 60 percent power and fan speed increases as the temperature rises. You can easily adjust the activation temperature between approximately 160-240 degrees F. The fan controller includes a 1/8" NPT thread-in temperature sensor with bushing adapter. It features variable fan speed and a 40 amp rating. It works on 12 Volt systems only.

FN4001 with temp sending unit 153.99 ea

Electric Fan Controller

New!

Performance Designed

Includes a 70 amp relay and will work with your existing water temperature gauge, operating from the temperature sending unit already installed. A dedicated sending unit can be installed for applications without a water temperature gauge. Operating range of 150-250 degrees F and features fully programmable "fan on" and "fan off" temperature functions to suit any application. This also gives you the capability to leave the electric fan operating after the engine has been shut down for a user adjustable period of time. High-quality LED readout displays current temperature readings.

Important: Must use second relay, either part #DD2701 30 amp relay or DD2702 70 amp relay for dual fan or 2-speed fan operation.

Adjustable Electric Fan Controller

This Derales high amperage fan controller breaks new ground in the industry of electric fan controllers. A bulletproof design, 35 amp per fan amperage rating, adjustability from 150-240 degrees F, and a die-cast bright finish aluminum cover. It's capable of controlling two separate 35 amp fans at different turn-on temperatures, with only a single probe. The first electric fan will be activated at the temperature set by the user followed by the second electric fan when the temperature becomes 10 degrees F warmer. Each electric fan will turn off at 10 degrees F below its turn-on temperature. Includes: wiring harness, fusible link, all necessary electrical connectors, and push-in style radiator probe.

USA

1965-93 Ford Small Block Victor Series Water Pump

Designed, cast, and machined out of A356 aluminum at Edelbrock's manufacturing facility in the USA. These water pumps provide maximum cooling for the street and race track. Using state-of-the-art racing technology, they are designed to provide maximum flow, pressure, and equal distribution to the block. Water pumps only flow one direction (unless noted) for optimum efficiency. Features heavy-duty ball/roller bearing, seals, precision impeller and hub machined from billet steel. Available in several finishes.

1986-95 V8 Racing Thermostat

Mishimoto's racing thermostat will promote greater cooling efficiency for your 1986-95 V8 Mustang, especially in modified or turbo applications. This thermostat will open at 154 degrees, instead of the stock 190 degrees, to allow coolant into the engine block sooner which will reduce and maintain lower engine temperatures resulting in more power.

MM13058 1986-95 154 degrees 59.99 ea

1986-02 Low Temp Thermostat

Reduced engine temperatures add life to your engine and provide a denser air/fuel mixture which helps produce more horsepower. The factory 195 degree thermostat simply cycles open and closed, this reduces cooling efficiency in any engine. With the JET 180 degree thermostat you get consistent engine cooling and a precise metering of water throughout the engine. Constructed of stainless steel.

JT10170 1986-02 all V8..... 15.99 ea

Universal High Performance Thermostat

Edelbrock thermostats are designed to ensure consistent cooling in high-performance applications. Features a brass and copper valve assembly with a stainless steel body for durability. These 160 and 180 degrees F thermostats are a bolt-on replacement that measure 2.087" and 2-1/8" diameter.

E8603 160 degrees..... 21.99 ea

E8604 180 degrees..... 21.99 ea

High-Performance Thermostat

These high-performance thermostats are designed to resist variations in coolant pressure, opening and closing only at the correct temperatures, regardless of engine RPM. Thermostats are made from brass and copper with a high grade steel frame for years of worry free operation.

Note: Fits all except pre-1967, 390-428.

43631 160 degree thermostat..... 24.99 ea

43641 180 degree thermostat..... 24.99 ea

1969-73 Thermostat Gasket

This direct fit replacement gasket is constructed of a cellulose/nitrile composition to be both durable and long-lasting in your harsh underhood environment.

Boss 429, 351C, 351CJ, Boss 351, 429CJ

8255D 1969-73..... 3.99 ea

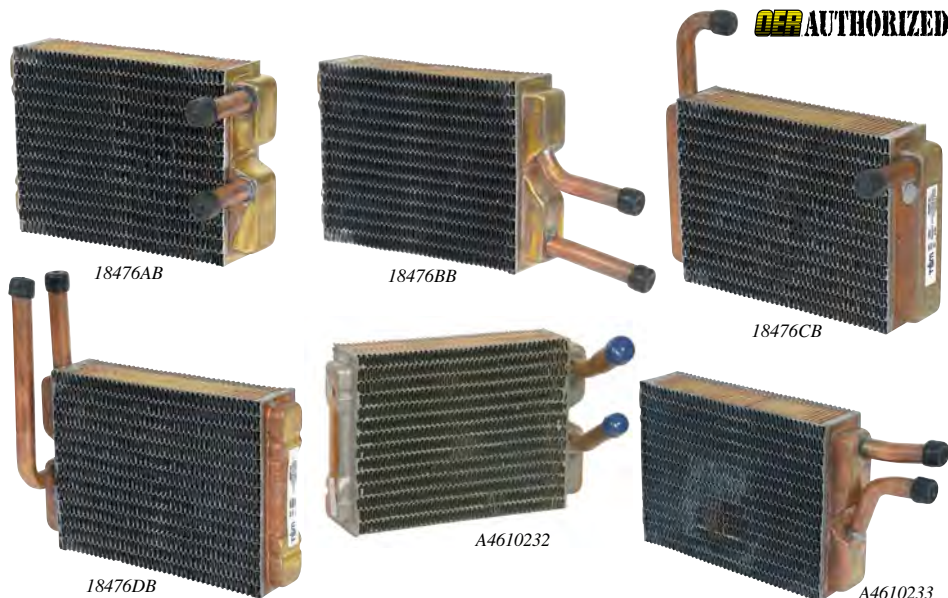

Water Outlet Restrictors

These restrictors come in a set of 3 with a 5/8", 3/4", and 1" hole to allow adjustment for optimum cooling. Each 2-1/8" plate is made from anodized aluminum and fits under the water outlet in place of the thermostat.

263440 restrictor plates 16.99 set

Heater Components

1964-78 Copper/Brass Heater Core

Exceptional quality copper/brass replacement heater core, manufactured as original. All new construction, not rebuilt. Copper is heavier, more durable, and transfers heat better than other inferior materials.

1964-70 Sure Fit Climate Control Set for Serpentine Drive

This Sure Fit Gen 5 Climate Control set includes everything you need, and nothing you don't! It was designed specifically for those who have upgraded their motor with a serpentine belt drive system and do not need a compressor and mounting brackets. You still get the same evaporator assembly, fly-by-wire controls, condenser, dryer, safety switch, firewall plate, and preformed aluminum lines as in the complete set. These sets are designed to install with minimal drilling and no fabrication required. Be sure to order the adapter kit required for your compressor.

Important: Refrigerant is not included.

Note: Special order.

- All Fittings, Hoses, and Tubes (Suction, Discharge, and Liquid)

1964-70 Under Dash AC System

Classic Auto Air Daily Driver under dash air conditioning system for 1964-70 Mustang models. This system is designed for originality with a four vent evaporator unit that resembles the factory hang down AC units. The evaporator unit features an extra large coil that provides excellent air volume and temp. Much like the factory system, it operates independently of the heat and defrost systems, making it much simpler install.

Note: Some engine configurations may require additional pulleys.
