YellowTop Battery

With premium cranking power, low internal resistance, and unparalleled cycling capability (rechargeability), the YellowTop AGM battery is a true dual purpose automotive battery. It handles deep power drains and recharges to full capacity so it can power plenty of electronics and still start the engine time after time. Perfect for vehicles with multiple electronic systems or high demand audio.

Aluminum Relocation Battery Box Set

Taylor's aluminum relocation battery box is constructed from .040" thick aluminum and features a removable top to allow easy access to the battery. Battery mounts to the frame of the box with the supplied 3/8" bolts and includes a heavy-duty 1 piece battery hold down along with mounting hardware. Measures: 13-1/2" x 9-1/2" x 10".

Note: Complies with NHRA rule 8:1 for installations where there is no firewall between the driver and the battery.

TP48100 aluminum..... 154.99 set

Sealed Battery Box Set

Moroso black polyethylene sealed battery box. The external venting makes it ideal for relocating a battery to the rear of any race, street, or off-road vehicle with or without a rear firewall. It features closed cell foam gasket lid to prevent battery gasses from escaping into the vehicle, and includes 3/8" hold down rods, mounting hardware, vent tube and grommets. Fully approved for racing by NHRA, IHRA, and SCCA. Holds a Series 21, 24, 26, 34, 42, 54, 55, 56, 61, 62, 63, 85, 86, 96R battery with either top post or side post terminals.

Battery Cables

14302A

14302A - detail

1964-67 Reproduction Battery Cable Set

Includes: battery to relay, battery to ground, and relay to starter cables. Features original coloring, boots, and markings. All cables are marked with line printing as originally done, correct font, and lettering styles are used. The cables are identical to what would have been on your vehicle when it was delivered to the dealer. Cables are made right from the original factory blueprints, where appropriate, brass or lead heads are used. The insulating material used is the correct SAE spec non-flammable material.

Note: Do not clean cables with Armor-All or other products that contain solvent. We recommend cleaning by using very diluted soapy water solution on a damp cloth with very light pressure.

Lava and Stealth Battery Heat Shields

Battery heat shields can improve the performance and increase the life of your car battery. Excessive under hood temperatures are not uncommon in today's automobile landscape, as high-performance engines with power adders are generating more heat than ever. This extra heat can tax your battery's capabilities and push it to premature failure. Using the Lava or Stealth Battery Shield will reduce this heat, and increase the longevity of your battery, as well as ensuring your battery is performing at peak levels. These car battery shields work on all types of batteries, from lead, gel, AGM, and lithium. Have the peace of mind knowing you won't be stranded by a weak performing battery.

1965-70 Chassis Wiring Harness

Painless Performance chassis wiring harness for 1965-70 Mustang models. This 22 circuit direct fit harness is ready-to-install right out of the box with many of the factory connector pre-installed. This harness uses our unique covered micro-fuse block. It features a modern micro-fuse block with an auxiliary circuit with 20 amp relay for accessories such as fog lights, or an electric fuel pump. Each wire is custom printed with the circuit identification as well as using Ford color codes for easy installation. Set is intended for vehicles without EFI or electronically controlled transmissions.

Important: Will not fit 1964 Mustang models.

60510

1986-95 Engine Wiring Harness

Painless Performance EFI engine harness for the 1986-95 Ford 5.0 HO engines with mass air. Included with this harness is an 8 circuit modular fuse block and Ford color coded wires with labels for easy installation. The standard length harness allows 4 feet from the back of the intake manifold to where the fuse block and ECM mount, the extra length set allows 8 feet. Only compatible with 1989-93 MAF and Distributor, 1986-88 Mustang models must convert to MAF. 1994-95 Mustang models have to modify TPS wiring and change distributor. Harnesses do not include all the original connections for the original emissions.

Universal Wiring Harnesses

RON FRANCIS
Wiring

Features:

- For V8 or 6 cylinder engines
- Ford alternators (ext. regulator)
- Adds turn signals and third brake light
- Factory or aftermarket columns
- Accepts electronic fuel Injection or carbs (EFI separate harness)
- Includes firewall connector cover
- Electronic, Dura Spark, or points distributors
- New headlight switch included
- Freedom of panel installation locations
- Back-up light wiring included for upgraded Mustang models

detail

1964-73 Mustang Wiring System

Upgrade your vehicles wiring with Ron Francis Ford Series EXPRESS wiring system for 1964-73 Mustang models. The EXPRESS is a small fuse panel. Includes all of the wiring needed to pass most state inspections, fire the engine, gauges, third brake lights, room for air conditioning, power windows, and power locks. Stereo radio memory for digital systems and all the toys you might want to add.

Note: If you are using the factory Ford alternator, you will need part #VR88 voltage regulator. Not compatible for one wire or newer alternator models.

14400A

1964-70 Mustang "Classic Update" Complete Wiring Harness Set

Includes all new ATO style fuse box, new OEM style switches for headlamps and ignition with original style switch connectors used throughout. This complete wire harness set replaces all the main wiring looms in your Mustang, including the under dash loom, engine gauge feed loom, and front and rear lighting looms. Plenty of room for most aftermarket accessories.

1994-02 Fuel Injection Engine Swap Wiring Harness Set

For maximum power with exceptional driveability nothing beats electronic fuel injection. And the easiest way to install a modern fuel injected engine is with one of these proven FI engine wiring harnesses. These harness sets are designed to allow you to properly wire your engine swap from a donor car or crate motor. A variety of harnesses are available to suit 1994-up LT1, LS1 and GM crate engine applications. Each of these sets include detailed instructions and illustrations.

Painless Wiring

The engineers at Painless have worked out all of the connection and routing problems so all you have to do is follow the straight forward instructions for a painless installation. Feature TXL high temp wire that is color coded and labeled with each application for ease of installation. Harnesses for the LS1 applications require 1998 Camaro computer G8606 and a mechanical throttle body.

Important: *Includes a module to bypass the vehicle anti theft system (VATS) incorporated in the computer. Does not include any emissions related connections.

Trunk Mount Chassis Harness

In many street rods and custom cars there is little or no room to mount the fuse block under the dash, forcing modifications to either the car or the harness. Our 12 circuit trunk mount wiring harness provides additional wire from the fuse block to the dash and from the fuse block to the front end, allowing the remote installation of the fuse block in the trunk or behind the rear seat. Like all Painless kits, these fuse blocks come completely pre-wired and terminated for a simple, painless installation. Includes GM column mounted ignition and turn signal plugs.

Modular Fuse Panel Systems

Each universal fuse panel is constructed in heat resistant nylon and features anti-push back locks and single side wire access with self-locking, screw down connections. Includes a starter/alternator 175 amp mega fuse for extra protection. The panel is fed through an 8 gauge power feed wire and features a battery and accessory stud connection. Includes: color coded wiring for ignition, alternator, headlight, steering column, accessories and gauges, relays, fuses, flashers, circuit breakers, and all necessary power connections and terminals. Also includes a full color schematic and step-by-step instructions.

15 Circuit Harness Includes:

- Composite Panel Base
- Nylon Panel Components
- Color Coded Wire
- Easy-to-Read Wire Labeling
- Self-Locking Screw Clamp Interface
- 8 Gauge Alternator Feed
- 175 Amp MegaFuse
- Full Color, Step-by-Step Instructions

Highway 15 Modular Fuse Panel System

Features 15 power outputs in 8 fuses and 1 circuit breaker. Gauge cluster disconnect for easy maintenance. Includes: ignition, headlight, and dimmer switches.

Remote Battery Disconnect

With this setup, one click of the key fob completely shuts down your vehicle's entire electrical system. It's accomplished by routing your main battery cable through a remote cutoff solenoid that you've stashed in a place inaccessible to a thief. For even more security, the 4 channel "Safe-n-Sound" system not only shuts off all power from the battery, but will also control 3 other items, like closing the windows, triggering the power door locks, and interrupting electrical power to the fuel pump, all separate from the main battery cutoff. The 4 channel package can handle up to 30 amps worth of electrical equipment.

Universal Shaved Door Handle Set

Building a custom vehicle means you're looking for unique ways to separate your vehicle from the rest. This shaved door handle set will give your vehicle the ultimate smooth look to do just that!

Important: Door handle block off plates not included.

SDH100 without emergency entry..... 195.99 set

New!

GSE2100A

MADE IN USA

Electronic Exterior Door Handles

Elevate your vehicle's style with these electronic exterior door handles from Lokar! Each billet door handle utilizes a weatherproof 12 Volt pressure pad switch to supply power to an electronically actuated door latch (door popper). Its 2 piece design and available 0 degree or 10 degree mounting surface allows the insert to be removed, and door handle positioned for ultimate customization. The XL design provides 7/8" of clearance between the door and the switch, allowing for easier mounting and less modifications to the door. Made in the USA from 6061-T6 billet aluminum.

Important: This requires electronic door latch actuators, which are not included.

Note: *Installation requires hand pocket for clearance.

Power Window Reversing Relay ⚠

Each kit is equipped with 40 amp relays and is designed to supply the reversing power needed to operate power windows, convertible tops, seats, antennas, or any other motor-controlled accessory that requires the ability to reverse polarity. This power window relay kit will work with both high amperage and low amperage control switches, and matching color coding of the relays and their corresponding wires make installation a breeze. Long 120" wire leads allow the panel to be mounted in even the most remote locations inside the vehicle.

Semi-Rigid Wrappable Split Braided Tube

Clean up and protect any wiring harness with this black braided wire wrap. The semi-rigid tube opens along a lateral split to accommodate a variety of harness configurations, then simply closes without any need for fasteners. A 25% overlap ensures complete coverage. Retains shape and rigidity from -94 degrees to 257 degrees F. For 18-14 gauge wire.

Express Sleeve

Express sleeving is a combination of a high temperature insulation material and a highly reflective Mylar foil

with a Velcro closure. The sleeving is designed to simply and effectively protect wire, hoses, and cables from harmful effects of radiant heat. Just pull apart the Velcro, wrap around the wire, and re-close the sleeve. Express Sleeves reflect over 90% of radiant heat bursts up to 2000 degrees F, and can easily withstand direct temperatures up to 750 degrees F.

X-Treme Tape

X-Treme Tape was developed for the military and has some very unusual properties. The silicone based tape will stick only to itself, and only when placed under tension. Once wrapped around an object, it forms a non-conductive, air and watertight, insulating seal that remains flexible within a temperature range of -60 degrees to 500 degrees F. Insulates to 8000 Volts. Stretches to 3X's its length. Conforms to irregular shapes. When wrapped upon itself, it bonds together immediately and becomes completely fused after 24 hours at room temperature.
