Get The OER® Advantage. . . It's Almost Unfair!

Authentic Quality Reproduction Parts for Classic American Muscle

ORIGINAL QUALITY • ORIGINAL APPEARANCE

Original Fit

Appearance is extremely important in reproduction parts, but just as important is the way the part fits. You will appreciate OER® reproductions. Parts are designed to fit as closely to the original as possible. Each part is checked and rechecked to ensure proper fit and function.

Superior Quality

It's one thing to manufacture a reproduction part, it's another to duplicate the quality. OER® uses the finest quality materials and workmanship to ensure the finished part meets or exceeds original equipment specifications. In fact, many OER® products are superior to the original.

Authentic Appearance

Each OER® part is manufactured to original specifications, down to the smallest detail. Consistent quality control methods ensure an exact duplicate every time.

OER® Officially Licensed Products

Many OER® products are officially licensed by the original manufacturers, assuring the highest quality reproductions available.

OER ORIGINAL® EQUIPMENT REPRODUCTION

Manufacturing Authentic Products for The Restoration Industry

Learn more about OER online: **www.oerparts.com**

Look for the OER® symbol of quality throughout this catalog.

Classic Industries® Has More To Offer!

Service Excellence From the Restoration Leaders!

Price Match Guarantee

If You Find a Product for Less, We'll Match the Price!

Classic Industries® will match any competitor's current advertised retail price for an identical product. Simply send us a copy of the competitor's current advertised price from a catalog, advertisement or website (with URL) and we'll match the price. The price match guarantee is available at the time the order is placed and for in-stock merchandise only. Price matching will be determined by a competitor's most current retail published price and is limited to competitors within the Restoration Industry.

Money Back Guarantee

100% Satisfaction or Your Money Back!

We take pride in the quality of the products we offer and back it up with a 100% Money Back Guarantee. If for any reason you are not satisfied with a product or purchase, you can return the product within 30 days of receipt for a full refund, credit or exchange.

Online Instructional Videos

Visit ClassicIndustries.tv to View Our Online Video Library

Need a little guidance to help you install the restoration parts you purchased? Then cruise over to Classic Industries®' new video media website, www.classicindustries.tv where you can watch a library of how-to videos created by our own expert staff, guiding you through the installation processes for upholstery, headliners and more.

Technical Support

Call 1-800-854-1280, extension 5390 for more information

Our tech representatives are ready to help you with all your restoration questions regarding parts or accessories, but we don't stop there, we can help answer questions you may have concerning the detailed areas of your restoration! Our tech representatives consist of some of the most knowledgeable restoration experts in the business. We don't claim to have all the answers but we've been doing it longer than anyone. Chances are we've heard the questions you need answered before. If nothing else, we can probably steer you in the right direction. We continually train our staff in all aspects of early and late model restoration and pass the information along to you!

California Residents — Prop 65

Prop 65 requires businesses that manufacture and/or sell products in the State of California to inform consumers which items contain chemicals known to cause cancer and/or reproductive harm.

Symbols of Quality

OER® Original Equipment Reproduction

The leader in quality reproductions is here! OER® stands for Original Equipment Reproduction®. When you see the OER® logo, you can be assured that every part is manufactured to exact factory specifications and will fit and function just like the original part. What's more, many OER® products are officially licensed and carry a full one year warranty against defects and workmanship.

OER® Authorized Products

The OER® Authorized logo represents products that meet or exceed stringent OER® quality control standards. These items have been sanctioned and approved by OER®. Most of these products are prepackaged with the OER® Authorized logo.

OER® Premier

Count on the OER® Premier logo to denote parts that are outstanding in fit, craftsmanship, and manufacturing techniques. Each and every product displaying the Premier symbol is the best the market has to offer, and a cut above the competition. Order with confidence when you see this symbol, as OER® Premier is the true sign of originality and quality.

Classic Industries® The Restorer's Choice™

Count on the Classic Industries® Restorer's Choice™ symbol whenever purchasing reproduction parts and accessories. You can be sure that each and every product displaying this symbol is manufactured correctly to exact specifications and fits the way the factory intended. This Classic Industries® symbol is your assurance of quality.

Made in USA

Classic Industries is proud to offer American products for your American classic. Wherever you see this MADE IN USA symbol, you know you're receiving the highest quality parts, sourced from the skilled craftsmen of the United States of America.

PRODUCT EMISSIONS GUIDE

Please visit help.classicindustries.com/en/emissions-compliance-guide for more details.

1 **CARB EO Compliant (50 States) – This product is covered under a CARB EO and is legal for sale and use in all 50 states.**

Products that have completed the CARB EO process belong in this category. EPA recognizes the CARB EO as a reasonable basis demonstration, therefore products can be considered legal by both CARB and EPA.

2 **Legal In U.S. (Excludes California) – This product is covered under the Emissions certification or has otherwise met the requirements of the EPA's Tampering Policy and is legal for sale in states that do not mandate Executive Order (EO).**

Products that have demonstrated a reasonable-basis emissions compliance either through engineering evaluation or testing, but do NOT have a CARB EO. For example: Testing has been completed and paperwork submitted to CARB but the EO has not yet been issued. The product meets the reasonable basis standard but may not meet CARB's criteria for an EO. Testing has been performed but decided not pursue a CARB EO.

3 **Non-CARB Compliant – This product is not legal for street use on an emissions-controlled vehicle. It may be used on a dedicated competition or pre-pollution-controlled vehicles only.**

Some products can never be legal for use on pollution-controlled vehicles (both for use on the road and off-road), but they do have legitimate use on racing vehicles and vehicles that predate emissions regulations. Pre-certification means: 1965 and older domestic vehicles in California, 1968 imports in California and both domestic and imports under EPA jurisdiction.

4 **Non-Emissions – This product does not require an EO in California. By nature of its design, it is legal for sale and use in all 50 states. Replacement parts included.**

Products that have little or no impact on emissions, such as drop-in air filters or exhaust components downstream of the last emissions component (such as the catalytic converter, DPF, or exhaust gas sensors). Also included are devices that plug into the OBD port to monitor information, but do not alter the vehicle's electronics.

OER AUTHORIZED Nova Car Covers

FREE Lock Kit and Storage Bag With Car Cover Purchase! A $20.00 Value!

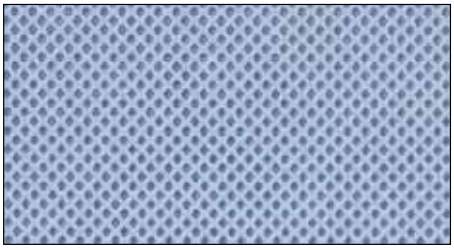

The Economical Way to Protect Your Investment!

Diamond Blue™

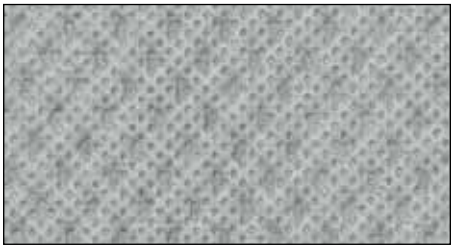

★ **Indoor Use**
★ **Single Layer Material**

Designed for indoor use, OER's Diamond blue covers are manufactured using an economical single layer non-woven material that offers excellent protection from dust and dirt penetration. Each cover is sewn with double stitched seams to add strength and durability to the cover and Neoprene elastic is sewn into the front and rear hems to help secure the cover. Breathable and lightweight, Diamond Blue offers basic protection from water and guards against damage from dust, dirt, over spray and similar environmental elements. Covers feature non-scratch grommets installed onto each side of the cover to allow the use of a tie strap or lock.

Diamond Fleece™

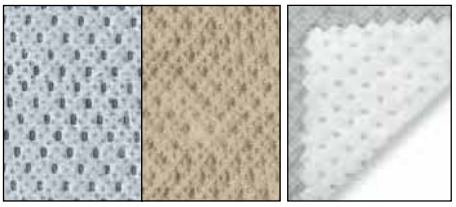

★ **Indoor/Outdoor Use**
★ **Triple Layer Material**

Designed for indoor and occasional outdoor use, OER's Diamond Fleece cover is manufactured using a durable 3 layer non-woven material that provides excellent protection from dust and dirt penetration. Each cover is sewn with double stitched seams to add strength and durability to the cover and Neoprene elastic is sewn into the front and rear hems to help secure the cover. Breathable and lightweight, Diamond Fleece offers water resistance and prevents damage caused by the sun's UV rays. Covers feature non-scratch grommets installed onto each side of the cover to allow the use of a tie strap or lock.

OER AUTHORIZED Nova Car Covers

FREE Lock Kit and Storage Bag With Car Cover Purchase! A $20.00 Value!

The Ultimate in Outdoor Protection for Your Vehicle

SoftShield™

cotton flannel

GR *TN*

Cotton flannel car covers pamper the vehicle's finish with a soft nap underside

- Indoor Use
- Cotton Flannel Material
- Soft Nap Underside

Favored by classic car collectors that garage their vehicles, OER's SoftShield cotton flannel car covers pamper the vehicle's finish with a soft nap underside that protects even the most delicate surfaces. Designed exclusively for indoor use, the SoftShield cover is soft on paint while providing a barrier against dust and protection against nicks and dings while the vehicle is being stored. Each cover is sewn with double stitched seams to add strength and durability to the cover and Neoprene elastic is sewn into the front and rear hems to help secure the cover. Covers feature non-scratch grommets installed onto each side of the cover to allow the use of a tie strap or lock. Your choice of gray or tan flannel.

Note: Please add 2 digit color code when ordering.

Titanium™

Lightweight highly reflective material for added protection from harmful UV rays

- Indoor/Outdoor Use
- Silver Reflective Material
- Single Layer Extremely Lightweight

This durable, lightweight fabric is engineered specifically to provide the best protection from the sun. Designed for both indoor or outdoor use, OER's Titanium material features a special 100% polyester reflective and water repellent top layer that helps keep the interior cooler in sunlight and protects against harmful UV rays. Each cover is sewn with double stitched seams to add strength and durability to the cover and Neoprene elastic is sewn into the front and rear hems to help secure the cover. With their specially engineered reflective properties, Titanium covers offer the ultimate in UV protection in a lightweight material that's easy to handle and store. Covers feature non-scratch grommets installed onto each side of the cover to allow the use of a tie strap or lock.

CC28

K4000

AG1

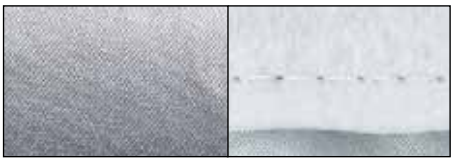

Car Cover Accessories

Protect your car cover with a storage bag, lock and cable kit, or antenna grommet designed to fit almost any car and truck cover. A storage bag will help to keep your cover clean and safe when not in use. A lock kit will prevent theft of your cover while in use. An antenna grommet will allow the cover to fit better over a fender or quarter panel mounted antenna, and will prevent the unintentional spread of the antenna hole.

AG1	antenna grommet	2.99 ea
K4000	lock and cable set	11.99 set
CC28	storage bag	9.99 ea

TitaniumPlus™

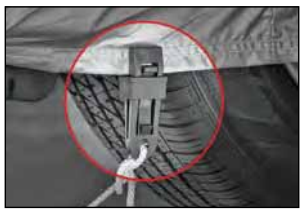

Plus soft cotton lining for protection against door dings and scratches.

- Indoor/Outdoor Use
- Silver Reflective Material
- Double Layer Soft Cotton Inner Lining

OER's premium Titanium Plus material offers double the protection of the standard Titanium material! Engineered specifically to provide the best protection from the sun. Designed for both indoor or outdoor use, features a reflective and water repellent top layer that helps keep the interior cooler in sunlight and protects against harmful UV rays. In addition, this premium cover adds a soft padded cotton inner layer that provides extra protection against nicks and dings when your vehicle is parked in tight spaces. Each cover is sewn with double stitched seams for strength and Neoprene elastic is sewn into the front and rear hems to help secure the cover. Titanium covers offer the ultimate in UV protection. Covers feature non-scratch grommets installed onto each side to allow the use of a tie strap or lock.

Gust Guard™ Cover Clamps

The Gust Guard™ is the easy solution for keeping your car cover in place in windy conditions! If you need to leave your vehicle covered for extended periods of time (airport, vacation, etc.) in locations where wind gust could be a problem, this set is the answer. Includes: four adjustable hem clamps, two "Quick Grip" friction locks and two 7' long white cords. These components clamp to the hem in front of the front tires and behind the rear tires. When wind gets under the car cover, the Gust Guard™ helps reduce the possibility of the cover coming loose.

QuietRIDE Solutions — AcoustiSHIELD

Stage 1 Dynamat® Damper Pads

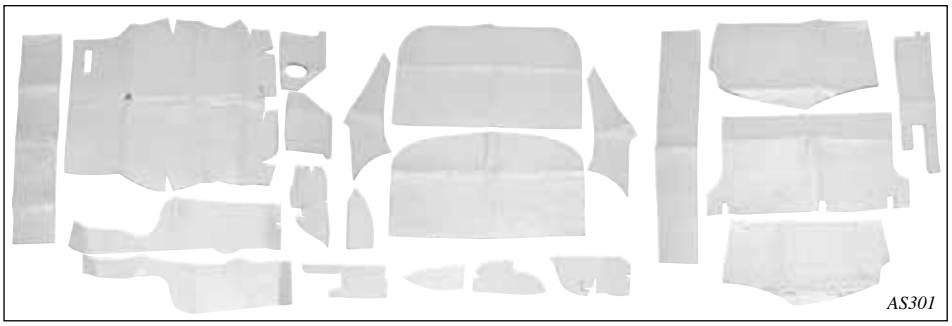

The first stage consists of pre-trimmed, self-adhesive, Sound Damper Pads, bonded to strategically located trouble spots on the floor pan and roof of the vehicle to control body panel vibration and noise. These spots are mapped and labeled in detailed instructions which are included in the kit.

Stage 2 Heat Shield/Barrier Panels

The second stage uses a high-tech absorber/barrier material, bonded to the body panels, to both sound deaden and insulate the vehicle from radiant heat penetration from the engine and road. Each absorber panel is cut to the correct shape and contour and is mapped and labeled in the detailed instructions.

AS301

Sets May Include Insulation for:

- Floor insulation
- Roof insulation
- Body insulation
- Door insulation
- Cowl/dash insulation
- Trunk insulation
- Dynamat damper pads
- Aerosol spray adhesive
- Sealing tape
- Fully illustrated instructions for an easy, painless, installation

QuietRIDE Solutions

HushMat

- #1 Rated Automotive Thermal & Sound Insulator
- Reduces Firewall/Tunnel Heat By Over 40%
- Blocks Exhaust Drone from Entering Interior
- Hushmat Ultra Bonds to Every Surface
- Creates A 10 dB Barrier to Road & Engine Noise
- Performs In Temperatures Up to 550 Degrees F
- One Step Peel and Stick Application
- Flexible in All Climates – Molds & Contours Easily

#1 Rated Made in the USA

HM300

Ultra Insulation

Starter Set

Four 12" x 12" sheets available in either black or silver. 4.1 square feet (1.25 square meters). A starter set is perfect for single panel treatment or small jobs.

HM250	silver	4 piece	29.99 set
HM251	black	4 piece	29.99 set

Door Set

Ten 12" x 12" sheets available in either black or silver. 10.1 square feet (3.1 square meters). A door set is designed to effectively treat two doors. Treat the inside of the outer door skin, door frame and back of the door trim panel. Replace that cheap metal, rattling noise with a solid sound when you close your doors.

HM200	silver	10 piece	79.99 set
HM201	black	10 piece	79.99 set

Trunk Set

Ten 12" x 23" sheets available in either black or silver. 19.1 square feet (5.8 square meters). A trunk set is designed to effectively treat the trunk floor, spare tire well, quarter panels and rear deck of a vehicle. Helps reduce interior noise typically caused by performance exhaust systems.

HM300	silver	10 piece	129.99 set
HM301	black	10 piece	129.99 set

Floor/Firewall Set

Twenty 12" x 23" sheets available in either black or silver. 39 square feet (11.8 square meters). A floor/firewall set is designed to treat the firewall, floor panel and transmission tunnel. This eliminates vibration noise caused by the engine and road surfaces and reduces the heat transfer from the engine and transmission.

HM400	silver	20 piece	229.99 set
HM401	black	20 piece	229.99 set

Bulk Set

Thirty 12" x 23" sheets available in either black or silver. 58.7 square feet (17.9 square meters). A bulk set is enough to treat an entire midsize or smaller vehicle.

HM500	silver	30 piece	299.99 set
HM501	black	30 piece	299.99 set

Interior Insulation

Cool It Insulating Mat

Battle excessive heat and noise that penetrate the driver compartment through the firewall and floorboards. The highly reflective Mylar reflects heat away from surfaces, while the foil side is orientated away from the heat source to conduct any penetrating heat across its surface thus providing the ultimate in heat protection. The silica blanketing is a dual density composite and is the main sound insulator. Easy to trim and can be applied with the push-in fasteners provided or any weatherstrip adhesive. Two sizes to fit your individual needs.

TT1005	24" x 48"	36.99 ea
TT1006	48" x 48"	67.99 ea

Adhesive Heat Barrier™

Adhesive backed, this Heat Barrier™ protects parts and components from radiant heat. Made up of woven silica with a flexible aluminized finish. The surface of the material is capable of withstanding radiant temperatures in excess of 2000 degree F. The adhesive backed composite construction material can easily be applied to any surface or wrapped around a hose or wire to make a clean professional appearance.

TT1003	12" x 12"	11.99 ea
TT1004	12" x 24"	19.99 ea
TT1049	24" x 36"	55.99 ea
TT1050	24" x 48"	73.99 ea

Super Sonic Acoustical Mat

This high-quality mat offers superior sound dampening control to reduce road noise, rattles, engine noise, and any other noises that are bothersome. The high density polyethylene film with an aluminum foil composite is abrasion and tear resistant. The gray film provides structural integrity and strength, allowing the material to bend, move, and return to shape even under tension forces. The product is 70 mil in thickness, contains a high temperature adhesive backing, and is easy to trim and fit. The rubberized compound is applied with the high temperature adhesive to absorb all those out of control noises.

TT14700	12" x 12"	2 piece	18.99 pr
TT14710	36" x 24"	1 piece	32.99 ea
TT14720	36" x 60"	1 piece	67.99 ea

Thermo-Guard FR

Thermo-Guard FR is a lightweight, durable shield that does everything: reduces sound, absorbs vibration, protects from radiant heat and provides an extra layer of insulated padding. The product features 100% polyester fiber felt that provides sound and comfort control and a high tech foil heat barrier that blocks more than 90% of radiant heat. Easy to apply and can be trimmed to fit anywhere. Available in 2 sizes with 1 or 2 foil sides. Designed to be applied with Thermo-Tec's Heavy-Duty Spray Adhesive.

TT1055	24" x 48"	1 side	27.99 ea
TT1056	48" x 72"	1 side	55.99 ea
TT1057	48" x 72"	2 side	76.99 ea

Suppressor Acoustical and Heat Control Mat

The Suppressor is ideal when both sound and radiant heat control is needed. In addition to the polyethylene film, the foil surface provides direct protection from radiant heat. Great for areas like firewalls, floorboards or doors. The Suppressor is also 70 mil in thickness, contains a high temperature adhesive backing, and is easy to trim and fit.

TT14600	12" x 12"	2 piece	15.99 pr
TT14610	36" x 24"	1 piece	29.99 ea

Logo Custom Carpet Floor Mats

Your choice of officially licensed logo, mat color, and embroider color.

Custom fit Lloyd Mats for Nova feature densely packed 2-ply 32 oz. DuPont nylon yarn for durability and long-lasting appearance. Their woven polypropylene backing, water resistant latex coating and non-slip TractionBac rubber backing prevent unwanted movement and the matching nylon velour binding finishes off the edge of the mat and provides durable, long-lasting protection that will never unravel. Lloyd Mats are available in a variety of colors to match or complement your Nova's interior color. These custom logo mats are covered by a manufacturers limited warranty against defects in design, workmanship and materials for two years from date of purchase. Please be sure before placing your order that you are sure of your color selection as each mat set is manufactured to your specifications. For that reason mats cannot be accepted for return due to incorrect, mismatching color, etc.

Note: GM Trademarks licensed to Lloyd Design Corporation. All mats are special order only.

Choose an embroidery color for script style floor mat.

Sportline Evolution X Racing Seat

The new Sportline series of seats by Corbeau features superior comfort, style, and support, plus top of the line injection molded foam, bolsters that hold you in the right spots, and harness capability. The Evolution X is a fixed back racing seat. Inspired by the C5/C6 Corvette where seating options are limited due to the small cockpit area, the Evolution X was designed to be a bit narrower, allowing it to fit in smaller vehicles. Each seat has a base height of only 2-1/2" between the floor and where you would sit. This is ideal for minimal headroom applications or for drivers wearing helmets. Seats feature black vinyl with carbon vinyl accents and are handcrafted with your choice of red or black offset stitching. Seats will fit up to approximately a 38" waist.

Note: *Mounting brackets with seat tracks sold separately. Shipped double oversize.*

Sportline RRB Racing Seats

The Sportline series of seats by Corbeau have a look and feel that is second to none. RRB seats feature thigh bolsters that come into contact with the back of the seat. This gives you that racing bucket look of a fixed back seat, while maintaining the convenience of a reclining seat. Each seat has a base height of only 2-1/2" between the floor and where you would sit. This is ideal for minimal headroom applications or for drivers wearing helmets. Seats will fit up to a 38" waist. Weight is 26 lbs per seat. Sold as a pair.

Note: *Mounting brackets with seat tracks sold separately. Shipped double oversize.*

Seat Belt Harness Pads

Corbeau harness pads provide extra comfort and support to your harness belts. Harness belts tend to rub against your neck and or shoulders causing some minor annoyance while driving. Harness pads will prevent this and provide extra padding between your straps and body. Available in 2" or 3" belt widths and your choice of black, yellow, blue, or red.

Fits 2" Wide Harness

Seat Belt and Components

New! CORBEAU

3 Point or 4 Point Seat Belts – 2" ⚠

Corbeau 3 point, 2" wide harness belts are an affordable way to upgrade your vehicle to harness belts. The 3 point retractable harness belts are unique in two ways. The retractable feature and the double release feature, which allows you to disconnect the rear strap with the simple push of a button. With the 4 point belts the two shoulder straps go over your shoulders and through the harness slots in your seats then mount in the rear area of your vehicle. Available in your choice of black, blue, or red.

2 Point Aviation Style Seat Belt

RetroBelt lap belts for your classic vehicle feature attractive chrome-plated aviation style lift buckles and are available in 24 colors. The webbing is color matched to its stitching. Seat belts meet or exceed Federal Motor Vehicle Safety Standards. Many vehicles manufactured prior to the late 1960's were not equipped with seat belts. Adding seat belts is a wise investment in the safety of yourself and your family.

Note: 90" belt measures 45" on the buckle side and 45" on the lap side. Please specify 2 digit color code when ordering.

- Buckles measure 2-3/8" x 2-1/2"

3 Point Aviation Style Seat Belt

RetroBelt's retractable lap and shoulder seat belts with classic chrome aviation style buckles are available in 11 colors to match the interior of your classic vehicle. The webbing and its stitching are color matched to the retractors, and the belt ends are chromed. The retractor holds 96 inches of webbing, with 39 inches of webbing outside for a total of over 11 feet of seat belt webbing. The buckle side is 27 inches long and is fully adjustable for maximum installation flexibility. This system uses an advanced inertia retractor that locks to support both the upper and lower parts of the body in the event of a sudden stop. The retractor may be mounted in either the horizontal or vertical positions.

Important: Fabrication skills may be required to establish shoulder anchor point – please consult a professional installation specialist. Seat belts are not designed to work with vehicles that have electric seat belt warning systems.

Note: Please specify 2 digit color code when ordering.

- 12"of webbing on buckle side
- Inertia locking retractors measure 3" wide x 2" tall
- Starburst push button buckles & chrome belt ends
- Hard black plastic sleeves on buckle sides for use with bucket seats

3 Point Push Button Seat Belt

Featuring attractive starburst push button buckles and chrome belt ends, RetroBelt's retractable lap and shoulder belts have hard black plastic 12" sleeves on the buckle side, making them ideal for the bucket seats found in your classic. Our retractors are very small – just 3" wide x 2" tall – so they can be installed in the tightest spaces. The retractors function in either the vertical or horizontal position. Mounting hardware is available separately.

Important: Fabrication skills may be required to establish shoulder anchor point – please consult a professional installation specialist. Seat belts are not designed to work with vehicles that have electric seat belt warning systems.

Note: Please specify 2 digit color code when ordering.

N12101SP

1962-72 Premier Perforated Vinyl Headliner

After years of neglect or to complete your restoration properly, you'll want to replace your headliner with a pre-cut and sewn factory style headliner. Each headliner is produced from factory patterns and will install as originals.

Note: 1962-65 and early 1966 Nova models do not require separate sail panels. The material continues from the roof area to cover the inner sail panel area. Includes additional material to recover the sun visors.

1968-72 Premier Non-Perforated Headliner/Sail Panel/Visor Set

Replacement pre-cut and sewn factory style headliner with sun visors cut from the same roll of material for an exact match in color and material. Each headliner is produced from factory patterns and will install as original.

Important: *Due to variations in mounting hole locations on sail panels, these reproductions are supplied with Velcro pads for mounting. If mounting clips are desired to attach sail panels, provisions for mounting clip holes must be cutout. It is recommended to keep original sail panels in order to use as a template for correct mounting hole locations specific to the vehicle.*

1968-72 Inner Rear Window Headliner Molding

Reproduction inner rear trim molding for 1968-72 Chevy II models. This reproduction molding installs on the upper section of the interior rear window area where the headliner meets the rear glass. This is a 1 piece molding manufactured to original GM specifications and features the correct grain and profile for an authentic appearance and fit.

K852 1968-72 1 piece ..... 69.99 ea
K886 1969 1 piece ..... 46.99 ea

Headliner/Upholstery Tool

Great for tucking headliner or upholstery material into tedious channels without damaging materials. This is a handy tool which will make installing your headliner easy. You could spend tedious minutes trying to get it just right. Why waste time? Easy to use around curves and near corners.

A7672 ..... 14.99 ea

3M Super 77 Spray Adhesive

A high tack, high coverage, fast drying, transparent adhesive for permanently attaching foils, carpeting, foam, paper, cardboard, felt, cloth, etc. to painted or unpainted metals, wood, hardboard, and other base materials. High initial grab with sufficient open time to allow for positioning of materials.

Note: Due to current FAA regulations all aerosol spray cans must be shipped ground delivery.

21210 16.75 oz. aerosol ..... 16.99 ea

3M Super Trim Adhesive

3M General Trim Adhesive creates a secure bond when gluing soft materials such as carpet, vinyl, fabric and plastic to hard impervious surfaces. Our clear drying, high strength adhesive delivers professional quality results when making automotive repairs. Once the adhesive sets, the bond offers good heat and water resistance. This trim adhesive comes in an aerosol spray that is easy to aim and control. Simply spray the adhesive onto both surfaces to be joined. The adhesive dries quickly in about one to three minutes, leaving a tacky surface behind.

Note: Due to current FAA regulations all aerosol spray cans must be shipped ground delivery.

39187 ..... 39.99 ea

Headliner, Upholstery, Glue and Thinner

Correct adhesive formula used to adhere the headliner to the roof panel and for other vinyl upholstery jobs where a strong vinyl adhesive is required. This is specially designed for use with vinyl covered fabrics. Includes a handy brush for easy application. Solvent-based thinner reactivates dried HH-66 vinyl cement or removes unwanted HH-66 from surfaces. You also can use HH-66 thinner to clean brushes, rollers, spray guns, and other types of applicators.

30704	without door jamb switches		25.99 set

Dome Lamp Dimmer

The standard dome lamp dimmer keeps the lamp on an extra three seconds then slowly fades off, instead of simply switching off. The deluxe dome lamp dimmer, if the ignition power is off, the lamp delay is 10 seconds, but if the power is on, the lamp fades when the doors shut. The deluxe dome lamp dimmer can also be installed in a way that the lamp softly brightens when the doors open. These devices easily install on most applications and can be mounted in any location where electrical connections are easily accessible.

1962-72 Mesh Package Tray

Mesh style rear seat shelf features a color matched mesh screen and hole cuts over the areas for speaker installation. These ideal seat shelves eliminated the need for external speaker grills because they're built right in. Available in most of the popular original colors! In order for this product to retain it's shape and integrity, it must be shipped double oversize. Although the freight is more expensive, the product will arrive in pristine condition and install correctly.

Note: Shipped double oversize.

Rear Seat Shelves

1975-79 Rear Package Tray

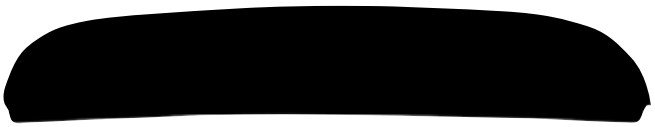

Formed from high impact ABS, these package trays have the same texture and appearance as the original part. Because its an ABS material, it is not prone to warping from humidity like the pressed hardboard originals. They are CNC-machine trimmed and include the same speaker hole pattern as the originals.

Important: *Must reuse original felt mat or similar substitute under the package tray.*

Note: *Shipped double oversize.*

1962-79 Rear Seat Shelf Protector

Classic Industries® offers a convenient way of protecting your seat shelf with form fitted covers. Produced from 100% solution dyed polyester material. Each cover is contoured to the shape of the rear seat shelf to ensure a protective fit. When your vehicle is in the sun or in extreme cold temperatures, the rear seat shelf can become damaged. The seat shelf protector will eliminate these various problems and keep your original seat shelf looking factory new.

1969-79 Push-On Speedometer Cable

This speedometer cable is manufactured as original. It is a push-on design and measures 69" in length. This complete speedometer cable assembly is manufactured to correct factory specifications featuring correct fittings, crimped ends, casing, and cable.

Note: Firewall grommet not included.

6478176	1969-79	push-on	69".....	29.99 ea

1962-79 Speedometer Cable

Replace your original speedometer cable with these genuine ACDelco replacements. Originality in all aspects of your restoration is important. Why replace your original cables with aftermarket generic cables that may or may not fit your application when the OEM cables are available. You'll be glad you did once you install it.

1968-69 Speed Warning Control Cable

Reproduction control cable for all 1968-69 Chevy II/Nova models with the desirable and highly sought after RPO code U15 (Speed Warning Indicator).

6454841	1968-69.....		29.99 ea

"U-Cut-To-Fit" Speedometer Cable

High-quality speedometer cables feature machined aluminum fittings and a premium housing with a specially extruded liner to extend the life of the cable. These cut-to-fit 7' speedometer cables are designed to work with factory speedometers with a 5/8"-18 male thread, or any cable driven aftermarket speedometers such as AutoMeter, Stewart Warner or VDO. The transmission end is designed to fit most transmission driven gear adapters (not included), and the inner cable and outer housing of these cables can be cut-to-fit most GM transmissions.

SP1501	stainless steel housing.....	205.99 ea
SP1500	black housing	129.99 ea

1962-70 Speedo Cable Grommet

OER® reproduction firewall grommet installed where the speedometer cable runs through the firewall on 1962-70 Nova models. Measures 1-1/2" o.d. with a 5/16" center hole.

3792008	1962-70.....	4.69 ea

1968-69 Speed Warning Cable Bracket

A high-quality reproduction of the control cable bracket for 1968-69 Chevy II/Nova models with the desirable and highly sought after RPO code U15 (Speed Warning Indicator).

3954257	1968-69	bracket	24.99 ea

1966-74 Four-Speed Speedo Cable Clip

Originally used on vehicles with factory installed 4-speed transmissions, this unique retainer clip is used to hold the speedometer cable onto the firewall transmission tunnel.

HC74	1966-74	4-speed	9.99 ea

1969-79 Speedo Cable Retainer Clip

Reproduction of the speedometer cable retainer clip for 1969-79 models. This metal clip secures the speedometer cable to the back of the speedometer.

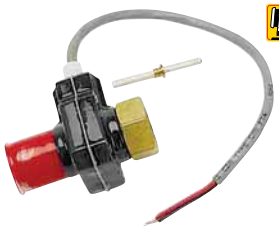

6491006	1969-79.....	6.99 ea

1968-79 Speedo Drive Gear Clip

For use with manual or automatic transmissions.

G7612	1968-79	9.99 ea

Speedometer Sending Unit

Speedometer sending unit for use with all AutoMeter electric speedometers. This unit is not included with the gauge packages and must be purchased separately.

AM5291	sending unit	120.99 ea

Speedometer Gear Housing

Reproduction speedometer gear housings for Powerglide, TH350 and TH400 transmissions. Each housing is manufactured as original in either steel or aluminum. Includes the speedometer gear shaft seals.

Important: Please verify speedometer gear housing diameter prior to ordering.

Sky Drive GPS Speedometer Sender

Drive your speedometer accurately and reliably with the Sky Drive GPS Speedometer sender. This device quickly calibrates and accurately drives any electronic programmable speedometer. The Sky Drive updates 10 times per second without any transmission signals, pulse generators or signal converters and features an omnidirectional antenna that can be mounted virtually anywhere and in any position. No more guessing or recalibrating due to tire or gear changes, this unit requires a one time setup and you're done.

280667 GPS speedometer sender..... 162.99 ea

New!

GPS Speed Sender

New Vintage USA GPS speedometer senders are compact units that mount virtually anywhere and deliver a steady, smooth signal to any electronic programmable speedometers. So, if you need an easy way to pickup your speed signal, or have a transmission without a built-in VSS or cable output, a New Vintage USA's GPS speedometer sender may the just the part you're looking for.

NV42181 universal ..... 154.99 ea

Cable-X Speedometer Drive Converter

The Cable-X is the easy, cost efficient way to operate your stock mechanical speedometer with a transmission equipped with vehicle speed sensor for an electronic speedometer. This universal adapter will pickup the electronic speedometer signal and operate the cable driven speedometer to the corresponding speed. It's a snap to install with only three wires: hot, ground, and signal. The Cable-X is a one-of-a-kind solution to your speedometer drive problem.

1860S with snap-on cable ..... 459.99 ea
1860T with thread-on cable..... 459.99 ea

Speed Sensor

A speed sensor is an electrical device that can sense the rotational speed of a shaft or member and transmit this information to another device, such as a readout. Sensor is 7/8"-18 thread.

60117 late TPI & early LT1 – 4 pulse 159.99 ea

Fuel Tank Sender

This universal type fuel sender is used with gauges that require 240Ω empty and 33Ω full and can be adjusted for tanks from 5" to 24" deep. Universal 5 bolt fuel sending unit for use with Auto Meter universal fuel gauges. This unit is not included with the gauge packages and must be purchased separately. Made in USA.

Important: *As this is a universal-fit product, some modification to the tank may be necessary for installation.*

AM3262 fuel sender ..... 49.99 ea

Internal Float Fuel Sending Unit

This advanced design provides accurate readings without fluctuations due to fuel slosh. Because this internal float design requires no float arm, it is far more resistant to corrosion, even with racing fuels. All sending units mount to the tank with the standard 5 bolt mounting flange and are available in sizes from 4" to 24".

Important: *Sending unit should not touch bottom of tank. When the fuel gauge reads empty, the area below the sending unit is reserve fuel.*

Note: *Sending units are available in lengths from 4" to 24" and are sold in 1" increments. Please add the desired length to the end of the part number, eg. 06 = 6", 11 = 11".*

- Wide angle color TFT LCD Message Center(s)
- Independent day/night color selections
- Illuminated needles and LED backlighting for the numbers and tick marks
- "Ghosted" indicators (Turn signals, high beam, check engine, cruise control engaged, parking brake, plus two that are user-definable) appear only when lit.
- Bluetooth connection to tablet/ smart phone
- Easy-to-use app allows for quick setup, modifications and sensor diagnosis
- Available for iPhone and Android systems.

1963-76 HDX-Series Gauge Set

The new HDX series gauge sets from Dakota Digital brings you the best in modern instrumentation, rivaling what's offered in today's modern vehicles. Each HDX system is fully customizable, allowing you to personalize your instrument panel to complement nearly any vehicle theme. Each direct-fit gauge package incorporates a speedometer, tachometer, fuel level, Volts, oil pressure, and coolant temperature gauges, along with a digital message center. The gauges are integrated into your vehicle's systems using the supplied central control box. Includes necessary sensors. Gauge faces offered in black alloy or silver alloy and are available with either standard (MPH and Fahrenheit) or metric (KM/H and Celsius) displays.

Important: *Gauge bezel not included. Metric display (KM/H and Celsius) gauge sets are custom built by Dakota Digital, and may require a 3-5 week build time.*

Note: *Please specify option codes when ordering: 1 – standard (MPH and Fahrenheit); 2 – metric (KM/H and Celsius) and then either A – silver alloy gauge face, or B – black alloy gauge face.*

Example: DD15941A = 1963-65 with standard display and silver alloy gauge face.

This electronic programmable speedometer is setup to read 140 MPH (Velocity Series 160 MPH) and the quad cluster is programmed for a stock fuel sender reading 0-30 Ohms, water temperature, oil pressure, and Volts. Cluster is designed with integrated turn signals and a halo high beam indicator. All sets come equipped with water temp sender, oil pressure sender, pulse signal generator for the programmable electronic speedometer, and lens. The cluster will mount into a stock or aftermarket bezel and will use the original light diffuser. A new lens is included with each set of gauges.

New!

B9333B – components

B – blue G – green R – red W – white

Features Include:

- 2-1/16" diameter and 1-1/2" deep
- Automatic night-dimming and In-dash mounting hardware
- Absolute brightest LEDS available
- No sender needed
- Oil Pressure displays 0 to 80 PSI accuracy and universally adaptable. It is accurate, super bright, and intelligent all in one.

3 Gauge LED Bar Graph Set

With the absolute brightest LEDs available, this sharp looking 3 gauge bar graph panel features voltmeter, water temperature, and oil pressure showcased in a black bezel. Sending units and mounting hardware are included. Voltmeter is microprocessor controlled with 12.0 to 16.0 Volts accuracy.

Note: *When ordering, please add the correct suffix: B – blue, G – green, R – red, or W – white.*

B9333 ..... 219.99 set

- Instrument bezel not included

DP8001B

DP8001B DP8001G DP8001R DP8001W

- 255 MPH Speedometer with Odometer, Tripmeter, 0-60 time,1/4 mile ET, and Top Speed Recall
- 9900 RPM Tachometer
- 18-255 Degree Temp Gauge
- 0-99 psi Oil Pressure Gauge
- 7.0-25.5 Volt Voltmeter
- 0-99% Fuel Gauge

1962-65 Digital Instruments

Looking to get a fresh, modern look for your gauge panel? The Intellitronix digital dash gives your Nova the precision of digital readouts under the elegance of a smoked gauge lens. Each set includes: a printed circuit board and smoked faceplate, along with sending units for the speedometer, oil pressure and coolant temperature. This set also works with your factory fuel level sending unit. Features one button calibration regardless of tire size, gear ratio or transmission, along with 0-60 time, 1/4 mile ET and high speed recall, all with the push of a button. Dash bezel not included. Made in USA.

Note: *When ordering, please add the correct suffix: B – blue, G – green, R – red, or W – white.*

DP8001 1962-65 specify color..... 459.99 set

New!

M9333B

B – blue G – green R – red W – white

Features Include:

- Voltmeter is microprocessor controlled with 7.0 to 18.0 volts accuracy
- Oil Pressure displays 0 to 100 PSI accuracy and universally adaptable.
- Water Temperature has 18-255 Fahrenheit degree accuracy

3 Gauge LED Digital Set

Intellitronix universal digital LED 2-1/16" diameter 3 gauge panel. Feature the brightest LEDs available, this sharp looking 3 gauge digital panel includes voltmeter, water temperature, and oil pressure showcased in a black bezel. Sending units and mounting hardware are included.

Note: *When ordering, please add the correct suffix: B – blue, G – green, R – red, or W – white.*

SCX Pro and SCX Series Gauges

SCX Pro gauges feature one touch peak recall and programmable high and low full dial warning. There is also an external alarm output (12V, 500mA) that can be used to activate an external warning light when an alarm condition exists. Superior amber and white through-the-dial lighting and illuminated pointer. All SCX and SCX Pro fuel senders work with 0-90, 240-33, 73-10, 20-150, and 0-30 Ohm senders. SCX Series 5" tachometers feature a slimline case design (only 2" deep).

Note: **Pedestal mount. **Pedestal mount w/LED shift light.*

Auto Meter In-Dash Speedos and Tachs

Our In-Dash Speedometers and Tachometers feature our famous high-performance movements and are designed with seamless dashboard mount in mind for the ultimate driver information center. Available in a variety of configurations and sizes.

***Important:** Electric speedometers operate on 500-200,000 pulse/mile sending units. Use existing sender if vehicle is originally equipped with an electric speedometer. Use AM5291 to convert from mechanical drive to electric. Tachometers operate on 4, 6, or 8 cylinder engines with most factory or aftermarket ignitions. Some fuel gauges use the vehicle's stock sending unit. Measure resistance using an ohmmeter with the sending unit float in the empty and full position to determine the correct fuel gauge.*

Full Sweep Electric Gauges

Powered by digital microprocessor-controlled, rugged stepper motor drives and laboratory grade sending units, Full Sweep Electric Gauges combine extreme durability and readability of 270 degree sweep mechanical gauges with the easy installation and safe operation of short sweep electrics. Track tested and race proven, these units use precision senders to keep hazardous fluids out of the driver compartment and perform gauge calibration and sensor diagnostics at power up for extreme accuracy, every time.

Short Sweep Electric Gauges

Advanced 90 degree air core movements and three wire installation characterize these Short Sweep Electric Gauges. Electric sending units keep hazardous fluids in the engine compartment, sending collected data via an electrical signal to quick reacting, precise air core movements to give you all the information that you need.

Tachometer and Components

New!

Monster Memory Tach – 5" Pedestal

AutoMeter 5" pedestal autogage monster memory tach 0-10,000 RPM. AutoMeter's race proven air-core electric tachometers provide quick and accurate readings with a needle so responsive it can go from 0 - full scale in 333 milliseconds. Compatible with most 4, 6, and 8 cylinder engines (2-4 pulse per revolution ignition signals) with points, electronic, and most 12V high-performance racing ignitions.

233907 silver ..... 243.99 ea

New!

67005C

67005C – face view

Slim Design Tachometer

This new generation, slim design tachometer is 35% thinner, offering better clearance for dash and pillar mounted applications. For all 4, 6, and 8 cylinder engines. Modern touch pad controls. Includes mounting bracket. These tachs are available in three versions: memory recall of highest RPM, memory recall with adjustable external shift light, and memory recall with adjustable internal shift light. All tachs are 5" in diameter with an 11,000 RPM range. Shift lights operate independently from a tachometer and are adjustable from 3000-12,000 RPM in 200 RPM increments.

67005SC shift light – silver case..... 50.99 ea

Dixco Style Hood Tachometer

This Dixco style 8000 RPM tachometer was installed by builders for super car vehicles such as Yenko, Baldwin Motion, and Big Daddy Garlits. Fits all vehicles. This tachometer works with factory points and GM HEI distributors. Tachometer features an electronic movement and reset to "0" once they receive 12 Volts of power. Works with factory points style ignition and GM HEI. Any aftermarket ignition may need a module or convertor to give correct signal.

Note: Tachometer adapter required for aftermarket ignitions.

A9100101 all ..... 199.99 ea

Distributorless Tach Adapter

This tach adapter is designed to adapt a standard ignition tachometer, Pro Shift light, or RPM activated module to be used with distributorless ignition systems.

AM9117 tach adapter ..... 121.99 ea

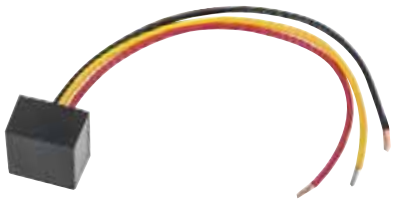

Tachometer Signal Filter

AutoMeter tachometer signal filter. These filters are designed to correct erratic tach function by filtering out the interference or spiky pulse signals often caused by points or noisy ignition systems.

AM9116 ..... 29.99 ea

OER AUTHORIZED

Universal Tachometer Filter

Eliminate tach signal noise and surges caused by your ignition system with this compact and easy-to-install tachometer filter. This filter installs between the tachometer and the signal source and modifies the sharp up and down spikes into a semi-square wave signal for steady readings and faster response. This tachometer filter can be used as a direct replacement for 1975-89 GM vehicles. Measures: 2" x 3/4" x 1". Includes instructions.

Important: Recommended for vehicles running an HEI ignition with a tachometer designed for points style ignitions.

Radio Noise Suppressor

Sometimes after installing any new sound system, you may experience bothersome engine/alternator noise. Be sure to check all grounds for good connections (radio, antenna, amp, etc.). If you still hear engine/alternator "whine", our quality noise suppressor may eliminate this problem.

Note: For use with amplified systems only. Not for use with stock radios.

NSP1 universal type ..... 37.99 ea

Radio Off Delay

With this new device, you can listen to your radio after you remove the key from the ignition, just like many modern luxury cars! After removing they key, this unit will keep the radio power active for 15 minutes or until a door is opened. This allows you to continue listening to the radio without leaving the electric fan or other accessories running. And you're not limited to just the radio; it could be wired to control all accessory power so you still have control of the power windows after the key is off.

Play Portable MP3's or CD's on Your Factory Radio!

You now have the freedom to listen to your favorite music using a modern MP3 Player, iPod or CD player in your classic with the RediRad adapter, the only portable music adapter specially designed for older vehicles. The music is seamlessly routed from any portable music player such as a cassette, CD or MP3 player, even satellite radio into your stock AM or AM/FM radio without any vehicle modifications. Designed for simple and out-of-sight installation, it uses a standard audio plug on a six foot cable to connect to your portable player. When music is detected at the audio plug, the RediRad automatically switches from the radio broadcast to your personal player. The radio will return to normal operation after switching off your personal player. Made in USA.

14923 RediRad adapter ..... 128.99 ea

Bluetooth® Receiver Adapter

Now you can wirelessly stream audio and take handsfree calls from the road in your Classic Nova! Simply plug this into your cigarette lighter, connect the cable to your radio's 3.5mm input jack, and pair your Bluetooth® enabled phone or other device... that's it! You'll be ready to wirelessly stream music from your device to your audio system. Calls and music are routed through your car's speakers for excellent sound quality. Includes Bluetooth adapter and 18" extension cable.

1962-65 Dash Mounted Dual Speakers

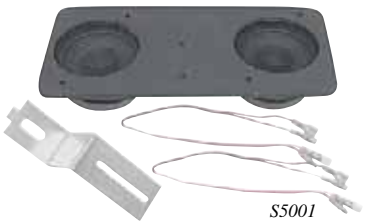

Adding stereo sound to your classic doesn't have to involve cutting the doors, door panels, or package shelf to install stereo speakers. The dash mounted dual speaker easily installs in stock dash speaker location to produce true stereo sound on a wide variety of classic vehicles equipped with a dash speaker that is held in by screws. Can also increase sound quality of stock mono radio. Available in basic dual cone style. Basic speaker is rated to handle 30 watts.

1962-72 Antenna Location Template

When mounting an antenna on new sheet metal, the most important step is knowing the exact and correct placement of antenna before you drill. No more worrying about costly body work caused by misdrilled holes. Simply apply the template to the corresponding panel using referenced body surfaces for exact location, and drill the holes. With these antenna templates, you can be sure that you're mounting your antenna in the correct factory location the first time.

Steering Column Parts

1969-74 Tilt Steering Column

FR30002S

These Flaming River tilt steering columns feature all-new components including a one piece cast upper housing design with a keyed GM ignition switch that has the standard GM plug. The ignition switch is located in the 3 o'clock position for added comfort and convenience. These columns are manufactured using 2" stainless steel tubing and a high strength, all steel shaft with Teflon coated bearings. They include the tilt lever, turn signal lever, and hazard knob. The shift lever with the shift indicator are included on column shift applications. These stainless steel columns are available in unfinished paintable stainless, powder coated black, or a beautiful polished stainless finish. Columns are 33" long, with 1"-48 spline shaft and are a direct fit for 1969-74 Nova models; or a column 33" long with a 1"-DD shaft which is good for rack and pinion steering. A stock GM steering wheel from a 1969 and newer GM passenger car will bolt to these steering columns.

Important: *Reuse of original column to dash clamp is required for installation, with some modification necessary. or use part #FR20300 column strap clamp if you want to save your old column. If you do not want to do that you may use FR20114K and not use the OEM mounting.*

1969-73 Steering Column

FR30009B

Flaming River direct fit tilt steering columns with an original look are for 1969-73 Nova models. These columns are made with 2" stainless steel tubing and are designed to fit the original dash mounts. Each column comes complete with a billet dress-up kit (tilt/turn signal levers and hazard knob), GM wiring (4-1/4 inch connector) and an all new canceling cam. 1969-73 columns include keyed ignition switch. Your choice of paintable mill finish, black powder coated, or polished. Made in USA.

SC15472

1962-73 Tilt Column

These all new tilt steering columns include all levers and knobs and come completely wired for self-canceling turn signals, 4 way flashers, and horn. A neutral safety switch is included with all column shift columns. For 1967 models the original mounting hardware and coupler can be used. A stock steering wheel from a 1969 and newer GM passenger car will bolt to the top of the column. Most aftermarket wheels will attach with an adapter. Columns can be ordered in paintable steel, chrome steel, black powder coated, polished, or brushed billet aluminum.

Important: *Column shift units do not include a gear selector indicator. The shift pattern on column shift units can be used for a 3- or 4-speed automatic transmission, but will not match the detent pattern of a Powerglide.*

1962-66 Pro-Lite Lightweight Performance Steering Column

Pro-Lite light weight aluminum steering column built to fit the 1962-66 Nova. At under 6 lbs, the Pro-Lite still packs all the features of a standard column including self-canceling turn signals, 4 way flashers, horn wiring, 3-7/8" wiring plug, and a 1" 48 lower shaft. It also collapses a full 5" for enhanced driver safety and is designed to work with most quick release steering wheel hubs. Installs easily using your original dash mount and ididit's plug-in wiring connectors.

RP20016 – detail

1962-65 15" Steering Wheel

Replace the old, bulky 16-1/5" steering wheel with one of these 15" reproduction OE style steering wheels. These quality wheels replicate the look of the original steering wheel, but improve the driving feel with their smaller 15" diameter, a benefit especially for cars converted to modern power steering. Steering wheel includes horn ring, horn cap with custom emblem.

Note: *Steering wheels also accept original horn caps.*

Important: *Part #2612100040 adapter kit is required when using an aftermarket tilt steering column.*

NRG Steering Wheels

152773C

Cherry Mahogany Wood Steering Wheel

Add a traditional look to your interior with this 6 bolt woodgrain steering wheel from NRG. Made from high-quality materials with a sophisticated design to let you feel the smooth luxurious wood and the aggressive matte finish. Mounts to any 6 bolt hub or quick release unit. Measures: 13" in diameter, 1-3/4" deep.

Standard Woodgrain Wheels

152773B	matte black center	159.99 ea
152773C	chrome center	159.99 ea

Rim Sport Style Wheel

NRG Rim Sport series wheel is manufactured from high-quality materials, providing the feel of smooth luxurious wood, polished aluminum center spokes and the old school brushed metal feel. Mounts to any six bolt hub or quick release unit and measures 14-1/4" in diameter, and 1-1/2" deep.

152778	6 bolt	209.99 ea

Classic Woodgrain Wheel

New!

NRG Classic woodgrain 3-spoke center in chrome. Measuring in at approximately 14-1/2", this wheel was made to be a direct replacement for many of the older vehicle that did not feature options such as power steering, or assisted steering. It's large, sturdy, and ready for the road. Covered in custom stained Mahogany featuring polished aluminum spokes.

153801	6 bolt	179.99 ea

Steering Wheel Replacement Screws

Replacement mounting screw set for all NRG steering wheels. 6 piece set. Includes Hex key.

carbon fiber – detail

152782BK

Generation 2.0 Quick Release System

These 2.0 Quick Release units feature many options that conventional ball-lock Quick Release systems do not offer, such as specially designed raised sections to prevent hub stretches and a self-locking mechanism. These units are manufactured from highest quality aircraft aluminum with style and function that are designed to last.

Note: *Must use in conjunction with the short hub adapter.*

5 Bolt – 2.0 Quick Release

Compatible with all 5 bolt Grant steering wheels, and others with 5 x 70mm bolt pattern.

152783B	black	119.99 ea

6 Bolt – 2.0 Quick Release

Compatible with all 6 bolt steering wheels with: 6 x 70mm or 6 x 74mm bolt patterns.

With Carbon Fiber Ring

152781C	black	119.99 ea

With Titanium Ring

152782BK	black	111.99 ea
152782GM	gunmetal	111.99 ea
152782GL	silver	111.99 ea

152784BK

Generation 2.8 Quick Release System

The Gen 2.8 Quick Release provides all the benefits of the 2.0 Generation Systems ball-locking quick release system with the added benefit of an upgraded Diamond Cut flared ring. This provides leverage and grip for the pull ring allowing much easier release of the steering wheel. Perfect for race applications where gloves are required. Choose from a selection of colors.

Note: *Must use in conjunction with the short hub adapter.*

6 Bolt – 2.8 Quick Release

Compatible with all 6 bolt steering wheels with: 6 x 70mm or 6 x 74mm bolt patterns.

152784BK	black	144.99 ea
152784GM	gunmetal	144.99 ea
152784GL	silver	144.99 ea

Short Hub Adapter

This short hub unit was designed to mount an aftermarket steering wheel/quick release combination close to the original orientation. Manufactured from the highest quality aluminum using a solid, one piece design for maximum strength and durability.

Note: *Must use with one of our Quick Release or tilt systems.*

152780	black	125.99 ea

152779B

152779G

1/2" Steering Wheel Spacer

Bring your steering wheel closer with this 1/2" spacer. Manufactured from CNC-machined aluminum with counter sunk mounting holes to the hub and a universal 6 bolt mounting pattern.

152779B	black	27.99 ea
152779G	silver	27.99 ea

152786GL

Quick Lock System

A perfect complement to the Quick Release Systems, these units quickly and easily disable the steering hub by preventing the placement of a steering wheel onto the hub. Manufactured from solid steel and utilizing a ball-lock design and key mechanism. Available in various color finishes.

Note: *Must use with either the 2.0 or 2.8 quick release system.*

152785GM	gunmetal	125.99 ea
152786GL	polished	125.99 ea
152786MB	matte black	125.99 ea

152772B

Quick Tilt/Lock System

By allowing the steering wheel to tilt out of the way in one quick motion and combining a patented locking system to secure the wheel once the tilt is engaged, this system provides an added layer of anti-theft security without sacrificing convenience.

Note: *Requires short hub adapter. Not compatible with quick lock or quick release units.*

152772B	black	249.99 ea
152772G	silver	249.99 ea

Heritage Collection Steering Wheel

These Heritage Collection steering wheels are modern interpretations of classic wheel designs. Construction starts with a 14-3/4" diameter polished 6061-T6 aluminum wheel with 2-1/2" dish, offered in a range of spoke designs and adds your choice of genuine leather or hand rubbed mahogany wood rim with finger grips on the back for comfort and style. The modular design allows the wheel rim to be completely covered without the partial aluminum rim seen on many billet wheels. Includes matching polished aluminum center cap and mounting kit.

1962-72 Center Console

TMI small center console for 1962-72 Chevy II/Nova models. These high-quality aftermarket consoles improve the look and feel of your classic car's interior. Center consoles can be installed on vehicles without a stock console with bucket seats. Consoles are manufactured with French seams, hidden hinge, a secret lower compartment. Featuring TMI premium grain, matte charcoal black vinyl. This console is made to match the material on our TMI Sport bucket seats and TMI rear sport seat upholstery. Length: 21-1/4", width: 6", height at highest point: 11". Sold individually.

DL7020 1962-72 matte black..... 432.99 ea

1963-78 Cup Holder Console

Made specifically for 1963-78 Nova models without factory installed consoles with bucket seats, the Humphugger console looks like a factory option. Constructed of automotive grade vinyl and double stitched with commercial nylon thread, this accessory console is an extremely durable and practical way to add storage to your classic Nova with absolutely no modifications to your vehicle. Comes standard with a padded lift up armrest, fully lined interior, and 2 standard sized drink holders. Measures 21" x 8" x 8" with an approximate 10" x 5" x 5" storage compartment.

Important: *†Requires 8" inches in between bucket seats to fit. *Fits 1968-71 Nova Super Sport with bucket seats only. Requires 6-1/2" in between bucket seats to fit.*

Accelerator Parts

B199240 B199245

MADE IN USA

1963-67 Floor Mount Billet Gas Pedal

Add a touch of class to the interior of your Chevy II/Nova with one of these CNC-machined floor mount gas pedals from Billet Specialties. They are a simple bolt-in replacement for the stock pedal and can install in minutes.

B199240	polished	159.99 ea
B199245	black	159.99 ea

1968-74 Accelerator Pedal Assembly

OER® accelerator pedal assemblies for 1968-74 Chevy II/Nova models. Includes: accelerator pedal, pedal mounting pin, and tension spring, accelerator pedal rod, rod to firewall support, and throttle rod arm.

K519	1968-74	69.99 ea

MADE IN USA

1968-74 Billet Throttle Assembly

Manufactured from solid aluminum, each billet throttle assembly is fully adjustable featuring a uniquely designed molded rubber insert, and spring loaded gas pedal. Assembly is anodized with machined highlights in black. Made in USA.

P145	1968-74	black anodized	290.99 ea

1962-67 Accelerator Pedal Pad

All 1962-67 models were originally equipped with a floor mounted accelerator pedal pad. This OER® reproduction is designed to replace the original exactly. The accelerator pedal ball studs are not included with the pedal, but are available separately if needed.

3820328	1962-67	pedal pad	11.99 ea

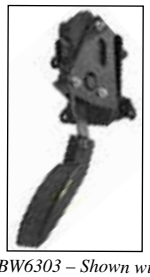

K919 K912

1968-79 Accelerator Pedal Pad

Correct replacement gas pedal which was originally installed in 1968-79 Nova models. This pedal is an OER® replacement part which features the same ribbed design as original. Pedal mounts directly onto the accelerator arm which extends from the firewall. Trim plate sold separately.

K919	1968-79	pedal	6.99 ea
K912	1968-79	trim plate	5.99 ea

DBW6303 – Shown with pedal. Pedal not included.

MADE IN USA

1962-72 LS Engine Drive-by-Wire Brackets

Designed for bolt-on installation, this bracket adapts the popular GM 10379038 or equivalent pedal to your 1962-72 Chevy II/Nova LS engine swap. Remove the factory throttle linkage and bolt-in place for a simple install. Adjustable to accommodate any driver height. Includes black powder coated brackets and necessary stainless steel hardware.

Note: *Pedal assembly not included. Available separately.*

S8521 S8520

Barefoot Pedal Cover

Stomp on it in true retro style with this groovy barefoot accelerator pedal cover. This far out pedal cover takes you back to the psychedelic sixties every time you drive your Chevrolet. Chrome cover mounts over your existing accelerator pedal and is accented in black. Mounting bracket and screws included. While you're at it, you might as well add the matching dimmer switch cover, too. Dimmer cover fits all vehicles with floor mounted dimmer switch.

S8520	barefoot accelerator pedal		22.99 ea
S8521	barefoot dimmer switch		8.99 ea

1962-67 Nova Accelerator Pedal Ball Stud

OER® reproduction ball stud for use with 1962-67 Nova models. 1/4"-20 x 1-1/2". Studs can break after years of use and may need to be replaced. Check your original for wear when replacing the gas pedal linkage. 2 required per vehicle.

4868300	1962-67	reproduction	2.99 ea

1968-79 Accelerator Pedal Mounting Pin

This special mounting pin is just what you need to correct a loose accelerator pad. The special design allows the pad to attach to the accelerator arm correctly and tightly. A common problem which is easy to fix by simply replacing a bent or worn out mounting pin.

368078	1968-79		2.99 ea

1968-79 Accelerator Pedal Tension Spring

An original tension spring which when replaced will allow your gas pedal pad to function properly the way the factory intended. The spring attaches under the gas pedal pad and attaches to the rod assembly promoting the correct tension ratio.

368077	1968-79		2.99 ea

1968-70 Accelerator Pedal Rod

Reproduction of the final link in your Nova models accelerator/throttle activation system. This special rod connects between the throttle arm and the accelerator pedal. For V8 models only.

Brake Pedal Rod Extension

Universal fit pedal rod extension is ideal for firewall mounted brake boosters or under floor linkage when you need a longer rod to reach the pedal. Rod can be cut to your desired length if necessary. Rod measures 4-3/4" overall, 3" on the threaded portion, and thread size is 3/8"-24 on the female end, and 3/8"-24 on the male end. Includes nut. Zinc-plated for corrosion resistance.

Eliminator Floor Mount Gas Pedal

The Eliminator floor mount gas pedal is crafted from billet aluminum and designed to eliminate routing cables through the firewall. It includes an adjustable aluminum splined shaft and stainless steel under the floor cable mounting bracket. Can be mounted in multiple positions for various floor and toe board angles.

Important: *Requires a 36" cut-to-fit Lokar throttle cable. LS1, Ramjet and Vortec applications require a 48" throttle cable.*

1969-72 Plug-N-Chug Drink Holder!

The Plug-N-Chug dashboard drink holder installs in seconds by sliding your ashtray out and sliding the Plug-N-Chug in, in its place. Whether driving to a show or just cruising in your daily driver, you'll find this standard size double drink holder a welcome addition to your cockpit. Best of all, it installs with absolutely no modifications to your vehicle. During the show, simply unplug the drink holder and plug the original ashtray back in its place for an original interior appearance. Upholstered in a variety of colors with automotive grade vinyl.

Note: Specify black, dark blue, dark green, graphite, medium green, orange, or red when ordering.

1958-78 Chevrolet Service/Shop Manual

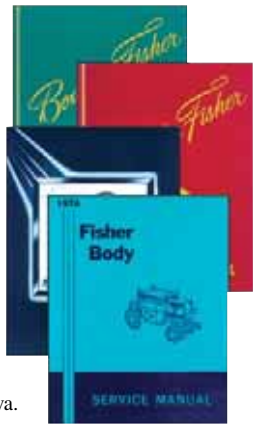

Factory manuals that give all the information you'll need for servicing your Chevy II or Nova. Each shop manual includes procedures for maintenance and adjustments, minor service operations, removal and installation of components (excluding the body) and a wealth of General Motors service operations techniques. If there is one book devoted to the care of your Nova, this is the one! Includes information on other models in the Chevrolet line (excluding Corvette). Whether you own a Nova or another Chevrolet model, these manuals have the important and pertinent information for correct maintenance procedures. Written by General Motors. A must for any Chevy II or Nova owner.

Note: *Some books include overhaul, electrical and Fisher body information. See listing for availability.*

Service/Fisher Body/Assembly Manual Kit

Due to popular demand, Classic Industries® has put together this easy to use restoration/reference kit. This three volume kit includes the most desirable manuals required to completely *rebuild, assemble, or restore* your 1966-72 Chevrolet X-Body. Both enthusiasts and professionals, will find answers to just about any technical question in one or all three of these manuals. The service manual contains information regarding maintenance and adjustment, minor service operations and the removal and installation of the mechanical parts of the vehicle. The Fisher Body Manual includes information on body panels, electrical, stationary glass, convertible tops, headlining, and much more! The assembly manual is a duplicate of the original technical assistance reference guide which was used by the original GM assembly line personnel when the cars were being built. The information is extremely detailed and includes exploded views of many different areas of the vehicle including original part numbers (*which may have changed due to replacement numerical assignments*). This kit is an absolute must for all 1966-72 Nova owners! *Each manual also available separately.*

1968-79 Chevy Nova Interchange Manual

Want to keep your Nova running in mint condition but can't find original replacement parts? This Nova Interchange Manual: 1968-1979 solves the problem. Designed for collectors, repairers and restorers, this specialized muscle manual lists interchangeable part information on every Nova made between 1968-1979. It puts a stop to dead end part searches and high priced replacements. This book saves you time, hassle and money. Use this manual to make part identifications a snap with enhanced images of wheels, wheel covers and front ends. It includes a handy part type chart for quick reference. It even shows you how to use the Interchange Manual to identify the full range of original replacement parts. Softbound, 298 pages, 8-1/2" x 11".

The Interchange Manual gives you more choices. It will tell you that:

- The engine from a 1975 Buick Apollo interchanges with a 1973 Nova.
- The intake manifold from a 1985 GMC Van fits a 1976 Nova.
- The steering gear from a 1980 Skyhawk interchanges with a 1968 Nova.

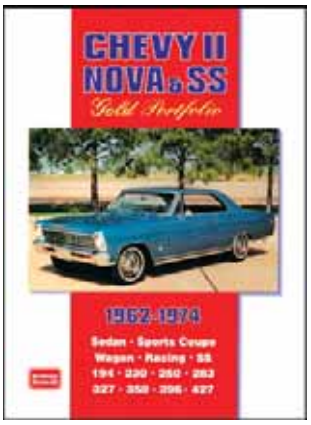

Use the manual to:

- Save time and money on replacement parts by knowing all the interchangeable options available.
- Track down hard-to-find original wheels and wheel covers.
- Verify bumpers, grills, hoods, and lamps, using front end images.
- Check part specifications on any Nova made between 1968-1979.
- Identify exactly the right part to keep your car in original condition - by accessing detail - rich listings and Interchange numbers.

The Nova Interchange Manual: 1968-79 is standard equipment for every Nova owner. Use it to identify exactly the parts you need, at a price you can afford, in a fraction of the time. It's a small investment with a big payoff.

1962-74 Wiring Diagram

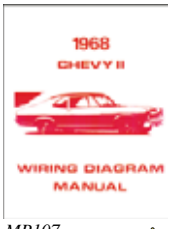

If you are tired of trying to read and decipher black and white wiring diagrams out of your old shop manual, we have a solution! They are available in 2 sizes, standard 8-1/2" x 11" or large 11" x 17". They are laminated back to back in heavy plastic for durability (no more grease smudges) and ease of use. Redo the wiring on your classic Chevy the easy way... in color!

Note: *Add A suffix for large format 11" x 17". *A second wire diagram is required for vehicles equipped with the optional console gauge package.*

Rebuilding the Small-Block Chevy Step-by-Step Videobook

This is a step-by-step workbench book and DVD combination that shows you how to build a street or racing small-block Chevy. Detailed sections show how to disassemble a used engine, inspect for signs of damage, select replacement parts, check critical component fit, and much more! 160 pages, softbound.

L6611 ..... 49.99 ea

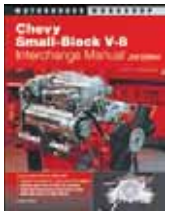

How to Rebuild the Small-Block

This book covers virtually every small block engine. Includes easy step-by-step approach, helps avoid costly and time consuming mistakes, select the right parts, master mechanical tips and the ins and outs of quality machine work. Softbound, 146 pages, 100 illustrations.

L278 ..... 27.99 ea

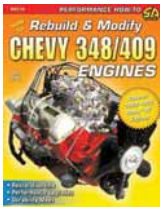

Small-Block Interchange

Cataloging all 1968 to 2000 small block Chevy engines, this manual includes more than 25,000 part numbers, specs, dates and technical details on engine blocks, heads, valves, crankshafts, camshafts, pistons, manifolds, ignition systems, emission systems, and more. Softbound, 176 pages.

L1024 ..... 27.99 ea

How To Rebuild & Modify Chevy 348/409 Engines

Chevy's "W series" 348 and 409 became legends on the street, and the track. While these engines enjoyed pop culture status in the early 1960's, the later Mark IV Chevy big blocks overshadowed these W-engines by the end of the decade. This book provides instruction for rebuilding a stock W-engine as well as directions for a sound performance build. Learn how to select a strong, clean block, the best heads and camshaft, and increase the compression ratio. All options are examined. From mild to wild, from stock to modified, the book covers everything you need to know about the legendary 348-409 engines. Softbound, 8-1/2" x 11", 144 pages, 400 color photos.

How to Rebuild LS Engines

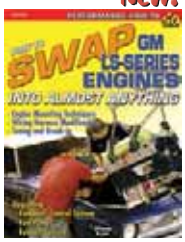

This book details and highlights special components, tools, and other accessories needed to get the job done right. Appendices are packed full of valuable reference information, and the book includes a Work Along Sheet to help you record vital statistics and measurements along the way. 8-1/2" x 11", 152 pages, 604 color photos, softbound.

L975 ..... 29.99 ea

How To Swap GM LS Engines

New!

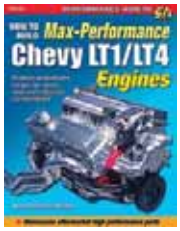

Complete specs, and detailed information so you can select and fit an LS engine. A section on mounting kits, explaining how to install these engines into a variety of cars using readily available motor mount kits, universal engine mounts, or fabricated mounts. 144 pages, softbound.

L1021 ..... 29.99 ea

How to Build Chevy LT1/LT4

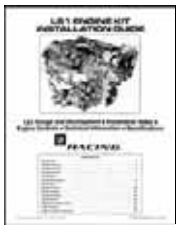

New!

This book guides you through the factory and aftermarket components of the LT1/ LT4 engines, offering sound performance advice and recommendations. Additionally, complete engine buildup recipes are provided, along with their respective horsepower and torque levels. You can follow the advice of experts and achieve targeted results for your own project. Softbound, 8-1/2" x 11", 136 pages.

L1098 ..... 34.99 ea

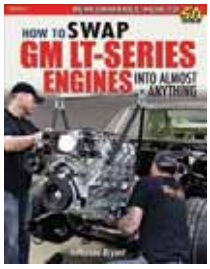

LS1 Engine Installation

This useful publication provides general information on components and procedures that can be extremely useful when installing or servicing LS1 engines. Topics include installation notes, support systems, electronic engine controls, recommended accessories, parts lists and engine specs. Softbound, 36 pages.

G11810 ..... 21.99 ea

How To Swap GM LT Engines

Discover the latest GM swap technology in this all-new, comprehensive LT swapper's guide. 144 pages.

SA411 ..... 32.99 ea

How to HOTROD Big-block

New!

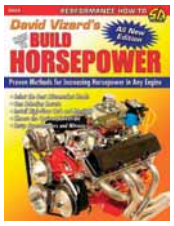

Full coverage is included to show and explain what it takes to blueprint an engine to the exact specifications which will provide the best performance. Lots of photos and illustrations will help make your task easier. Softbound, 162 pages, 8-1/2" x 11".

L75 ..... 29.99 ea

How to Build Horsepower

New!

Proven methods for increasing horsepower in any engine. High-performance street and race engine builders are always looking for the latest techniques and combination of parts to build a better, stronger, more powerful engines. This all-new edition of Vizard's top-selling How to Build Horsepower explains the latest and most effective engine building techniques and strategies. The reader is treated to the secrets and methods for building virtually any automotive engine. Paperback, 8-1/2" x 11", 144 pages.

L606 ..... 29.99 ea

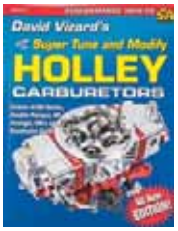

Holley Carburetor Handbook

This handbook covers the fuel inlet system, idle system, main metering system, power system, accelerator pump system, secondary system, choke system, metering blocks, repair and adjustment, and more! Softbound, 6" x 9", 80 pages.

L559 ..... 19.99 ea

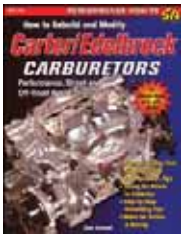

David Vizard's How to Super Tune and Modify Holley Carburetors

Author Vizard explains the science, the function, and the tuning expertise required to get your Holley carburetor to perform its best for your performance application. Paperback, 144 pages, 8-1/2" x 11".

L9658 ..... 29.99 ea

Carter/Edelbrock Carburetors

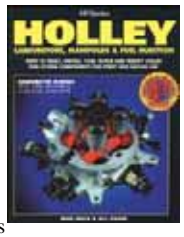

Contains photos, illustrations and diagrams, covering rebuilding, tuning and modifying Carter and Edelbrock carburetors. Also features history on the Carter company as well as the development of the AFB and the AVS since the purchase by Edelbrock. Softbound, 136 pgs, 8-1/2" x 11".

L433 ..... 34.99 ea

Holley Carburetors, Manifolds & Fuel Injection

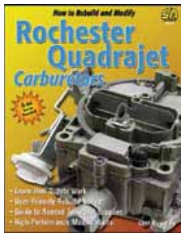

New!

This manual covers high performance and stock replacement 1, 2, and 4 barrel Holly carburetors and Holly manifolds for the street or strip. Also includes sections on the operation and installation of Holley's Pro-Jection fuel injection systems and a special section on Z-28's. Softbound, 8-1/2" x 11", 192 pages.

L40 ..... 29.99 ea

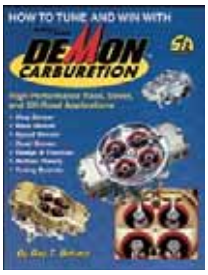

How to Build and Modify Quadrajet Carburetors

The book is a complete guide to selecting, rebuilding, and modifying the Q-Jet, aimed at both muscle car restorers and racers. It includes a guide to selecting and finding the right carb, instructions on how to rebuild the carb and extensive descriptions of high-performance modifications. 128 pages.

L202 ..... 29.99 ea

How to Build Horsepower Carburetors & Intake Manifolds

Small modifications and upgrades can result in large performance gains! Acclaimed technical writer David Vizard provides you with the latest technical updates in regards to Carter, Holly, Predator, Weber, Dellorto and Mukini carburetors plus calibration methods, analysis of different designs, mixture ratios and intake combinations. Paperback, 8-1/2" x 11", 128 pages.

L353 ..... 33.99 ea

Designing And Tuning High-Perf Fuel Injection Systems

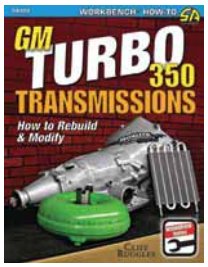

This book goes in-depth on the combustion basics of fuel injection as well as benefits and limitations of standalone. Includes glossary and a special resources guide with standalone manufacturers and test equipment manufacturers. Softbound, 128 pgs, 8-1/2" x 11".

L1062 ..... 29.99 ea

Automotive Literature

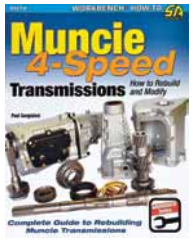

GM Turbo 400 Transmissions

Automotive technical author Cliff Ruggles guides you through the complex rebuild procedure of GM's popular rear wheel drive automatic transmission. With his proven style, Ruggles goes through the step-by-step rebuild and performance upgrade procedures in a series of full color photos. He includes instruction on removal and installation, tear down procedures, parts inspection and replacement, as well as performance mods and shift kit installation. Time saving tips are part of every buildup as well. Paperback, 8-1/2" x 11", 144 pages with 563 color photos.

L1322 ..... 39.99 ea

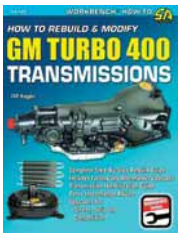

Muncie 4-Speed Transmissions How to Rebuild and Modify

This is an indispensable reference to Muncie 4-speeds that guides you through each crucial stage of the rebuild process. Comprehensive i.d. information is provided, so you can positively identify the cases, shafts, and related parts. It discusses available models, parts options, and gearbox cases. Most important, it shows how to completely disassemble the gearbox, identify wear and damage, select the best parts, and complete the rebuild. Various high-performance and racing setups are also shown, including essential modifications, gun drilling the shafts, cutting down the gears to remove weight, and achieving race-specific clearances. Paperback, 8-1/2" x 11", 144 pages.

L1291 ..... 29.99 ea

How to Rebuild & Modify GM TH400 Transmissions

Millions of GM cars and trucks have been built with Turbo 400 automatic transmissions. This book takes readers step-by-step through the complex transmission rebuild procedure as performance upgrade procedures with a series of full color photos for each of these models. Softbound, 144 pages, 8-1/2" x 11".

L1413 ..... 27.99 ea

How To Diagnose and Repair Automotive Electrical Systems

Details the various tools, such as multi-meters and test lights, that can be used to evaluate and troubleshoot any vehicle's electrical system. Several hands-on projects take readers on a guided tour of their vehicle's electrical system and demonstrate how to fix specific problems. Paperback, 160 pages, 8-5/16" x 10-5/8".

L20990 ..... 27.99 ea

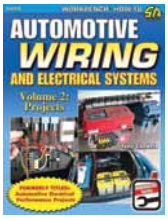

Custom Auto Wiring & Electrical

This indispensable guide to high-performance and OEM automotive electrical systems covers electrical theory, wiring techniques and equipment, custom wiring harnesses for racing, hot rods and restorations, pre-made wiring harnesses, special electrical systems (navigational, audio, video), troubleshooting common electrical problems, dashboards and instrument and trailer wiring. Softbound, 8-1/4" x 5-1/4", 192 pages.

L1056 ..... 29.99 ea

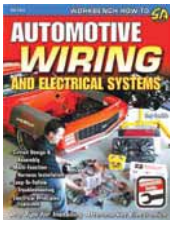

Automotive Wiring & Electrical

In this revised edition brilliant color photos and explanatory step-by-step captions detail the installation of the most popular, functional, and beneficial upgrades for enthusiasts of varying skill levels. Projects included are: maximizing performance of electric fans; installing electronic gauges; upgrading charging systems; and installing a complete aftermarket wiring harness. Paperback, 8-1/2" x 11", 144 pages, 394 color photos.

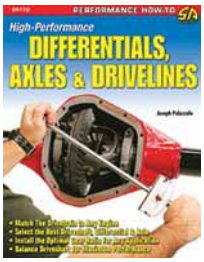

L1323 ..... 29.99 ea

Automotive Wiring & Electrical

The basics of electrical principles, including voltage, amperage, resistance and Ohm's law, are revealed in clear and concise detail, so the enthusiast understands what these mean in the construction and repair of automotive electrical circuits. 8-1/2" x 11", 144 pages, 350 photos.

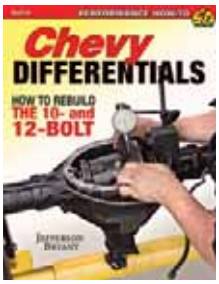

L1019 ..... 29.99 ea

High-Perf Differentials, Axles & Drivelines

All too often, when an enthusiast builds a high-performance engine, swaps a more powerful engine into a car, or mounts sticky tires, the driveline components simply can't handle the added torque and fail. In addition, differential, axles, and driveline parts have a limited life span under the power of a high-performance engine. This book covers everything you need to know about selecting the most desirable gear ratio, rebuilding differentials and other driveline components and most importantly, matching the correct driveline components to engine power output. Learn how to setup a limited-slip differential, install high-performance axle shafts, swap out differential gears and select the best available products for the driveline. Explains rear differential basics, rear differential housings, rebuilding open rear differentials, limited-slip differentials, and factory differentials. Sftbnd, 8-1/2" x 11", 144 pages.

L1063 ..... 29.99 ea

Chevy Differentials: How To Build The 10 and 12 Bolt

In this step-by-step guide, you learn how to completely disassemble the differential, evaluate components, and select replacement parts. You're also shown all of the up-to-date techniques for re-assembling the differential and axle. Informative sections on axle identification and replacement parts are also provided. Maybe you have found a salvage yard unit and want to rebuild it to upgrade your existing vehicle or would like to install an aftermarket 12 bolt assembly for extreme performance or racing. This is the only book dedicated solely to rebuilding, setting up, and modifying these axle assemblies for long service life and maximum performance. If you're going to rebuild a Chevy 10- or 12 bolt axle, this book delivers the essential information to get the job done right. Softcover, 8-1/2" x 11", 144 pages.

L1287 ..... 29.99 ea

Muscle Car Brake Upgrades: How To Design, Select and Install

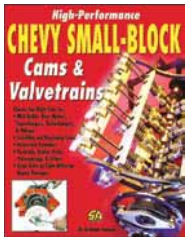

Arguably the only book dedicated exclusively to muscle car brake performance, veteran author Todd Ryden shows readers how to select brake systems for various applications and different budgets. The book covers system design, operation, and component function so you have a clear understanding of all principles. You'll learn how to assess brake system requirements and select brake system kits for many popular muscle car applications form aftermarket brake leaders including Baer, Wilwood, and CPP. Paperback, 144 pgs,8-1/2" x 11".

L1574 ..... 29.99 ea

High-Performance Chevy Small Block Cams & Valvetrains

New!

Graham Hansen, takes the mystery out of camshaft and valvetrain function, selection, and design. This book covers rocker arms, lifters, valves, valvesprings, retainers, guideplates, pushrods, and cam drives, as well as detailed information on how to degree a cam and choose the proper cam for your application. Finally, matching cams to cylinder heads, analyzing port flow, and proving it all through dyno-tests round out this informative volume. Softbound, 8-1/2" x 11", 144 pages.

L193 ..... 39.99 ea

The Yenko Era

This book by Yenko family friend Mark Gillespie sheds new light on the life and times of legendary racer, car dealer and car builder, Don Yenko. The small buildings that stand today where the Yenko plant once built cars are proof that a small operation can have a huge impact with Yenko changing the business of cars and racing forever. Family photos, invoices and letters paint a picture of the man who created the Yenko sports cars and follow his exploits as a businessman and a racer until his tragic demise in 1987. A must have for any Yenko enthusiast.

1973-74 Deluxe Windshield Heat Shield

The UVS100 Ultra-Violet heat shield helps reduce interior temperature and protect from damaging sun rays that come through the front windshield. One side is colored reflective fabric and the other side is finished in soft Pellon felt. Both fabrics are laminated to a foam core board which acts as an insulator to help reduce heat buildup. Heat shields are easy-to-use. Produced using pre-sewn panels that quickly accordion fold for handy storage. There is no hardware or hassles, simply fold and position across the windshield surface, then fold the sun visors down to hold the shield in place. Optional heat shield storage bag is available in correct size for each.

Note: Specify color when ordering.

OER® "Secret Formula" Clay Bar System

Clay pulls out all the contaminants you cannot see, but that you can definitely feel, like industrial fallout, rail dust, and brake dust. These contaminants may cause patches of paint to appear dull, even after waxing. As these contaminants oxidize, they create rust spots within the paint. Clay bar will remove these contaminants and leave the surface silky smooth with a mirrorlike smooth finish. Our clay will not break or deteriorate into small particles like inferior low quality clay bars. Acts as a magnet to foreign particles, literally pulling the paint fouling grime away from the surface of the paint. Clay lubricant is essential to the performance and safety of clay. It provides the necessary slick surface for clay to glide on.

OER® Premium Metal Polish & Sealant

OER® Extreme Shine Metal Polish & Sealant cuts through layers of dulling oxides to restore a wet mirrorlike finish that outshines chrome. This outstanding polish makes chrome, copper, brass, aluminum, stainless steel and other metalwork gleam and look their absolute best. Spreads on with ease, buffs off with little effort. Great for oxidized metals and even light rust. Can be easily applied in the shade or sun. Leaves virtually no smear, dust, or powder. Utilizing friction and heat OER® Extreme Shine Metal Polish cleans, restores, revives and polishes. Friction generates heat that allows the product to break down into a micro-fine polish that leaves the surface shining like a mirror. During the final phase, it breaks down to release the durable protective sealant that bonds to metal surfaces reducing corrosion and prolonging shine. Use by hand with a polisher or with your polish ball and drill.

K89483 16 oz. bottle 17.99 ea

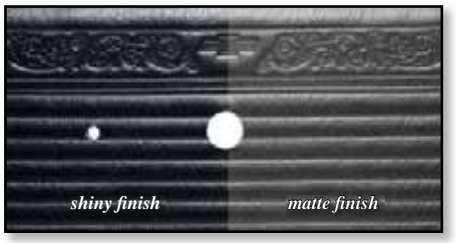

OER® "Secret Formula" Acryli-Shine Glaze

K89620 K89621

Glaze is a polish without any cleaning properties used primarily to improve the shine and clarity of paint. Primarily used by body shops for finishing jobs or by detail shops to bring out the brilliance of paint, glazes are also commonly used on show vehicles to achieve a "high luster or wet look". Your moldings will not turn white. Glazes do not replace polishing. If a surface has minor swirls and imperfections, to achieve the best superior results, the surface should be polished with a polish first.

K89620	32 oz. bottle	24.99 ea
K89621	1 gallon	54.99 ea

Ice Super Shine High Gloss Dressing

K89521 K89522

The Ice Super Shine Dressing is a thick silicone rich dressing that leaves a super high gloss, long-lasting shine on tires, rubber molding, vinyl, and plastic. This dual action premium dressing leaves surfaces 100% dry to the touch and shining better than new, while protecting the surface against dirt, dust and harmful UV rays.

with Diamond Finish

DiamondFinish Clear Coat

DiamondFinish Gloss Clear Top Coat is a permanent, moisture cured, UV stable coating primarily used for top coating surfaces previously sealed with RustSeal, for top coating direct to metal, or to coat over any other paint/primer application. The clear coat formula can be applied direct to metal or over other coatings. This high gloss clear coat remains permanently flexible and is able to perform in the toughest environments without yellowing, cracking, or peeling. Apply directly to painted surfaces with minimal surface prep. Incredibly tough and hard like no other clear coat on the market. Can be applied with a brush (without leaving any brush marks), roller and conventional spray gun. Unlike two part coatings, no hardener is needed with DiamondFinish. Just stir and go. DiamondFinish clear coat will cure without heat or UV lights in temperatures from 50 to 86 degrees Fahrenheit. Able to withstand the harshest of chemicals including fuels, solvents, battery acid, brake fluid, Ethanol, Methanol, MEK, Hydrochloric Acid, fertilizers, and Acetone. Graffiti resistant: because of its chemical resistance, graffiti just won't stick and can be removed simply with a solvent soaked rag. Great for high temperature automotive applications including the use on cylinder heads, engine blocks, brake components and even inlet manifolds, without yellowing up to 300 degree Fahrenheit.

RustSeal Corrosion Barrier Coating

RustSeal is a superior one part, ready-to-use, high-solids content, rust preventive, corrosion barrier coating. RustSeal flows out to a beautiful, rock-hard, tough ceramic-like coating that is tough to chip or scratch, and will not crack or peel. RustSeal is an incredible, single component, ready-to-use, high solids content, rust preventive coating with exceptional sealing properties. RustSeal is the most permanent cost effective solution for stopping rust and corrosion anyplace where it is a problem: home, automotive, industry, fleet, farm, and more! RustSeal is an enhancement that lasts. Water and air are locked out, therefore oxidation, the precursor to rust, cannot take hold. RustSeal is not intended for use as a final finish. After removing or treating rust on floors, subframes, or other under vehicle components, RustSeal Corrosion Barrier Coating works by isolating the surface from moisture and oxygen. This single component, high solids, rust stopping coating seals out the ultimate causes of rust, creating a rock hard non-porous barrier between the metal and rust promoting elements. Will not crack, chip, flake, or peel, and no hardeners or activators are needed. RustSeal is completely unaffected by salt, gasoline, oils, battery acids, hydraulic fluids, solvents, chemicals, or corrosives.

BEFORE APPLICATION ***AFTER APPLICATION***

Shared Benefits:

- Easy spray-on application
- Continuous protective moisture barrier
- Fast clean up with soap and water
- Environmentally friendly solution
- Applicable to interior or exterior of vehicle
- Non-toxic and class A fire rated
- Both are paintable
- Coverage is approximately 50 ft²/2 gallons

Sound Control Benefits:

- Provides non-combustible thermal insulation
- Able to withstand temperatures up to 500 degrees F
- Interior temperature reduced by 30 degrees F
- Offers a protective, seamless membrane

Ceramic Insulation Benefits:

- Protects surface from moisture and rust
- Dampens annoying rattles and road noise
- Impressive damping to weight ratio
- Coating can withstand temperatures up to 300 degrees F

Sound Control and Ceramic Insulation

Get the comfort of premium grade insulation without the extra weight! These environmentally safe formulas from LizardSkins can be used as a one part coating or as a two stage system for a cooler, quieter driving experience. The Sound Control formula dampens unwanted engine and road and noise, while the Ceramic Insulation formula cools your vehicle up to 30 degree F or more creating a more comfortable ride. Designed for floors, roofs, firewalls, fenders, transmission tunnels, door panels, trunks, and more, all at a combined cured weight of 52 lbs for four gallons. Insulating a vehicle has never been this easy, thanks to a custom designed application gun made specifically to handle the thick density of the coatings with ease. Order the individual components or buy a complete kit and save!

Important: For two stage applications, Sound Control coating should be used as the base. Four gallons of each coating are required to encapsulate a typical interior and trunk area of 1 vehicle, and 1 gallon of Sound Control when applied as undercoating.

OER® Premium Quality Aerosol Interior Paint

OER's revolutionary formula provides 40% more coverage than standard dyes and lacquers, and actually penetrates and molecularly bonds to the surface to permanently seal in the color. Dries to the touch in 45 seconds, forms a complete bond in just 10 minutes. UV stable and color fast, it will not crack, flake, or peel. For use on vinyl, leather, ABS plastic, polycarbonate, polypropylene, polyurethane, acrylic, lexan, fiberglass, and recycled plastics. When only the best will do, use OER® Premium Quality Interior Paint. Available in your choice of a convenient 16 oz. aerosol can (net wt. 12 oz.).

Note: *Shipped within the continental U.S. only. Shipped ground only.*

OER® Metal Mimic FX Coating

OER® Metal Mimic FX high-performance coatings were developed to mimic the appearance of bare metal so that you can refinish and protect all of the components that were originally left unpainted by the factory. Items such as cast iron housings, aluminum housings, stainless steel parts, galvanized parts and even chrome can now be coated with a "factory correct" looking finish that is extremely durable and amazingly close to the original color.

Note: Ships ground only. No air shipment.

OER® Factory Black Coatings

OER® factory black coatings are available in a variety of sheen levels to help you achieve the correct factory look for your restoration. Our Ultra Flat sheen is an extremely flat non-glare finish. The next level up is our low gloss formula followed by the semi-gloss and finally our exclusive high gloss formulation. Whatever you are spraying, we have the correct sheen for an original factory black look.

Note: Ships ground only. No air shipment.

Factory Black Set

Buy the complete OER® Factory Black set and you will have all the necessary sheen levels for a correct factory look no matter what component you are spraying.

K89550 4 can set – all four sheens ..... 59.99 set

Ultra Flat Factory Black

Extremely flat non-glare finish that is perfect for a variety of uses including underhood items. Provides a durable flat black zinc phosphate look without the high cost of black zinc phosphate plating.

PM0305

Frame, Engine, and Body Marker

Auto makers use these permanent markers to write codes and numbers on frames, engines and body components. Engine suffix codes were often written on the back of the cylinder heads. Job numbers were written on the firewall, frame, engine and other components to assure the correct vehicle was being built according to the build sheet. These permanent paint markers will help you exactly duplicate the factory original marks.

OER® Aerosol Coatings

OER® Rubberized Undercoating

A black, rubberized undercoating for all automobile under surfaces. Sprays evenly and dries completely to a smooth consistency. Can be top coated with any type of automotive finish. Prevents rust, reduces road noise, seals out water, fumes, road chemicals, and dust. Special formula greatly reduces lingering odor associated with most other brands of undercoating. No "bleed through" when top coated. Use on undersides of panels, hoods and deck lids, trunk interiors, section repairs, weld joints, rust holes, or on chassis parts. 20 oz. aerosol can (net wt. 18 oz.) or buy a case and save!

Note: Ships ground only. No air shipment.

K89570	20 oz. can.....	24.99 ea
K89669	case of six cans	119.99 cs

OER® Black Wrinkle Finish

A durable and long-lasting finish which has a unique wrinkled texture. Excellent hiding qualities provides an excellent finish for hiding surface imperfections such as pitting, scratches, or chips. Extremely durable formula resists oil, gas, and grease. Can be used where harsh conditions break down conventional coatings. Comes in 12 oz. net wt. aerosol can. Great for valve covers, air cleaners, dash components, and more. 16 oz. aerosol can (net wt. 12 oz.) or buy a case and save!

Note: Ships ground only. No air shipment.

OER® Spray Galvanizing Weld-Thru™ Coating

A smooth, cold galvanizing compound that chemically fuses to bare steel and forms a extremely rust resistant barrier. Perfect for application on the inside of newly installed panels where rust prevention of new metal is important, but where the part treated will not be painted. Fast dry, sag free spray that is abrasion resistant. Stops rust creepage, resists chemicals and is rust inhibitive. Apply it to sheet metal pieces before installation, then weld as usual. The coating will not affect the quality of the weld, and will retain is rust preventative properties. Available individually in 12 oz. cans or in case of six.

Make a Big Statement
with Die-Cast Air Cleaner Emblems!

Install these beautiful chrome-plated die-cast emblems for an upscale custom look for your big block Nova! These emblems capture the appearance of the air cleaner decals originally installed on big block vehicles of the era. Manufactured from die-cast metal, these colorful triple chrome-plated emblems are specifically designed to fit the contours of the stock 1967-73 big block 14" diameter open element air cleaner lid. Installation is simple! Each emblem is adhesive backed for simple "peel-and-stick" application.

Air Cleaner Decals

Restore your Chevy II or Nova back to it's original condition with Classic Industries® reproduction air cleaner decals. Each decal is reproduced to exact dimensions including the correct Mylar chrome edging utilizing pressure sensitive crack and peel backing for easy installation. Always be sure to clean the entire surface before applying the decal to air cleaner. Early Nova models equipped with "396" engines require 2 decals on the air cleaner, a Cross Flags decal and a Turbo-Jet decal with the appropriate horsepower rating.

DC109

Turbo-Thrift Decal

Applies to air cleaner lid for models that included 6 cylinder engines.

1968-79 Emission Decal

These decals were applied to the radiator support and denoted the engine tuning specifications and instructions as well as emission information (when applicable). These decals are pressure sensitive with a "peel and stick" backing. On vehicles equipped with air conditioning, the decal is applied to the radiator shroud. On vehicles without air conditioning, the decal applies to the radiator support between the center of the radiator support and the driver side radiator support brace.

Important: *The location of the decal may vary depending on the year.*

Berger Chevrolet Prescribed Power Decal

This is a reproduction of the now-rare "Prescribed Power" decal that was originally applied to performance vehicles delivered by Berger Chevrolet in Grand Rapids, MI. This logo features a hot rod V8 with zoomie pipes and velocity stacks in a pharmacist's mortar bowl below the "Prescribed Power" headline. This decal displays the Berger dealer logo on one side of the V8 and the Chevrolet Bow Tie logo on the other, over a red bar with "GRAND RAPIDS, MICHIGAN" printed in white centered on the bottom of the red bar.

Decal Application Cleaner Gel and UV Protectant

33910

Don't make an expensive mistake by trying to put on your decals the hard way! Help ensure a safe application by a proper preparation of the vehicles painted surface with Pre App® surface cleaner. The Slide-on® Application Gel is specially formulated for applying automotive stripe kits by eliminating air bubbles and helps temporarily overcome the tack of pressure sensitive materials during installation. Slide-over® UV Protectant was designed to give an optically enhanced appearance by repelling dirt, oils, tree sap, smudges, and stains.

Note: Applicator is not included.

Weatherstrip Kits

Bring your weatherstrip back to original factory condition and improve the overall look of the vehicle while maintaining originality with Classic Industries® replacement sets. After many years of use your original weatherstrip can deteriorate or simply rip in the most crucial areas. When this happens, small leaks will begin to enter the interior compartment or trunk area causing rust and the need for expensive sheet metal replacement.

Although each item in this kit can be purchased separately, we recommend replacing all the weatherstrip on the vehicle at one time. If you are painting the vehicle or simply replacing worn out parts, the weatherstrip is one of the first places to check. Each weatherstrip product is manufactured to factory specifications and will fit properly and function exactly as designed.

Note: *Image is for illustration purposes only and does not indicate completeness of kits.*

2 Door Hardtop Kit:
- LH and RH door weatherstrip
- LH and RH roof rail weatherstrip
- LH and RH vent window seals
- LH and RH U-shape door jamb seals

Emblem and Trim Adhesive

Applying metal and plastic emblems and trim requires an adhesive that creates a permanent bond that won't loosen over time. 3M Plastic Emblem and Trim Adhesive creates a strong adhesion that resists environmental exposure such as water and heat. Quick-acting adhesive sets in about 15 minutes and fully cures in 24 hours. Adhesive dries clear and can also be used for bonding transparent or translucent plastics.

Multi Wedge Prying and Scraping Tools

Multi Wedge is an amazing automotive restoration tool that will replace screwdrivers, pry bars, and all other metal tools that can cause damage and marring to delicate surfaces! The soft, orange wedge set and the jumbo wedge are made from a high tech, specially blended polyethylene that is incredibly ductile so they won't break or snap. The hard, black wedge set is made from a high tech, specially blended polycarbonate for the heavy-duty jobs like oil pan covers, timing covers, or valve covers. Each 3 piece set includes: one 4" curved end, one 4" straight blade and one 3" straight blade. Buy both sets and save! The jumbo wedge is 14" in length and 2" wide, making it perfect for the big jobs.

T2300M (7 piece)

T2302

Soft Duty – Delicate prying or wedging

Medium Duty – Sturdy prying or wedging

Heavy-Duty – Very strong and durable

Prying and Scraping Tools

Available in 3 different fiberglass reinforced plastics, the soft duty tools are good for jobs where a minimum amount of force is needed to remove objects. The medium duty tools are better for the objects that require a little more force to remove, and the heavy-duty tools are for the objects that are real stubborn and just do not want to be separated from their current position. All these tools are strong enough to pry yet soft enough to do interior and exterior automotive jobs without the damage that metal tools can do.

Premium Auto Trim Removal Tool Kit

This 11 piece kit was designed for the removal of door panels, dashboard, trim strips, interior panels, and window moldings. Made of impact resistant plastic that will not mar surfaces like metal tool will. Included for the tools is a heavy-duty nylon pouch.

TX2684	11 piece	23.99 ea

Glass Molding Clip Installing Tool

Reduce the risk of chipped glass and scratches by using this handy tool for replacing your front or rear window glass molding. This tool is specifically designed to fit trim clips over the studs and virtually eliminates glass breakage.

A13574		37.99 ea

Weatherstrip Ball End Hook Tool

This hook tool has a small, round steel ball on the end. Once the steel ball is inserted down into the rubber gasket, it is very difficult for it to come out. If it should slip out of the gasket, there is less of a chance you will scratch the paint of the vehicle.

153823		14.99 ea

Glass Seal Rope-In Tool

Use the rope in tool when working with rubber gasket set glass. The unique counter grip plastic handle injects the rope through its stem as it is pulled around the gasket. There is plenty of enough durable rope to fit around even the largest truck window.

153813		19.99 ea

Universal Molding Release Tool

The ultimate tool for cleanly releasing moldings. Slide tool left or right under the molding until it hooks a retaining clip, then just rock the tool with a twist of the wrist to release the clip. Heat treated, high carbon steel.

1962-67 Molding Clip Retaining Nut

OER

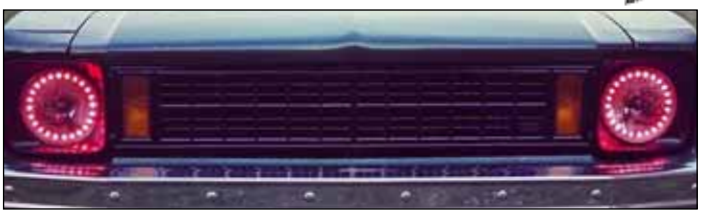

Reproduction capped style stud and clip nut designed to protect the owner from accidently cutting hands when reaching into areas like the trunk where the rear molding clips could cause harm. Most commonly used for rear quarter or trunk moldings on 1962-67 Chevy II/Nova models. Attaches to the molding studs.

Black Illusion

color options for multi-color halos

Round Headlamps with LED Halo

RedLine LumTronix headlamps allow 50% more light to shine through thanks to their crystal clear lenses and a special side lens that extends past the retaining ring. This side lens is a true safety innovation and was designed to provide additional side light and increase visibility. Each headlamp features a Euro style diamond cut reflective base, diamond crystal glass, and a heat resistant composite housing. Even though no paint or tint is applied to the glass or reflector, the Black Illusion headlamps look blacked out when off thanks to the halo and lamp shields that are painted black. Headlamps are available with or without a halo, either single color halo (white) or multi-color halo (with 16 selectable colors plus the ability to adjust brightness), with or without turn signals and your choice of clear or blue H4 Halogen bulbs or H4 LED bulbs. The halo or "Angel Eyes" can also be wired as a daytime running lamp and features 23 low temp LEDs with a 100,000+ hour life, along with "fade", "flash", "strobe", and "smooth" modes that you can choose with the included wireless remote. Headlamps plug directly into your stock harness for a simple and easy installation. Each pair includes: 2 headlights, 2 bulbs, dust boots, ceramic tip pigtail harness adapter, and instructions. Multi-color halo sets also include the RGB harness and wireless remote.

Important: *Will fit most vehicles (cars, trucks, motorcycles and motor homes) made from 1936 to 1979, as well as many vehicles made after 1979 that use a universal round style headlight.*

Note: *Blue Halogen bulbs are blue in color when off, and bright white when on (no blue tint). Clear Halogen bulbs are clear in color when off and bright white when on. LED bulbs include colored film to change the look and temperature color of your lights.*

H4 LED Headlamp Bulbs

Upgrade your stock Halogen bulbs with a pair of premium LED headlamp bulbs from RedLine Lumtronix. With a 50,000 hour lifespan, you won't have to change the bulbs as frequently, meaning you'll spend more time on the road than in the garage. Each bulb is 300% brighter than your stock Halogen bulbs as well as a direct fit, "Plug and Play" upgrade that requires no modification to your electrical wiring. LED bulbs include colored film to change the look and temperature color of your lights.

LED7 Projector Headlamps

Dapper Lighting 7" LED projector headlamps provide the classic look while substantially upgrading the quality and spread of light. These replacement bulbs feature OE style glass lenses, Bi-LED projectors, and a slim flat base design (3.2" deep without bulb). These features eliminate the extra wiring and bucket modifications associated with HID lighting. They offer a quick and clean install and a significant increase in performance, reliability, and safety. Available with chrome or black housings and with or without halos. The halos are available in solid, dashed, and HDR styles.

Note: *RGB halos require a controller sold separately.*

United Pacific

Halogen Headlight Pigtail

Universal replacement heavy-duty 3 wire headlamp plug will replace the original plug on most vehicles equipped with dual filament low/high beam headlamps that require a standard classic 3 prong connector. Each pigtail is widely used on many various applications. Check your original pigtail socket to determine the 3 prong design. The 3 blade connector plug includes 3 high heat resistance nylon wires in black, green, and red color skin. Will require cutting and splicing to install into the original wire harness.

H49003	.....	6.99 ea

PAINLESS

Halogen Headlamp Harness

To get maximum power from your headlamps, it is recommended to have the shortest possible distance between the power source and the bulbs. Resistance in small gauge wire or in the switch will lower the output at the lamp. Be Safe! Our headlamp harnesses draw power directly from the battery, through a relay, to the headlamps, providing full power to your Halogen sealed beams. They can also be used to relocate headlamps to a remote location. They are made with TXL high temp wire, weather resistant 30 amp fuse, and two 40 amp weather resistant relays capable of handling up to 150 watts. #30816 is for use on vehicles with a 2 headlamp system using dual filament sealed beams. #30817 is for use on vehicles with a 9005 and 9006 bulb on each side.

EH002

Headlamp Wiring Harness Upgrade

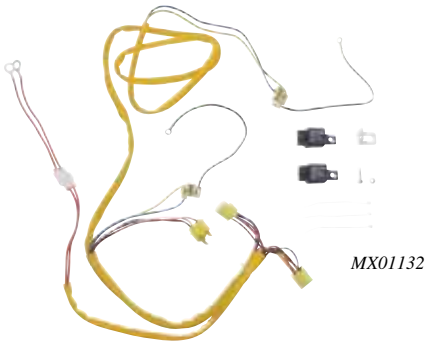

Redline Lumtronix wire harness kit upgrades the stock headlamp wiring on your vehicle to provide your new bulbs with maximum power and decrease the chance of overloading the stock wiring and connectors. Power will be drawn directly from your battery, eliminating voltage drops and ensuring headlamp system reliability. The upgrade kit installs easily in 5-10 minutes without any cutting or splicing. Simply plug into your factory headlamp sockets, attach positive connectors to battery terminal and ground wires to the body of your vehicle. Two 30 amp relays provide added protection for your headlamp switch and wiring harness.

1962-78 Headlamp 7" Round Spacers

Need more room behind your headlamp buckets? Use these 3D printed headlamp spacers to move your headlights forward, and give yourself the needed room. Using larger spacers may require longer screws for your headlamp mounting rings. Please use caution as overtightening or unequal tightening as these screws can stress the headlamp glass to the point of breaking. The spacers are made with automotive grade filament: ASA (Acrylonitrile-styrene-acrylate) which is similar to ABS plastic but with increased UV protection for improved durability.

1968-69 Vigilite Fiber Optic Lamp Bezel

While most of today's vehicles have a lamp monitoring system, during the late 60's and early 70's Chevrolet offered this system as optional accessory. This system included a chrome bezel, which was attached to the top of each front fender. This chrome bezel housed a fiber optic cable with a lens that indicated whether or not your headlamps or turn signals were lit and operating properly. This ultra rare option was found on very few 1968-69 models. This is the outer chrome bezel assembly that was used with this system, which can be used on either fender.

Note: *The Vigilite system was also used on some other 1968-70 GM passenger cars, including Buicks and Olds.*

1966-72 LED Park Lamps

This is the latest in park lamp technology! These direct replacement LEDs for your factory park lamps exceed the requirements for brightness using very high intensity, wide angle LEDs. An exceptional way to increase visibility and add a cool aesthetic touch to your Nova! The LEDs are arranged to compliment the original lens facets and provide the best light output. Diffusion material is added for an even distribution of light and to help eliminate or minimize the spottiness that happens with LED lighting to give you a smoother, more natural look.

Note: *Lens and housing are not included.*

1968-74 LED Multiple Pattern Sequencing

Animate your taillamps and make your Nova stand out! These LED panels feature a self-contained microprocessor and circuitry to enable multiple sequential lighting patterns. Make the light pattern flow at various speeds from the center of the vehicle outwards, from the center of the lens outwards, and more! Each set offers nine different patterns. Made in USA. Taillamp housings are not included.

Important: *All panels require a low current LED flasher.*

DD160 1966-67 ..... 180.99 set

1968-69 LED Taillamp Upgrade

Update your 1968-69 Chevy II/Nova's taillights with new LED technology. LEDs are far brighter than incandescent bulbs, light up in less than .05 seconds, use less energy and last much, much longer. Since they are brighter, illuminate instantly and are visible from farther away, LED taillamps are not only a significant safety upgrade for your vehicle, but also give your car a clean, modern look when the brake lamps are lit. These LED circuit boards are easy-to-install. Simply splice into the factory wire harness and the LED arrays fit neatly beneath the stock lens, providing a stock look when the taillamps are off. Because this upgrade is "invisible", it appeals to owners of both modified and restored vehicles. Set includes: two LED arrays, electrical harnesses, connectors, and all necessary brackets and mounting hardware.

500875

1968-72 Sequential LED Taillamps

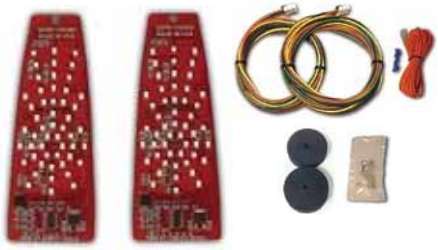

This is the latest in taillamp technology! These LED replacements for your factory taillamps fit perfectly behind your factory lens and bezel, and are far quicker responding and much brighter than DOT requirements! These sets use very high intensity, wide angle LEDs for an exceptional way to increase visibility and add an extra aesthetic touch to your Nova. They provide two modes of operation, standard or sequential. The sequential mode gives you a unique cascading affect that will really get you noticed! Changing modes is as easy as flipping a switch on the back of the circuit board. Every light circuit board is specifically designed to use the maximum area of the housing. The LEDs are arranged to compliment the original lens facets and provide the best light output. Diffusion material is added for an even distribution of light and to minimize the spottiness associated with LED lighting for a smoother, more natural look. These are to be spliced into the rear wire harness. Includes everything needed for a perfect installation. Each set will convert both LH and RH taillamps. Taillamp lenses and housings are not included and can be purchased separately if necessary.

Note: *This is the taillamp circuit boards only.*

1966-74 Sequential LED Taillamps

Everyone knows the latest and greatest thing in taillamp technology is LED lighting. Update the look of your 1966-74 Nova with these LED replacements for your factory taillamps, which fit perfectly behind your factory lens and bezel. These taillights offer two modes of operation: standard and sequential. The sequential mode gives your a unique "cascading" effect that will really get you noticed! Changing modes is a breeze, just flip a switch on the back of the circuit board. These taillamp circuit boards include wiring pigtails, which are to be spliced into the rear wire harness. Includes everything needed for a perfect installation.

Important: *A no-load flasher part #2000021 is recommended for vehicles upgrading to LED's.*

New! Universal LED Fog Light Kit

The Delta 220 Series easily adapts to any application with its 8" x 4" rectangular light design. It is built tough with a 20 gauge steel housing. The sensible shape and adjustable mounting allow this light to look great when mounted above or below the bumper. The photo-metrically precise lead crystal lens focuses the light on the road. These lights are an energy efficient, high powered upgrade to low wattage factory standard fog lamps. This lens is the amber fog version, providing low wide angle peripheral coverage. Made in USA.

1962-77 Insulator and Cover Set

Precut, ready-to-install insulation panels, and cover! AcoustiHOOD insulator and cover sets by Quiet Ride are designed to help stop the vibration of the hood skin, thus reducing the transfer of airborn noise into the passenger cabin by 20-25%, or 3 decibels. It also covers the hood structure with a high temperature ABS panel to finish off the engine bay. These panels will regularly tolerate temperatures up to 250 degrees F.

Important: *Does not fit cowl hoods. For best results and air flow, maintain at least one inch or more of clearance between the surface of the hood cover and the engine components. Hood not included and is available separately. Set also includes a drill stop sleeve and drilling instructions in case drilling is required. Quiet Ride Solutions attempts to use existing hood pad mounting holes. Drilling may be required if never equipped. For non-metallic hoods (such as fiberglass or carbon fiber), hood magnets will be used to retain the hood cover, and will need to be glued into place.*

Note: *Please specify 2 digit logo code when ordering. Shipped double oversize and ground only (no air shipments) due to aerosol spray adhesive.*

DM11102

Universal Hood Insulation

Dynamat hoodliners will protect your vehicle's paint and reduce irritating underhood noise. Made from 3/4" acoustic sound soaker foam with a reinforced, aluminized skin that is oil and water resistant. The hoodliner has a high tack pressure sensitive adhesive for easy peel and stick application. For those who prefer black, there is also Dynaliner, which boasts the highest heat blocking properties available in a single layer synthetic foam. Dynaliner is available in 1/4" and 1/2" thick. Use the thickest one your space will allow. All hood insulation sheets measure 32" x 54".

Adjustable Hood Prop

Constructed of high-quality aluminum and stainless steel, these adjustable hood props offer great looks as well as functionality on your ride. When the hood is raised, the hood prop will automatically lock itself into position. A quick release allows the hood to be opened to its max for easy engine access. A three position and a six position option allows the hood to be set at various levels. Each level of the 6 position prop increases the opening of the hood by approximately 6". Each level of the 3 level prop increases the opening of the hood by approximately 12". They also works great for cooling your engine in the staging lanes.

MADE IN USA

1968-74 Two-Speed Hidden Wiper

Our wiper system is a modern, high-quality replacement for the old system. It is the only replacement wiper system that is completely hidden, fitting entirely within the airbox in the cowl! This allows you to remove the stock wiper motor. The wiper motor hole in the firewall can be covered up with the cover plate supplied in the set or you can weld in a patch panel to eliminate the hole entirely. Perfect for Pro Street cars or if you just desire a clean looking firewall. For models with concealed wipers.

Important: *Very minor modification is required to run the wiring through the firewall.*

1962-67 Wiper Motor

A true bolt-in replacement for your 1962-67 Chevy II/Nova model. The Clean Wipe Wiper Drive for the 1962-67 Chevy II is a high tech motor replacement for the OE. electric motor. Using an extremely heavy-duty factory tested 2-speed motor that is smaller than the original, giving you more room for that big block motor or aftermarket ignition system. The set mounts in the factory mounting position, hooks up to the original linkage and transmissions, and includes all the mounting hardware.

1966 Nova

1969 Nova

1977 Nova Concourse

black white dark green buckskin

1962-79 Nova/Chevy II Vinyl Top

Reproduction vinyl tops for 1962-79 Chevy II/Nova models are manufactured using the finest quality Levant grain vinyls for the ultimate in originality. The seams are sewn with Dacron bonded thread and then dielectrically heat sealed as original for a truly authentic appearance. There are two types of seams were used for certain years: 1) Heat sealed seams which are stitched seams then folded over (stitching is not exposed) 2) French stitched seams which are double stitched on the top (stitched seams are exposed). French seams go down the center of the roof and the heat sealed seams go along the sides. Replacing your original vinyl top will make your Nova look showroom new once again. Classic Industries® recommends professional installation for best results.

Important: Each vinyl top is precut for the rear window and pillar post areas. All models used moldings to finish the lower rear edge of the vinyl top and will need to be cut and trimmed to fit the specific vinyl top moldings for each year. Be sure to check the design and placement of the moldings before trimming and gluing the top to ensure accuracy.

Note: Tops are full tops, must be trimmed to fit for vehicles with half tops. Can be used on hatchback models.

R5254

1962-79 Outer Door Handle Push Button

This set includes the LH and RH door handle push button assemblies. These high polished chrome buttons include: the chrome thumb knob, attachment rods, tension springs, o-ring gaskets, and button retainers for easier installation.

Note: *On some models the push button retainer flange may require minor trimming in order to fit correctly on the inner retainer at the back of the outer door handle. This was due to minor variances between GM divisional suppliers.*

R5254	1968-79	.....	10.99 set

OER

1962-79 Door Handle Push Button O-Ring

This door handle o-ring is one of the most overlooked replacement parts on any vehicle. The o-ring inserts onto the outer door handle push button and eliminates rattling and wear between the handle and the push button. Manufactured to factory specifications and installs on 1962-79 Chevy II/Nova models. Sold individually.

SECTION H

BODY COMPONENTS

Important Information Before Attempting to Install Sheet Metal!

Regarding Minor Imperfections in Panels:

The sheet metal you receive may have scratches, dings, small dents and other minor imperfections which are considered normal sheet metal characteristics due to the nature of the product. These minor imperfections will be easily corrected during the filling, priming and sanding phase of your sheet metal installation. Classic Industries® does not consider dings, scratches, minor dents or other imperfections on the sheet metal to be defects in the panel nor are they considered damaged. All sheet metal panels will require some sort of preparation and manipulation during installation. Every panel that we sell is inspected and then carefully packaged to protect against damage that may occur during transit.

Test Fit All Panels Prior to Paint and Installation:

Classic Industries® recommends test fitting all sheet metal panels prior to final paint and installation. Minor modifications including elongating mounting holes, adding additional shims, etc. are normal and may be necessary when installing sheet metal. It is important to note that hard driving conditions, like racing, can twist bodies and frames out of original tolerances. Poor body work from previous collisions can cause problems with the body structure that the panels are attached to. Some vehicles were manufactured with a unitized body (no frame) thus causing even the most minor accident to twist the body creating a situation that would cause sheet metal panel misalignments. Take into consideration that tolerances on classic vehicles are not nearly as exact as they are on modern vehicles. This is primarily due to the hand fitting of panels at the factory on most antique and classic cars as opposed to the robotics used in today's modern factories. All of these factors will affect the way your new reproduction sheet metal will install and fit on the vehicle. There is really no such thing as a direct fit body panel when it comes to older vehicles.

Returns and Defects:

Prior to returning any defective body panel or sheet metal item to Classic Industries®, please contact our customer service department. Classic Industries® will not replace a panel, nor will we be responsible for freight on returns should it be deemed that the panel is not defective. See policies for more information.

For Best Results, Hire a Professional to Install the Panels:

Classic Industries® recommends that you hire a professional paint and body technician that has the skills, knowledge and experience necessary to install the new panels on your vehicle. A professional body technician will be able to prepare the panels for installation and repair any imperfections.

When Welding Sheet Metal Products . . .

Save time when replacing sheet metal by using Classic Industries® new, innovative "Weld-Thru™" primed sheet metal products. Our all new coating process is designed to eliminate the unnecessary process of grinding or sanding the EDP coating off to ensure a solid and rust-free weld. This "Weld-Thru™" primer requires minimal preparation and eliminates corrosion problems between overlapped panels and layered spot welds. It also minimizes heat zone problems, reduces panel distortion, and allows better penetration into the dense replacement steel to compensate for the older metal's impurities. Look for the "Weld-Thru™" logo when purchasing sheet metal products to save time during installation of weld-on sheet metal repair panels.

Some Guidelines on EDP Coating

Many sheet metal products are delivered with a black electrophoretically deposited coating (EDP, or E-coat) for superior long-term corrosion protection, while others use a similar lacquer-based coating designed to provide protection for storage and shipping. Before panel installation, Classic Industries® recommends applying lacquer thinner with a shop towel to determine the type of coating. If the coating is removed by lacquer thinner, then it should be completely stripped from the product before any primer or paint is applied. If the lacquer thinner does not remove the EDP coating, it can simply be prepped, primed and painted without stripping.

Classic Industries® The Restorer's Choice™

Count on the Classic Industries® Restorer's Choice™ symbol whenever purchasing reproduction parts and accessories. You can be sure that each and every product displaying this symbol is manufactured correctly to exact specifications and fits the way the factory intended. Products denoted throughout the catalog with this symbol are officially approved by Classic Industries® as a genuine restoration product. Look for the Restorer's Choice™ logo. The Classic Industries® symbol is your assurance of quality.

Made in USA

Look for the "Made in USA" logo for products that are proudly manufactured in the United States.

Quarter Panels and Skins

4409685

1962-65 Full Quarter Panel

Reproduction rear quarter panel for 1962-65 Chevy II/ Nova 2 door hardtop models. Manufactured in stamped steel to original factory specifications for an authentic appearance and fit. This replacement is perfect for vehicles that have rust around the wheel well or rear lower section of the quarter panel. Does not include the upper sail panel area or complete door jamb area. Small portion of metal near the top of door jamb must be removed from original panel and re-welded to new panel.

1966-72 Nova Quarter Panel

Reproduction complete quarter panel for 1966-72 Chevy II/Nova models. Each quarter panel is manufactured in quality stamped steel and matches the original in quality and fitment. Not just a replacement skin, this panel replaces the entire quarter panel section including the door jamb, trunk gutter, upper sail panel, and more. Will attach at the original factory seams. Panel features a black electrophoretically deposited coating (EDP or E-coat) for superior long-term corrosion protection. Ready to be prepped, primed, and painted without stripping. The quarter panel is complete and ready-to-install. These quarter panels are designed to fit 2 door models.

1962-65 Quarter Skin

Replace your original quarter panels with these reproduction skins. Each skin will install as original. This is an excellent replacement if you have rust around the wheel well areas. This panel offers a good fit and will install with minimal refitting. This is a partial quarter panel skin which extends to the center body line. Will eliminate all rust located around wheel opening. Each panel is manufactured to allow application of the chrome wheel opening moldings. These panels are excellent for convertibles due to the elimination of the sail panel area. Careful attention is paid to packing and shipping to prevent damages!

1966-72 Quarter Panel Skins w/Door Jamb

Replacement quarter panel skin for 1966-72 Nova models. Manufactured with correct heavy gauge steel using new tooling, these quarter panel skins replace about 80% of the rear quarter. These panels are ideal when replacing the upper sail section of the quarter panel is not necessary. Carefully patterned after original quarter panels, each skin features all correct mounting holes and flanges and includes the door jamb area for a complete replacement. The featured door jamb area makes aligning the quarter skin during installation much easier.

1667285

1968-74 Lower Rear Half Quarter Patch Panel

These are patch panels that replace the lower rear quarter panel from the area behind the rear bumper to the middle of the wheel well. These are partial quarter panel skins that extend to the center body line. This is a common rust area, and this is an inexpensive way to correct that problem. These panels have the side marker lamp cutouts and extend approximately 9-1/2" above the wheel well.

Important: *Due to differences in the side marker holes, modifications may be required to match your models original configuration.*

1962-77 Insulator and Trunk Mat Set

Precut, ready-to-install insulation and rubber trunk mat set! Most vehicles have little or no insulation in the rear trunk floor area of the vehicle. QuietRide's new AcoustiTrunk floor mat and insulation sets can help you stop the noise, vibration and heat and dress-up the trunk area as well! This is a great solution to quiet down the trunk of your vehicle, while adding a custom touch. Your choice of smooth, no logo design, or a 3D raised logo trunk mat.

Important: All models, except wagons.

Note: Shipped double oversize and ground only (no air shipments) due to aerosol spray adhesive.

OER® Complete Trunk Refinish Kit

Restore the trunk area of your classic car to a factory original appearance and provide the ultimate protection from the elements. First prime the area to be painted. On bare metal, you should use a self-etching primer. Next, spray your base coat. Then spray your spatter coat and let dry thoroughly. Finally, coat the entire surface with our clear top coat to seal the surface. Contains everything you need to refinish the trunk of your classic vehicle including 2 cans of primer, 3 cans of spatter paint and 2 cans of clear top coat.

Note: *Ships ground only. No air shipment.*

Sheet Metal Tools

13216 132131

Blaircutter

When you don't have a lot of holes to make, Blaircutters provide fast, accurate holes in materials up to 3/16" thick. Blaircutters are annular cutting tools that cut around the edge of the hole and eject the center as a slug. Because they're hollow there's no dead zone as with twist drills. And unlike hole saws, that rip and tear through the material, they quickly give you a quality, virtually burr-free hole. Sold individually.

Note: D.O.C = depth of cut. Arbors and Cutters sold separately.

11093

Premium Spotweld Cutters

When you have a lot of spotwelds to remove, step up to the premium spotweld cutters for longer life in today's high strength body steels. These cutters have a heavier wall (.090") for extreme durability and two step geometry that splits the chips and helps clear them. Premium spotweld cutters have a fast cutting action and lasts for hundreds of spotwelds. They are for use in 3/8" or larger drill chucks. The spotweld cutters are available individually or in sets containing arbor, 3 cutters, your choice of 2 skip proof or 2 standard pilots.

Stick Lubricant

Ideal for all Blair hole cutters. Softer than standard stick lubricants, it provides superior adhesion to the tool and can be used in place of cutting fluids on ferrous and non-ferrous metals to increase tool life, improve cutting performance and easier slug removal.

11750	1.68 oz.	12.99 ea

13224

Double-End Spotweld Cutter

Double-end spotweld cutters makes removing body panels fast and easy. Their hollow design cuts around the spotweld so weld hardness does not affect tool sharpness. When one end becomes dull, simply unscrew the cutter and flip it over using the new teeth on the other end. An adjustable depth rod sets the tool so only the outer panel is cut, leaving the underlying panel undamaged.

Holcutter

Produce holes 3 times faster and cleaner than hole saws in sheet metal up to 1/8" thick and have dramatically extended tool life. Holcutters produce holes from 11/16" up to 3" diameter in sheet metal, rubber, gasket or fiber materials, and some plastics. Ideal for aftermarket installations, custom fabrication, trailers, or gauge installation. Arbor fits 3/8" drill chucks. Holcutters have a new, patented Quad-Lead Thread System for quick cutter changes. Buy the set and save! Holcutter set includes: arbor, hex washer, extra pilot and the following sizes of cutters, 7/8", 1-1/8", 1-1/4", 1-3/8", 1-3/4", 2", and 2-1/2".

Note: D.O.C = depth of cut. Arbors and cutters sold separately.

11083	1/4", 3/8", 1/2", and 3/4"	48.99 set

Rotabroach Cutter Set

11007 arbor with 11356 cutter

Rotabroach annular cutters are ideal for sheet metal fabrication, paintless dent removal and for cutting rustproofing access holes without clogging. Unlike hole saws and twist drills that push and tear through materials, these cutters will make hundreds of holes in steel, sheet metal or plastics up to 1/2" thick with no deforming of stock, jagged edges or out-of-round holes. Arbors for Rotabroach cutters fit 3/8" and 1/2" handheld drill chucks and use either spring loaded pilots or skip proof pilots which eliminate predrilling operations. Each set includes: arbor, Hex wrench, center punch, extra pilot, and a variety of cutters as listed.

Note: D.O.C = depth of cut. Arbors and cutters sold separately.

Body Tools

The Filler Detective

The Filler Detective will find hidden body damage and body filler on a car, truck, or motorcycle. It will tell you where body filler is and how deep it is. This simple 1 button tool lights up and sounds when it detects body filler and features a visual alert with bright, daylight visible LEDs. The meter doesn't miss and it indicates exactly where the body filler is and includes a test plate to confirm accuracy. Never again wonder whether or not a vehicle has been in a wreck! The Filler Detective solves the mystery every time.

FDA0100 red ..... 79.99 ea

EZ Rest Door Hanger

The EZ Rest door hanger enables a single person to quickly remove and/or install vehicle doors. The padded, removable side rails and plastic, ribbed base inserts allow for accurate positioning of the door. The easy on/off design quickly adapts to most floor jacks with a removable saddle and 30mm (1.18") diameter saddle hole.

Note: *Floor jack is not included.*

S21870 ..... 179.99 ea

Door Spring Tool

Compresses spring for easy safe removal. Slides safely over spring. Constructed of heat treated, high carbon steel.

S21900 ..... 25.99 ea

Door Hinge Adjuster Tool

You can now easily adjust the hinges without the aggravation of trying to align by eyesight with this handy tool. Specifically designed to help adjust the hinges so they help to align the door.

Y65800 ..... 52.99 ea

Door Hinge Pin Popper

The ultimate solution for removing door pins fast. Drives out even stubborn hinge pins. Works on most GM vehicles with removable hinge pins. Includes pin puller to remove loosened pins.

S21835 ..... 43.99 set

Door Bushing Tool

If you've ever tried removing a door hinge bushing with just a regular punch, you know it's a hassle. This tool makes it easy to punch out bushings and align bushings when reinstalling. Offset design allows for easy access to all door hinges.

S21825 ..... 20.99 ea

Door Aligning Bar

Finally, a convenient door aligning tool that will fit in your tool drawer! Features a Hex stub to use with a breaker bar and socket for additional leverage.

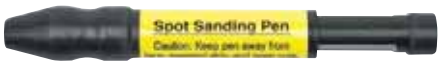

S21845 ..... 46.99 ea

Pro Paint Gauge

The Pro Gauge is a device which measures paint thickness. Factory paint is usually four to five mils in thickness. By using the Pro Gauge you can determine if the vehicle has been repainted. For instance, you can take measurements of about 4.5 mil around the vehicle but the hood may read seven mils on the Pro Gauge. That tells you the hood has been repainted.

PG2437 ..... 84.99 ea

Eliminator Rust Remover

Before touching up paint, you first must remove all rust, wax, and dirt or the rust will return and the paint won't adhere. This unique tool will scrub away all dirt, rust, and wax. The results are touch up paint adheres, seals and blends smoothly into the rest of the paint.

E3437 ..... 9.99 ea

Lisle

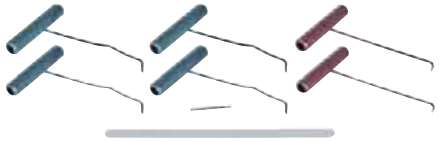

Spot Weld Chisel

Chisel tool to separate panels after the spot weld has been drilled out. Drive the blade with a hammer from the end or the side through the panel seam. Panels are separated without damage. The blade is sharpened on three sides, and offset for clearance.

Note: *The sharpened edges will wear with use. Resharpen on a grinding wheel.*

Y51900 ..... 15.99 ea

Body Dent Removal Tools

The pull rod set includes: 4 pull rods with formed shank, 2 pick pulls with straight shank, straight edge and HS split point drill bit.

S20000 pull rods ..... 47.99 set

X9858

Cleco Sheet Metal Fastener Kit

Everything you need to secure sheet metal panels during the fit and alignment stage. The pliers can be used with all standard spring loaded fasteners and clamps. The kit contains: one pair of Cleco pliers, twenty-five 1/8" Kwik-Lok Clecos and four side grip fastener clamps. Also available are individual components so you can add to your kit as necessary.

Body Chemicals

BlackTop Top Coat

BlackTop is a permanent, moisture cured, UV stable coating primarily used for top coating surfaces previously sealed with RustSeal or any other paint/primer application. BlackTop is a high-performance protective coating specifically formulated to withstand dulling and fading caused by prolonged sunlight exposure. BlackTop may be used alone as a resilient coating but offers the ultimate rust protection when used in combination with the RustSeal corrosion barrier coating as step 1. For the best stop rust and ultraviolet protection, first apply RustSeal to permanently seal the surface and then top coat with BlackTop for an incredibly tough and professional looking finish. Like RustSeal, BlackTop dries to a rock hard yet flexible coating that can be readily applied to chassis, coil springs, and lightweight panels. BlackTop also has high heat resistance and can be applied to almost all automotive applications except exhaust systems. BlackTop is intended as a final finish for parts that have been coated with RustSeal. BlackTop will retain its color and sheen even after repeated or prolonged exposure to direct UV light and will not degrade.

Hydroelectric PS Pump System

EPAS Performance hydroelectric pump system replaces your original style belt drive pump. This system has a program that works with an angle sensor and CAN protocol. The converter talks to the pump via the angle sensor, ramping up the systems pressure as needed. There is no noticeable delay or drop in pressure when input at the steering wheel is exerted. The wiring harness is essentially "Plug and Play", and only requires a hot ignition source, and full battery power.

Note: For floor shift models only.

Power Steering Fluid

Joe Gibbs Driven Racing Oil

Get the race winning experience of Joe Gibbs under your hood with Joe Gibbs power steering fluid. This fully synthetic power steering fluid is specially formulated to avoid foaming at high temperatures to create superior cooling properties. The higher thermal stability also offers less pressure drop. One quart or case of 12.

Max EZ Power Steering Fluid

Royal Purple Synthetic Oil

Max EZ is an advanced power steering fluid designed to maximize the life and performance of all power steering units. Max EZ is formulated with a blend of select synthetic base oils plus Royal Purple's proprietary Synerlec additive technology, which is proven to make equipment run cooler, smoother, longer, quieter and more efficiently. Max EZ is compatible and can be mixed with conventional power steering fluids and has excellent seal compatibility.

Warning: *Regarding Steering Pump Pulleys*

Stock replacement, aftermarket stamped steel or cast iron pulleys are not designed to exceed 400 horsepower or 6000 RPM. Using reproduction pulleys on engines that exceed these limits may result in catastrophic failure of the pulley, which can potentially cause severe damage to the engine, cooling system and body parts. Classic Industries® assumes no liability for damages caused by improper usage of pulleys. Be sure to install the pulley properly to avoid damage that can occur from improper installation or exceeding recommended RPM and horsepower limits.

Power Steering Parts

1962-79 Power Steering Hose

A leak in your power steering system can lead to a very serious and possibly dangerous situation. Leaking hoses can cause a loss of steering. Replace your worn out or cracked power steering hoses before big problems occur. The pressure hose connects from the power steering pump to the control valve/gear inlet. The return hose connects from the control valve/gear outlet to the power steering pump.

Note: Due to some couplers requiring a 5/16" fine thread nut and others requiring a 5/16" course thread nut, this set includes one of each for your customers convenience.

Coupler Hardware Set
748799 1968 6 piece ..... 7.99 set

1967-79 Steering Coupler Hardware Set

Reproduction of the 12 point, Grade 8 bolt that secures the steering coupler to the steering shaft on most GM vehicles. The original couplers included a 12 point bolt in the location where tightening this bolt squeezes the coupler onto the steering shaft. The reason a 12 point bolt must be used is because it is very tight tolerance, and very difficult to get wrench to tighten up with full turns when the coupler is installed on vehicle. Having the 12 point bolts makes it much easier to install, and makes the part look much more authentic and original.

Power Steering Parts

1962-66 Steering Gearbox Conversion

Eliminate your leaky control valve and enhance the feel of your steering with this modern quick ratio power steering conversion for 1962-66 Chevy II/Nova models. This conversion kit features a remanufactured modern integral power steering gearbox which has been heavily modified for direct bolt-on installation in the Nova's factory mounting location and clear the stock steering linkage without interference or the need to modify the frame or shock tower. The integral power steering gearbox provides true modern power steering feel, feedback and a quick 16:1 ratio. For use with floor shift applications only, the factory column must be shortened to clear the power steering box. Models with factory power steering will require either a drag link adapter or a manual steering center link. For more direct bolt-on installation, we recommend ordering the steering column shaft with vibration isolator (part #990041) designed for this application.

Important: *You may use a steering column with a column shift; you will have to eliminate all of the parts pertaining to the column shifter and would have to change to a floor shifter. This conversion is intended for use with a stock column.*

Note: **These adapters are for those who want to make their own. Adapters are included with the hose set. Converts 16MM x 1.5 inverted flare fitting to a -6AN.*

1968-79 500 Series Steering Gearbox

The 500 Series power steering conversion gearbox for 1968-79 Nova models is a key part of a modern, high-performance power steering system. These 14:1 ratio units provide superior control and feedback, thanks to low friction recirculating ball gears. An open centered rotary valve provides smooth operation while retaining excellent road feel and steering response. This gearbox is a great upgrade for manual steering and power steering models and works with the factory power steering pitman arm and 3/4"-30 rag joint and is a great upgrade for manual and power steering models, including those with the larger 605 power steering gearbox.

Rack and Pinion Steering

Manual or Power Rack and Pinion Steering System with Tilt Steering Column

FR3051

Rack and cradle are shown painted for illustration purposes only. Supplied in a black painted finish.

FR3052

1962-67 Rack and Pinion with Tilt Steering Column

This unique new style of steering system utilizes the original inner and outer tie rod ends. This makes for simple installation and maintains original pivot position as well as turning radius. No cutting, welding, or drilling to the chassis. It bolts into the existing steering box and idler arm holes. Available in power or quick ratio manual, they easily convert the steering box application to rack and pinion steering without any chassis modification. Complete sets include: the rack and pinion cradle system, a tilt steering column, universal joints, wire connectors and all mounting hardware. Power steering sets also include: the pump with pulley and a polished aluminum reservoir.

Important: *Power steering pump brackets, hoses, and column to dash clamp bracket are not included. Reuse of original column to dash clamp is required for installation, with some modification necessary. Power rack and pinion and cradle bracket are painted black, manual rack and pinion has a chrome finish. Must use 1968-69 Camaro outer tie rod ends.*

Note: *Shipped double oversize.* OS2

1962-74 Rack and Pinion

These rack and pinion systems are designed for 1962-74 Chevy II/Nova models. 1962-67 works with small block engines while the 1968-74 will work with small block or big block Chevrolet engines. The 1968-74 rack and pinion will work with the factory power steering pump, but will require the hose set sold separately. The 1962-67 sets include: a new pump, hoses, and remote reservoir. New steering arms are included and must be used on the power steering rack. The manual rack will mount to your stock steering arms. This system is not compatible with aftermarket spindles with steering arms cast as a single unit. This system also requires a new steering shaft between the steering column and the rack and pinion, sold separately.

Note: *Factory exhaust manifolds are recommended on big block engines, as headers may cause interference with steering shaft. Shipped double oversize.* OS2

A9583001

1968-74 Rack and Pinion

Steeroids rack and pinion sets were designed to make your 1968-74 Nova steer like a new car! This set features uniquely designed adjustable tie rod ends specifically engineered to eliminate bump steer – even on lowered vehicles. The system gives you greater control while driving on rough surfaces and provides a tighter and more precise feel. These bolt-on rack and pinion conversion sets do not require cutting or drilling into your frame, crossmember or its supports. Steeroids power steering kits allow you to retain your stock power steering pump. Available in power or manual sets. Instructions included.

Important: *If using your old pump, flush and clean it thoroughly before installing the set.*

Note: *Shipped oversize.* OS1

CTA79A

CTA71L

1968-79 Tubular Control Arms

A great performance upgrade for your front suspension. Provides increased straight line stability, reduced wander, and quicker cornering response. They're ideal for drag racing, autocross/road racing and performance street. No modifications required, replaces stock upper control arms. Control arms have positive caster built into them so no need to require offset shafts. Upper arms reduce factory bump steer by cutting it in half (beneficial for drag, street, and road racing applications). Standard ball joints are used so they can be serviced anywhere. Shipped fully assembled with billet shafts, Del-A-Lum bushings, ball joints, and bump stops. Powder coated black. New alignment specifications are included. Can be used with lowered frame mounting holes. Will work with coilover kits. Made in USA.

1968-79 Tubular Control Arms

These standard width upper and lower arms for all 1968-74 and 1975-79 models are state-of-the-art in both design and fabrication. The upper arms are 1-1/4" dia. tube, and the lowers are a full 1-1/2" dia. tube. They are narrowed 1" per side, pulling the tires in. The arms are black powder coated and supplied with factory ball joints. High-performance urethane bushings are standard. Upper arms include offset cross shafts for ease of alignment. These are full bolt-on arms, requiring no modifications to the frame.

1968-74 Upper & Lower A-Arms

Enhance your handling performance with BMR A-arms. Fabricated from heavy-duty 1-1/4" DOM (Drawn Over Mandrel) tubing, BMR's upper A-arms feature a billet, nickel-plated cross shaft and HD stainless bushing retainers. BMR uses high durometer, fluted externally greaseable Polyurethane bushings. The compact design provides additional header clearance and come pre-assembled with Polyurethane bump stops and upper ball joints. Lower A-arms feature sway bar mounting provisions and work with all stock springs and shocks or with the popular QA1 Pro Coil kit.

Note: Please add suffix A for red, B for black hammertone.

g Street

Chassisworks

K570461

K570561

1968-79 gStreet Control Arms

The gStreet line of front suspension components is an excellent choice for improving the performance and stance of your Nova. You can get the bolt-on gStreet control arms used on the complete subframe by Chris Alston for your stock subframe Chevy II or Nova. The gStreet lower control arms feature a true coilover style eye mount. To keep installation simple and maximize compatibility, control arms utilize the factory chassis mounts and bolts directly to stock or aftermarket spindles. These arms require the use of VariShock coilover shocks or ShockWave air suspension, and feature a gray hammered powder coat finish, a pivot ball lower mount and ball stud upper mount that bolts directly to the factory mounting location. The exclusive greaseable ball stud mount provides more positive control of the suspension while still allowing free pivoting movement.

Important: These arms require the use of VariShock coilovers or ShockWave air suspension.

1969-79 Sway Bar End Links

It doesn't take long before soft suspension rubber begins to deteriorate. Polyurethane is impervious to deterioration caused by oil, grease, and the elements, giving you firm, confident handling that lasts. These bushings are formulated and designed to reduce the noise, vibration, and harshness that other Polyurethane bushings may have and include "squeak proof" Super Grease. All of the dynamic bushings feature grooves to hold grease for superior performance.

Adjustable Polyurethane End Links

Installing better handling and stability just got a lot easier with Energy's Adjust-A-Link. The end links include two different height bushings which enable you to mix and match to obtain the optimal length. Each set number offers 1/2" of adjustability in 1/4" increments. Energy's Adjust-A-Link will accommodate lengths of 2 3/4" to 6 3/8" with no coverage gaps.

Universal Sway Bar End Links

If your vehicle's handling is a bit on the sloppy side lately, replace your mushy rubber end links with Prothane's polyurethane end links. Polyurethane is unaffected by oil, smog, road salt, and most chemicals. It doesn't soften, compress, or distort like rubber.

Note: Please add color code to part number when ordering: G – black and R – red.

ENERGY SUSPENSION

1962-79 Poly Sway Bar Bushing Set

High tech Polyurethane bushings designed for use in place of originals while giving a stiffer, tighter, and more superior ride. When changing sway bar bushings to Polyurethane bushings it is advisable to replace all your front end bushings with Polyurethane bushings.

***Important:** Do not mix and match Polyurethane and OEM type bushings together. All bushings should either be rubber or Polyurethane. Mixing and matching could cause problems for your suspension and your bushings to wear out much faster.*

K44717

1968-72 OEM Style Subframe

Repairing the corroded or damaged subframe on your Nova used to mean hours or days of hard work. Now, you can simply replace it with a new complete reproduction subframe designed specifically for 1968-72 models. These reproduction subframes feature the correct contours, openings, and welds for an OEM appearance. In addition, these subframes have been internally reinforced in the lower crossmember, greatly improving strength and rigidity. Manufactured in heavy gauge steel. Available without a crossmember or with a TH400 transmission crossmember installed.

Note: *Shipped truck freight.* TRUCK

C14633

1962-67 Mini Subframe Set

Improve stability and steering response and gain ground clearance for your 1962-67 Nova with these mini subframe sets. This mini subframe helps maintain proper alignment without the use of a lockout plate for a free motion in the lower control arm. The results are better ride quality. Because the bulky factory strut rods and strut rod mounts are replaced, this set adds only 2 lbs to the vehicle. The 1 piece crossmember ties both frame rails together by bolting into the factory strut rod mounting location. The lower control arms add a forward caster adjustment and utilize the original camber adjustments. For use with the factory and aftermarket sway bars up to 1" in diameter.

Important: *For steering stops use C14636.*

Note: *Shipped oversize.* OS1

Standard Set

Standard sets include: tubular upper and lower control arms, simple, bolt-in 1/4" thick steel cross member with forward mounting, 4 alignment cam kits, Grade 8 hardware, low friction, long life bushings with premium upper and lower ball joints.

Formula Five Prelube

Energy Suspension Formula Five Prelube is a versatile, waterproof, non-melting grease containing PTFE. These forms a tough, durable, chemical resistant film of lubricant. This lube also prevents metal-to-metal contact even under severe shock loads. Only small amounts are required to properly lubricate bushings and metal components and to prevent corrosion. Use this when assembling your Polyurethane bushings to your suspension.

Important: *Only small amounts of this prelube are needed when assembling components.*

TCI 1962-67 Coilover Street IFS

MADE IN USA

Get a Lowered Look and Improve Handling for Your Nova with No Welding Needed!

Total Cost Involved coilover Street IFS with coilover springs is a complete subframe that features the front suspension clip with engine motor mounts and suspension brackets installed. A narrowed rail design will give 1-1/2" of space per side for wider tires. A vertical metal plate is now used for mounting the upper control arms. This design allows easy camber and caster adjustments via shims instead of alignment slots. This will keep your Nova in alignment for a longer time. Frame is engineered with U.S. steel. Made in USA.

Important: *No welding necessary. Assembly is required. Rotors, spindles, and brake units are assembled with bearings packed with high temp grease. Shown painted for illustration purposes only. Components are supplied unfinished.*

Note: *Shipped double oversize.*

Coilover Street IFS Set Includes:

- Narrowed tubular upper A-arms
- Narrowed tubular lower A-arms
- 2" drop spindles
- New manual rack and pinion gear
- Custom steel inner front fender panels
- Big bore calipers
- 11" drilled and slotted zinc-plated rotors
- 1" anti-roll bar
- Black powder coated springs
- Painted coilover shocks
- Hood hinge brackets
- Upper and lower ball joints
- Greaseable urethane bushings
- Small block engine brackets

TCI 1962-67 Performance 4-Link Rear

Modernize Your Nova's Rear Suspension without Cutting or Welding Your Stock Floor

This 1962-67 Chevy II/Nova performance 4-Link rear assembly from TCI is designed as a true bolt-in system. The kit was designed to eliminate the poor handling characteristics that occur with stock leaf springs. Optional sway bar and transmission crossmember sold separately. Engineered with high-quality U.S. steel and proudly made in USA.

Important: *No welding necessary. Assembly is required. Shown painted for illustration purposes only. Components are supplied unfinished.*

Note: *Shipped double oversize.*

Mustang II Style 1962-67 Bolt-On Subframe

A Lowered Look and Superior Handling for Your Chevy II/Nova in 3 Easy Steps!

HEIDT'S Hot Rod Shop, Inc.

1 Get The Mustang II Subframe

Now you can give your 1962-67 Chevy II/Nova the lowered look and superior handling the street rods have enjoyed for years. Install a Heidt's IFS with no welding. Simply unbolt your complete front clip and bolt in the Heidt's complete subframe. Install the firewall supports, bolt on the suspension components and you are all set. The stock radiator support also bolts right up.

Important: *15" wheel or larger required. Brake lines not included. Subframe and components are supplied unpainted and unassembled.*

Note: *Special order. Shipped overweight.*

Subframe Set Includes:

- Crossmember/Subframe Assembly
- Steel Tubular Control Arms
- 11" Iron Rotors with 5 on 4-3/4" BP
- 275-375 Spring Rates Available
- Rebuilt GM Metric Calipers
- Stock or 2" Drop Spindles
- Manual Rack and Pinion
- Shock absorbers
- Tie Rod Ends and Ball Joints
- All Mounting Hardware and Bushings
- Firewall Supports

Heidt's Pro-G 1962-67 Bolt-On Subframe

Get Pro-Touring performance handling that bolts on to your Nova! Heidt's Pro-G Suspension is based on a full front subframe with 56-3/8" track width. The final assembly provides true racing geometry for unbelievable cornering that will enhance your Nova!

Bolt-On Pro-Touring Performance for Your Chevy II/Nova in 3 Easy Steps!

1 Get The Pro-G Subframe

Heidt's Pro-G subframe starts with a basic package to make your vehicle sit lower and hug curves tightly. Control arms, rack and pinion, drop spindles, and disc brakes combine to allow quicker stops and more precise driving.

Important: *16" or larger wheels required. Brake lines not included. Subframe and components are supplied unpainted and unassembled.*

Note: *Special order. Shipped truck freight.*

Set Includes:

- Motor Stands for Small Block/LS
- Wilwood 11" Smooth Rotors
- Wilwood 4 Piston Black Calipers
- Firewall Supports
- Tubular Control Arms
- 2" Drop Spindles
- Powder Coated Coilover Springs
- Adjustable Coilover Shocks
- 400-600 Spring Rates Available
- Power Rack and Pinion
- Wheel Bearings and Seals
- Tie Rod Ends and Ball Joints

Heidt's Pro-G Subframe

Subframe & Suspension

D32004

The Subframe is Complete Including the Following Components:

- Tubular upper and lower control arms
- Coilover shocks and springs
- Power rack and pinion steering
- Splined sway bar
- C6 Corvette steering knuckles with hubs

Information Regarding Wheel Fitment:

- 17" wheels – up to 10" wide
- 18" and 19" wheels – up to 10" wide

Bolt pattern 5 x 4-3/4", Stud Size M12 x 1.5. 17" wheels require a minimum inside diameter of 16.250". Some brake applications will not work with 17" wheels. Flush mount valve stems may also be required on wheels with a behind center valve stem location. 10" wide wheels will not fit on 1968 Nova models.

MADE IN USA

1968-74 Hydroformed Subframe

Detroit Speed and Engineering's all-new front subframe is a bolt-in replacement for the original stock subframe. Utilizing DSE's industry exclusive hydroformed frame rails and unique suspension geometry, it improves ride quality and handling. Hydroformed frame rails offer strength, stiffness, precise quality and repeatability. Both the main and secondary crossmembers are stamped for structural rigidity. DSE's front subframe can accommodate a 10" wide wheel package with up to 335-series tires without modifying the inner wheel wells, but you must check the fender lip for turning clearance. You can use any C6 Corvette brake package from stock to aftermarket. DSE subframes will accommodate small block, big block, LS1, LS2, and LS7 engines as direct bolt-ins. Brake hoses will need to be custom made because they will require a metric fitting on one end but a standard fitting on the other.

Important: *The subframe and parts are sold in bare metal, uncoated and not assembled. If the powder coated option is purchased, assembly is included. The assembled subframe is finished in satin black. Upper and lower control arms, and sway bar arms are gloss black. 1968-72 use stock frame and engine mounts; 1973-74 use 1968-72 frame and engine mounts for small or big blocks.*

Note: *Special order, must be prepaid. Shipped truck freight.* TRUCK

1968-74 LS Engine Mount Set

These engine mount sets are for use with the 1968-74 Detroit Speed and Engineering subframe. The LS engine mount bracket set enables easy, no hassle installation of an LS engine into the DSE hydroformed subframe. This set locates the engine in the proper location, provides the correct method of adapting the 3 bolt engine mounts to the 4 bolt LS engine mounts and requires no fabrication.

MADE IN USA

1962-67 Chevy II Front Frame

Detroit Speed's front frame is a bolt-in replacement for the stock subframe. It improves handling and ride quality by utilizing DSE's unique suspension geometry. The bay bars feature rigid integral hood hinge mounting and are hidden when used with DSE's Chevy II Inner Fenders package to allow up to a 9" wide wheel without modification. SBC and LS engines have been designed as a direct bolt-in to this frame. Each set includes: tubular control arms, coilover shocks/springs, power rack and pinion, splined sway bar, and C6 Corvette uprights. Powder coated option is available and assembled.

D1934115

MADE IN USA

1962-74 Subframe Connectors

These weld-in subframe connectors are fabricated from 2" x 3" x 0.095" wall rectangular tubing for 1962-67 Nova or 2" x 3" x 0.120" wall rectangular tubing for 1968-74 Nova. These connectors are barely visible from underneath the vehicle. The rear of the connector is tapered to attach to the rear frame rails and has a laser cut slot that conforms to the rear seat floor pan. The connectors are bent and TIG welded in a fixture for accuracy and repeatability. These do not interfere with seat attachment hardware, installation or removal of the rear leaf spring pocket, and the molded factory carpet will fit over the connectors. Includes: laser cut brackets, templates, pictures, and detailed instructions for installation.

Note: *If not installing the 1962-67 Chevy II QUADRALink™ you will need to purchase D934115 DSE torque boxes.*

MADE IN USA

1968-74 Leaf Spring Offset Shackles

These billet aluminum offset shackles are designed to relocate the rear leaf springs inboard to accommodate larger rear tires. They relocate the rear leaf spring inboard to accommodate 335 tires (with a section of 13.5") on a F-Body. The shackle offset is 1-3/4". Use along with other Mini-Tub components to complete your project. Set includes: 4 offset shackles and Grade 8 fasteners. This shackle is designed for maximum suspension travel. Made in USA.

Note: *The stock fuel tank will need to be narrowed or use DSE's narrowed stainless steel fuel tank when relocating the rear leaf springs.*

1968-74 Mini-Tub Set

Now you can run all the tire you need, and drop the rear for the "Pro-Touring" look on your 1968-74 Chevy II/Nova with this complete Mini-Tub package. This set is designed to fit tires up to 315mm wide and wheels up to 11" wide without any clearance problems. Installation is a snap with the installation video CD that is provided. The American-made, multi-leaf, 175 lb/in. rate springs are tested to meet exacting specifications and matched to ensure a level stance available in either a 2" or 3" drop configuration.

Important: *The installation of these components requires extensive modifications and welding skills. The rear frame rails will need to be notched and boxed to clear the offset shackles and leaf springs. A narrower than stock gas tank is required with these repositioned shackles and leaf springs. Requires 3" axle tube for installation of spring pads. Shocks sold separately.*

Note: *Special order, must be prepaid.*
Shipped double oversize.

1968-74 Mini-Tub Rear Shocks

These AFCO rear shocks are essential for 1968-74 Chevy II/Nova models that have been mini tubbed. The mono-tube, high pressure gas shocks have a 1/2" bearing mount on each end, and are rebound adjustable. The Mini-Tub set is designed around this shock for proper mount height, as well as jounce and rebound travel.

D41301	1968-74	LH and RH	971.99 kit

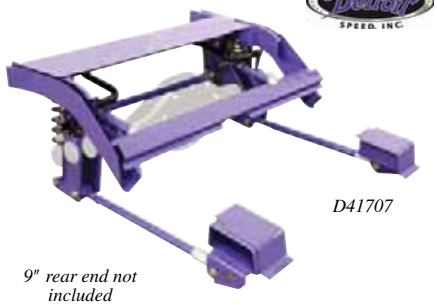

1968-74 Deep Tubs

Detroit Speed's exclusive deep tubs are inner wheel housings designed to accommodate wide tire and wheel packages. They are engineered for an excellent fit and allows you to maintain a "stock" look. Much wider than the stock wheel housings, allowing for tires as wide as 335mm and wheels as wide as 12". Deep tubs are stamped from 18 gauge steel here in the USA. They will significantly reduce the number of hours required for a Mini-Tub project. Included is a CD containing printable templates and a full instructional video that guides you through the install process from start to finish.

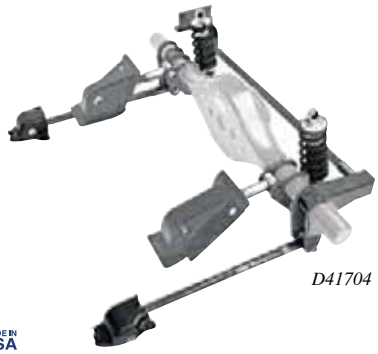

Note: *Shipped double oversize.*

D41704

1962-74 QUADRALink Rear Suspension

Upgrade from original leaf spring suspension with DSE's Quadralink rear suspension. The DSE "Swivel-Link™" allows the suspension to fully articulate with smooth solid motion an no binding. The Swivel-Link design utilizes tuned, high durometer rubber bushings (instead of Heim joints or squeaky urethane bushings) and the long upper links provide great pinion and U-joint angle control. Utilizes a panhard rod that provides precise and effective rear axle lateral location during hard cornering. The panhard rod is adjustable as ride height changes for roll center control.

Important: **Axle brackets require a 3" axle tube. Moser 12 bolt or Ford 9" axle assemblies are a good choice for this setup and are available in this catalog.*

Note: *Special order, must be prepaid.*

1968-74 Mini-Tub Fuel Tank Set

These stainless steel, narrowed, 17 gallon fuel tanks are designed specifically for use with our Mini-Tub set. These are a direct bolt-in replacement using the original mounting location, and the stainless steel fuel tank straps are provided. All carbureted tanks have a 1/2" NPT fuel pickup fitting compatible with either -8 AN or -10 AN fuel line. All tanks are baffled and pressure tested. Made in USA.

Important: *A universal 5 bolt single wire 0-90 Ohm fuel sending unit is required and is available separately.*

Note: *Special order, must be prepaid.*
Shipped double oversize.

Emissions Note: ③ *Non-CARB compliant (not legal for emission controlled vehicles).*

Brakes for DSE Quadralink Rear Axle Assembly

Classic Industries® and Wilwood have put together disc brake sets that will compliment Detroit Speed's QUADRAlink rear axle assembles. Match your front W6AR big brake set with the W4AR 4 piston caliper set. The calipers and rotors match perfectly to create the look and performance of a well built Pro-Touring car. The Superlite 4R 4 piston caliper set will match your front Superlite 6 set to complete the overall styling and performance that makes your vehicle stand out.

Note: *Special order, must be prepaid.*

ridetech Suspension Systems

ridetech StreetGRIP

11265010

- Direct replacement for factory suspension
- Radical improvement to ride quality and handling performance
- Dual rate front coil springs offer ride quality and crisp handling
- Delrin front control arm bushings eliminate movement and static friction in front suspension
- Composite rear leaf springs save 70 lbs of unsprung weight!
- Delrin leaf spring bushings regain lateral stability missing with rubber or poly bushings
- Tall ball joints improve OEM camber curve for a more stable feel through the corners
- Larger front and rear sway bar minimizes body roll
- Delrin sway bar bushings eliminate movement and static friction in the sway bar to improve ride quality and handling performance
- RideTech HQ series rebound adjustable shocks offer the ultimate in ride quality and handling performance
- Staggered rear shocks eliminate wheel hop; upper mounts are reinforced for extra strength

1968-74 StreetGrip

Arguably one of the most famous generations of the popular Nova, this radically new body design held on to its popularity despite being plagued by the era's oil crisis. Nova models that have made it through to modern times have also been plagued...by worn out suspensions! Bring your X-Body into the 21st century with Delrin bushings, composite leafs, and more in this incredible new suspension solution...the RideTech StreetGRIP!

Important: *Recommend the RideTech Bushing Installation/ Removal tool – 85000009 for those who do not have a press to remove and install bushings.*

Note: *Shipped oversize.* OS1

Upgrades:

- ***Spindles –*** Taller for camber gain and a raised spindle pin to lower your vehicle 2".
- ***Steering Arms –*** Corrects bumpsteer and allows for 10" wide wheel with 5.75" backspacing.
- ***Drag Link Bracket –*** Bolts onto OEM unit to relocate the inner tie rod end to minimize bumpsteer.
- ***Tie Rod Assemblies –*** Integrate with your new steering arms and center link to provide a true bolt-on steering system.

MADE IN USA

1968-74 Tru-Turn Steering System

This Tru-Turn system resolves several issues with early Firebird front suspension geometry. With this set, bumpsteer is virtually eliminated, steering arm interference is corrected to allow wider tires, and the wheels lean into turns, rather than away. If your front suspension already uses RideTech drop spindles, the Tru-Turn upgrade set includes the remaining components to correct the issues of the factory design. Made in USA.

Important: *10" wide tires may require modification of the inner wheelhouse and outer fender lip. Not for use with OEM or other aftermarket spindles.*

LW40301

1962-79 Lakewood Drag Shock

Lakewood drag shocks feature state-of-the-art 10 stage valve design which provides excellent starting line reaction and stable high speed operation, superior to any other shock on the market today. These shocks feature multiple valve stages, as the vehicles speed increases, the characteristics of the shock change. All Lakewood drag shocks will mount in the stock locations without modification.

90/10 Series Front – Race Only
Will let the front end rise quickly to provide as much weight transfer as possible to the rear wheels on initial launch.

Important: *These shocks are not designed for street use.*

70/30 Series Front or Rear – Street & Strip
Used for overall improved handling on the strip or when quick front end lift is not needed. Works best on medium to high horsepower vehicles with wide tires and low to medium horsepower vehicles with slicks.

50/50 Series Rear – Street & Strip
Used to properly load the rear wheels and prevent over reaction and wheel hop. This shock is the best overall choice for vehicles that are driven both on the street and the strip. Use with leaf or coil springs.

CF Series Front 90-10 Shocks

Calvert Racing Suspensions offers a shock specifically designed for maximum weight transfer. Built with the softest rate on rebound on the market today, allowing the front end of your race car to come up as easy as possible! Dual stage valving on compression allows the vehicle to settle on the top end. Due to a slightly larger diameter shock body, some slight trimming or clearancing may be required on the lower control arm. Sold as a pair.

*Note: *Needs slight grinding to fit per vendor. Not for street use.*

LW20530	for LW21606		28.99 pr

CalTracs

14469

MADE IN USA

1962-78 Traction Bar System

Developed by Super Stock winner John Calvert, these traction bars are the answer to "hooking up" high horsepower with your leaf spring suspension vehicle. This simple bolt-on set requires no welding or modification of the stock suspension. CalTracs redirect spring wrap-up force into the front pivot points, transferring weight to the rear of the vehicle. Your vehicle will launch harder with greatly improved 60 foot times, while maintaining correct pinion angle. Opposing threads on the transfer link make pre-load adjustments simple. Low profiles are designed for lowered street driven vehicles and give an additional 1.5" of ground clearance with full pre-load adjustability. Finished in black powder coated, CalTracs are approved by major sanctioning bodies like the NHRA, NMCA and the PSCA.

Note: *Shipped oversize.* OS1

144702

144703

144711

MADE IN USA

1962-78 Split Leaf Mono Spring

Calvert Racing revolutionary split leaf springs allow you to have both the proper spring rate and the desired ride height for your high horsepower hot rod. The split mono-leaf is designed to work with Calvert Racings CalTrac traction bar system. They overlap 12" at the high stress area of the spring, emulating a parabolic type spring. Aluminum bushings in the front eyes and polyurethane in the rear eyes remove slop and help control the spring's motion. You'll also find them substantially lighter than your stock springs. Calvert springs are manufactured to exacting standards and were used by the last 5 World Champions in Stock Eliminator.

Important: *Some fabrication will be necessary for installation. Requires steel blocks to replace the 2 upper and 2 lower rubber leaf spring pads.*

Chassisworks

K580011

K580061

MADE IN USA

1962-74 g-Bar Rear Suspension System

The g-Bar rear suspension system dramatically improves ride quality and performance over the stock leaf spring suspension. Four individual arms precisely position the rear axle, better defining the axle's correct path of travel. A panhard bar is not required with this style of suspension, meaning that you can easily change spring rates without altering suspension geometry or allowing changes in pinion angle and lateral movement. In turn, this means that lighter spring rates can be used to improve ride quality without causing leaf spring wrap-up, a common source of wheel hop. A combination of premium urethane and high durometer rubber bushings creates controlled ride quality that inspires confidence under performance driving conditions and during high-performance maneuvers. The g-Bar system includes VariShock QuickSet 1 single adjustment coilover shocks with spring rates compatible with your Nova's rear weight. VariShock features 16 position valve adjustment within a specifically designed range from soft to harsh. This system is for anyone who wants a nice ride but also wants to be able to carve corners.

Note: *Shipped overweight.* OVER WT

1962-76 Complete 12 Bolt Axle Assembly

Moser Engineering offers the best aftermarket 12 bolt on the market. The 12 bolt housings are newly cast nodular iron housing units that are direct replacements for leaf spring General Motors OE applications. The extremely durable housing units have giant caps utilizing 1/2" Allen bolts, and include perches. You have a choice of axles with pressed on ball bearings, or OE style C-clip axles. The units can be set up to work with many OE GM brake setups. Utilizing new housing ends adds to the simplicity and ease of installation, which is unparalleled in the industry. The complete package includes a Moser 12 bolt housing, custom alloy axles with ball bearings, studs and retainer plates, or C-clip axles. Also includes a posi-unit, Pro Street gears, 1310 or 1350 series pinion yoke, chrome or Performance differential cover, and assembly. Brakes are not included. When ordering pressed bearing axles with a posi unit, you have the option of 30 spline axles or upgrade to our 33 spline axles, which carry a 10-year replacement warranty. However, if you are ordering the package with C-clip axles you can only order 30 spline axles.

Note: *Special order, must be prepaid. Shipped truck freight.*

1409215DR

Moser Compatible Wilwood Disc Brakes

Classic Industries® has worked with Wilwood to design brake sets to work with the Moser 12 bolt axle assemblies that are sold through Classic Industries®. These will be setup with the correct offset and center register (the diameter of the center flange of the axle where the rotor is installed). Sets include: either Forged Dynalite brakes (black or red calipers) and 12" rotors (standard or drilled and slotted); or Superlite 4R Big Brake 13" rotors (standard or drilled) and (black or red calipers); and have parking brakes. Offset is 2.81" except for 1409315-D-DR which has a 2.75" offset; and all have 2.78" center register.

Important: *1409215-D-DR are not designed for use with staggered shocks, factory shock mount must be moved inboard to clear caliper.*

Note: *Special order. Shipped overweight.*

9" Housing and Axle Set

These housings are designed and built to go into your muscle car with a minimal amount of effort. It is setup with the Aftermarket Brake Configuration Standard which is: 2-1/2" brake space with late model big Ford housing ends, and a 2.80 center hole in the drum or rotor. Axles include 5 x 4-3/4" bolt pattern with installed 7/16" wheel studs 1/4" thick heavy-duty bearing retainer plates,and tapered Timken Set 20 wheel bearings pressed on. Set includes the Currie "9-Plus" Housing (3" x .188 wall tubing) with brackets and 31 spline performance axle kit These are made from USA steel in the USA.

Note: Shipped double oversize.

All 3rd Members Include:

- Nodular Iron "Sportsman" Gear Case w/3.062" Caps
- Nodular Iron Big Bearing Pinion Support
- Nodular Iron 1330 Series Short Yoke
- Nodular Iron Traction Lock, TwinTrac, or Detroit Locker
- New Ring and Pinion in These Ratios: 3.00, 3.50, 3.70, or 4.11
- Timken Bearings and Performance Oil Seals

9-Plus 31 Spline 3rd Members

These are built and ready-to-install in your 9" rear end. The Detroit TwinTrac is a helical gear style performance differential that maximizes wheel traction and enhances driving and handling characteristics. The TwinTrac operates as a standard or open differential under normal driving conditions, allowing one wheel to spin faster or slower as necessary. Operation of the TwinTrac is smooth, quiet and automatic. The unit will engage without any driver knowledge or action required. It also has no wearable parts and requires no maintenance, meaning less time in the garage and more on the road.

LR1920 LR1910

1967-00 Positive Locking Differential

These new positive locking differentials are a breakthrough in differential technology that prevents wheel "spin-up" and delivers extreme traction with smooth, silent efficiency, while providing full differential operation! The Lock Right system is a rugged, simple design that replaces the existing spider gears with a pair of Lock Right driver and coupler gears in your stock open differential assembly. Requires no special tools, calibration equipment or fixtures, or extra modification because the ring and pinion gears are unaffected. Made in USA.

Note: Not for use with Positraction or Limited-Slip differentials, use in stock, open differentials only.

Moser Engineering

M12144

Made in USA

Performance Differential Cover

Strengthen your 10 or 12 bolt Chevrolet rear with a Moser Performance Cover. These 356-T6 aluminum covers are designed to reduce gear deflection to increase ring and pinion gear life as well as improve the appearance of your vehicle. The whole cover weighs only 6 lbs and includes all bolts, washers, and gaskets needed.

B&M

A9800120

Aluminum Differential Cover

B&M cast aluminum rear end cover was designed to strengthen the rear end by preventing case distortion. Constructed of A356.0-T6 aluminum, this rugged unit also dissipates heat much faster than the stock factory unit to prolong the life of your ring and pinion gears. Features an engraved B&M logo, added fluid capacity for better cooling, magnetic drain plug for catching ferrous metal particles, and complete hardware.

Max-Gear Gear Oil

Max-Gear is an ultra tough automotive gear oil. designed to maximize power and provide protection to heavily loaded gears. Max-Gear is recommended for use in front or rear differentials and manual transmissions that specify use of an API GL-5 or GL-4 fluid. Gears run smoother, quieter, cooler and longer without overhauls. Max-Gear combines the highest quality synthetic oils with Royal Purple's proprietary Synslide additive technology. All viscosities are formulated with hypoid friction modifiers necessary for use in clutch or cone type differentials. No additional additives are necessary.

6566CBK

1962-67 Disc Brake Conversion Set ⚠

1962-67 Chevrolet Chevy II/Nova 5 lug zero offset disc brake setup ready to bolt-on to your factory ball joints and tie rod ends! Sets are pre-assembled, greased, and ready-to-go. Unlike other sets that move the front wheel position out 5/8" per side, these sets remain at the stock drum track width allowing for the most amount of fender clearance available. It takes an extreme amount of effort to stop four wheel drum brake vehicles especially in rainy conditions. This disc brake conversion will drastically reduce the braking effort needed to stop your vehicle quickly and safely in all weather and road conditions.

Important: *Will not fit 4 lug Chevy II/Nova models.*

Note: Shipped overweight. OVER WT

New!

Combo Dual Bowl Master Cylinder

This high-performance chrome aluminum master cylinder has an integrated adjustable proportioning valve and can be used with front disc, 4 wheel disc, and drum brake applications. It's built to strict tolerances to be a top performer and is lighter than a cast iron unit (only weighs 5 lbs). It has optional 1" bore and can be used on manual or power brake applications. Beautifully chrome-plated, it is dual ported on the bottom with 3/16" threads so that the lines can be routed on the right, left, or straight down.

1967-74 Brake Combo Valve

If you need a new disc brake metering valve or want the more updated look of a brake combination valve in your 1967-70 Nova, or need a replacement for a 1971-74, these carefully machined reproduction brass combination valves are the perfect replacement solution. Will fit and function for all 1967-74 models with either factory disc/drum, disc/drum or disc/disc brake conversions. Available as a valve only or as a set including: valve, bracket and hardware or as a set including: valve, bracket, hardware, and lines.

Disc/Drum Brake Proportioning Valve

This universal brake proportioning valve kit is designed to replace a missing or damaged factory proportioning valve on models with disc front and drum rear brakes (dual reservoir M/C). Combination valve kit is a necessary item when installing a disc brake conversion kit in a classic car. Includes: proportioning valve, mounting bracket, adapter fittings, warning switch pigtail, instructions, and a special tool to help bleed the system.

TF500239	chrome		130.99 ea

Adjustable Proportioning Valve

The next generation adjustable proportioning valve from Wilwood combines the latest refinements in manufacturing processes and materials to deliver precise pressure metering and unyielding strength from its compact and lightweight, forged billet design. Precision proportioning from 100 to 1000 psi. At full release, valve is capable of up to 57% reduction in line pressure. The new, smaller body accommodates easy mounting in a variety of locations in conjunction with two .25" diameter holes on 1.00" centers. Along with standard 1/8" NPT inlet and outlet ports and two 1/8" NPT to 3/8-24 inverted flare brake line adapters included with each valve makes installation simple.

Brake Components

New!

APVDB APVDBC

Adjustable Proportioning Valve

The PROP-BLOCK is a precision-machined combination distribution block and adjustable proportioning valve in one. The valve connects to the master cylinder and distributes brake fluid to all four wheels, while the adjustable proportioning valve regulates rear brake pressure, maintaining correct brake bias between front and rear brakes. A built-in switch activates brake lights when brake pedal is depressed.

Important: *This is not a direct factory replacement for original blocks and some line modifications may be necessary.*

26013783

26013784

Residual Pressure Valve

A 2 pound valve is used in disc brake systems where the master cylinder is mounted below the horizontal plane of the calipers and fluid drain back occurs from gravity and vibration, thereby causing excessive caliper piston retraction and a longer brake pedal stroke. A 10 pound valve is used with drum brake vehicles to compensate for return spring tension in the drums. Fittings are included.

2 Pound Valve – Blue

New!

PV29204BL PV29204RD

Universal Residual Pressure Valve

Residual pressure valves retain a minimum brake line pressure to help eliminate excessive pedal travel in both disc and drum brake systems. The 2 pound valve is used in disc brake applications where the master cylinder is mounted below the horizontal plane of the calipers. With drum brakes, a 10 pound valve is used to compensate for return spring tension and maintain wheel cylinder sealing in the drums. Residual Pressure Valves are made from billet aluminum and color coded for easy identification. Valves with fittings are supplied with two 1/8-27 NPT to 3/-24 inverted flare female fittings that will fit most domestic 3/16th hard brake line.

Brake Line Sets

XKT6703

- Available in stainless steel or original material.
- All lines have the correct color coded fittings.
- All lines have been pre-bent for easy installation.
- Each line is machine double flared for a safe, no leak fit.
- All lines are clearly labeled for your convenience.
- Spiral wire gravel guard where required as original.

Reproduction brake lines for your early model Nova are now available in OEM material for a stock look or stainless steel material which offers a longer life span and custom look! Each set includes all the necessary components from the distribution block/proportioning valve forward. We keep a large inventory on hand for quick delivery!

Note: Some brake line sets are shipped oversize.

1967-79 Stainless Steel Brake Line Set

Increased stopping power, better pedal feel, and improved safety are some of the qualities you can expect with stainless steel brake lines. Eliminate "mushy brake" feel caused by rubber lines that swell under pedal pressure. These quality brake lines are subjected to a 9 step quality assurance testing process including pressure testing each line up to 3000 psi. All lines are DOT certified and T.U.V. (Germany) approved. Sets include 3 lines.

Parking Brake Cables & Sets

A9507801

MADE IN USA

E-STOPP® Push Button Parking Brake

The perfect E-brake for stock or custom vehicles that can accept an E-brake cable. It frees up room on the chassis and in the cab and doubles as an anti-theft device when the button is hidden. It replaces hand, pedal, or lever brake and mounts conveniently under the vehicle's carriage. The E-Stopp® attaches directly to your current e-brake cable and has a micro-computer that regulates the proper amount of pressure to your braking system – it will only pull up to 600 lbs before its locked down. The detachable head button allows for an easy install and for visual and audible recognition. For safety, the brake is inoperable while the ignition is on. It can be hooked up to the parking brake warning light. Includes the actuator, the control box with switch, and wire connectors. Made in USA.

Important: *If your brake cables are old, we recommend purchasing Lokar's Universal Rear Parking Brake Cables. You have a choice of a black housing BC80B or a Stainless Steel Housing BC80. It will make the installation easier and cleaner.*

Brake Rotors

CB2099A

1969-79 Brake Rotor

Replacement brake rotors feature machined non-friction surfaces for better balancing, creating a cleaner, more finished looking rotor that dissipates heat effectively to provide better stopping power, especially in repeated stopping situations. Each rotor features a double disc ground finish to virtually eliminate run out thickness variations, producing a non-directional finish for better pad and rotor break-in. The 1969-70 rotors were originally a 2 piece design, now replaced with a 1 piece design.

Front Rotors

1967-68 Four Piston Caliper Rotor

Originally equipped with a 2 piece rotor, the 1967-68 model 4 piston calipers require a special rotor that hasn't been available for a long time. This all new reproduction will do the same job that the original two piece units. You can continue to use your original 4 piston calipers with these special rotors. For use with 1967-68 models with disc brake. Hub outside diameter measures 6-1/2".

E231	1967-68	79.99 ea

1969-74 Standard Brake Rotor

These brake rotors provide great stopping power at a reasonable price. These stock style rotors are CNC precision machined and non-directional crosshatched for better break-in, Meets SAE J431 specifications. Sold individually. Fits left or right.

RS5100	1969-74	53.99 ea

CB2099BR CB2099CL

1969-79 Slotted Rotor

Direct replacement rotors are 1 piece, slotted discs for your factory brake system. They offer improved cooling as well as a signature "short slot" design which wipes away the debris of used friction material that otherwise accumulates between the rotor and pad, keeping fresh pad material exposed to the rotor and reducing pad glazing. The edges sweeping the pad slightly increase the effective coefficient of friction, or "bite", amplifying brake system response. By providing an escape path for water, slotted rotors can also improve initial brake response under wet conditions. Choose from standard high-performance slotted or cryo high-performance slotted rotors. Specify L for left or R for right.

Replacement Calipers

12010937

gray black red

1968-79 Two Piston Brake Caliper

Direct bolt-on replacement for all 1968-79 Nova models originally equipped with the big single piston D52 pad calipers. Built to mount in the stock location with stock dimension rotors, using regular OE type or aftermarket compound replacement brake pads and fitment anywhere OE calipers were used. Forged billet aluminum caliper body reduces weight. Stainless steel pistons with high temperature bore seals minimize heat transfer and provide maximum durability. Features a 2.00" bore for 1.00" disc width.

Important: *Sold individually. Will work with any factory disc brake pads, which are sold separately.*

7" D52 Style Front Caliper Set

Brand new reproduction (not rebuilt) brake caliper that was factory-installed for many years on a wide variety of GM mid-size vehicles. This caliper will fit any bracket/spindle designed for the large GM calipers with the 7" mount width. Features include a 7/16"-20 inlet so you can use the readily available brake hoses and hardware from Pre-1978 GM mid-size models. Supplied with brake pads. Sold as a pair.

Note: *Depending on the spindle and rotor size it will not fit most applications running 14" wheels, nor will it fit on most 15" drum brake wheel applications.*

154897	front	LH and RH.....	152.99 pr

New! OER AUTHORIZED

5-1/2" D154 Metric Front Caliper Set

Reproduction single piston metric calipers like those that were standard equipment on 1978-88 GM mid-size vehicles. Features a 2.375" single piston, shielded bottom inlet, and 5-1/2" mounting bolt spacing. The compact size will save 3-1/2 lbs. per side compared to mid-size 1969-77 calipers that are often used in performance brake conversions. IMCA approved. No core charge required since these are brand new units. Sold as a pair.

154902	front	LH and RH.....	132.99 pr

New! OER AUTHORIZED

Universal Rear Caliper Set

Reproduction calipers based on the 1978-up factory GM style metric calipers that accept either original GM or Lokar type emergency brake cables. Fluid inlets are tapped to accept 7/16"-20 banjo fittings. Each caliper includes the bracket to attach the emergency brake cable, slider bolts, and brake pads. The bleeder hole is 10mm x 1.5. Mount bolt spacing is 5.45". Sold as a pair.

Note: *These were factory calipers on many 1979-85 model GM vehicle including Cadillac Seville and Eldorado, Oldsmobile Toronado, and Buick Riviera, but are popularly utilized on many classic vehicles to convert the vehicle to rear disc brakes.*

CB2299A

1969-79 Premium Brake Pads

These premium brake pads are manufactured using the same positive molding process utilized by OE suppliers. Positive molding uses extreme pressure to compress the friction material and bond it to the backing plate. This process assures consistent friction material density throughout the pad, resulting in even wear and performance characteristics throughout the life of the brake pad. These are available in 3 specialized formulas suited for varied applications and driving styles. Semi-metallic, extended wear, and ceramic.

Chassisworks

K5754162

MADE IN USA

1968-72 Billet Aluminum Spindles

These rigid and lightweight billet aluminum spindles and steering arms are direct replacement components for 1968-72 Chevy II/Nova models. Overall height of both upright versions is 1-1/2" taller than stock, resulting in more aggressive camber gain with increased cornering performance. Spindles feature a black anodized finish and heat treated, corrosion resistant, slotted flange nuts. Optional flange nuts for oversize stud lower ball joints are sold separately. For use with calipers that attach to OEM style disc brake locations.

Note: *Taller spindle height requires Chassisworks billet steering arms and tubular upper A-arms to properly position ball joint range of alignment. Minimum rim size is 15" to 18" diameter, depending upon width and brake kit.*

Y44800 heavy-duty (lg. brake springs).. 13.99 ea

Brake Spring Pliers

Removes and installs shoe return springs on most drum brakes. Socket end removes spring from anchor stud. Notched end installs spring on anchor. Pliers remove and install the return spring to outside of brake shoe.

X298 ..... 24.99 ea

Y10400

Brake Cylinder Hone

Special abrasive pads polish the cylinder without cutting. Controlled pressure, three abrasives, and flexible driver give good stability and speed. Stones are 1" long. Range 1-1/2" to 3-1/8".

Y10400 hone..... 25.99 ea
Y10490 set of replacement abrasives.... 6.99 set

Brake Pad Spreader

This unique tool makes changing disc brake pads easy. The tool compresses the disc brake piston for easy installation of pads.

Y24400 ..... 10.99 ea

Y25750

Speedy Brake Pad Spreader

The pistol grip ratcheting action and the fast acting plunger compress disc brake pistons in seconds. This makes brake pad replacement a snap.

Y24300 single piston pad spreader ..... 49.99 ea
Y25750 dual piston pad spreader..... 64.99 ea

Double Flaring Tool Set

If your brake or fuel lines need to be flared, this is the right tool for you. This set allows the user to make single or double SAE flares to exact dimensions. Great item to keep in your tool box.

Y31310 ..... 41.99 set

Tubing Bender

This tool make bends easy without the tube collapsing. Tube benders can be used for bending copper or steel tubing such as brake, fuel, transmission cooler, or power steering lines.

V025700 5/16" and 3/8" lines..... 59.99 ea

Brake Fluid

2908478

Wilwood offers two grades of high-performance brake fluid. Hi-Temp° 570 for severe heat. EXP 600 Plus for extreme performance under the high heat of professional motor sports. Always add new fluid to a clean system. Sold by the case.

EXP 600 Plus – 626° Boiling Point

2908478 six 16.9 oz bottles..... 143.99 cs

Hi-Temp 570 – 570° Boiling Point

2902210 six 12 oz bottles..... 75.99 cs

High-Performance Brake Fluid

CB2560

StopTech High Performance Brake Fluid meets and exceeds current DOT 4 Federal Motor Vehicle Safety Standards. High-Performance DOT 4 Brake Fluid is compatible with modern ABS and stability systems. It mixes with all DOT 3 and 4 products. Choose from street or racing formulations. Sold in durable 500ML metal containers.

CB2560 street formula... 23.99 ea
CB2566 racing formula.. 39.99 ea

Brake And Parts Cleaner

JG1210

This powerful Brake And Parts cleaner quickly cuts through grease and grime, but it does not leave an oily film. This fast drying formula gets the job done while using less spray compared to watered down cleaners. Non-chlorinated.

JG1210 14 oz. can ..... 5.99 ea
JG1211 12 – 14 oz. cans.. 71.99 cs

S/S Super Sport Wheel

The Cragar S/S wheel was first introduced in 1964. By 1974 the Cragar S/S had become one of the most popular wheels of the muscle car era. Because it was chrome-plated rather than polished aluminum, it held its shine and was easier to keep clean. Instead of requiring time consuming polishing, the Cragar S/S was ready to show with a simple hosing off and wiping down. Available in a variety of sizes and configurations, these wheels are now back in vogue with muscle car enthusiasts who prefer a custom look, but wish to keep their vehicle "period correct". Chrome aluminum center cap is included with each wheel. Lug nuts sold separately.

Cragar 32 Series Keystone Klassics

If your vehicle is a 1960-70's model, chances are it came with narrow wheels and tiny bias ply tires. By the mid-1960's, aftermarket wheel swaps were commonplace among car enthusiasts. One of the most widely chosen aftermarket wheels available during the muscle car era was the Cragar Keystone Klassic. Popular for their composite design, the chrome-plating on the Keystone Klassics made them much easier to clean than aluminum or mag wheels because they required no polishing. Cleaning them was a breeze by just hosing them down and wiping them off. These wheels are now back in vogue with muscle car enthusiasts who prefer a custom look, but wish to keep their car "period correct". Chrome center cap is included with each wheel. Lug nuts sold separately.

Cragar 390 Street Pro

The style of the Cragar Street Pro is reminiscent of the Halibrand Sprint which was made famous on the circle track cars of the 60's. The similarities stop there, however. Unlike the Halibrand which was made of magnesium and required constant polishing to retain its shine, the Cragar street pro is manufactured of a chrome-plated steel rim with a chrome-plated aluminum center. The price of original 60's era Halibrands has been pushed up by collectors and the new Halibrand wheels are also very pricey. So, if you'd like the look of a legend at about 1/4 of the price, the Cragar Street Pro is definitely the way to go. Chrome center cap is included with each wheel. Lug nuts sold separately.

center cap detail

American Racing Outlaw

In the 1980's the modular wheel became the hot ticket on any late 70's or 80's muscle car. The wheels were called modular because they consisted of 3 elements: an aluminum wheel center (in various styles), an inner rim, and an outer rim. The combination of these "modules" allowed for an unlimited range of possibilities when it came to wheel specifications. The true modulars, however, where a bit pricey for the average Joe. This soon led to an influx of modular copies and 1 piece wheels built with a modular look. This modular style wheel is manufactured by American Racing. It comes clear coated and includes center cap. It's a good choice if you're looking for a period correct wheel design at a great price.

OER® 1 piece acorn lug nuts are for the R15 style aluminum wheel or any aluminum wheel designed to use a factory style acorn nut. Available in standard and extended length, which gives the additional thread depth coverage that is necessary when running the wheels on the front of the vehicle with .25" spacers for wheel clearance. Sold individually or in a 10 piece set.

CRD1343A

CRD1164S

OER AUTHORIZED

CRD1314S

CRD1324S

Copper/Brass Construction

MADE IN USA

1962-79 Restoration Radiator

OER® Authorized radiators install exactly like original. Each radiator is equipped with a new tank and core. Not rebuilt! Features original style mounting brackets attached and installs as original to the radiator support. The fan shroud must be replaced if your are installing a radiator for air conditioned models on a vehicle which did not include factory air. This helps to maintain a correct fit and sufficient air flow to the engine. All radiators include a 6-month limited warranty. Made in USA.

No Exchange Required! No Core Charge!

Important: Fan shrouds, fan shroud brackets, radiator petcock, radiator cap and shroud mounting clips are available separately. Due to dimensional differences, fan shrouds are not interchangeable between air conditioned models and non-air conditioned models.

AT=Automatic Transmission, MT=Manual Transmission, AC=Air Conditioning.

OS1

Note: These are all-metal replacements for original plastic tank composite GM radiators. Shipped oversize.

COLD-CASE

1962-79 Aluminum Radiator

CC46116

CC46131

Improve the cooling capacity of your engine with Cold-Case performance radiators for 1962-79 Nova models. Feature an all aluminum construction that is good at dissipating heat and saving energy, with 2 oversized cooling rows, and polished stamped tanks. All Cold-Case radiators are 100% TIG welded, pressure tested, and includes OE style fittings for both automatic and manual applications. All radiators manufactured by Cold Case are guaranteed to be free from material and workmanship defects for the life of your installation. Does not include the cap, sold separate.

Radiators

1962-79 Nova Aluminum Radiator

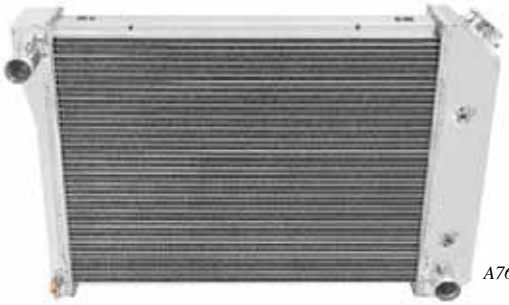

AR80281N

Constructed of 100% aluminum, these racing radiators are built using no epoxy for trouble-free service. Aluminum radiators have shown to be 15% more efficient than factory copper brass type radiators. This radiator fits in the factory mounting location with predrilled brackets for easy installation. The factory fan shroud can be reused without modifications while the inlet and outlet are in the stock locations so the factory style radiator hoses can be used. As with most radiators, automatics are available with a built-in transmission cooler with the correct dimensions to use the factory transmission lines.

Important: *1962-67 crossflow radiators require modifications to mount. Transmission cooler lines must be rerouted and factory fan shroud will not fit.*

Note: **SB. **SB/BB. †With automatic transmission. Shipped oversize.*

A7600110

1962-79 Polished Aluminum Performance Radiator

Keep your engine cool with one of these polished high-performance aluminum radiators. Manufactured from TIG welded aircraft grade aluminum with brazed aluminum cores and billet filler necks, each radiator offers high capacity cooling with louvered fins and 3/8" spacing between core tubes. Designed for direct fit installation. Radiator cap is included.

Important: *All radiators have built in automatic transmission coolers and can be used in both automatic and manual transmission applications.*

Note: *Shipped oversize.*

Universal Slim-Fit Radiator System

PROFORM has completely rethought how the radiator, fan, thermostat, and shroud can come together seamlessly to create a unified radiator system that is under 4" thick, looks and works great, and is pre-assembled right out-of-the-box, ready for a custom fit into your muscle car or sport truck. With revolutionary engineering we flipped the motor around so instead of hanging on the outside, it's integrated directly into a uniquely designed core made with state-of-the-art brazing technology (with no meaningful cooling compromise). The core itself is a hybrid combination of traditional dual 1" tubes, and full core width extruded tubes. Combine this with a high-performance fan blade inserted into a smooth aluminum shroud, the result is the industry's thinnest, most streamlined look. Every PROFORM Slim-Fit Radiator includes a shroud, electric fan with adjustable thermostat, wiring harness, and radiator cap.

rivet detail

1962-67 OE Style Radiator Cap Hollow Rivet

Authentic reproduction radiator cap designed for the enthusiast who wants total originality in a reproduction cap. Features the correct cap rating along with all the correct markings as original. Long discontinued, the current GM replacement and other reproduction caps do not accurately represent the original cap. One of the features that sets OER's reproduction cap apart is the correct divot in the brass rivet in the center of the cap, just like the original. OER's reproduction is an exact replica of the original featuring correct markings as well as an accurate cosmetic appearance of the rivet in the center of the cap.

"Liquid Chill" Engine Coolant and Additive

Mishimoto's Liquid Chill is a universal, synthetic coolant that will provide premium cooling and protection for your vehicle. Liquid Chill protects from boil over to 265 degrees F and from freezing down to -26 degrees F, inhibits corrosion, and reduces operating temps. Made with propylene glycol base and unique poly organic additives to allow for extended life of 2+ years or 250,000 miles before needing service in gasoline applications. One gallon jugs are available in full strength formula or 50/50 blend. For up to 30 degrees F cooler over just coolant alone, the universal Liquid Chill additive is available in 4 oz. bottles.

J-B Weld Cold Weld

MADE IN USA

JB8265

J-B Weld is a great alternative to welding, soldering and brazing. This two part system is mixed at a ratio of 1:1, it forms a permanent bond and can be shaped, tapped, filed, sanded, painted and drilled after curing. Cold weld will bond to most clean and dry surfaces and sets in 1-2 hours and will fully cure in 16-24 hours. Waterproof, petroleum, chemical, and acid resistant when fully cured. Non-toxic and temperature resistant up to 600 degrees F. Cure color is dark gray. Made in USA.

JB8280	2 x 5 oz. tubes	15.99 ea

Super Coolant

ROYAL PURPLE SYNTHETIC OIL

Purple Ice is a high-performance, synthetic, radiator coolant additive. It reduces engine heat by reducing the surface tension of the radiator fluids for improved heat transfer. Purple Ice fosters optimum coolant flow by helping to prevent formation of scale deposits in the radiator. Purple Ice is recommended for any water/glycol pressurized cooling system, including those using the traditional green silicate based glycols or the newer OAT or HOAT based glycols.

Cooling Fans

New! DERALE PERFORMANCE

66927

MADE IN USA

Electric Dual Fan & Shroud Powerpack

Get complete control of your engine temperature! Derale Performance has combined their high performing shrouded powerpack with the ultimate fan controller. Using high output electric fans incorporated into an engineered shroud, this powerpack can conquer even the most difficult cooling conditions. The dual 12" high output electric fans are some of the most proven and reliable fans in our line-up and are specifically designed to thrive on thick, tight fin radiator cores. Offering a total of 4000 Cfm. Now add the digital PWM fan controller with built-in soft start technology. The controller utilizes Pulse Width Modulation to constantly adjust electric fan speeds from 0-100%, maintaining the optimal engine operating temperature. Features a laser cut, powder coated steel shroud measuring 26" wide by 18" top to bottom and is only 4" in overall depth.

High-Performance Electric Fan

Your stock fan robs your engine of up to 15 or more horsepower! Replace it with a rugged, quieter than straight blade, universal fit S-blade fan equipped with an adjustable 160-240 F degree thermostat. Bolts to your radiator supports using sturdy brackets. With a heavy-duty motor, and 15" diameter, this unit pulls up to 2,800 cfm of air. Amp draw: 14 amps. Mounting hardware and wiring included.

Syclone Electric Fan

The amazing Flex-a-lite Syclone electric fan is the most efficient S-Blade fan blade on the market! This quiet fan mounts to the core and can be used to push or pull air through the radiator. The higher torque (17 amp) motor produces 2500 cfm of air flow, making these fans strong enough to replace your belt driven fan and fan clutch to gain more horsepower and torque. The sweep style blades squeeze out the maximum air flow possible. 16-5/8" x 15-3/4" x 4" mount. Universal mounting brackets are included.

FL398	16" fan	153.99 ea

Black Magic S-Blade

If your vehicle is still running the factory engine driven fan, you're losing vital horsepower and not even getting the full cooling effect you should! By replacing your engine driven fan with an efficient electric unit, you can reduce unneeded drag on your engine to free up horsepower and improve your fuel economy. An engine driven fan can cost up to 17 HP to operate! This universal fit Flex-a-lite electric fan features computer engineered blades that are extremely quiet and efficient, and moves 3000 cfm of air to provide consistent cooling, regardless of engine RPM. Ring fans like this provide better blade support for impact resistance. This electric fan fits vehicles with 16" or wider radiator cores, and requires a mounting surface of 18" x 16" x 4-1/4" for an easy, bolt-in installation. Universal mounting brackets are included.

Improves Horsepower, Extends Water Pump Life and Cools Faster!

Used as a primary fan, this unit frees up wasted horsepower and increases fuel mileage by eliminating drag caused by your standard engine mounted fan. Also increases water pump life by reducing strain on the water pump bearing assembly. When mounted in front of the radiator and used as an auxiliary fan in addition to your stock belt driven fan, this electric fan provides better cooling in any engine prone to overheating.

Brushless Electric Fan Powerpacks

Derale Brushless Powerpacks provide the best Performance when it comes to cooling performance for your engine. Derale's NEW, high-performing brushless fans with integrated fan controller, combined with their high-performing shrouds is a combination that just can't be beat. These units feature a fully welded aluminum shroud measuring only 2-13/16" in depth and combined with the installed electric fan, the overall thickness is only 3-1/2". The dual 12", brushless electric fans are some of the most proven and reliable fans in our line-up and are specifically designed to thrive on thick, tight fin radiator cores. Offering a total of 4400 cfm. Don't forget they also have the built-in PWM Fan Controller with soft start technology. The controller utilizes Pulse Width Modulation to constantly adjust electric fan speeds from 0-100% to maintain temperature. This allows electric fans to operate at the percentage needed, instead of 100% all the time. This results in extra longevity, increasing component life and eliminating amperage spikes.

Electric Dual Fan & Shroud Powerpack

This Derale Dual High Output RAD Fan Powerpack assembly is part of the HO aluminum shrouded fan series that is designed with the application in mind. Based on some of the most common radiator core sizes sold today, this unit features an aluminum shroud and is only 4" in overall depth to offer an adjustable yet precision fit. The natural, non-finished aluminum shroud gives the user the freedom to polish, anodize, paint, or simply leave it raw to create a truly custom look for an affordable price. The dual 12" high output electric fans are some of the most proven and reliable fans in our line-up. Offering a total of 4000 cfm, this dual electric fan assembly generates the most real-world airflow in the smallest package on the market. Now add the digital PWM Fan Controller with built-in soft start technology. The controller utilizes Pulse Width Modulation to constantly adjust electric fan speeds from 0-100%, maintaining the optimal engine operating temperature.

Cooling Fan Components

16" Fan Mounting Gasket

SPAL fan gasket is a specifically designed rubber gasket for use exclusively with the 16" fan line. The gasket provides an additional 1/4" clearance from the cooler core and is ideal for mounting our pusher style fans.

Note: Will not fit SP2056 and SP2057.

SP2070 16" ..... 16.99 ea

Cooling System Zinc Anode

Used in heavy-duty and marine applications to protect the cooling systems and its many components from damage due to electrolysis or coolant additive failure/ breakdown. The introduction of the zinc anode will protect your cooling system from galvanic action as it "eats" the zinc rather than your cooling system. To be installed in the radiator as a replacement for the drain petcock in radiators that are equipped with a 1/4" NPT hole or any 1/4" NPT hole that is available in the cooling system.

FL32060 ..... 15.99 ea

MF109

Fan Temperature Sending Unit

The temperature sending unit screws into the side of the cylinder head or on the intake manifold to operate the Champion or Challenger Series fans.

MF108 185° for carbureted engines..... 25.99 ea
MF109 195° for fuel injection engines 25.99 ea

Temperature Sending Wire Cloth Insulator

This 3/16" i.d., 5/16" o.d. replacement cloth insulator, keeps your temperature sender harness well insulated from engine heat. Sold per foot. 2-3 feet required per vehicle.

K0163 ..... 2.49 ft

Temperature Sending Unit Wiring Set

Reproduction wiring which extends from the front light harness to the temperature sending unit. Includes correct 24" insulator cover and 30" green wire with bullet, blade, or button type terminals included.

CA34620 ..... 18.99 set

Universal Fan Mounting Bracket

SPAL universal fan mounting bracket. It can be used with most aftermarket and OEM radiator types. It is adjustable and features a black powder coated finish. Includes 1 metal strap bracket and 1 plastic foot. Requires 4 for proper installation.

SP2072 ..... 2.99 ea

Universal Fan Mounting Rod

SPAL universal mounting rod brackets attach directly to the fan shroud. Manufactured from lightweight steel and plastic. Includes mounting clip. 4 required for proper installation.

SP2071 ..... 5.99 ea

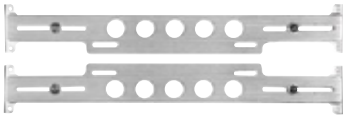

SP2073 *SP2074*

Plastic Mounting Bracket

SPAL plastic fan mounting foot bracket. Four mounting brackets are required to complete proper installation. Sold individually. Available in either flat or raised design.

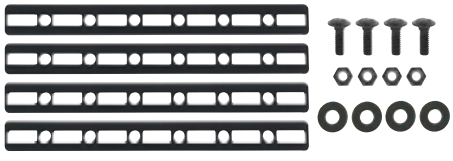

SP2073 flat ..... .99 ea
SP2074 raised ..... .99 ea

Billet Aluminum Fan Brackets

Use this premium billet aluminum bracket set to mount your 14" or 16" Champion or Challenger Series fan. The set features 4 adjustable side angle brackets that attach to the side flange of the radiator. Mounting hardware is included.

MF105 billet aluminum fan brackets.. 58.99 set

Universal Fan Bracket Strip Set

This bracket set is used to mount your Champion or Challenger Series fan. Install the fan's 90 degree mounting feet (included with fan) to these four 7-1/4" long strips for solid support. Mounting hardware is included.

MF104 universal fan bracket strips .... 24.99 set

New!

Electric Fan or Oil Cooler Mounting Set

These sturdy nylon electric fan and transmission cooler installation set includes 4 plastic rods, 4 retaining clips, and 4 foam mounting pads to provide a solid trouble-free and installation-friendly method of securing an electric fan, transmission or engine oil cooler to any vehicle.

13001 4 rods with retainers ..... 6.99 set

Adjustable Fan Temperature Sensor

Turn your electric fan on at whatever your desired temperature is with this adjustable temperature sensor. Sensor adjusts from 180-240 degrees F and helps prevent overheating in performance vehicles when driving at low speeds or when idling for long periods.

346932 180-240 degrees F ..... 109.99 ea

SP2068

Fan Harness Set

SPAL wiring harness sets are a must-have when installing an electric fan. Designed to safely integrate with OEM wiring harness. Feature a waterproof 40 amp relay, stainless steel switch with optional switched override capability along with printed wires which aid in installation. Thermo switch, fuse holder, connectors 1/2" adapter, and instructions are included.

SP2068 185 degrees harness ..... 118.99 set

Electric Fan Relay

Designed as inexpensive protection for your electric fan. Provides constant voltage, protects from voltage and amperage spikes. Choose from the regular fan relay or the weatherproof relay which are for the harsh weather conditions, these relays provide complete protection from the elements and ensure reliable and dependable performance. These sets utilize heavy-duty waterproof relays, weatherproof circuit breaker covers and extreme condition weatherproof shrinkable crimp-on terminals.

30111 185° on/175° off..... 29.99 ea

Universal Electric Fan Relay Wiring Kit

Lock down superior cooling and eliminate bothersome noise and vibration with a Champion Cooling electric fan relay kit. Featuring heavy-duty, 1 piece construction with a permanent magnet motor and computer balanced, reversible swept blades, this top-of-the-line kit enables you to run your fan as a puller or pusher. 1-year warranty.

CCFKRL with thermostatic switch..... 89.99 ea

Electric Fan Relay Wiring Kit

Cold Case electric fan wiring kit for single or dual electric cooling fans. Includes thermostatic switch that turns on the fan(s) at 190 degrees F and turns them off at 170 degrees F. Operates single or dual fan setups. Includes: 12' wiring, thermostatic switch, weather resistant relay, and fan pigtail connectors.

CC46179 with thermostatic switch..... 99.99 ea

Single Fan Pigtail Connector

Single male fan pigtail connector for Northern or SPAL single fans. Required when not using Northern relay harness.

Note: *This same pigtail is included on Northern relay harnesses. Use part #40080 for Northern relay harness.*

Z40079 pigtail connector ..... 9.99 ea

PCM Controlled Fan Relay Set

This PCM controlled, weatherproof fan relay set is inexpensive protection for an electric fan and a vehicle's wire harness. Relay activation by grounding the relay coil can be provided by most Powertrain Control Modules. Provides direct battery power, protects PCM from voltage spikes and prevents the fan from back feeding through the vehicle's wire harness.

30133 weatherproof 35 amp ..... 46.99 set

Delayed Cooling System Shutdown

Timed cooling system shutdown features adjustable relays that keep power to the cooling fan and electric water pump (if equipped) when the key is shut off. This reduces the block temperature as much as possible without the risk of killing the battery. This is a timed circuit and does not use a thermostat or other fan control to operate.

TF900632 shutdown..... 178.99 ea

Cooling Fan Shutdown

This cooling fan shutdown set shuts down your electric cooling fan above 50-60 MPH to improve engine cooling by preventing the electric fan from fighting airflow through the radiator at highway speeds. The unit is adjustable and may be overridden by using the supplied dash mounted toggle switch. This set is designed to be used with the supplied signal generator which must be installed into the speedometer cable.

TF900627 shutdown ..... 214.99 set

Thermo Switch — Screw-In

Wire your dual electric fan/shroud assembly the easy way with this dual shroud wiring harness with relay and sender specifically designed dual electric fan setups. This wiring harness and relay kit will protect your vehicle's electrical system from the added draw of dual electric fans and proper gauge wiring ensures a stable electrical connection. The temperature switch activates "on" at 185 degrees F and shuts off when the temperature drops to 165 degrees F.

40078 185° on/165° off..... 114.99 ea

Cooling System

New!

Multi-Fan Controller with Soft Start Technology

Now add the Derale Performance digital PWM Fan Controller with built-in soft start technology. The controller utilizes Pulse Width Modulation to constantly adjust electric fan speeds from 0-100%, maintaining the optimal engine operating temperature. This multi-fan controller has a built-in AC Over-ride circuit and is designed to control as many 12 Volt brushed electric fans as desired, up to 70 amps combined. Even better, installation and calibration is a snap. It simply wires in-between your vehicle's battery and electric fans.

16797 digital PWM controller ..... 251.99 ea

New!

Variable Speed Fan Controller

Turns your electric fan on and off at your desired temperature. The control is right where it belongs, in your hands Fans turn on at 60 percent power and fan speed increases as the temperature rises. You can easily adjust the activation temperature between approximately 160-240 degrees F. The fan controller includes a 1/8" NPT thread-in temperature sensor with bushing adapter. It features variable fan speed and a 40 amp rating. It works on 12 Volt systems only.

FN4001 with temp sending unit ..... 153.99 ea

Electric Fan Controller

DD2700

Includes a 70 amp relay and will work with your existing water temperature gauge, operating from the temperature sending unit already installed. A dedicated sending unit can be installed for applications without a water temperature gauge. Operating range of 150-250 degrees F and features fully programmable "fan on" and "fan off" temperature functions to suit any application. This also gives you the capability to leave the electric fan operating after the engine has been shut down for a user adjustable period of time. High-quality LED readout displays current temperature readings.

Important: *Must use second relay, either part #DD2701 30 amp relay or DD2702 70 amp relay for dual fan or 2-speed fan operation.*

16789

Adjustable Electric Fan Controller

This Derale high amperage fan controller breaks new ground in the industry of electric fan controllers. A bulletproof design, 35 amp per fan amperage rating, adjustability from 150-240 degrees F, and a die-cast bright finish aluminum cover. It's capable of controlling two separate 35 amp fans at different turn-on temperatures, with only a single probe. The first electric fan will be activated at the temperature set by the user followed by the second electric fan when the temperature becomes 10 degrees F warmer. Each electric fan will turn off at 10 degrees F below its turn-on temperature. Includes: wiring harness, fusible link, all necessary electrical connectors, and push-in style radiator probe.

69599

Electric Fan Controller

Turn your electric fan into a thermostat controlled fan! PROFORM's premium adjustable fan controller make this easy! The thread-in probe can be installed directly into the water jacket of the intake manifold, engine block, or cylinder head. The push-in probe can be installed between the fins of the radiator. Fan activation is adjustable between 150 and 240 degrees F. This fan controller is recommended for race and street applications.

69598 thread-in probe sensor ..... 50.99 ea
69599 push-in probe sensor ..... 48.99 ea

Fan Controller Set

The Mishimoto fan controller set is applicable to any 12V electric fan and includes all necessary components for installation. Features adjustable activation from 150 to 240 degrees F and deactivates once temperatures are reduced by 10 degrees F. This controller includes a built-in AC override feature and is designed for use with 1–2 electric fans drawing a combined 25 amps or less.

153522 probe style ..... 77.99 set

"Ice Box" Cooling Fan Control

Available as a dual fan/ 2-speed fan control unit. The sensor is simply tightened under an intake or water pump bolt. It can then be adjusted to your exact preference for on and off temperature. It is equipped with an AC Request system to turn the cooling fan on whenever the AC Compressor engages (this feature does not have to be used). The dual fan control can operate two fans at different temperatures or a single 2-speed fan at different temperatures. Each unit has a fully adjustable operating range of 140-230 degrees.

Note: *With Walker 2-speed fans.*

TF900635 dual control..... 179.99 ea

MF102

MF100

Electric Fan Controllers

These sets are designed to operate Champion or Challenger Series electric fans. Includes: a heavy gauge wire harness, relay, weatherproof fuse, and electrical connectors.

Fixed Switch Fan Controllers

MF102 with 185 degree temp. sender 78.99 set
MF103 with 195 degree temp. sender 78.99 set

Adjustable Switch Fan Controllers

MF100 with adj. temperature switch.. 78.99 set
MF110 adjustable switch only..... 25.99 set

30104

Adjustable Electric Fan Thermostat Set

These sets are designed to allow a wide range of temperature adjustments for your electric fan. The adjustment knob may be used to set a precise temperature desired for fan activation. The mounting bracket is made of brushed stainless steel for good looks and durability. The complete set includes the thermostat with bracket, a 30 amp relay, a 30 amp circuit breaker for overall protection, wiring, terminals, and mounting hardware.

Specs on Adjustable Fan Thermostat:

Temp range - 32 degrees to 248 degrees F
Accuracy: +/- 7.3 degrees F
Differential: 7.3 degrees +/- 3.6 degrees F

Important: *Temperature refers to the temp of the capillary tube, not the coolant temp.*

V-Belt Style Belts

YE15555

YE15555 – detail

1962-79 V-Belt Style Fan Belt

Make sure your belts are in top condition before starting off on your next road trip. Belts are inexpensive, yet they are an often overlooked component of a restoration or daily driver... that is until something goes wrong. Don't risk the life and longevity of your engine for the sake of a few bucks. Replace your weathered belts before you are stranded due to overheating, dead battery, etc. Better yet, buy a new set to install and keep a spare set just in case you should have a broken belt while on the road with your classic vehicle.

1964-79 Performance Water Pump

These "super cooling" pumps are computer designed to deliver more flow at a higher velocity. They're the ideal choice to prevent overheating in any performance vehicle. Precision cast powdered metal impellers have extra large vanes for the maximum flow rate possible, ensuring adequate pressure and volume even at lower engine speeds. They feature a 5/8" pilot shaft. Choose from 3 popular finishes.

1964-68 High Volume Small Block Short Water Pump

High-performance, high volume aluminum water pump features balanced distribution and improved efficiency with close tolerance impellers that increase coolant flow over stock pumps. This increases the pressure within the block to help prevent hot spots and steam pockets, as well as improves coolant flow through the radiator. When used with a non-restrictive, high flow thermostat (sold separately) this pump to work to its highest capability. Available in natural aluminum, polished aluminum, or chrome.

EMP Stewart Components

WP12203

WP21104

1962-79 Cast Iron High Flow Water Pump

For over 20 years, Stewart Components has focused on the development and production of high-performance water pumps, resulting in innovations like special high strength castings, larger flow passages, more efficient impellers, and stronger bearings. Every pump is designed to exacting tolerances for reliable, long-term performance, offering maximum flow with minimum power consumption. These pumps deliver up to 180 gpm (gallons per minute) of coolant flow at 8000 RPM, yet consume just 2.26 horsepower at 4000 RPM! Each Stewart pump is hand assembled and tested at 10,000 RPM.

Stage 1 Cast Iron Water Pumps

These Stage 1 pumps use brand new, original equipment iron castings are internally engineered for performance and reliability. These water pumps feature a 3/4" heavy-duty bearing. Available for V-belt or serpentine belt systems.

Big Block – Counter Clockwise Rotation

WP11105	1968	5.750" tall, 5/8" shaft	129.99 ea

Stage 2 Aluminum Water Pumps

These Stage 2 pumps use brand new, 356-T6 heat treated aluminum castings that are precision machined to be compatible with stock lines and brackets. These water pumps feature a 3/4" heavy-duty bearing. Available for V-belt or serpentine belt systems.

Important: *These small block water pumps require the use of a high flow, modified thermostat due to the elimination of the factory bypass holes in the Stage 2 pumps. See listings below for available temperatures.*

1970 Water Pump Pulley

Reproduction factory long water pump pulley for 1970 Nova big block engine models. This is a single groove pulley that measures approximately 6-1/4" in diameter. For models with or without air conditioning. Shallow single groove design. GM number stamped on pulley is 3976059AO.

14543 1970 3976059, 6-1/4" ..... 39.99 ea

Warning: concerning water pump pulleys

Stock replacement, aftermarket stamped steel or cast iron pulleys are not designed to exceed 400 horsepower or 6000 RPM. Using reproduction pulleys on engines in excess of these limits may result in catastrophic disintegration of the pulley causing severe damage to the engine, cooling system and body parts. Classic Industries® assumes no liability for damages caused by improper usage of pulleys. Please be sure to install the pulley properly to avoid damages that could occur from improper installation or exceeding the recommended RPM limitations.

1964-79 Water Neck O-Ring

Avoid water leaks which can compromise your cooling system. Reseal your water neck with this replacement "O" ring. For use on various GM models.

66610	1964-79	replacement o-ring	.99 ea

Chrome Water Outlet

Chrome straight-up water outlet designed for 1964-79 custom applications. Each chrome water outlet comes complete with gasket and bolts for fast installation.

T4987	small block or big block		13.99 ea

1974-79 SB Water Outlet

Original style replacement water outlet designed for 1974-79 small block engines. Each water outlet is triple chrome-plated. Includes o-ring and chrome screws.

T9468	1974-79	small block	17.99 ea

Water Outlet Restrictors

If coolant travels too fast, it doesn't absorb enough heat inside the engine or properly cool down as it passes through the radiator. That's why it is still important to restrict coolant flow in applications where a thermostat isn't desired. These restrictors come in a set of three with a 5/8", 3/4", and 1" hole to allow adjustment for optimum cooling. Each 2-1/8" plate is made from anodized aluminum and fits under the water outlet in place of the thermostat.

263440	restrictor plates		17.99 set

Reduced Barrier Hose Kit

Reduced barrier hoses have the same i.d. as standard barrier AC hoses. However, the wall thickness of a reduced barrier hose is thinner which creates a smaller o.d. hose. This allows for a cleaner look that takes less space and can make tighter bends than standard barrier AC hose. Vintage Air reduced barrier hose kits are available with finished hoses for the stock configuration or open-ended hoses for modified configurations. Kits include: hoses, beadlock fittings, o-rings, and mounting hardware.

1962-79 Aluminum AC Compressor

This is a 10 cylinder "bolt-in" direct replacement for the GM Fridgidare/Harrison A6 compressor. This new design is specifically engineered to fit the A6 mounting brackets and AC hose assemblies. This highly efficient compressor offers a smoother, quieter operation, creating less vibration and engine drag, increased fuel mileage, improved engine and cooling system performance. The aluminum body is 52% lighter than the original A6. Designed to accept both superheat and high pressure safety switches. This compressor is supplied with a single groove clutch and has a 210cc displacement. Compressor is pre-oiled and compatible with R12 or R134a. Fits 1962-79 Chevy II/ Nova models with the A6 Compressor. Includes hardware and instructions.

Sanden Style "Peanut" AC Compressor

New, not rebuilt, Sanden SD706/SD7B10 "Peanut" style air conditioning compressors. The compact SD7B10 is becoming one of the most popular compressors for original equipment manufacturers or aftermarket. SD706s rob less horsepower resulting in improved fuel economy and increased performance. They feature a modern rotary internals that reduces noise and vibration. Their extremely compact design is half the weight and bulk of most OE units. With mounting ears on the front and rear and on both sides, these compressors are very easily adapted to most engines.

LS Engine Cover Kit

Take your engine bay to the next level with this customizable LS engine cover kit. Made in the USA from special temperature resistant automotive polycarbonate and features 6061 aluminum inserts. This kit is compatible with any automotive paint or hydro dipping for endless customizing options. The LS engine cover kit is engineered to fit LS1, LS2, and LS3 passenger car intakes and coil packs only. Kit includes: valve covers, intake cover, cover inserts, ARP mounting hardware, billet oil filler, and aluminum stand-offs.

Note: *Some trimming may be required. Must install aftermarket fuel rail HC2123.*

1962-74 Chevy II Nova LS Conversion

These sets take the guesswork out of installing an LS engine into a 1962-74 Chevy II/Nova model. Designed to position the engine and transmission with room for most accessory drives, exhaust systems, heater boxes, steering and power brakes. Available for use with T56, 4L60E, or 4L80E transmissions. Includes: motor mounts, frame brackets, transmission crossmember with a poly mount, installation hardware, and detailed instructions. Ceramic coated headers specifically designed for these kits are also available. Features a lifetime replacement manufacturer's warranty. Made in USA.

Important: *Modification to the firewall or transmission tunnel may be required.*

Note: *1968-74 models require notching of the frame when using a 1998-02 F-Body accessory drive system with low mount AC compressor.*

Emissions Note: (3) *Non-CARB compliant (not legal for emission controlled vehicles).*

1962-79 Replacement Motor Mount

If your vehicle has 50-60,000 miles or more or the motor mounts have been soaked with oil over a period of time, chances are they have grown weak and are need of replacement. Worse yet, if you experience a thud upon acceleration or deceleration, check for signs of fan scallop on your radiator core or fan shroud. Use a pry bar to check the mounts for movement. A fan scallop or excess movement of the mount would be the telltale sign of a broken motor mount. This can be a dangerous condition as the engine can shift, causing the accelerator to stick in a full throttle position. Our reproduction motor mounts are an inexpensive cure for this potentially dangerous condition.

*Note: *Use with big block frame mounts only.*

1968-74 Motor and Mid-Mounting Plate

When installing a high-performance engine into your new Chassisworks subframe, secure it with the corresponding mounting plates. These specially designed aluminum bolt-in motor plate and steel transmission mid-plate for automatic transmissions or manual transmissions are constructed to provide a much more solid perch for your motor than OE style pedestal motor mounts. All manual transmission applications require the use of a Lakewood bellhousing.

Adjustable LS Motor Mount Adapter Set

Adapter allows the installation of LS engines into 1958-72 models using a standard 3 bolt motor mount. Position the engine in either the original location or 1"-2" forward to allow for transmission bellhousing clearance. Mounting locations allow proper driveline alignment and an additional 1/2" of adjustment. Includes: engine mounting plates, adjuster plates, hardware, and instructions.

Note: *Some aftermarket motor mounts may require mounting holes enlarged to 7/16". Some OEM style mounts may require additional clearance of the cast rubber portion to allow full front to back adjustment of the adapter. Not for use with "clamshell" type mounts.*

A9750010 adapter..... 164.99 set

LS700201

Fitrite™ LS Engine Mount Set

This set is made to assist you with swapping a LS series engine into your 1962-79 Chevy II/Nova. These mounts are designed to move the engine forward and backward for ease of fitment. The long adapter set allows the engine to move from 1/2" rearward (great for oil pan to crossmember clearance) up to 3-1/2" forward for a full 3-1/2" of travel with a completely custom range of positions. The short adapter set is a smaller, more compact version, moving the engine from 2-1/4" forward to 3-3/4" forward for a total of 1-1/2" of travel. This exclusive design no-weld brackets are CNC laser cut steel and features a durable black powder coated finish. FitRite™ sets include POLYPLUS™ engine mounts.

Note: *The short adapter works well with the low mounted air compressor.*

Each Set Contains 12 Groups of Fasteners:

- intake manifold bolts
- valve cover bolts
- thermostat housing bolts
- alternator bracket bolts
- distributor bracket bolts
- motor mount bolts
- oil pan bolts
- coil bracket bolts
- header bolts
- front cover bolts
- water pump bolts
- fuel pump bolts.

Complete Engine Bolt Set

It's easy to assemble a show quality engine when you use ARP's handy engine and accessory fastener set. Virtually everything you need comes organized in one convenient package! More importantly, each and every fastener is superior in strength to the OEM bolts. Choose from heat treated 8740 chromoly steel with black oxide finish or corrosion resistant polished stainless steel. Both materials are rated at 170,000 psi tensile strength and available in both Hex and 12 point heads.

Note: Sets are designed for carbureted engines. 1987 and newer EFI applications may require the purchase of additional fasteners. Each set contains 12 groups of fasteners.

Holley

H3022

1955-87 Retrofit LS Oil Pan

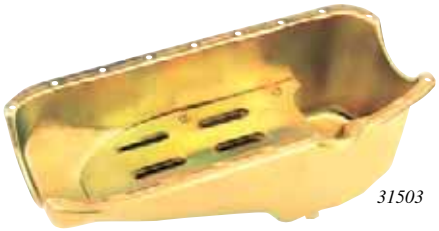

Holley's Retro LS oil pans are designed for maximum chassis and ground clearance on 1955-87 GM rear wheel drive V8 applications originally equipped with a rear sump oil pan. Each pan is made from machined cast aluminum and uses an original style oil filter and gasket. Features provisions for a factory style oil cooler and attachment points for the factory bellhousing. Set includes: sump baffle, pickup tube, sump plug, oil filter stud, and oil passage cover. H3021 LS Retrofit oil pan is designed for LS engine retrofit installation in a variety of GM muscle/classic car and truck models. H3022 LS Gen 1 F-Body Retrofit oil pan is designed specifically for LS engine installation in 1968-74 Chevy II/Nova models. The H3022 oil pan may also fit other muscle/classic car and truck chassis where more engine to chassis clearance is required near the front half of the oil pan.

Note: *Requires the use of LS3 dipstick and dipstick tube.*

Attach Your Oil Pan Like a Pro!

Undoubtedly the most professional method of attaching an oil pan is through the use of Milodon's pan stud and nut set which includes heat treated studs with rolled threads and special nuts with built-in serrated washer face. The set provides easy pan installation, prolongs gasket life and the special serrated nuts guard against pan loosening during operation.

1968-79 Stock Replacement Oil Pan

These stock replacement oil pans feature a distinctive gold-plating that is not only cosmetic, but also provides long-lasting protection against corrosion, inside and out. Every pan is 100% leak checked and block checked to assure the high standard of quality that Milodon is famous for. Flat, unwarped pan rails and proper bolt hole alignment provide for a fit and function that is unmatched in the industry. All pans are specifically designed for use only with Milodon gaskets, sold separately. Sold separately is Milodon's "crushproof" gasket seal set, item #40100 for 1955-85 small block or item #40200 for 1964-90 big block. Also offered is Milodon's new 1 piece gasket item #41000 for 1955-85 small block or item #41001 for 1986-02 small block. For use with original stock oil pickup screen also sold separately.

This dipstick assembly has a unique sleek design, as well as many functional benefits. All dipstick hardware is CNC-machined from billet stainless steel. Fittings, stick, and hose are all stainless steel so they will stay bright and rust-free even with the use in an everyday driver. It uses an o-ring sealed top to positively seal against water or dirt and provides a very efficient seal for race cars running an internal vacuum pump or vac-u-pan system. Made in USA.

FL500007

FL700032

Engine Oil Cooler

Engine oil is designed to act as a coolant as well as a lubricant for your motor. If the engine oil is allowed to get too hot, horsepower drops, varnishes form, and the oil starts to break down, which can lead to premature engine wear. Flex-a-lite heavy-duty oil coolers can help prevent this by keeping oil temperatures down, helping to ensure longer-life to engines and components, and reduce the stress created by high-performance engine modifications. Also suitable as a heavy-duty transmission fluid cooler. Includes -8, -10, and -12 interchangeable AN fittings with o-rings.

Important: *Depending on application and setup, additional fittings or adapters may be required.*

Note: *Dimensions: width = 11"; depth without fan = 1-3/4", with fan = 4-1/4"; variable height, see height below in the line listings.*

MADE IN USA

Thermostatic Oil Cooler Line Adapter

High-quality die-cast aluminum 180 degrees F thermostatic sandwich adapter with 1/2" NPT ports and an O-ring diameter of 3 1/2". This adapter provides external oil lines to allow the addition of an engine oil cooler to most 1956-07 GM V-8 engines. It installs between the stock engine oil filter landing and the oil filter. Stock filter is retained. Set includes sleeve nut and hose barb fittings.

15720 cooler line adapter ..... 47.99 set

MISHIMOTO

MM13064

Oil Catch Can

Protect your muscle car or truck from potentially harmful oil blow-by with this oil catch can by Mishimoto. Internal baffles within the catch can trap the oil and moisture in the gasses coming from the PVC valve while recycling the gases back into your engine thus preventing sludge buildup. The 16 oz. catch can is made from aluminum and can be mounted virtually anywhere under your hood with the included hardware

MM13063 black ..... 110.99 set
MM13064 carbon fiber..... 140.99 set

Oil Catch Tank

An oil catch tank works as a filter for the PCV system, reducing emissions and carbon buildup. This fabricated aluminum tank includes mounting tabs, barbed inlet/outlet fittings, a drain plug, and a sight glass to let you know when it is full.

25051 round 17 oz. tank w/breather filter.. 94.99 set

Engine Saver Prefilter Screen

MOROSO

Add life to your engine with a prefilter screen for your oil filter. This stainless steel screen installs on top of conventional spin-on oil filters and traps debris down to the 280 micron range without restriction or loss in oil pressure, letting you examine particles from failing bearings that would normally be trapped in a filter, unseen.

223845 small block Chevrolet ..... 28.99 ea

MOROSO

Oil Bypass Eliminator

An oil bypass valve lets oil bypass the filter if pressure gets too high or the filter becomes plugged. For performance engines that often see increased oil pressure at high RPM, this can cause more damage than it prevents, due to the frequent circulation of unfiltered oil. This anodized billet aluminum adaptor eliminates the bypass valve, preserving your expensive engine. For small block applications.

223775 ..... 50.99 ea

HEATSHIELD PRODUCTS New!

Catch Can Cool Shield Insulation

Catch Can Shield is designed to keep the oil catch can cool by preventing it from being heated by ambient engine heat and direct exposure to sunlight. The Catch Can Shield uses a specially designed, heat-resistant self-adhesive, so no clamps are needed for installation. Clean the surface of the catch can with a good solvent to rid it of any oil or other residues, then stick it on and you're ready to go.

Oil Filter

The K&N Performance Gold® oil filter has been constructed from the ground up to satisfy the vehicle owner who wants the very best oil filter available. Metal top end caps are used instead of paper to ensure that no unfiltered oil can get back into the system. High volume positive oil flow with low restriction coupled with exacting engineering standards results in the right balance between engine protection and low oil pump drag.

High-Performance Synthetic Engine Oil

Delivers superior protection and improves performance in four cycle gasoline and diesel engines. Increase horsepower and torque, save fuel and reduce heat, wear and emissions! It has unsurpassed oxidation stability that allows for extended oil drains and fewer oil changes, which saves time, money and reduces the impact on the environment. Royal Purple's motor oils for passenger cars and trucks are API licensed. Performance advantages come from a blend of synthetic oils plus Royal Purple's proprietary Synerlec technology. Compatible with other mineral and synthetic motor oils.

Accu-Drive® Camshaft Gear Drives

Edelbrock

MADE IN USA

E7890

Replace Your Stock Timing Chain with a Precision Gear Drive System from Edelbrock! The Accu-Drive® camshaft gear drive set replaces a stock timing chain with a precision gear drive system. The gear drive can be easily installed. Just replace the stock crank and camshaft sprockets with Accu-Drive® gears and slip in the idler assembly. Most Accu-Drives require no modifications to the engine block, although some fitting of the axles and front cover may be required. The Accu-Drive® gear system transmits power from the crankshaft gear to a full floating main idler gear which drives the camshaft gear. A unique feature of the Edelbrock Accu-Drive® system is the ability of the main idler gear to float to an optimum position between the crankshaft and camshaft gears.

Important: *Not for stock Chevy hydraulic roller lifter cam equipped engines. Accu-Drive® gears are not recommended for use above 7000 RPM or on computer controlled vehicles with knock sensors. On some late model small block engines, it will be necessary to check clearance behind the cam gear at the engine block at the 12 o'clock position. Make sure gear clears oil galley bosses on block when in the most rearward position. Grind or machine block for clearance.*

Emissions Note: ③ *Non-CARB compliant (not legal for emission controlled vehicles).*

Warning Concerning Crankshaft Pulleys

Stock replacement, aftermarket stamped steel or cast iron pulleys are not designed to exceed 400 horsepower or 6000 RPM. Using reproduction pulleys on engines in excess of these limits may result in catastrophic disintegration of the pulley causing severe damage to the engine, cooling system and body parts. Classic Industries® assumes no liability for damages caused by improper usage of pulleys. Please be sure to install the pulley properly to avoid damages that could occur from improper installation or exceeding the recommended RPM limitations.

T9603 T9608 T9724

1969-79 Chrome Crankshaft Pulley

Dress-up your small block or big block engine with a chrome crankshaft pulley from Classic Industries®. These beautiful chrome aftermarket pulleys are manufactured with great attention to detail and are highly polished for a show quality shine. Applications are available for small block or big block engines.

HD100001

HD100006

Chevrolet Pro/Race Harmonic Balancer

Pro/Race high-performance harmonic balancers are direct replacements for factory cast iron units which may fracture or disintegrate at high RPM. Pro/Race dampers are ideal for the additional torque loads from belt driven superchargers. The STREET damper features special splines to enhance bonding between the elastomer, inner hub, and outer ring to prevent any outer ring radial movement, perfect for engines making between 350 to 400 horsepower. Externally balanced balancers feature weights bolted in place which may be removed for neutral or internally balanced application. Internally balanced balancers can be used on an external application simply by ordering the correct engine specific weights and bolting them in place.

*Note: *HD100016 and HD100019 are NOT drilled to accept counterweights.*

1720101

1720111

MADE IN USA

Performance Harmonic Damper

Fluidampr performance harmonic balancers and dampers contain no rubber or elastomers. Instead, they are filled with a viscous silicone-based liquid that doesn't wear out after time. CNC-machined and balanced steel with a black zinc chromate finish. All dampers are SFI 18.1 certified and are designed to last a lifetime without being rebuilt. Made in USA.

Note: SB dampers are not for 1992 and later LT1 engines.

MR7108

Replacement Engine Gaskets

If you have a Chevy engine to reassemble, you will need new gaskets. Made from durable materials that meet or exceed OE specifications, these gaskets are perfect for stock or mild performance vehicles. Sets include gaskets for cylinder heads, intake, exhaust, valve covers, oil pan, timing cover, and water pump. Valve seals, rear main seals, and front timing cover seals are also included, along with all necessary gaskets and seals for their listed applications. Individual gaskets are also available. Sets do not include carburetor or FI intake plenum gaskets.

Ultra-Seal Head Gasket

The Ultra-Seal head gasket has a 5 layer composite construction and is coated with high temperature silicone to ensure seal of engine fluids. It's graphite core has excellent thermo-conductivity; transfers heat away from hot spots in head to coolant passages, preventing gasket burn out. The Ultra-Seal head gasket provides excellent stability, compressibility, high temperature endurance and will not Brinell (indent) aluminum cylinder heads.

75801	1970-79	400	4.190" bore	64.99 ea

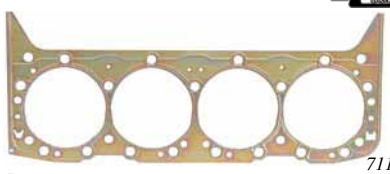

MLS (Multi-Layered Steel) Head Gasket

The MLS head gasket is manufactured from Viton rubber coated stainless steel layers and is stress formed embossments seal extreme cylinder pressure. The MLS head gasket provides excellent stability and reduces cylinder bore distortion. Ideal for supercharged, Turbo charged, nitrous, and extreme compression ratios.

.040" Compressed Thickness

73130	1969-79	283-350	4.060" bore	111.99 ea

71130

71131

Steel Shim Head Gasket

The Steel Shim head gasket is manufactured from .020" steel shim stock and is stress formed embossments seal extreme cylinder pressure. Made thinner than OE head gasket, increases engine compression and coated with high temperature silicone to ensure seal of engine fluids.

Note: Do not use with lightweight 305 heads.

.020" Compressed Thickness

71130	1969-79	283-350	4.100" bore	32.99 ea
71131	1969-70	396-454	4.370" bore	32.99 ea

Gasket Maker

Makes reliable formed in place gaskets that resist cracking, shrinking and migrating. Coats precut gaskets to increase reliability. Resists auto and shop fluids. Great for use on valve covers, intake manifold end seals, timing covers, water pumps, and thermostat housings. 3 oz. tube.

S80022	blue #6B	7.99 ea
81630	red #26B	7.99 ea

Ultra Copper Gasket Maker

For use with Turbo-charged engines or high-performance models. The most advanced, hi-temperature silicone gasket available. Sensor safe, low odor, non-corrosive. Outstanding oil resistance and joint movement values. Temperature range -75 to 700 degrees F intermittent. Recommended for pre-1980 six cylinder and V8 engines. Great for use on: exhaust manifolds/headers, valve covers, intake manifold end seals, oil pans, timing covers, water pumps, thermostat housings. 3 oz. tube.

S81878	copper #101B	8.99 ea

Form-a-gasket Sealant

Slow drying, non-hardening sealant designed for sealing cut gaskets and stamped parts. Allows for easy disassembly if required. Has a temperature range of -65 to 400 degrees F. Use where sealing is more important than adhesion. Resists shop fluids and fuels. Great for valve cover gaskets and oil pan gaskets.

S80016	3 oz.....	9.99 ea

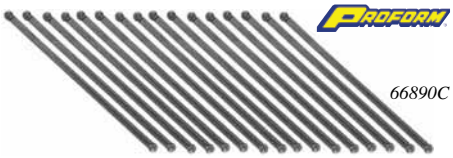

Super Silicone Sealant

Excellent for use with all types of gaskets. A rapid curing adhesive/sealant can also be used as a sealant between flanges, hose connectors, and similar close fitting parts.

08661	clear	3 oz. tube.....	14.99 ea

TVL43	mechanical	8.99 ea

Stamped Rocker Arm Set

66905

Stamped steel rocker arms featuring long slots for use with cams that have lift specs higher than stock for additional clearance at the rocker stud. Fits small blocks through 1986 with stock 1.5:1 pivot ratio and 3/8" rocker studs. Set of 16 rockers with pivot balls and nuts, or add a set of 16 stock length, high-performance 5/16" pushrods with welded ball ends and save.

Note: Check for pushrod clearance and alignment, spring coil bind, piston to valve clearance and valve timing when modifying the valvetrain to exceed factory specs.

1.5:1 Ratio for 3/8" Stud

66905	without pushrods	79.99 set

66936	for 7/16" studs	27.99 set

66908C

1958-86 Aluminum Roller Rockers

The needle bearing fulcrum and roller tip design unleashes power while lengthening valvetrain life and reducing valve stem tip wear. Small block sets are available for engines with stock 1.5:1 ratio arms, or performance enhancing 1.6:1 arms. For small blocks through 1986, a combination of eight 1.5:1 arms and eight 1.6:1 arms is available to allow greater air flow on either the intake or exhaust ports. Big block sets for engines through 1984 feature high-performance 1.7:1 ratios. Sets include 16 rockers with poly locks.

Note: Check pushrod clearance and alignment, spring coil bind, piston to valve clearance and valve timing when modifying the valvetrain.

Emissions Note: * ③ *Non-CARB compliant (not legal for emission controlled vehicles).*

Camshafts

Your Choice of Four Convenient Sets to Meet Your Specific Needs!

A – Camshaft Only

The camshaft only set includes camshaft, instructions, assembly lube and decals.

B – Cam and Lifters

Order the cam and lifter set to add a matched set of lifters to your camshaft.

C – Small Set

Order the small set for cam and lifter set plus timing chain and gear.

D – Full Set

Full set includes cam, lifters, timing chain and gear valve springs and retainers, valve locks, valve stem seals.

High Energy™ Cams for Your Daily Driver!

All High Energy™ designs are totally streetable cams. They will produce 10 to 30% more power than a stock cam throughout the RPM range. Each cam has a particular RPM range in which it works best. By selecting the cam that best suits your driving needs, exceptional power increases can be expected. High Energy™ Cams work great for everyday driving without the "bad" side effects normally found with other cams. High Energy™ cams produce more power, are more efficient, and do not affect the engine's idle characteristics to the point of making your vehicle undriveable. High Energy™ Cams will not affect any vacuum or power accessories such as power brakes, air conditioning or steering.

Important: *On small block applications, High Energy Cams may be used with stock valve springs and lifters. However, these components must be in good operating condition. In order to protect your camshaft warranty and for maximum performance benefit, we recommend replacing stock valve springs and lifters with a high-performance set from Classic Industries®.*

Emissions Note: * ① *CARB EO compliant (50 states legal).* ** ③ *Non-CARB compliant (not legal for emission controlled vehicles).*

CAMS for your High-Performance Street Machine!

The Magnum™ Cam is a great cam for high-performance driving in street machines. Provides 30-70% more horsepower and a rough and ready to rumble idle in small block or big block Chevy applications. The Magnum™ will not affect power accessories, but should be used with headers. This is the perfect cam for cruising. Xtreme Energy™ Cams are Comp Cams® series of hydraulic cams. They are designed to take advantage of the latest improvements in valve train components and the newest developments in camshaft design. Xtreme Cams can be used in any street or street/strip application where both throttle response and top end horsepower are desired. Increases horsepower from 20-70% over stock. Includes camshaft, lifters, chain set, valve springs, valve spring retainers, valve locks, valve stem seals, assembly lube, instructions, and decals.

1964-90 V8 Dual Port Intake Manifold

Offenhauser Dual Port intake manifolds feature completely separate runner systems for the primaries and secondaries for more power across the RPM range. At low load, the primaries feed the air/fuel charge through the smaller bottom passages at near sonic speed, improving power and efficiency. When the secondaries open, their charge goes through the bigger, cooler upper passages.

Emissions Note: ③ Non-CARB compliant (not legal for emission controlled vehicles).

1964-86 V8 Tri-Power Intake Manifold

Offenhauser 360˚ Equa-Flow Tri-Power intake manifold makes good use of Offy's 360 degree technology to feed all cylinders evenly and make more power. That combination delivers the fuel-air charge evenly to all cylinders for more power without flat spots.

Note: Accepts three large base Rochester 2GC carburetors.

Emissions Note: ③ Non-CARB compliant (not legal for emission controlled vehicles).

New!

OF5253

1964-90 V8 Equa-Flow 4 Hole Square Bore Intake Manifold

Offenhauser 360˚ Equa-Flow single and dual quad 4 hole square bore intake manifolds make good use of Offy's 360 degree technology to feed all cylinders evenly and make more power. This results from their single plane configuration, with its unique split plenum chamber and tuned intake runners. That combination delivers the fuel-air charge evenly to all cylinders for more power without flat spots. Drilled for AFB and Holley carburetors.

*Note: *Works with AFB carburetors only.*

Emissions Note: ③ Non-CARB compliant (not legal for emission controlled vehicles).

1968 V8 Equa-Flow Dual Quad Spread Bore Intake Manifold

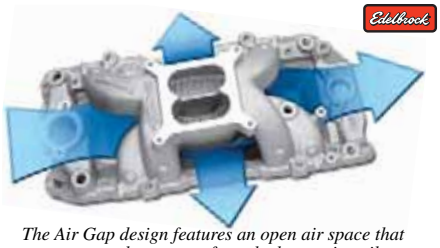

Offenhauser 360 Degree Equa-Flow dual quad high rise intake manifolds make good use of Offy's 360 degree technology to feed all cylinders evenly and make more power. Edelbrock Performer series and Carter AFB carburetors are recommended. Some applications cannot mount Holley carbs in any manner, or clear HEI.

Emissions Note: ③ Non-CARB compliant (not legal for emission controlled vehicles).

Intake Manifolds

The Air Gap design features an open air space that separates the runners from the hot engine oil.

Performer Air Gap

Designed for 1955-86 small block Chevys, the great looks of the Performer Air-Gap along with the solid idle to 5500 RPM performance make this an ideal choice for street trucks. Fits spread-bore or square-bore carburetors. There is no provision for exhaust heated chokes or exhaust crossover. Made in USA.

Emissions Note: ③ *Non-CARB compliant (not legal for emission controlled vehicles).*

spread bore *square bore*

Performer RPM Manifold

Performer RPM manifolds are dual plane, high rise intake manifolds with a 180 degree firing order to produce incredible top end horsepower while retaining good throttle response. Their larger plenums and runners match the free flowing exhaust, and high lift cams and other modifications of a high output engine.

Important: *Will fit cast iron Chevrolet Bow Tie cylinder heads, but will not fit 1987 and later cast iron cylinder heads.*

Emissions Note: ③ *Non-CARB compliant (not legal for emission controlled vehicles).*

Intake Manifold Parts

225050

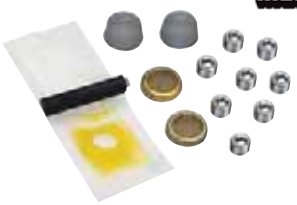

225050 detail view

Lifter Valley Oil Baffle

This aluminum lifter valley baffle simply snaps into place in the lifter valley, shielding the bottom of the intake manifold from hot oil to keep incoming air cool and dense. It also keeps excess oil out of the valve covers and holds lifters in their bores in case of pushrod or rocker arm failure.

Note: Due to minor variations in block castings minor trimming may be required. Not for use with roller lifters.

225050	small block Chevy baffle	54.99 ea
225100	big block Chevy baffle	54.99 ea

Oil Return Screen Set

This oil return screen set is inexpensive insurance on any modified small block Chevy engine. The screens install in and over the oil drain holes in the lifter valley, trapping debris from valvetrain failure, keeping it out of the oil pan. Includes: galley plugs, screens, and a special epoxy for installation.

216 Stovebolt Intake Manifold Heat Plate

Installing aftermarket exhaust manifolds or headers on 216ci 6 cylinder engines requires an intake manifold heating system for proper performance. The original intake and exhaust manifolds were connected with a heat riser system to keep fuel at ideal atomization temperature. Without this, fuel puddles at idle, causing poor performance, hesitation under acceleration, and fouled spark plugs. This manifold heater plate solves this issue using temperature regulated coolant circulated through the cooling system, rather than extremely hot exhaust gas. CNC-machined from 3/8" heavy gauge aluminum and includes barbed brass fittings and instructions. Made in USA.

*Note: Gaskets and mounting hardware not included. *On vehicles without a water outlet on the thermostat housing use thermostat housing spacer 4010003.*

109216*	216ci engines	51.99 ea

6 Cylinder Intake Manifold Heat Plate

Installing aftermarket exhaust manifolds or headers on 194, 230, 250, and 292ci 6 cylinder GM engines requires an intake manifold heating system for proper performance. The original intake and exhaust manifolds were connected with a heat riser system to keep fuel at ideal atomization temperature. Without this, fuel puddles at idle, causing poor performance, hesitation under acceleration, and fouled spark plugs. This manifold heater plate solves this issue using temperature regulated coolant circulated through the cooling system, rather than extremely hot exhaust gas. CNC-machined from 3/8" heavy gauge aluminum and includes barbed brass fittings and instructions. Made in USA.

New!

Elite Series II Valve Covers

Features a design that is influenced by the original Elite Series released in 1985, but with a new modern take on this classic look. They're made from heavy gauge, die-cast aluminum and are finished off with a show quality high luster polished finish. The raised fins are accented by a contrast gloss black finish between the fins for the definitive Elite Series look. Edelbrock's tall profile valve covers are 2" taller than stock, and clear most roller rockers and valvetrain components. Our low profile valve covers clear all air conditioning, alternator brackets, and aluminum rockers. Overall height is measured from gasket flange to top at the highest point.

***Emissions Note:** ③ Non-CARB compliant (not legal for emission controlled vehicles).*

OE Style Big Block Valve Cover Set

One of a kind reproduction of the original type baffled valve covers for 396-454ci big block. Each set features correct OE style plug wire retainer tabs, correct diameter grommet holes, and oil filler cap holes. Applications are available with or without notch for booster and with original factory type oil drippers or without oil drippers. Choose triple chrome-plated finish or paintable covers. Individual components are also available.

Note: Notched valve covers are correct for 1965-67 Corvette models where clearance of brake booster is a concern.

Without Booster Notch

MADE IN USA

LS Coil Covers

Elegantly hides LS coil packs. Fits GM LS engines utilizing existing coil bracket mounting points. Has a cutout for the oil filler. Designed to fit LS crate motors and will not clear factory high mount alternators (such as those found on Corvettes) unless a cutout is fabricated or aftermarket alternator and brackets are used. Best suited for aftermarket serpentine pulley systems. Machined from 6063-T6 aluminum. Can be used with relocated coil packs for a lower profile appearance. Dimensions 19-1/2" x 5", available in black finish. Made in USA.

PCV Valves & Grommets

Crankcase Evacuation System

This universal crankcase evacuation system replaces the standard PCV to air cleaner system by connecting to the exhaust system allowing exhaust pressure to pull the from the crankcase. Includes two simple pipes with one way valves that weld to the header collectors and are connected to dual valve cover breathers.

Note: *For valve covers with 1-1/4" holes. Hoses not included.*

Emissions Note: *Non-CARB compliant (not legal for emission controlled vehicles).*

20501 ..... 62.99 set

Dual Flow Adjustable PCV Valve

Does your PCV valve match your engine? Stock PCV valves are not designed to work with modified high-performance engines due to their altered vacuum profiles. A mismatched PCV valve can cause oil to push out of your breathers, cause oil leaks, or contaminate your oil with piston blow by gasses. Now you can manage your crankcase pressure with this fully 6061-T6 billet aluminum dual flow PCV valve. Once adjusted, the valve will provide sufficient crankcase ventilation during both idle and cruise. Valve fits 3/4" i.d. valve cover grommets and 3/8" i.d. PCV lines. A 3/8" inline style valve allows for installation on 3/8" i.d. inline applications. PCV valve set includes valve, vacuum gauge fitting, Allen wrench, and detailed instructions. Made in USA.

Emissions Note: *Non-CARB compliant (not legal for emission controlled vehicles).*

Street Fire HEI Distributor

We know the importance of a centrifugal advance in a distributor so our engineers made sure that the Street Fire received an advance assembly with coated weights and welded weight pins (not just pressed in like other models). The Street Fire is fit with the same gear that is used on our Pro-Billet models. The metallurgy of this gear has been refined for years to perform through the harshest conditions. Inside, the ignition module and coil work together to produce a stout spark to light the fuel mixture for great performance. One-year warranty.

Emissions Note: ① CARB EO compliant (50 states legal).

8362	Street Fire HEI		229.99 ea

HEI Distributor with Coil — Polished Finish

Aftermarket high-performance distributors use with HEI V8 engines. This high-performance distributor produces a 50,000 Volt spark through 7500 RPM with true spark alignment for instantaneous response, a high performance curve, a premium cap with brass terminals, and a low-saturation ignition module. Each distributor includes distributor cap, rotor, coil, and coil cover. Features a polished cast aluminum housing and iron gear.

Pro-Billet Distributor

These distributors feature a flawless lightweight CNC-machined 6061-T6 billet aluminum housing and a polished steel shaft that receives a QPQ, or Tuftride coating that reduces friction and resists corrosion. To accurately guide this shaft, MSD uses a sealed ball bearing located at the top of the housing. At the bottom of the housing, an extra long sintered bushing controls the shaft. This combination keeps the shaft spinning smooth and accurately throughout 10,000+ RPM. Choose from the "standard" Pro-Billet distributors that utilize the MSD 6, 7, 8, or 10 series ignition control box or from our "Ready-to-Run" distributors that are internally controlled. "Ready-to-Run" distributors do not require an external controller and are the "Plug and Play" alternative to more expensive computer controlled systems. Made in USA.

*Emissions Note: * ① CARB EO compliant (50 states legal). ** ③ Non-CARB compliant (not legal for emission controlled vehicles).*

Billet Slip-Collar Distributor

Flame-Thrower billet slip-collar distributors are designed to give maximum ignition performance and easy installation. Designed for small block or big block Chevrolet engines, these distributors provide all the features and benefits that the complete line of Flame-Thrower distributors offer. The slip-collar design fits either standard deck or tall deck applications.

Cast Stock Look Distributor

Flame-Thrower distributors are disguised as stock point type distributors. Featuring a hardened precision ground gear with adjustable vacuum advance and a tailored advance curve, these distributors are built to last. Available with standard Ignitor ignition or with the high-performance Ignitor III high energy multi-spark module with adjustable RPM limiter. Includes brass contact high dielectric cap and rotor.

PX710460

Note: Fits non-computer controlled small block and big block Chevrolet engines except 305 and "W-series" 348 - 409.

Emissions Note: ① CARB EO compliant (50 states legal).

PX710460	w/Ignitor III	353.99 ea

Unilite Distributor

A legend returns – the tried and true Mallory Unilite Distributor line is back! The easy three wire hook up of the Unilite makes running a stock coil, a Mallory performance coil and even a Mallory HyFire CD ignition a snap. Supplied with a quality cap and rotor, the Mallory Unilite also provides a fully adjustable mechanical advance to dial in the perfect timing curve for a multitude of engine combinations. The Unilite features a compact housing that lends itself well to applications where space is a premium due to tight firewall clearance or blower applications.

Emissions Note: ③ Non-CARB compliant (not legal for emission controlled vehicles).

3748201	Chevy V8.....	437.99 ea

HyperSpark Distributor

Sniper EFI HyperSpark distributor from Holley Performance. This high-performance billet aluminum distributor features a unique "noise free" Hall-Effect crank trigger with a welded shutter wheel for years of reliable, accurate service. Hall-Effect triggers provide a clean RPM signal required for EFI systems like the Sniper EFI. This distributor makes adding timing control to a Sniper EFI system a "Plug and Play" procedure. Includes wire retainer and a patented clear installation cap for an easy installation.

Emissions Note: ③ Non-CARB compliant (not legal for emission controlled vehicles).

H565300	SBC/BBC	379.99 ea

H565200 *565200BK*

Dual Sync Distributor

Holley EFI Dual Sync distributor for small and big block Chevrolet engines. These high-quality "Plug and Play" distributors are constructed of CNC-machined billet aluminum and include a hardened steel distributor gear. They feature Hall-Effect sensors for cam and crankshaft position for sequential fueling operation. The precision machined shutter wheel ensures an accurate RPM signal well beyond 8000 RPM. Designed for simple "Plug and Play" installation with Holley EFI systems.

Emissions Note: ③ Non-CARB compliant (not legal for emission controlled vehicles).

Magnetic Trigger Billet Distributor

These magnetic triggering billet distributors for SB Chevy engines contain a precision magnetic pickup coil and reluctor that produce a strong crisp signal even at extremely low RPM. The over molded pickup coil has excellent corrosion resistance and a standard Tyco mate plug for easy wiring. This distributor is compatible with most capacitive discharge and magnetically triggered ignition systems. Available with black or red caps.

PX300711

Note: Must be used with an ignition box.

Emissions Note: ① CARB EO compliant (50 states legal).

8910 *8910E* *8920*

Tachometer Adapter

MSD tach adapters will correct the operation of most voltage triggered tachometers or fuel injection systems that do not work directly off the tach output terminal of the MSD ignition unit. If you are triggering an MSD Blaster, 5, 6, SCI, or 7 series ignition with its white wire or points terminal, you will need item #8910 or 8910E. For applications using green and violet wires for magnetic pickup input, use item #8920. Made in USA.

*Important: *For use on non-current limiting ignitions, originally equipped with a ballast resistor. **For use on current limiting ignitions, not originally equipped with a ballast resistor.*

8910*	points or amplifier	91.99 ea
8910E**	points or amplifier	96.99 ea
8920	magnetic pickup	98.99 ea

Noise Filter

If you experience radio noise after installing the MSD ignition, you may need to install an MSD Noise Filter. Electro Magnetic Interference (EMI) is occasionally generated from the MSD power cables and can be easily eliminated by installing the Noise Filter on the heavy power supply wires coming from the MSD.

8830	noise filter.....	65.99 ea

Distributor Components

Distributor Housing Shims

When an engine block has been decked or heads have been resurfaced, shims are needed under the distributor to maintain correct clearance. If the distributor sits too low, it can cause damage to the oil pump or camshaft. These shims are made to exact GM gasket specs from high impact nylon to ensure a leak free fit. Set contains .030", .060", and .100" thick shims.

226150 distributor shims..... 11.99 set

1962-79 Vacuum Advance

A primary component of your vehicle's ignition system is the vacuum advance. The vacuum advance is a mechanism attached to the distributor which moves the breaker point or pickup coil plate when it receives vacuum generated by the engine. Over time, the vacuum advance can become worn or the diaphragm can become brittle and crack causing the vehicle to run poorly.

6A/6AL Ignition Control

MSD's new Digital 6A is the base model of the capacitive discharge multiple spark 6 Series design. Features the same footprint as the traditional 6A and 6AL, but with a lower profile for a sleek look. Like all MSD 6 Series Ignitions, the 6A will work with virtually any vehicle as long as it has a 12-18 Volt electrical system. It can be triggered using breaker points, a magnetic pickup or the output of an electronic amplifier. All necessary parts and wiring instructions are included. Will work on 4, 6, and 8 cylinder engines. The new Digital 6AL shares the same proven circuitry of the Digital 6A with the addition of a built-in adjustable rev limiter with 2 top mounted rotary dials. The combination of powerful sparks with the safety of a rev control is what makes the Digital 6AL the most popular ignition control in the world.

Emissions Note: ① *CARB EO compliant (50 states legal).*

Ignition Coils

High-Performance Coil

Complete your ignition upgrade with a Flame-Thrower high-performance coil. Best when used with the Ignitor Electronic Ignition Conversion, the Flame-Thrower high-performance coil fits existing coil brackets for a clean, factory look. Enables larger plug gaps for greater fuel efficiency and more power. Available with either a chrome or black finish. Choose from a variety of voltages and primary resistance ratings.

Emissions Note: ① *CARB EO compliant (50 states legal).*

40,000 Volt Coil – 1.5 and 3.0 Ohm

These Flame-Thrower coils are compatible with breaker point ignition systems or vehicles equipped with the original Ignitor system. Choice of 6 or 8 cylinder.

Ignition System Coil MSD

Upgrade your stock coil or complement the performance of your MSD 6 Series ignition, these coils are the right choice! The following Blaster coils share the same special windings and high voltage output as the other Blaster 2 coils, but do not include a ballast resistor. When you are using an MSD ignition control, the ignition is responsible for delivering the voltage to the coil so a ballast is not necessary. The Blaster 3 coil features an extra tall tower design to improve the coil wire attachment and spark isolation and is supplied with a 90 degree terminal and boot. Made in USA.

Emissions Note: ① *CARB EO compliant (50 states legal).*

8202	Blaster 2		49.99 ea
8223	Blaster 3		59.99 ea

New! WALKER

1969-79 ThunderSpark Ignition Coil

ThunderSpark ignition coils are precision made for superior performance and manufactured to meet or exceed all original equipment specifications. A full service kit contains not only the base sensor but also provides the installer with the mating connector, pigtail, butt splices and heat shrink to ensure a watertight connection.

9201001	1969-74	standard	16.99 ea
9201003	1974-79	HEI	23.99 ea

Blaster Performance Coil MSD

With a stock points style ignition, a ballast resistor must be placed in-line with the positive terminal of the coil. The following Blaster coils are supplied with a 0.8 Ohm ballast resistor plus a terminal and boot to fit most applications. Mallory Unilite applications also require the ballast resistor. Available in chrome or red. Made in USA.

Important: The ballast is not necessary if an MSD 6 or 7 series ignition control is being used with the points distributor.

Emissions Note: * ① *CARB EO compliant (50 states legal).* ** ③ *Non-CARB compliant (not legal for emission controlled vehicles).*

HEI Ignition Coils

MADE IN USA

8.5mm Super Conductor Coil Wire

If you're changing a coil or cap to a new design, you could find yourself searching for different terminals for the coil wire. MSD offers these 2 style coil wires to make the change easy. Also, remember that the coil wire sees 8 times the use of each plug wire so changing the coil wire as maintenance is recommended.

***Important:** *18" long, female socket style, both ends. **18" long, 90 degree male coil terminals and boots are installed on both sides to connect to an HEI style terminal. A terminal adapter is also supplied to adapt to a female socket style distributor cap.*

HV 60,000 Volt Coil

The Flame-Thrower HV (high voltage) coil have an E-Core design which is rated at a sizzling 60,000 Volts and operates with no degradation of energy throughout the temperature ranges. Made from 6063-T5 aluminum, it efficiently transfers heat to optimize energy output, and the housing is black anodized for increased corrosion resistance. Available in 3 different resistances for compatibility with most points and electronic ignition systems. Standard threaded connections and mounting hardware are included.

***Emissions Note:** ① CARB EO compliant (50 states legal).*

PX60104	0.45 Ohm	113.99 ea
PX60115	1.5 Ohm	112.99 ea
PX60130	3.0 Ohm	113.99 ea

HC 60,000 Volt Coil

The Flame-Thrower HC (high current) coils have an E-Core design which is rated at 60,000 Volts with an ultra low .32 primary resistance and has a high current design for a rapid charge rate. Made from 6063-T5 aluminum, it efficiently transfers heat to optimize energy output. The housing is black anodized for increased corrosion resistance and has a precision machined male high tension terminal and brass primary terminals. It is compatible with Ignitor II and Ignitor III systems as well as most capacitive discharge boxes. Standard threaded connections and mounting hardware are included.

***Emissions Note:** ① CARB EO compliant (50 states legal).*

PX60103	0.32 Ohm	103.99 ea

HyperSpark Ignition Coil

Holley SNIPER EFI

Sniper EFI HyperSpark ignition coil from Holley Performance. This coil features an innovative connector and integrated bracket for a secure connection and simplified mounting. Its powerful 135MJ of spark ensure complete combustion and improved performance. This coil is designed to be "Plug and Play" with Sniper EFI Systems.

***Emissions Note:** ③ Non-CARB compliant (not legal for emission controlled vehicles).*

H556152	universal	52.99 ea

Power Coil

The TSP power coil is capable of delivering a longer and hotter spark with up to 70% more spark energy than stock ignition coils. Its convenient design easily mounts to fire walls, core supports and fender wells. It features an aluminum heat sink keeping it cooler for more efficient energy output at lower temperatures. Coils have an HEI style output tower and are rated at 50 kV maximum voltage with 260 mA peak current with 0.35 Ohm primary resistance. Coils include installation hardware, a coil wire boot with terminal and a wiring harness.

A7700202	black coil	45.99 ea

Blaster SS Coil

MADE IN USA MSD

Don't let the compact size of the Blaster SS coil fool you because it is packed with performance. The efficient E-core windings are designed to produce high amounts of current without sacrificing the voltage output. In fact, when used with an MSD 6 Series Ignition, the Blaster SS produces 300 milliamps with a maximum voltage output of 40,000 Volts. The secondary windings are wound on a segmented bobbin which reduces the chance of voltage breakdown between the primary and secondary windings. For more protection, these windings are encased in a polyurethane compound for complete protection against vibration. The Blaster SS features brass terminals and a sturdy Rynite housing. It is supplied with a 90 degree boot, terminal and vibration mounts. A great addition to CD ignitions and some stock applications. Made in USA.

***Emissions Note:** ① CARB EO compliant (50 states legal).*

Performance Ignition

Never change points again!

PX71181 *PX91181*

PerTronix Ignitor

Eliminates points and moving parts that wear out, while delivering twice the voltage to the spark plugs over stock to increase horsepower, fuel economy and plug life! Optimal performance can be achieved when used with the Flame-Thrower 40,000 Volt coil. Ignitor is concealed entirely within the distributor. Installs in minutes, compatible with 12 Volt negative ground systems, and it's smog legal in all 50 states and Canada! Includes a 30-month warranty.

Emissions Note: ① *CARB EO compliant (50 states legal).*

PX1181	1957-74	8 cylinder.....	117.99 set

PerTronix Ignitor II

The Ignitor II electronic ignition goes an extra step beyond for even more power and efficiency! It senses levels of current in the coil, and uses a powerful micro controller to adjust the dwell to maintain peak energy throughout the entire RPM range. As engine RPM and operating conditions change, dwell time is increased or decreased to provide more energy at higher RPM, reducing misfires while improving engine performance. Ignitor II develops nearly 4 times more available energy between 3000 and 5000 RPM, and double the available plug voltage! The Ignitor II's higher RPM performance is maximized when used with the new Flame-Thrower II super low resistance (0.6 Ohms) 45,000 Volt coil, but the system is compatible with any induction coil. It comes with a 30-month warranty and is emissions legal in all 50 states and Canada!

Emissions Note: ① *CARB EO compliant (50 states legal).*

PX91162	1963-74	6 cylinder.....	159.99 set

8 Cylinder with Hall-Effect Style Sensor

PX91181	1957-74	8 cylinder.....	171.99 set

PerTronix Ignitor III

Ignition box performance without the box. The Ignitor III is the most advanced points replacement set. It is literally an ignition box inside your distributor. It features multiple sparks throughout the entire RPM range and a REV limiter accurate to +/- 50 RPM which is set by you with an LED user feedback for rev limit confirmation. The Ignitor III module generates 5 times more spark than points. This means more spark energy creating more horsepower and better mileage. The Ignitor III features include: adaptive dwell which maintains peak energy throughout the entire RPM range. Peak current level is reached just prior to spark for maximum energy without the heat buildup, increasing coil performance and module reliability. Legal in all 50 states and Canada. Fits GM V8 single point type distributors.

Note: Not available for 6 cylinder.

Emissions Note: ① *CARB EO compliant (50 states legal).*

PX71181	1957-74	8 cylinder.....	206.99 ea

1957-74 E-Spark Conversion Set

Are you tired of constantly having to adjust and replace points in your distributor? Eliminate those pesky points altogether with Mallory's new, low cost E-Spark conversion sets. This self-contained conversion set fits neatly within a stock GM or Mallory distributor cap, so it looks like original from the outside. Thanks to specialized electronic circuitry and an infrared signal, you'll never again have moving parts to wear out, and you gain better performance, drivablity, and throttle response, plus improved fuel efficiency!

Ignition Wires

1966 Transistor Ignition Amplifier

Ignition system trouble, one of the most frustrating problems any classic GM owner can experience! Take it to three different mechanics, get three different answers. If you're experiencing strange ignition problems that no one can seem to diagnose, don't rule out the transistor ignition amplifier. This unit heats up your spark to allow your classic to run more efficiently enhancing performance. This is a correct reproduction of the transistor ignition amplifier module. Replaces the original circuit board in amplifier. Fits all models.

32270 1966..... 188.99 ea

1964-67 Transistor Ignition Amp Extension

If your transistor ignition amplifier is fine, your harness is intact, and the system still isn't working, the problem may be the ignition amplifier extension. This integral extension runs from the internal circuit board to your amplifier housing connection.

33225 1964-67 ..... 59.99 ea

NV69371

NV67903

1966 Transistor Ignition Harness

If replacing your expensive module, be sure to order the new wiring to protect your investment! Fits all models with transistor ignition.

Amplifier Harness

While trouble shooting your ignition system, a more common problem may be the transistor amplifier wiring harness.

NV69371 1966..... 107.99 ea

Extension Harness

This harness is correctly reproduced with original style GM fasteners as are those listed above. This particular harness connects the ignition switch to the ignition amplifier extension harness listed above, be sure to order in conjunction when replacing your entire system.

CH47102 1966..... 27.99 ea

Ignition Amp Harness

This harness runs from the starter to the ignition amplifier as described above. A "must have" if you are investing in a new amplifier as well!

1962-74 Date Coded Spark Plug Wire Set

Reproduction Delco Packard plug wires for 1962-74 Nova models. Each wire includes the original style lettering with the wording Packard TV R Suppression. All wires are date coded based on the production quarter of the vehicle. "1-Q" indicates the first half of the production model year and "3-Q" indicates the 2nd half of the production year. Wiring sets are produced for Novas with original exhaust manifolds.

Note: *These are not for use with aftermarket type headers or aftermarket manifolds. Wiring may be applicable for use with other manifolds or headers but are not guaranteed to fit. 3-Q dated plug wires may be correct for use on vehicles manufactured in the first months of the succeeding years production.*

1962-79 Spark Plug

E3 has created a spectacular new spark plug that creates the industry's fastest spark growth and fastest combustion pressure rise, meaning it burns fuel more efficiently to give you more power and increased fuel economy. E3's patented design forces the spark discharge from one sharpened edge to another, and projects the spark forward into the combustion chamber, unlike traditional spark plugs, for the most consistent, powerful and efficient burn possible! Sold individually.

1962-79 Shorty Spark Plugs

Accel's patented race proven spark plugs are now available in a "shorty" configuration. The overall length of each plug has been reduced 1/4" to 3/8" (depending on the specific spark plug) to gain critical air gap space between the spark plug boot and the exhaust manifold or header tube. The shorter spark plug length also can make it easier to install and remove the spark plugs in certain applications where there is not a lot of room to work with a socket or wrench. Available as a set of 8.

8mm Superstock Plug Wires

ACCEL's SuperStock 4000 series 8mm spark plug wire sets are designed to upgrade an OE ignition system for high spark delivery levels for street driven applications. The 450 degree F rated high gloss silicone jacket is extruded over a tightly woven, rugged fiberglass braid. RFI suppression for street driven applications. Universal wire sets include standard socket and HEI boots with the appropriate terminals. Made in USA.

Core: Carbon/graphite conductive material, high resistance suppression, fiberglass/Kevlar, 3000-7000 Ohms per foot resistance.

Note: Universal fit 8 cylinder wire sets can be used for 6 cylinder applications.

8mm Superstock Spiral Plug Wires

ACCEL's SuperStock Spiral Core 5000 Series wire sets. With only 500 Ohms per foot of resistance, more ignition energy can reach the spark plug, producing a longer-lasting, hotter spark flame kernel. This 8mm wire's double silicone construction is rated to 550 degrees F. The high gloss wire jacket resists moisture, chemicals, and heat extremes for longer life and great looks. Stainless steel plug terminals. High RFI suppression for street and strip use. Universal wire sets include standard socket and HEI boots with the appropriate terminals. Made in USA.

Core: Spiral wound stainless steel alloy conductor, magnetic suppression and semi-reactive material, fiberglass/Kevlar core, 500 Ohms per foot resistance.

Note: Universal fit 8 cylinder wire sets can be used for 6 cylinder applications.

- Hi-Temp Silicone Jackets!

1958-74 Spark Plug Wires

These Flame-Thrower high-performance spark plug wires were created with the classic car in mind. They are manufactured in original 7mm size jackets to fit stock wiring looms. With no markings or script of any kind on the wire, they maintain a stock appearance yet give you all the benefits of a high-performance wire set including: 2 current paths spiral wound stainless steel alloy winding and carbon impregnated fiberglass center core, low 500 Ohm per foot resistance, silicone jackets to resist high temperatures, moisture, oil and chemicals. They also have EPDM rubber inner insulation for superior heat resistance and prevention of arcing and voltage leaks. Fiberglass reinforcing braid is added for strength and flexibility. Lifetime Warranty, Made in USA.

Thunder Volt 8.2 Ignition Wires

Taylor Thunder Volt 8.2mm ignition wires are dyno-tested and proven to increase horsepower and torque. Designed with a Ferrite spiral wound core coated with a blend of copper/nickle bonded with a conductive acrylic cover for only 40 Ohms per foot of resistance with optimum RFI and EMI suppression. A 2 layer 100% Zimplex silicone outer jacket for heat protection up to 600 degrees. Available in black, red, or blue with gray silicone spark plug boots. Universal wire sets include both standard socket and HEI boots with the appropriate terminals. Made in USA.

Super Conductor Spark Plug Wires

The MSD 8.5mm Super Conductor is the ultimate performance wire. It's extremely low resistance combined with the ability to suppress electro magnetic interference is a combination that defies the common laws of physics. Less resistance means more energy is going to make it to the spark plug to ignite the air/fuel mixture. The Super Conductor uses a copper alloy conductor resulting in less than 50 Ohms per foot of wire. This ensures that the most energy possible makes it to the spark plug. This combination is encased in a heavy-duty sleeve that will withstand abrasion and high temperatures. Cap off each end with our dual crimp terminals. Made in USA.

Important: **With wires over valve covers.*

90 degree boot — multi-angle boots

2-in-1 Universal Wire Set

Universal wire sets have only the spark plug boot and terminal installed. These boots and terminals are available in your choice of a 90 degree boot or a multi-angle boot. Both sets include terminals for engines with either the early style (socket) and late style (HEI) distributor caps. The wires are extra long so they can be cut-to-fit any application. Each set includes a MSD mini-stripper crimper for easy installation. Available with wires in either black or red. Made in USA.

Pro-Clamp Wire Separators

The MSD Pro-Clamp will keep the plug wires in a tidy order and away from engine heat sources. Each separator features secure grooves for each wire and a top bracket snaps in place to sandwich the wires in place. Each base has a hole for a retaining screw if desired and a tab that will help hold it in position. The set is supplied with two 4 wire separators, two 3 wire separators, and four 2 wire separators.

8843	Pro-Clamp separators	35.99 set

TAYLOR

Clamp Style Wire Separators

Organize your engine bay with Taylor clamp style wire separators Manufactured from nonconductive type 6/6 nylon that won't melt, distort, fade or crack. Each six piece set includes: two 4 wire separators, two 3 wire separators, and two 2 wire separators. Available in four different colors. Stainless steel hardware included.

Air Cleaners & Parts

601290

14" Low Profile Chrome Air Cleaner

This air cleaner provides a low profile by dropping the filter 7/8" or 1-1/4" below the carburetor flange. 5-1/8" flange fits all popular 4 barrel carburetors. Your choice of 4 element heights are offered to fit a wide variety of applications. The 7/8" drop will fit carburetors with electric choke mechanisms. Optional vent kit, item #851190 is available and sold separately. Total height listed below is the minimum clearance needed above the carburetor flange.

Important: **Items marked with asterisk will not fit Edelbrock carbs with electric choke.*

Emissions Note: ③ *Non-CARB compliant (not legal for emission controlled vehicles).*

Air Filter Oil & Clean/Degreaser Set!

K&N Air Filter Oil and Cleaner/Degreaser is the only oil and cleaner/degreaser specially formulated to work in combination with the cotton fabric in the K&N filter. The use of any other could void the filter's warranty and potentially harm the air filter's cotton material. The cleaner/degreaser works to dissolve the dirt buildup and old oil filter oil and can be washed away with water. Each set includes oil, cleaner/degreaser, and service decal.

Air Cleaner Element

A K&N air filter element can be washed up to 25 times before it is considered no longer serviceable. Even though the filter may not show outward signs of deterioration, it should be replaced after 25 washings. Excessive washings will deplete the tiny cotton hairs that crisscross the openings. The resulting damage will allow tiny dust particles to pass through. The elements listed below are designed for use with our K&N chrome and stainless steel air cleaner assemblies.

Retro Style Air Cleaner

Manufactured in heavy gauge steel and powder coated in a semi-gloss black finish, these custom air cleaners fit most carburetors and throttle bodies with a 5-1/8" mounting flange. The lower rear section of the air cleaner has clearance for HEI distributors. Available in a full scale 18-1/4" wide version that uses a 14" x 4" filter element and a 7/8 scale 15-21/32" wide version that uses a 12" x 3" filter element. Both sizes include a filter element, chrome rocket-shaped wing nut and an air cleaner decal.

Emissions Note: ③ Non-CARB compliant (not legal for emission controlled vehicles).

K0172

Starter Mounting Set

Mount your starter using correct hardware. The set includes the required bolts for small block or big block applications. Small block set is for starters with straight across bolt pattern. Big block set is for starters with cast iron nose and staggered bolt pattern.

K0172 small block (straight across)... 12.99 set
K0173 big block (iron nose, staggered) 12.99 set

Starter Motor Replacement Brushes

When rebuilding your original starter motor, it is usually necessary to replace the brushes. These brushes are stamped 945 and contain a 13/64" diameter hole. Set includes 4 brushes.

RX6004 1962-81 ..... 5.99 set

Starter Wire Harness Retainer

Reproduction of the commonly discarded starter wire harness retainer. Clamps to the main body of the starter solenoid and helps keep the power and negative wires from coming in contact with the exhaust manifolds.

HC82 1966-74 ..... 21.99 ea

PAINLESS

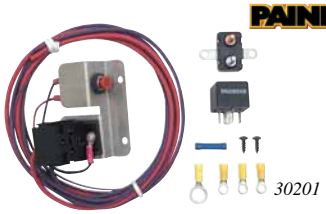

Remote Starter Solenoid

Allows you to position the starter solenoid any place you need to in order to make maintenance easier. Includes of extra wire and connectors to do the job right.

30203 ..... 64.99 ea

PAINLESS

30201

Hot Shot Starter Solution

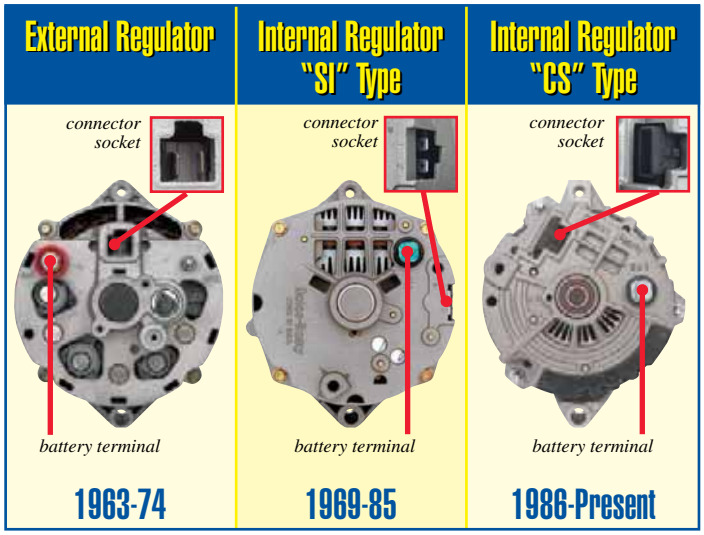

The solution for vehicles with GM starters that are hard to start when hot, or vehicles with old or worn out electrical systems. Works by boosting available amperage to the starter solenoid. The "Hot-Shot" Plus model includes an engine bump switch which allows you to turn over the engine while working in the engine compartment (adjusting valves, etc.) Includes: stainless steel mounting bracket, 30 amp heavy-duty relay, 24" wire length, wire leads, terminals, and easy-to follow instructions.

30201 with engine bump switch ..... 51.99 ea
30202 without bump switch..... 29.99 ea

Alternators

Internal and External Regulator Alternator Identification Guide

Clocking Position Identification Guide

The Delco SI series alternators are manufactured so that the rear half of the alternator case can be assembled to the front half of the case in any one of four positions. These positions are referred to as the "clock" positions. Clock positions are determined by viewing the alternator from the rear with the threaded mounting hole (adjusting ear) straight up. With this view, the terminal socket for the two wire, plug-in connector will point to any one of the four available "clock" positions. Straight up is 12 o'clock, to the right is 3 o'clock, straight down is 6 o'clock and to the left is 9 o'clock. Having the different clock positions allows for the alternator to be mounted on the left side or right side of the engine. It can also be mounted right side up or upside down depending on the clock position. This allows for the SI series alternator to be used on many different applications.

Smooth Look Alternator

This is a beautiful new look in alternators. The sharp lines on the back of most alternators have been replaced with a smooth domed surface. The sharp lines around the side have been eliminated and the air vents have been reworked to optimize cooling and surface finish. This chrome alternator is sure to brighten up your engine compartment. This all new alternator will add a custom appearance to your Nova while maintaining a high degree of dependability and performance.

Restore Your Charging System with a Quality Remanufactured Alternator from Classic Industries®!

There are a couple of simple tests you can perform to check your alternator. With your battery fully charged, start your vehicle. Turn on your lights and heater fan. Perform a voltage test from the positive to the negative battery post. The voltage reading should be between 13.0 and 15.3 Volts. If less than 13.0 Volts and your battery connections and alternator belt are good, chances are your alternator needs to be replaced. If the reading is above 15.3 Volts, you probably have a bad voltage regulator.

MADE IN USA

Alternator Bolt Set

The subsequent loss of electrical power could be due to the OEM alternator stud failing. To prevent this from ever happening, conscientious engine builders rely on ARP's "bulletproof " alternator studs. They're made from a premium grade 8740 chromoly steel alloy and heat treated to a nominal 200,000 psi tensile strength. They are very rigid and won't bend under the stress of competition, eliminating problems with alternator pulley alignment. Made in USA.

1962-68 Alternator Bracket for Headers

Exhaust headers often use extra thick flanges and tight bends making it difficult to mount an alternator bracket. These ceramic coated steel alternator brackets mount to the left or right side of the engine using header bolts that surround the front cylinder to allow the alternator to be attached without interference. These brackets close mount the alternator toward the vehicle center line. For those who want to retain the existing alternator position, a matched billet aluminum spacer, offered separately, allows you to retain the original belt. Three spacer styles are offered with either a polished or satin finish.

Note: For 1967-68 models with small block V8 and short water pump.

1962-72 Stainless Steel Fuel Injection Fuel Tank ⚠

Each tank is hand formed from 304 Grade stainless steel and TIG welded. All tanks feature a unique baffle system to control fuel tank slosh. Each tank has baffles running front to rear, side to side, and surrounding the fuel pickups to eliminate fuel starvation during acceleration and hard braking. All fittings and mounting flanges for fuel sending units and fuel pumps are CNC-machined from 304 stainless steel stock to a thickness of 3/8" to ensure a proper seal. All tanks include an installed fuel pump and stainless steel mounting straps with hardware. All tanks have a brushed finish for easy up keep.

Important: Fuel sending unit is not included with tank. A 0-90 Ohm sending unit is required and available separately or any standard universal 5 screw mount 90 Ohm sender (AutoMeter, Stewart Warner etc.)

Note: Shipped double oversize.

AEROMOTIVE

1962-72 340 Stealth Fuel Tank ⚠

These tanks bring modern fuel system technology to your classic muscle car. By placing the fuel pump inside the tank, hot fuel issues such as vapor lock and cavitation are eliminated. We have all heard the horror stories of hot rodders being stuck on the side of the road with a fuel system or an engine that stumbles under braking, acceleration or hard cornering. These are issues related to fuel pump location, plumbing, and lack of proper baffling. You can now have an in-tank fuel pump that is properly vented and submerged in fuel at all times. These new reproduction steel tanks feature a durable silver powder coated finish. In addition, they feature an internally baffled system with an in-tank performance fuel pump capable of supporting up to 1000 HP. Deep sump tanks include new fuel tank straps.

Note: Fuel pressure regulators sold separately. Shipped double oversize.

Emissions Note: ③ Non-CARB compliant (not legal for emission controlled vehicles).

Replacement Fuel Tanks

Features/Benefits:

- Tanks are coated galvanized steel then powder coated silver for total corrosion protection
- 255 lph fuel pump with hanger assembly gives you the fuel you need with in-tank quietness. Tank holds 16 or 20 gallons of fuel. Sender has NPT Supply and Return line ports for easy fuel line connection and a barbed vent fitting
- NPT Supply and Return line ports for easy fuel line connection and a barbed vent fitting
- Fuel level sender included with the correct Ohm range for your factory gauges
- Fuel pump and sender are recessed in the tank to provide an easy installation with no modification to your vehicle
- EFI style tank baffling includes a large 4.3 liter internal fuel tray to prevent fuel pump starvation
- Fits and looks like an OE tank when installed
- Complete bolt in solution for your EFI conversion
- Complete EFI Fuel Tank Solution in One Box!

EFI Conversion Fuel Tanks with Fuel Pump

Holley and Sniper are here to help you to complete your EFI swap with new EFI conversion fuel tanks. Each tank is a direct fit for your application no modifications necessary. The kit includes: the tank, a 255 lph fuel pump, internal baffling, a correct Ohm range fuel level sender, and the filler neck. The tank is powder coated for corrosion resistance and great looks. These tank kits are a complete solution for your EFI project!

Gold Standard Fuel Tank Sealer Set

Our 3 step fuel tank sealer set contains almost everything you might need to seal a tank of up to 25 gallons. The Gold Standard Tank Sealer is specifically formulated to stop rust and corrosion by forming a tough, fuel impervious coating while simultaneously sealing small pinholes and weld seams. The prep products are formulated to extend storage times by leaving a zinc phosphate film that prevents rust until you have a chance to seal the tank with the sealer. Complete set and individual items available.

3 Step Fuel Tank Sealer Set

Buy our fuel tank sealer set and save! Fuel tank sealer set includes: 2 quarts of Klean (a water based, heavy-duty, cleaner/degreaser), 1 quart RustBlast (a powerful rust remover/metal etch), 1 quart Gold Standard Tank Sealer, gloves, instructions, and a stir stick.

These billet fuel filler assemblies will add a custom look to any 1962-79 Nova. Made from machined aluminum they offer OEM quality sealing and no modification installation. Assemblies include: billet filler neck, custom billet locking cap with two keys, all necessary hoses, vent tube, clamps, and fasteners. Assemblies are available for direct fit and universal applications in both clear and black anodized finishes. An optional vent kit is also available for applications where venting is required.

Note: *Universal assemblies do not include hoses or clamps.*

Driven Carb Defender

JOES RACING PRODUCTS DRIVEN RACING OIL

Driven Carb Defender Fuel Additive has been formulated to protect against harmful ethanol deposits and corrosion in fuel and the induction system. Special inhibitors resist expensive damage and reduced performance from moisture accumulation from modern ethanol blended gasoline. This additive controls combustion chamber residue, cleaning and protecting fuel system and intake tract surfaces to keep carburetors functioning properly. Carb Defender is ideal for everyday drivers or classics that spend time in storage between cruises and special events. One bottle treats up to 25 gallons of ethanol blended fuel.

New! sparco

SP27004

Brushed Aluminum Fuel Cap

Sparco fuel caps are designed to prevent leakage of fuel vapors from the filler neck and keep dirt and dust from entering the fuel tank. They also add a significant touch of style to your vehicle. These fuel caps are made from high-quality materials to ensure reliable, lasting service and they're available in both non-locking and locking styles. All necessary installation hardware included. Fuel cap funnel sold separately.

SP27004	locking		194.99 ea
SP27005	non-locking		139.99 ea

New! sparco

Aluminum Fuel Cap Funnel

Sparco fuel cap funnel completes your fuel cap installation. These fuel funnels are manufactured from aluminum and are Sparco recommended for a complete install.

SP27009	aluminum		49.99 ea

New! OER AUTHORIZED

Universal Filler Neck w/Pop-Up Door

This billet aluminum flush mount fuel filler neck with pop-up gas cap is the perfect addition when adding a non-stock fuel filler location or relocating your fuel tank. Features a super sanitary and sleek design that is simple to install. Measures approximately 2-1/2" diameter to allow it to fit into tighter spaces while the filler hose connection measures approximately 1-1/2" in diameter. The fuel cap can be popped up or pressed down for a smooth appearance. When clicked into the flush position, the non-vented cap will not leak or allow fuel to escape.

T76063	universal		89.99 ea

Fuel System Cleaner

ROYAL PURPLE SYNTHETIC OIL

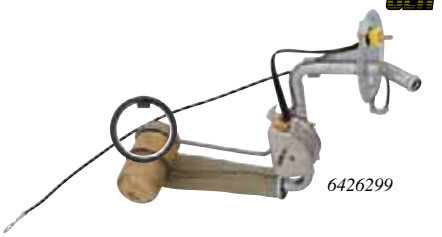

Max-Clean targets and cleans deposit buildup in the intake system and combustion chamber and is effective on the entire spectrum of engines on the road. Deposit buildup is a natural consequence of fuel combustion, but can have significant effects on the performance and reliability of your engine. Royal Purple's Max-Clean can restore internal engine surfaces, recovering lost fuel economy and performance.

Return Line Fitting Conversion Set

If you are installing an in-line fuel pump or an aftermarket fuel injection setup but are using an original fuel tank not originally provisioned for a return line, this universal return line fitting set is a simple and inexpensive way to add one to your existing setup without having to go through the hassle of pulling your old tank and installing an expensive, brand new tank. This fitting can also be used for other applications such as adding a vent line or power steering return line, whatever you might need where a return line was not originally installed. Works on material up to 1/4" thick.

Edelbrock

In-Line Electric Fuel Pump

This in-line electric fuel pump is continuous duty rated and is ideal for EFI applications that require additional pumping capabilities for upgraded modifications. Works superbly as either an in-line booster pump or as a stand alone unit. Use with EFI regulator part #E1728 for adjustability from 35 to 90 psi. 57 gph, 3/8" hose barb fittings. Includes mounting bracket and 3/8" hose barb fittings.

E3594 ..... 307.99 ea

Features:

- Solid-state worry free electronics
- Internal pressure regulating
- Universal design allows for easy installation
- No diaphragms or mechanical parts to wear out
- Hose barbs fit 5/16" fuel hose

Micro Electric Fuel Pump

This compact electric fuel pump features a solid state design that has a low current draw of around one amp and makes a good stand alone pump or booster pump. Designed for carbureted vehicles with a 12 Volt negative ground electrical system, this pump supports 4-7 psi at up to 35 gph. Includes: fittings, mounting hardware and instructions.

Note: *Not for diesel applications.*

H12880 6AN inlet/outlet ..... 186.99 ea

EFI Bypass Regulator

Performance EFI regulator designed for medium to high horsepower applications. This regulator features Aeromotive's high flow design, superb pressure control and legendary durability. Features base pressure adjustable from 40-75 psi, gasoline and alcohol compatible, fuel pressure rises on a 1:1 ratio with boost, 1/8" National Pipe Thread taper (NPT) gauge port. Includes two o-ring boss fittings (ORB-06) inlet ports and one o-ring boss fitting (ORB-06) return port.

Emissions Note: *(3) Non-CARB compliant (not legal for emission controlled vehicles).*

A9713109 adj. with EFI ..... 221.99 ea

Universal Bypass Regulator

A dual purpose, universal regulator for EFI or for carbureted street/strip applications. Features pressure adjustable from 3 to 20 psi with standard spring, (installed) or from 20 to 60 psi with high pressure spring (included). Offers the full flow and rock steady fuel pressure that only a dynamic, Aeromotive bypass regulator provides. Capable of regulating any fuel pump between 100 and 250 gph, fuel pressure rises on a 1:1 ratio when referencing boost. All ports are 3/8" National Pipe Thread taper (NPT), with one inlet and three outlets on the main body and one return port on the bottom. Bypass design provides the ultimate, dynamic fuel pressure control.

Note: *Requires a return line to be installed from the bottom of the regulator to the top of the tank.*

Emissions Note: *(3) Non-CARB compliant (not legal for emission controlled vehicles).*

A9713301 3 Port 3/8" NPT ..... 221.99 ea

Carbureted Bypass Regulator

For use when converting from fuel injection to carburetion using the EFI pump in a carbureted application. Perfect for naturally aspirated or 'blow-through' supercharged engines. Features base fuel pressure adjustable from 3-15 psi, 1 o-ring boss fitting (ORB-10) inlet port and 1 o-ring boss fitting (ORB-08) return port, fuel pressure rises on a 1:1 ratio when referencing boost, bypass design provides the ultimate, dynamic fuel delivery system, ideal for converting from fuel injection to carburetion using the stock, in-tank pump, EFI conversions will require a larger than stock return line for proper low pressure control. Includes two o-ring boss fittings (ORB-06) outlet ports and 1/8" National Pipe Thread taper (NPT) gauge port.

Note: *Requires Army/Navy fitting (AN-08) return line from bottom of regulator back to top of the tank.*

Emissions Note: *(3) Non-CARB compliant (not legal for emission controlled vehicles).*

A9713204 2 port ..... 231.99 ea

Fuel Pump Safety Switch

This safety feature is a must have for any electric fuel pump vehicle. This safety switch monitors the tach signal to limit when an electric pump can operate. When the key is first turned on, the fuel pump is allowed to run for three seconds, priming the fuel system. After that, it only operates if the engine is running. If the engine stops, so does the fuel pump. No plumbing into the oil lines or no extra priming button under the dash is required.

RE12003 ..... 64.99 ea

Fuel Pump Safety Switch

This fuel pump safety switch shuts off fuel flow whenever oil pressure drops below 15 psi. This adds a safety factor in case of an accident or engine stall. Designed for 12 Volt electrical systems and can be teed into the oil pressure sending unit with an 1/8" NPT tee.

1969-79 Electric Fuel Pump Relay Kit

This Holley kit can be used with any electric fuel pump, as long as the current load is not above 30 amps. It will work with 12, 16, and 24 Volt systems and comes equipped with 12 AWG wire to provide extra current carrying capacity with minimal voltage loss. A 30 amp relay is included with a relay socket wired with extra long leads specifically designed to reduce the number of splices required. Quality insulated crimp connectors are provided to make necessary splices where required.

H12753 1969-79 30 amp ..... 155.99 ea

Fuel Pump Relay

This universal fuel pump relay will ensure proper wiring which reduces the risk of damaging the fuel pump, and offers consistent fuel pressure. This relay is used with fuel pump part #E1791 or #E1792.

E1795 universal relay ..... 79.99 ea

Performance Carburetors

Thunder Series Carburetor

Edelbrock

E1906

Edelbrock Thunder Series carburetors share all the performance advantages of the popular Performer Series but with innovative new features. These carburetors include all of the performance features of the Performer Series carburetors and also include distinctive black hardware, dual fuel inlets (shipped with left side plugged), lightweight ball burnished and CNC profiled body, and the Quick-Tune secondary. They're available in 650 cfm and 800 cfm sizes with manual or electric choke. There's even a 650 cfm version specifically designed for off-road vehicles. These Edelbrock carburetors bolt-on and run right out of the box! Simply dependable, proven performance for almost any carbureted vehicle. All Edelbrock carburetors include an installation kit and owners manual.

Emissions Note: * ③ *Non-CARB compliant (not legal for emission controlled vehicles).*

Performer Series Carburetor

E1405

By design, Performer Series square bore carburetors are refined to provide the widest possible torque range when matched with Edelbrock Performer, Performer RPM, RPM Air Gap or Torker II manifold and camshaft combinations. However, these carburetors are not limited to these applications, they also match well with most stock and other manifolds of similar design. Performer Series square bore carburetors are all aluminum, ball burnished and lightweight. There are no power valves to blow out or plastic parts to break. The 2 piece construction resists warping and the metering rods can be changed in seconds without removing the carburetor. All Edelbrock carburetors come with an installation kit and owners manual.

Emissions Note: * ① *CARB EO compliant (50 states legal).* ** ③ *Non-CARB compliant (not legal for emission controlled vehicles).* †*Black power coated.*

New!

1306EDL

Race Series Carburetor

Edelbrock VRS-4150 race and performance carburetors are street friendly but race ready. The 3.75" tall cast aluminum main body fits all 4150 and 4500 carb flange manifolds without requiring an adapter plate. Multiple vacuum hook ups keep this carburetor usable on the street but still ready for the track with larger capacity fuel bowls and four circuit billet metering blocks. The floats have corner cuts to avoid shutting off the fuel flow during hard cornering, and jet extender notches and jet extenders in the rear to keep the jets covered in fuel under hard acceleration. The advanced idle circuit features interchangeable idle discharge jets in all four corners to allow for a smooth, clean idle with the use of big, low vacuum camshafts.

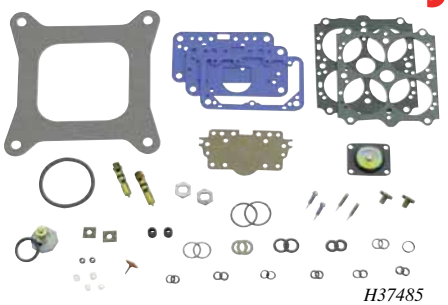

Emissions Note: ③ *Non-CARB compliant (not legal for emission controlled vehicles).*

Carburetor Parts

Carb Dual-Feed Fuel Line

Made from aircraft quality Buna-N neoprene hose encased in braided stainless steel, this fuel line is temperature, gas and oil resistant. Made for 3/8" NPT fittings, the fuel line is adjustable between the carb bowls from 7-1/2" to 11-1/2". Includes 1/8" pipe fitting and plug for optional fuel pressure gauge, etc. Hose inlet nipple not included.

E8101 ..... 130.99 ea

Dual Feed Fuel Line

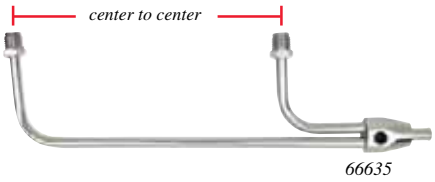

We offer billet aluminum or chromed copper fuel lines for Holley carburetors. Billet Aluminum line is an adjustable line for Holley 4150 or 4500 carburetors. It is manufactured with a -8 AN inlet and 3/8" NPT port at the rear with 7/8"-20 threads for the fuel ball inlets. The chromed hard lines are manufactured with seamless copper tubing and are double flared at the ends with 5/8"-18 inverted flare inlets that measure 9-1/4" center to center.

Hedman Hedder Notes

1) Without smog injection or injection heads.
4) Includes parts necessary to retain emission devices. (50 state).
5) With A.I.R. system.
6) Modification to stock exhaust required to retain catalytic converter.
15) Shortie Hedder (Max. ground clearance).
20) Not recommended for use with aluminum heads.
26) AC equipped vehicles require bracket #201110 for A6 compressor.
42) Square port Hedder.
45) Not legal for sale or use in California on pollution controlled motor vehicles.
49) Will not fit Saginaw close ratio PS with 825 power steering box.
103) Will fit with angle plug heads (Chevy alum. only).
128) Fits factory stock transmissions only 1964-67.
208) Due to aluminum cylinder heads on GEN VI engines, 502 BB Chevy will have clearance problems on some applications. Bottom of Hedder flanges may hit head bolts. Notching may be necessary.

Hedman Hedder Emissions Notes

**) Not applicable or intended for street or highway use. Legal only for racing vehicles which may never be used upon a street or highway.*
C) For vehicles 1964 through 1974 without A.I.R. system, considered as OE replacement parts when existing emission controls are not removed from vehicle.
D) Not legal for sale or use in California.
F) For vehicles 1964 through 1974 with A.I.R. system, considered as OE replacement parts and do not require an EO #, when existing emission controls are not removed from vehicle.
I) 1975-79 only, 50 state legal for these years only.
J) 1975-79, including vehicles with production date up to 12-31-79, registered as 1980, non-feedback systems only are 50 state legal.

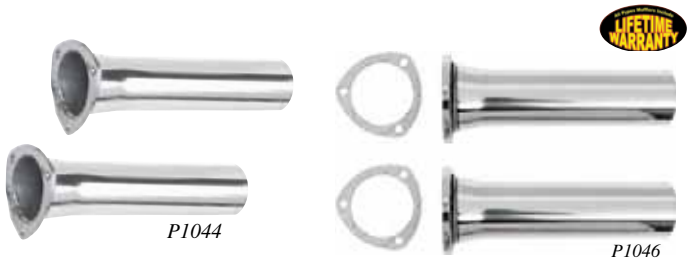

1968-74 Nova Big Block Headers

Pypes big block headers feature large 2" primary tubes and 3-1/2" collectors with power spikes. Constructed of 304 mandrel bent stainless steel and fully TIG welded they include stainless collector reducers, premium hardware, and gaskets. Big block frame mounts and motor mounts must be used to ensure proper engine location and header fitment. Fits 6-speed ZF transmission and standard 5-speed Chevy 502 big block generation 6 engines with aluminum cylinder heads will have clearance problems on some applications. Bottom of header flanges may hit head bolts requiring notching to clear the bolts.

Note: *Will not fit Saginaw close ratio power steering with 825 power steering box.*

A9700106 1968-74 396-502 ..... 731.99 set

Header Collector Reducers

These welded, 12" extended length reducers connect your headers directly to your Pypes X-pipe to eliminate unnecessary seams, clamps and extra work. They are constructed of polished 304 stainless steel. Limited lifetime warranty.

Doug's Header Notes

4) Fenderwell exit.
5) Shorty design for maximum ground clearance.
36) Fits D-Port cylinder heads including ZZ4 crate engines.
52) Will not fit Saginaw close ratio with 825 power steering box.
60) Will not work with 168 tooth flywheels or kick out aftermarket starters.
69) Big block frame stands and motor mounts must be used to insure proper engine location and header fit.
92) Will fit most angle plug heads including factory Chevrolet "Bow Tie" heads.
93) Vehicles with locking steering columns require linkage removal.
96) May require AC bracket 201110.
119) Double flange design (inner and outer).
126) Y indicates Tri-Y design.
133) Will not fit with Powerglide transmission.
180) Requires LS1 adapter plate set SK100
181) Includes 3" to 2 1/2" reducers with O2 fittings.
187) Will fit 572 tall deck (10.2") crate engine or equivalent.
205) Will fit 168 tooth flywheel if used with Powermaster mini starter part #S9500.
206) Will not fit with heater.
207) Will not fit convertible models

Doug's Emission Notes

3) The product accompanying this document is legal only for off-highway use (except in California or states that have adopted California emission standards), racing use or for use on pre-emission controlled motor vehicles/motor vehicle engines (pre-1974 domestic vehicles certified to California standards, pre-1974 domestic vehicles certified to federal standards and all pre-1974 foreign vehicles), per the manufacturer's application guide.

1962-72 Full-Length Stainless Steel Racing Headers

ARH full-length stainless steel headers for 1962-72 Chevrolet Chevy II/Nova. They are fabricated from aircraft quality T304 stainless steel and feature 3/8" thick round port flanges with hand ported inlets and fully welded custom sized merge collectors with scavenger with spikes standard. American Racing Headers will provide excellent ground clearance and are a direct bolt-in installation for General Motors X-Body vehicles.

ARP automotive racing products

Header Bolt Set

MADE IN USA

ARP manufactures premium bolt sets to facilitate installation of exhaust headers in both stainless steel or 8740 chromoly steel. Each ARP set includes the correct number of bolts for your application, plus premium quality washers. Available with Hex or 12 point heads. Rated at 170,000 psi tensile strength. Small block sets contain 12 bolts and big block sets contain 16 bolts. All bolts are 3/8"- 16.

PROFORM

Wedge Locking Header Bolt Set

PROFORM Grade 8 (12.9 steel), Hex type header bolts were designed to keep bolts from backing off. These permanently assembled bolts feature special washers with super hardened serrated teeth that, when sufficiently torqued, the washers bite into and grab the bottom of the bolt head and the top surface of the header. After being self-locked in this manner, any bolt loosening rotation is blocked by a wedge locking action created by the washers interfacing, matching cams. Engine vibration increases the tension, making them even more secure! They are reuseable and you can count on them to not fail. Available in different sizes.

*Note: Image for illustration purposes. *1979-earlier, small block 265-400. **Big block 396-502/exc 348, 409.*

1969 Reproduction Smog Tubes

We offer reproduction smog tubes also known as air injection reactor tubes (A.I.R. tubes) which are manufactured exactly as originals! These tubes are cosmetically correct in every detail! Each tube is manufactured to exact factory specifications with correct bends and outlets for installation onto the exhaust manifold. A correct threaded outlet head is installed for easy installation of the smog pump check valves. These tubes are produced in steel and are zinc-plated including a semi-gloss black finish.

*Note: *Will not work with AC.*

1969-76 Smog Diverter Elbow

Reproduction diverter elbow for the smog pump. This is the OEM aluminum elbow that bolts to the smog pump, and the diverter valve mounts on the opposite side. For 1969-76 Chevrolet applications LS6, LS5, L78, L89, 302, 350, 396, and 454 engines.

14674	1969-76		44.99 ea

Oxygen Sensor Plug

Many headers for late model engines are equipped with a oxygen sensor bung in each header. When retrofitting a carburetor on late model engines, an oxygen sensor is not necessary. This plug seals the oxygen sensor bung on headers and exhaust manifolds. Made from trivalent chromium-plated steel with a M-18 thread size to fit most stainless headers.

Emissions Note: ③ Non-CARB compliant (not legal for emission controlled vehicles).

222734	M-18 thread oxygen sensor plug	17.99 ea

Oxygen Sensor Fitting

Weld-in oxygen sensor fitting for all fuel injection systems. Fits TBI, TPI, CMFI, LT1, LSX, 5.0L, and most other oxygen sensors.

Important: This part requires welding for installation. Professional installation is recommended.

1969-72 Smog Pump Pulley

Quality reproduction of the deep groove A.I.R. (air injection reactor) pump pulley for high-performance small block and big block models. Pulley is stamped with original GM part #3932458. Single groove, 5-3/4" o.d.

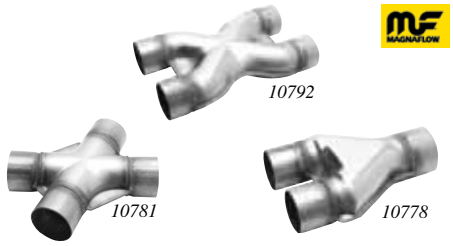

K1132	1969-70	396/375HP.....	79.99 ea
K1132	1970-72	LT1 350.....	79.99 ea

Warning Concerning Smog Pump Pulleys

Stock replacement, aftermarket stamped steel or cast iron pulleys are not designed to exceed 400 horsepower or 6000 RPM. Using reproduction pulleys on engines in excess of these limits may result in catastrophic disintegration of the pulley causing severe damage to the engine, cooling system and body parts. Classic Industries® assumes no liability for damages caused by improper usage of pulleys.

WARNING: Cancer and Reproductive Harm- www.P65Warnings.ca.gov

Exhaust Components

Tru-X and Y-Pipes

The more gentle radius of these X- and Y-pipes allow for better exhaust gas scavenging, noise cancellation and better balance between cylinder banks. The result is a significant increase in power and torque, but a reduction in dB sound levels.

1968-73 SB Exhaust Manifold Front Pipes

Magnaflow has designed these manifold pipes to fit OEM exhaust manifolds and allow for the installation of a performance exhaust system. Manufactured from corrosion resistant stainless steel to ensure longevity featuring 2-1/2" tubing and a 3 bolt flange connection.

Note: Shipped oversize.

16434	1968-73	small block	294.99 set

Universal Balance Pipe Set

Flowmaster offers a pre-fabricated universal balance pipe set to ease the installation of a crossover pipe in a dual exhaust system. Set includes: T-pipe connectors, balance pipe, and clamps.

F15920	2-1/2"		117.99 set

1962-77 Manifold Down Pipes

Not all performance enthusiasts use collector style headers, so Pypes has designed 2-1/2" down pipes for log style, rear exit exhaust manifolds to fit your Pypes header back systems. These down pipes are made from 409 stainless steel and mandrel bent 16 gauge tube that fit directly onto factory cast iron manifolds, and slip into the header back systems. Manifold flanges are installed.

Important: P1086 are for use on vehicles with "Ram Horn" style manifolds only.

Note: Shipped oversize.

1968-69 OE Style Exhaust Tailpipes

These tailpipes features the correct factory styled flat areas, bends and flattened/oval outlet. Manufactured to factory specifications from aluminized tubing.

EX80045	1968-69	all	54.99 pr

1968-74 Tunnel X-Crossover

Since a V8 fires alternately, exhaust exits in pulses rather than a steady flow. While one pipe is filled with pressure the other pipe is relatively pressureless, but connecting the two pipes in a Siamese pattern allows pressure to be equalized between the two tailpipes. This action allows the exhaust to pass through quicker for better breathing that increases horsepower. The Pypes crossover product line is defined by a high-quality, exceptionally versatile design. They are a proven winner when it comes to bumping up the horsepower of your daily driver or race car. Pypes tunnel X-crossover fits 1968-74 Nova models with easy installation. All crossovers are made of 409 stainless steel with dual reinforcement plates at the welds where they are needed most. All pipes are mandrel bent to allow for the maximum flow of exhaust gasses, which boosts acceleration. Limited lifetime warranty.

Important: If using stock, cast iron manifolds, add a set of down pipes to connect your original manifolds to the header back system.

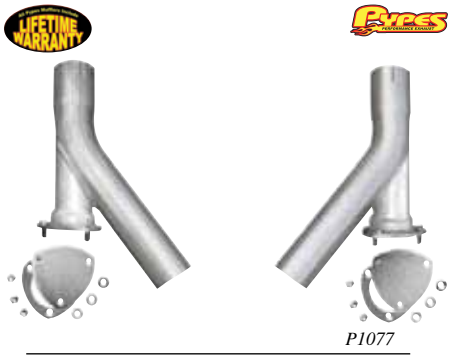

Note: Shipped oversize.

P1065	1968-74		226.99 ea

3" Tunnel Crossover

P1067	1968-74		273.99 ea

1968-74 X-Crossover Dump Legs

Pypes dump legs are made to replace the front legs of the X-pipe crossover on 1968-74 Chevy II/Nova models, making installation of electric exhaust cutouts simpler. Each dump leg is strategically located for maximum ground clearance and includes block-off plates and hardware, and is manufactured from 409 stainless steel with mandrel bends to allow maximum exhaust flow. Add the optional electric exhaust cutouts and make uncorking your exhaust as easy as flipping a switch, sold separately. Made in USA.

P1077	1968-74	2-1/2"	150.99 set
P1078	1968-74	3"	162.99 set

3" Crossover X-Pipe

X-Change X-pipes allow you to open and close your exhaust with the bolting or unbolting of dump plates. Crossover includes dual stainless reinforcement plates at the welds where they are needed most. All pipes are mandrel bent, to allow for the maximum flow of exhaust gasses, which boosts acceleration. Fabricated using the highest quality materials, smooth, seam coated, mandrel bent, stainless steel pipe resists corrosion and extends the life of your system.

BBK31025

BBK31025 – detail view

BBK31035

MADE IN USA

Varitune Adjustable Muffler

BBK Varitune mufflers are the first of their kind in the aftermarket fully adjustable performance Mufflers. They can be adjusted for sound and exhaust flow by simply moving the adjustment screw in or out from underneath the vehicle. BBK Varitune performance mufflers utilize a unique internal Power Valve. When in the closed position the valve blocks the exhaust flow, forcing it through all three chambers of the muffler for a classic deep sound. When in the open position, the valve opens the exhaust flow allowing it to take the path of least resistance, acting more like a straight through muffler for an aggressive, throaty exhaust note. Made in USA.

Super 10 Series Muffler

Looking for the most aggressive sound available? Flowmaster's new Super 10 series mufflers are so aggressive, they aren't recommended for street driven vehicles. Best suited to racing applications, these feature the same Delta Flow performance technology used in the highly popular Super 40 and Super 44 series Flowmaster mufflers. Manufactured from durable 409S stainless steel for long-life and offered in a variety of configurations. Backed by a limited lifetime manufacturer's warranty, these short, single chamber mufflers deliver the closest thing to open pipe sound possible. If you want high impact sound, the Super 10 series mufflers are the answer. Measures: 6-1/2" x 9-1/2" x 4".

Note: These mufflers are recommended for off-highway use, not for street driven vehicles.

4" x 9" Oval Muffler

Magnaflow's wide open performance mufflers outflow OEM chamber style mufflers by as much as 167%! This reduces engine heat and back pressure and improves exhaust scavenging from the combustion chamber. Magnaflow minimizes the power robbing effects of the OEM system to restore torque and horsepower to the engine. Magnaflow is the straight through, wide open performance muffler with a smooth, deep tone. These mufflers offer a reversible inlet/outlet design.

F42441

40 Series – Original Flowmaster Tone

This is the most "aggressive" sounding street/strip muffler that Flowmaster offers. If you're looking for attention, this one will get you noticed. The standard 40 series has an "aggressive rumble" and will generally resonate inside the vehicle around 1800-2000 RPM's, and again at 2400-2600 RPM's. Constructed of 16 gauge aluminized steel and fully MIG welded for maximum durability.

F952546

F952445

Super 40 Series Muffler

The Super 40 gives you a deeper tone that retains our classic 40 Series sound and feel. Increased flow path radius for optimum internal flow using the latest in Delta Flow technology. Flowmaster state-of-the-art robot assembly technology assures a product that exceeds OEM auto manufacturers' specifications. To achieve such critical quality, Flowmaster performs extensive R&D at the track and in-house with our own engine and chassis Dyno facilities. Flowmaster Super 40 is aluminized, black in color and is the most aggressive, deepest sounding street two chamber muffler they've ever built. Enjoy some American Thunder today!

QTP

13253C

Screamer Twintronic Muffler

With the success of QTP's electric cutout they took it to the next level, A dual mode muffler with a single inlet with a dual outlet. One outlet is a straight pipe with a valve at the end on a 360 degree floating flange for total adjust ability. When the valve is open you get the loud and free flowing exhaust system. Close the valve and the exhaust gases are diverted through the muffled section to get the quiet mild mannered sound. This is the only system out there that can give you exactly what you want. Other systems that make the power are loud and drone all the time which gets old. Other systems are on the quieter side, which lacks the power. With all the noise restrictions coming out The Screamer is the only system that gets you the power and sound you desire! All systems are stainless steel for clean look and made in the USA.

CFT Superflow Muffler

Gibson's CFT Superflow muffler with Convergent Flow Technology actually tunes your exhaust by using resonance chambers, directional louvered tuning ports and angular induction to draw exhaust gases into the muffler and expel it at a higher velocity. The result is a muffler that doesn't have packing to wear out, yet delivers more power and a performance sound. This muffler features a chambered and louvered core, to ensure no sound degradation overtime, and fully welded solid internal construction. This result delivers more power with a deep tone.

Exhaust Systems

MADE IN USA

1968-73 Crossmember — Back Exhaust

Every performance mod is designed for one thing... to put more power to the ground! Magnaflow's system starts with a muffler specifically designed with internal paths that ensure fast, equalized exhaust flow so that both sides flow the same. The crossmember back system is built with fast flowing mandrel bent stainless steel tubing that features Magnaflow's Tru-X crossover pipe. Plus, Magnaflow's wide open performance mufflers outflow OEM chamber style mufflers by as much as 167%, all of which reduces engine heat and back pressure and improves exhaust scavenging from the combustion chamber for much stronger performance. This system minimizes the power robbing effects of the OEM system to maximize torque and horsepower from the engine. Magnaflow is the wide open performance muffler with a smooth, deep tone! Made in USA.

Important: *Requires modification for convertible.*

New Pypes Cross Flow System for Maximum Flow, PLUS Maximum Ground Clearance

LIFETIME WARRANTY

P1060

1968-78 Header Back Crossflow System

Pypes has designed a 2-1/2" crossflow system for 1968-78 Chevy II/Nova models needing maximum ground clearance. The Race Pro muffler is the first maximum flow, straight through, transverse mounted crossflow muffler system that doesn't need to sacrifice any performance or aggressive growl to give you clearance. This system also features a horsepower freeing X-pipe designed to fit into the driveshaft tunnel, which contributes to it's ability to glide over the nastiest speed bumps. Available in 409 stainless steel or 304 polished stainless, including X-pipe, muffler, intermediate pipes and tailpipes. Limited lifetime warranty.

Important: *Modification to the body pan brace is required on 1967-69 convertible models. In order to utilize this X-pipe, it is necessary to either add a body pan designed to allow clearance for the X-pipe assembly, or remove the body pan and install subframe connectors. If using stock, cast iron manifolds, add a set of down pipes to connect your original manifolds to the header back system.*

Performance Exhaust

P1074K

Universal Dual Electric Cutout Set

The optional electric exhaust cutouts and make uncorking your exhaust as easy as flipping a switch. Electric cutout set includes: 2 valves, wire harness, switch, mounting hardware, and 2 gaskets. Limited lifetime warranty. Available with or without Y-pipes. Made in USA.

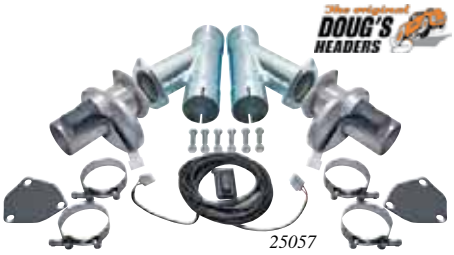

*Note: *Connects to any 2-1/2" exhaust with a straight section of approximately 12" in length and enough clearance for the motor/valve assemblies.*

For use with 2-1/2" or 3" Y-Pipes (Dump Legs)

P1074	cutout set only	442.99 set

Includes 2-1/2" Y-Pipes (Dump Legs)

P1074K*	cutout set with Y-pipes	567.99 set

25057

Stainless Steel Electric Cutout

These cutouts feature a rugged 12 Volt DC motor and rotating gate for a leak proof seal every time the cutout is opened and closed. When fully opened, these cutouts do not create exhaust flow obstructions that can create a leaky gasket sound, unlike butterfly style cutouts. A pre-wired harness with an illuminated rocker switch is supplied for easy installation. Uncork your exhaust with the flip of a switch from your dash. The cutouts are ideal for race tracks that don't require mufflers. Available individually, in pairs, or in complete sets with Y-Pipes for easy installation. Made in USA.

Important: Not recommended for vehicles equipped with catalytic converters.

MN2443 MN2450 MN2453 MN2446

Electric Exhaust Cutout

Don't crawl under your vehicle to uncork your exhaust ever again by switching to electric cutouts. Keep them closed and quiet for the street, wide open for the strip, or anywhere in between with the flip of a switch. You control the volume and the power! Available in sizes 2-1/4" to 4" and a low profile oval design for applications with limited ground clearance. Fits 2-1/4" to 3" round exhaust pipe. Built with high-quality materials CNC 6061 aluminum body and motor plate, stainless steel shaft and butterfly plate, high torque DC gear driven motor, weather tight wiring connectors, and custom illuminated toggle switch.

Note: Match valve size with cutout size for optimal fit and performance.

Xtreme Temperature Coating

XTC is a high temperature/heat resistant coating formulated specifically to protect metal surfaces operating at temperatures from 500 to 1500 degrees F. With proper preparation, XTC provides outstanding adhesion, film integrity, weathering, and thermal shock resistance throughout this entire temperature range, and is guaranteed not to burn off! Available in your choice of a wide variety of colors and sizes.

Note: *8 oz. will coat approximately 3 sets of automotive exhaust manifolds with 2 coats or coat a set of shorty headers with 2 coats. Pints will coat a set of full size headers with 2 coats or coat a complete automotive exhaust system with 2 coats.*

Xtreme Temperature Coating

Important: *When ordering, select the part number for the size of the can you need, then add the two digit numerical color code to the end of the part number to specify your desired color.*

Thermo-Sleeve

Thermo-Sleeve is the combination of a high temperature fabric laminated to a highly reflective Mylar foil. It provides protection from radiant heat for hoses and wires. Thermo-Sleeve's ultra lightweight construction provides more insulation than traditional bulky rubber coated fiberglass. The aluminized sleeve reflects more than 90% of radiant heat, plus it is fireproof and oil resistant! Thermo-Sleeve is available in 3' or 12' lengths.

Exhaust Components

Reduce Underhood Temperatures!

Increased exhaust scavenging is produced, along with lower intake temperatures. Exhaust Insulating Wrap™ withstands continuous heat up to 2000 degrees F, and contains no asbestos. Will not over insulate a system when properly installed due to a proprietary coating developed by Thermo-Tec® Thermal Conduction Technology (TCT) that conducts heat across the wrap's surface. The 1/16" thick wrap is available in 1 inch or 2 inch widths in 15' or 50' rolls. Choose from off-white or graphite black.

Off-White Exhaust Wrap

TT1009	1" x 15' short roll	9.99 ea
TT1011	2" x 15' short roll	14.99 ea
TT1010	1" x 50' long roll	28.99 ea
TT1012	2" x 50' long roll	56.99 ea

Graphite Black Exhaust Wrap

TT1053	1" x 15' short roll	10.99 ea
TT1054	2" x 15' short roll	15.99 ea
TT1013	1" x 50' long roll	29.99 ea
TT1014	2" x 50' long roll	48.99 ea

Reduce Underhood Temps Up to 70%!

The new quick wrap, high velocity Exhaust Jackets™ are an innovative way to insulate and block radiant heat. The jackets cover the header tubes vertically allowing for a consistent fit. The fit allows the exhaust system to expand as it comes up to operating temperatures without restrictions and provides air space for added insulation. This product uses Thermal Conduction Technology (TCT), developed by Thermo-Tec®, and can be applied with the headers in the vehicle.

TT1015	4-6 cylinder	82.99 ea
TT1016	8 cylinder	93.99 ea

This Flexible Heat Shield Clips Into Place!

The Header Manifold Blanket™ provides excellent heat retention for exhaust headers and manifolds. This flexible heat shield simply clips into place on the upper portion of the header. The fabric side of the material should be facing the heat source, and the aluminized side facing away – offering protection from abrasion and harmful liquid spills. The Header Manifold Blanket™ is available in two sizes: two 20" by 24" blankets for V6 and V8 applications, and one 36" by 40" blanket for straight 6 and 4 cylinder engines.

TT1017	V6-V8 applications	99.99 pr
TT1018	straight 6 or 4 cyl models	84.99 ea

Shield Plastic or Rubber Hoses and Wiring from Radiant Heat!

Thermo-Shield™ protects hoses and wires from radiant heat. Unprotected, rubber hoses and plastic or rubber insulated wiring can dry out, melt or crack over time. Thermo-Shield™ is used in applications where it is difficult or not practical to disconnect one end of the hose or wire. The adhesive backed composite construction tape can easily be wrapped around the hose or wire to make a clean, professional appearance. Reflects radiant heat up to 2000 degrees F. Provides a barrier against the extreme conditions that underhood components are exposed to. Wrap your fuel lines and say good-bye to vapor lock.

27161

27162

27163

Includes:
- Transmission Cooler
- Max Shift Transmission Fluid
- EZ-TCU Controller and Harness
- Handheld Programmer
- Outlaw Shifter (optional)
- Paddle Shifter (optional)
- Dipstick and Tube

6-Speed Transmission

The innovative TCI 6X six-speed automatic transmission, based on the 4L80E, is designed for Chevy small block, big block, and LS engines to handle both everyday driving and race vehicles up to 850 HP. Six forward gears allow breakneck acceleration as well as fuel efficient low RPM cruising, while a handheld programmer allows shift point adjustment. Each transmission is Dyno-tested and supplied with a serial numbered spec sheet with performance test scores.

Important: *4-speed automatic shifter is required for standard operation. Electronic manual shifting requires the optional paddle shifter or TCI Outlaw Shifter. Paddle shifter is designed for 5 or 6 bolt steering wheel adaptors.*

Note: *Some modification may be required. Special order, must be prepaid. Shipped truck freight.*

DAYSTAR

MADE IN USA

1969-79 Transmission Mount

Transmission mounts take a tremendous pounding and when power and torque enhancing modifications are added to the mix, most factory mounts just can't handle the stress. Daystar's transmission mounts are constructed of heavy-duty steel that is fully welded and interlocked for extreme duty strength. These mounts offer several advantages over factory mounts. They are resistant to vehicle fluids and road grime and provide firmer holding power than traditional rubber Made in USA.

1962-79 Transmission Crossmember

The G-Force Nova Performance Racing Crossmember is a heavy-duty, double hump transmission crossmember that was designed and fabricated exclusively for 1967-1981 Camaro models. It is manufactured new from 2" x 3" (1/8" wall) rectangular and 1/2" plate steel and black powder coated. It is designed to bolt-in, have clearance for dual exhaust, and be able stiffen your frame for big block horsepower. No floor pan modifications are necessary. Includes mounting hardware.

K6067

1968-74 Transmission Crossmember

For maximum exhaust clearance, use a bolt in transmission crossmember which bolts to mounts welded to the frame assembly. These crossmembers are finished in black powder coated and are available for TH350, TH400, TH700-R4, Powerglide, and manual 4- or 6-speed transmissions. These crossmembers can be used with a stock subframe but require an additional set of adapter brackets, see part #K6073 for SBC or BBC and #K6074 for LSX engines.

OER AUTHORIZED

1968-74 BB with Manual Transmission Crossmember

These superior reproduction crossmembers are outstanding replacements for factory equipment. Manufactured to original specifications and designed for models with a big block engine and a 4-speed manual transmission. Available with traditional EDP coating or in a Weld-Thru™ Primer that requires minimal preparation, eliminates corrosion between overlapped panels, and promotes superior weld characteristics.

1965-96 Tork Master™ Torque Converter

Similar in performance characteristics to the HoleShot™ series, the Tork Master™ is B&M's lowest cost performance torque converter. The Tork Master™ is an excellent all-around performance street converter for small block Chevy. The Tork Master™ torque converter is not recommended for big block or supercharged applications.

*Note: *30 spline version.*

223055

1962-96 HoleShot™ Torque Converter

A higher than stock stall speed as delivered by the HoleShot™ converter will provide several advantages and benefits in vehicles with modified engines. Big cams tend to reduce low end power and torque. The high stall converter allows the engine to launch the car at higher RPM where more torque is available. The HoleShot™ is a very good choice for the typical street Camaro that is looking for better launch capability. Not recommended for N2O equipped engines. Stall speed listings are based on engines producing 230 ft lb of torque at 2500 RPM. More torque at 2500 RPM will give you a higher stall speed, less torque at 2500 RPM will give you a lower stall speed than the stall speed ratings indicated.

*Note: *Requires 10-3/4" or dual pattern flexplate. **30 spline version.*

New!

Features:

- Furnaced brazed fins, needle bearings, hardened pre-ground pump hub, computer balanced
- Harder launches, quicker acceleration, improved low end power, bolt-in (no modifications required)
- Special high stall unit is great for light vehicles
- With heavy-duty front anti-ballooning plate for nitrous applications

1965-91 Breakaway Torque Converter

The Breakaway is a great torque converter for moderately modified street machines and weekend racers also used as daily drivers. It provides approximately 2400 to 2600 RPM flash stall, without negatively affecting part throttle driving. Designed for efficiency at highway cruising speeds and to launch hard at wide open throttle, the Breakaway is a fantastic all-around torque converter.

New!

Features:

- Furnaced brazed fins, needle bearings, hardened pre-ground pump hub, computer balanced, installation hardware included
- Higher RPM launches, quicker reaction times, lower elapsed times, better low- and mid-range power, 1500+ RPM increase in stall over stock.
- With heavy-duty front anti-ballooning plate for nitrous applications

1965-91 Street Fighter Torque Converter

Designed with the street/strip application in mind, this torque converter benefits more radically prepared street machines (those with performance cams, aftermarket carbs and higher compression ratios) to bring the launch RPM in line with the performance enhancements. The Street Fighter lets you take advantage of horsepower gains found in higher RPM ranges.

Transmission Components

700R4 Torque Converter Lockup

For 700R4 transmissions with square 4 pin connectors. Can be used without the factory computer (ECM). This unit is electronic, NOT vacuum controlled. It reads speed of the vehicle through a sensor that attaches to the speedometer cable. Transmissions with factory internal speed generators must be converted to cable drive to use this unit. Locks up the converter at a set speed and unlocks it when the signal generator senses the vehicle speed is below lockup speed or when braking. This unit is set to lock the converter at 42-47 MPH and can be adjusted if necessary.

TF900630	700R4	278.99	ea

Torque Converter Lockup

The B&M torque converter lockup provides a dash mounted control to govern converter lockup at any speed between 30 and 90 MPH. LED dash indicator displays when converter is locked or unlocked. Set includes: an adjustable control box with locked and unlock indication, speed sensor with cable adaptor for mechanical speedometer, wiring, and complete instructions. For GM TH200, TH350, TH700R4,4L60, and 200-4R transmissions.

A9800116

Sets Include:

- Single wire lockup control module
- 4th gear pressure switch
- New internal wiring harness with lockup solenoid for 700-r4 and 200-4r
- Brake switch,
- Pan gasket and filter with detailed instructions.

2004R/700R4 Torque Converter Lockup

The Bowler lockup set uses a pressure switch, not vacuum like Painless or a speed sensor like B&M. Their set allows engine to regain proper RPM before allowing the converter to lockup. Usually lockup occurs immediately after shifting into 4th gear, which can lug down the engine and cause poor performance. Module works off of pressure to allow a 8-12 second delay after shifting into 4th gear before the converter locks up. Converter locks up with adequate RPM gain after 4th gear and unlocks automatically with down shift or touch of brake. It will not allow lockup in any gear except 4th.

Key Features:

- Provides crisp shifts on any stock AT.
- Eliminates soft sluggish shifts, shift overlap, and excess wear on clutches and bands due to slippage.
- Improves transmission life.
- Transmission removal not required.

1965-01 Shift Improver Kit

The B&M Shift Improver Kit™ is the easiest way to get the stout performance you've always wanted out of your automatic transmission and you get two modes of performance to select from: Heavy-Duty, or Street/Strip.

Stage 1-Heavy-Duty – Firm positive shifts without loss of driver comfort for improved performance in all street vehicles. Recommended for regular passenger vehicles.

Stage 2-Street/Strip – Provides very positive shifts for high-performance street use or for competitive events. This model is for the enthusiast who wants the hardest, quickest possible shift.

No More Messy Oil Splash!

End the messy job of draining transmission fluid forever with a Transmission Drain Plug Kit from B&M. Only a few automatic transmissions are equipped with drain plugs from the factory. If you're not one of the lucky few, then you can install one yourself very easily. Simply remove the pan once, drill a hole, bolt the B&M Drain Plug Kit in, and eliminate messy oil splash forever. Non-magnetic. Universal fit.

223300	drain plug	14.99 ea

Transmission Pan FilterMag

FilterMag's powerful rare earth magnets trap and hold wear inducing metal particles smaller than 40-microns down to 1-micron that the filter cannot stop. The super strong magnetic force holds FilterMag to a steel trans pan, is reusable, and will reduce maintenance costs by extending the life of your oil. The super strong automatic transmission FilterMag mounts to the outside bottom of the pan and will keep metal particles from harming your transmission.

Pour In Performance!

Trick Shift™ was originally developed by B&M for racing applications. It's become so successful that it's the most popular high-performance fluid on the street also! Not an additive, this is the best performance ATF available! Trick Shift™ is the easiest way to measurably improve the transmission performance of your vehicle. Trick Shift™ works with all automatic transmissions when a firmer shift is desired. "Pour in Performance" isn't just a catchy phrase – it's reality! It can be mixed with stock type transmission fluids, however to attain maximum improvement you should use Trick Shift™ exclusively. Ideal for towing, light trucks and RV applications as well as racing.

***Important:** Not recommended for electronically controlled automatic transmissions.*

Max ATF

Max ATF is a synthetic, high-performance, automatic transmission fluid. Its low co-efficient of friction and high film strength help to dramatically reduce heat and wear. Reduces heat to extend the life of your transmission. Max ATF is fully compatible and can be mixed with other automatic transmission fluids.

Transmission Coolers

New!

Universal Transmission Cooler

Efficient compact lightweight all aluminum 18,000 GVW transmission cooler designed to keep the transmission within safe operating temperature for the budget minded. Measures: 7-1/2" x 12-3/4" x 3/4". Installation kit includes: hose, clamps, fittings, and mounting hardware.

820500 universal..... 71.99 ea

New!

Heavy-Duty AT Cooler with Fan

Extend the life of your automatic transmission with Mishimoto's heavy-duty transmission cooler. Features 100% aluminum, tube and fin construction and a high flow 8" fan to provide maximum cooling for your transmission. Measures: 12.5" x 7.45" x 3.5" (including fan). Includes mounting hardware.

MM13059 universal..... 172.99 ea

Hi-Tek Transmission Cooler

The Hi-Tek automatic transmission cooler is perfect for demanding street/strip and even towing applications. At 175 degrees, a thermal switch activates the high flow 12 Volt 7" electric fan. Durable, oven brazed aluminum construction promises years of performance. The 1/2" NPT fittings are easily adaptable to AN fittings and steel braided cooler lines, or can be used with standard rubber or steel lines. Measures 10" x 7-1/2" x 4" and includes electrical connectors and detailed instructions.

70298 universal..... 436.99 ea

Transmission Fluid Cooler

Transmission fluid is designed to act as a coolant as well as a lubricant for your transmission. If the transmission fluid is allowed to get too hot, performance drops, varnishes form, and the fluid starts to break down, which can lead to premature wear. Flex-a-lite heavy-duty cooler can help prevent this by keeping the temperatures down, helping to ensure longer life to transmissions and components, and reduce the stress created by high-performance transmissions. Also suitable as a power steering cooler.

Important: *Depending on application and setup, additional fittings or adapters maybe required.*

Note: *Dimensions: width = 11", depth without fan = 3/4", with fan = 3-1/4"; height varies.*

Hi-Tech Kickdown Cable Set

Lokar's "U-Cut-to-Fit" high tech kickdown cables are adaptable for all types of manifolds including tunnel ram and blower manifolds. Kickdowns feature aluminum fittings with ferrule to eliminate frayed cable ends and are designed with a specially extruded liner (not ordinary cable) for extended life of the cable. Available with stainless steel, black stainless steel, or black and polished housings. Polished versions feature polished aluminum fittings with polished ferrule to prevent frayed cable ends.

BOWLER

Tru-Shift Throttle Correction System

This throttle bracket system provides precise cable adjustment for 700-R4 and 200-4R transmissions. When properly adjusted this system allows proper shifting in city traffic and during full throttle operation. Includes: auto adjusting detent cable, cable arm, cable bracket, and throttle cable brackets. All sets include throttle brackets for Lokar and GM throttle cables. Can also be used with factory rod style throttle linkage. Available for Holley, Edelbrock, Demon Carburetors, and MSD Atomic, Holley Sniper-1 and Fi-Tech EFI.

1965-67 Powerglide Shifter Conversion

If you plan on updating your classic 1965-67 Nova with a newer TH350, TH400, TH700R4, or TH2004R transmission, why not make your conversion as easy and straight forward as possible. Classic Industries® offers the correct sets that will allow you to use your factory shifter with the newer style transmissions listed above. The conversion set includes a new laser cut and hardened detent plate, transmission shift lever, and all necessary hardware. This set retains the original rod type linkage. If you are converting from a Powerglide to a TH400, we recommend that you also purchase the SW425 shifter rod to make your installation much easier. All other applications can use original shifter rod.

Automatic Shifters

Key Features:
- Unique multi-positioned trigger for user comfort in various shifter positions.
- Base can be trimmed to custom fit any floor.
- Reverse lockout feature meets NHRA and IHRA requirements.
- Neutral safety switch, back-up light switch, lighted gear indicator, polished aluminum T-handle and cable.
- Can be used with a reverse pattern valve body.

The Most Comfortable Shifter We Offer!

The B&M Hammer™ shifter may just be the most comfortably operated automatic shifter you can buy. Grab the handle of a Hammer™ shifter and it feels like it was molded to your hand. The unique design easily fits small to large hands and provides the appropriate wrist angle. The multi-position trigger is spoon shaped for easy finger operation in a multitude of grip positions. Ratchet shifter for TH400, 350, 250, 200, 700R4, 200-4R, 3- and 4-speed automatic transmissions.

Important: *Not for original consoles.*

223016 Hammer™ shifter ..... 339.99 ea

Key Features:
- Universal floor mount application. Base can be trimmed to custom fit any floor.
- Cable operated for quick installation and accurate shifting.
- Neutral safety switch, back-up light switch, lighted gear indicator, polished aluminum T-handle, and cable.
- Can be used with a reverse pattern valve body.

High-Performance Ratchet Action!

The Megashifter™ is one of B&M's all-time classic designs due to it's timeless good looks and high-performance ratchet action. And, it's ideally suited for most popular universal applications. For TH400, 350, 250, 200, 700R4, 200-4R, 3- and 4-speed automatic transmissions.

Important: *Not for original consoles.*

223017 Megashifter™ shifter ..... 479.99 ea
223306 replacement shift boot..... 39.99 ea

Key Features:
- Universal floor mount application. Base can be trimmed to custom fit any floor.
- Cable operated for quick installation and accurate shifting. You can't miss a gear.
- Neutral safety switch, back-up light switch, lighted gear indicator, chrome knob and cable.
- Can be used with a reverse pattern valve body.

Classic Style and Stout Performance!

You want style and stout performance wrapped up in a classic package? The B&M QuickSilver™ shifter is your answer! This top of the line ratchet action shifter provides performance shifting without a trigger. To get into park or reverse from drive, just lift the knob/stick assembly and move it forward into position! And it's cable operated for easy installation and precise shifting. For TH400, 350, 250, 200, 700R4, 200-4R 3- and 4-speed automatic transmissions.

Important: *Not for original consoles.*

223018 QuickSilver™ shifter..... 439.99 ea
223307 replacement indicator decal .. 20.99 ea

Key Features:
- Base can be trimmed to custom fit any floor.
- Neutral safety switch, back-up light switch, lighted gear indicator, black T-handle and cable.

The Perfect Shifter for Your Daily Driver!

The Sport Shifter™ may be a low cost alternative to B&M's top of the line MegaShifter™ – but it performs as if it was twice the price! The Sport Shifter™ is not a ratchet shifter and not intended for racing applications, but it makes a perfect addition to any street machine – making daily driving something to look forward to. Utilizing a simple detent action between first, second, high, and neutral, it features a lighted gear indicator, black plastic T-handle, neutral safety switch, back-up light switch, and flat aluminum stick. For TH400, 350, 250, 200, 700-R4, 200-4R, 3- and 4-speed automatic transmissions.

Important: *Not for original consoles.*

223019 Sport Shifter™ shifter ..... 329.99 ea

Key Features:
- Base can be trimmed to custom fit any floor.
- Cable operated for quick installation and accurate shifting.
- Reverse lockout feature meets NHRA and IHRA requirements.
- Neutral safety switch and polished aluminum T-handle and cable.

Straight Line Detent Shifter

The B&M StarShifter is one versatile 3-speed automatic shifter – wrapped up in a clean, timelessly styled package! In the normal mode the StarShifter is a straight line detent shifter. When the lever is in low, lift the trigger all the way and pull the stick back to convert to ratchet action. Move the stick forward for the 1-2 and 2-3 shifts. Cannot be used with reverse pattern valve body. For TH400, 350, 250, 200 automatic transmissions.

Important: *Not for original consoles.*

223020 StarShifter™ shifter ..... 309.99 ea

Key Features:
- Base can be trimmed to custom NHRA and IHRA requirements.
- Neutral safety switch, back-up light switch, black T-handle and cable.

More Bang for the Buck!

The B&M Z-Gate™ shifter combines classic styling, performance and a popular price. If you're building a project on a budget, or just want to upgrade your automatic shifter, the Z-Gate™ is the only choice! Great for most 3-speed automatics, the patented 'Z' shaped architecture eliminates the possibility of over shifting and missing a gear. Even more, this easy to operate shifter has many of the features found in our top of the line units, and it includes a T-handle and T-trigger – so you get the most bang for your buck! For TH400, 350, 250, 200 automatic transmissions.

Important: *Not for original consoles.*

223021 Z-Gate™ shifter ..... 279.99 ea

Transmission Conversions

EXTERNAL FEATURES

SuperCase

We began with the strongest 356T6 aluminum alloy. We thickened the case walls, added additional material to support a stronger, full width 307 main drive bearing and a countershaft sealing soft plug, and we reinforced and thickened the mounting ears. As a final touch, user-friendly straight thread fill and magnetic drain plugs with sealing o-rings were added. Despite these improvements, we preserved the look of a 1960's design so our new case won't look out of place under your classic muscle car. No flex, no leaks, no broken ears.

Roller Side Cover

We noticed that we sell more side cover oil seals for Muncies than synchronizer rings, and although the oil seals are inexpensive and easy to replace, this bothered us. When we investigated we discovered that the shifter shafts in many high mile side covers are running in elongated bores, causing new oil seals to fail prematurely. Obviously, a new side cover with round bores would solve the problem temporarily, but we wanted a permanent solution, so we made our shifter shafts a true .750" and supported them with needle bearings. It's standard on our new transmissions.

Extension Housing

If you've been looking, you know that good extensions for thirty-ye ar old Muncies are hard to come by. When we set out to eliminate that little problem, we also thought about what you're planning to do with it. We added a backbone rib, stiffened the reverse shift tower, and enlarged the oil seal shroud. This housing is produced with a passenger side speedometer drive housing. So whether all you need is an extension better than yours or you're thinking your monster motor might need the big output to handle all that torque, you can stop looking. We've got you covered.

INTERNAL FEATURES

Gearsets

For over fifty years Auto Gear has delivered the highest quality manual transmission gears. Our Muncie M22 gearset is typical. Some vendors purchase the "unimportant" gears in India or China. They must be smarter than we are – we think they're all important, so all six of our gears are manufactured for us in Italy by Antonio Masiero S.p.A. For General Motors cars from 1963-74, we offer the most complete range of Muncie gearing available. Every piece meets our standards before we put our name on it. You can buy cheaper gears elsewhere, but you can't buy better gears anywhere.

Roller 1st Gear Option

When you're not in low (and how much time is that?) your gearbox is spinning your 1st gear on the shaft. That's horsepower that's not going to your tires, and for years racers have minimized that loss by squeezing a bearing between modified 1st gears and sleeves, an expensive, one piece at a time solution. Our roller 1st upgrade uses a specially cut gear and sleeve for the ultimate in accuracy, coolest running, and lowest cost. It's standard in our new transmissions.

Note: Not for use in drag racing applications, or street use when hard launches will be the normal or even occasional, driving style.

Ductile Iron Mid-plate

Every time you shift your Muncie's heavy main shaft assembly is thrown back and forth, restrained only by two snap rings and your mid-plate. Think of it as a slide hammer and it'll be no surprise that many aluminum mid-plates are distorted at the snap ring groove. We make the mid-plate you should be hammering on... our mid-plate is made from shock resistant ductile iron. It's standard in our new transmissions.

TR1013

The all new "UltraCase" – detail

M22 UltraCase: *The UltraCase is heavily ribbed, incorporates a deeper sump, and has an all-new rear thrust-button. Auto Gear began with the strongest 356T6 aluminum alloy, we thickened the case walls, added additional material to support a stronger main drive bearing and reinforced and thickened the mounting ears. No flex, no leaks, no broken ears.*

1963-74 M22 UltraCase 4-Speed ⚠

These are exotic transmissions designed for quarter miles or circle tracks, but if your vehicle sees city streets or country lanes you need a heavy-duty, synchronized, close ratio gearbox with a helical gearset and, to be honest, until now you haven't had too many good options. Each new Auto Gear transmission is built from genuine Auto Gear parts – the highest quality available – and includes all the goodies: the all new heavily ribbed UltraCase, ductile iron mid-plate, your choice of three heavy-duty gearsets (each with roller 1st gear option) and a roller side cover. Best of all, it's ready-to-install and it's available at a less than exotic price. No core required! TRUCK

Note: All transmissions now feature bolt-on style shifter linkage mounts. Stock stud type shift linkage will work with the bolt on style mounts. All transmissions are special order and must be prepaid. Special shipping rate applies.

M22 Gearset with 2.20 1st

If your only concern is taming the biggest, meanest motor on the block, you want an M22-based gearset. All three of ours feature the legendary 'Rock-Crusher' gear geometry and run with the signature whine. The M22 was originally paired with a 4.11 axle. Street cars used only in the wide open flat places may successfully run something faster. This approach off loads more of the 1st gear stress onto the axle and makes the gearbox more durable, but the fuel economy is frightening.

TR1013	1963-70	10/27 spl	2999.99 ea
TR1014	1970-74	26/32 spl	2999.99 ea

M22W Wide Ratio Gearset with 2.56 1st

The M22W is our answer to the price of gas. Pair it with a faster axle, say a 3.54 for street or a 4.11 for the strip, and you'll have a competitive combo that will show your wallet a little mercy. It's a little less strong, but it's far from weak.

Bellhousings

1964-67 Install a STEEL Bellhousing!

S.F.I. approved safety bellhousing is required for vehicles running 11.49 seconds or quicker in quarter mile competition. Built in the USA from high strength, hydro formed, and stress relieved steel to ensure uniform wall thickness. This bellhousing is precision machined and Blanchard ground to tight tolerances for maximum bolt and bore alignment. The bellhousing is heat treated for added strength and certified to SFI 6.1W specifications. Durable powder coated finish for years of corrosion free service. The block plate and Grade 8 hardware is included. Approved by all major sanctioning bodies.

Important: *Not for use as a safety bellhousing.*

Bellhousing Dowel Pins

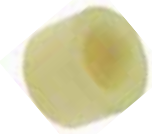

These dowels are a must when accurately dialing in the bellhousing. Offset dowel pins are available in different offsets as well as stock configuration. All dowel pins are longer than stock so block plates can be used.

Kevlar Pilot Bushing

Kevlar has a long history of durability in industrial applications, and now RAM offers pilot bushings in this amazing material. By using Kevlar for the pilot bearing, wear is significantly reduced over time versus bronze or needle bearing bushings that can lose lubrication over time, causing wear. Kevlar bushings are self-lubricating and offer low susceptibility to damage from heat while maintaining their dimensional stability.

BU656K	1967-77	.....	36.99 ea

Roller Pilot Bearing

Replacement pilot bearing for all 1964-79 V8 Chevy II/Nova models. Worn pilot bearings can cause hard shifting and increase transmission wear. When changing your clutch be sure to use a new pilot bearing for best results. This bearing should be used in high-performance vehicles and is a significant upgrade from the stock bronze bushing.

1969-79 Aluminum Flywheel

Get faster throttle response, quicker acceleration, and smoother shifting with a Fidanza billet aluminum flywheel! Fidanza billet aluminum flywheels are CNC-machined from the highest quality 6061-T6 aluminum to deliver optimum tensile strength, heat dissipation and weight reduction. The replaceable friction surface is made from 1050 steel and attached with military-grade aerospace fasteners for smooth engagement and durability. Fidanza billet aluminum flywheels also feature a 1050 heat treated steel ring gear that's pressed on and secured with Grade 8 button screws.

11501

1964-79 True Balance Billet Steel Flywheel

Ram True Balance billet steel flywheels are the ideal replacement for factory cast flywheels in high-performance and racing vehicles. Cast flywheels are not explosion proof and can be dangerous when used in high-performance applications at higher RPMs. Ram billet steel flywheels are CNC-machined from certified materials and exceed SFI specifications. After machining, the flywheels are Blanchard ground parallel to the crankshaft mounting surface, ensuring minimum run out and an optimum mating surface for the variety of friction materials offered. Use steel flywheels in heavier drag race cars or for the best drivability in street driven vehicles.

Important: *For Ram clutch sets only.*

Increase performance without sacrificing streetability!

HY85112 – organic friction material

HY85111

1962-79 Street Clutch

An excellent upgrade from the stock unit, the Hays Street Clutch far exceeds OE specifications in material, construction and performance. Light pedal pressure and quick release make the Hays diaphragm pressure plate the most popular choice for today's street driven vehicles. Hays Street discs feature organic friction material that is riveted to a Marcel backing which acts as a shock absorbing material. The sprung center hub absorbs driveline torque, eliminating shock and vibration to ensure chatter free engagement. The Hays high-performance throwout bearing has been developed to withstand the high spring pressure and high RPM operation common to performance clutches. Each bearing face is heat treated and Blanchard ground to ensure trueness. The collars are heat treated for strength and machined to close tolerances for secure bearing fork attachment. The ball bearing race is packed with heat resistant moly-based grease for better lubrication and longer life. A nylon liner and bearing retainer is also featured for cooler and quieter operation. Hays Street Clutch sets include a Hays performance pressure plate (light pedal pressure and quick release make the Hays diaphragm pressure plate the most popular choice for today's street driven vehicles), Hays performance clutch disc (features organic friction material that is riveted to a Marcel backing which acts as a shock absorbing material), Hays performance throwout bearing (withstands the high spring pressure and high RPM operation common to performance clutches), bolt kit, and a handy splined clutch pilot tool to aid in installation of set.

Important: *Stock clutch linkage may require reinforcements.*

1962-79 Street 450 Clutch Set

The Street 450 single disc set is an excellent upgrade from your stock clutch and designed handle mildly modified engines up to 450 horsepower. It is a great clutch where driveability is the most important factor. Our clutch features 30% greater clamping force than a stock clutch allowing you to put more power to the ground and high-quality disc material allows for smooth, no-chatter engagement.

Important: *Stock clutch linkage may require reinforcement. Check the number of splines on the input shaft of the transmission you are using before ordering.*

1976-79 Clutch Throwout Bearing

Authentic GM clutch throwout bearings. When replacing the clutch in your Nova, it is recommended that you replace the throwout bearing at the same time. Even if the bearing appears to be in good shape, it is not worth the risk of trying to save money now only to incur additional costs in the long run when the throwout bearing goes bad.

G8548	1976-79	8 cylinder.....	58.99 ea

Adjustable Throwout Bearing

This adjustable throwout bearing is the perfect replacement for any bearing. Replaces all of GM's three different bearing by simply removing one of the rings. With all three rings on the bearing you have the long bearing. Remove one ring and you will have the mid-length bearing and if you remove all three rings you will have the short bearing.

16505	adjustable.....	67.99 ea

1968-74 Factory GM Hurst Shift Lever Bushings

From 1968-74, GM had an issue with their factory Hurst 4-speed shifters. The three levers on the shifter would wear over time, causing sloppy and inaccurate shifts. In 1970, GM solved the dilemma by engineering these rubber bushings that snap into the holes on the shift lever to take up the space between the shift lever and the shifter rod. This set is an exact reproduction of the original GM bushings, produced with stainless steel and rubber to restore the functionality of your factory shifter.

1970-74 Wire Retainer for TCS Switch

This wire retainer bolts to the side of the transmission cover and guides the TCS harness to the switch on the transmission cover. It will prevent the wire from getting caught in the shifter linkage. This die-stamped clip features the rubber coated tabs to hold the harness. Most restorations need this often overlooked retainer clip. Perfect for your concours restoration.

Lava and Stealth Battery Heat Shield

Battery heat shields can improve the performance and increase the life of your car battery. Excessive under hood temperatures are not uncommon in today's automobile landscape, as high-performance engines with power adders are generating more heat than ever. This extra heat can tax your battery's capabilities and push it to premature failure. Using the Lava or Stealth Battery Shield will reduce this heat, and increase the longevity of your battery, as well as ensuring your battery is performing at peak levels. These car battery shields work on all types of batteries, from lead, gel, AGM, and lithium. Have the peace of mind knowing you won't be stranded by a weak performing battery.

Battery Cables

1962-72 Spring Ring Battery Cable

If you want to restore your Chevy II/Nova to exact factory specifications, these OEM type cables are what you need! Each cable is reproduced exactly as original using the same OEM type spring terminals and connectors. The terminal end includes the word "SPRING RING" in the correct type style and size. Each cable is produced for authenticity and includes the original wire markings. Positive and negative cables are sold separately, due to the various variety of cables which were used for different applications. Each reproduction includes the correct length cable and spring ring terminal end, except as noted on 1970 and later models with side mount battery cables.

Universal Battery Cables

Underhood or trunk mount battery cable sets. Each cable is 1 gauge and features lead die-cast top post terminals with a steel ring insert. This feature prevents cracking or breaking the terminal due to tightening. Each version available in either top post or side post sets. Trunk mount sets measure 18' while underhood sets measure 6' in length. Negative cables feature pre-assembled 36" long 6 gauge secondary lead. Each set includes: crimping tool, extra lugs, and shrink tubing.

Battery Cable Components

PAINLESS

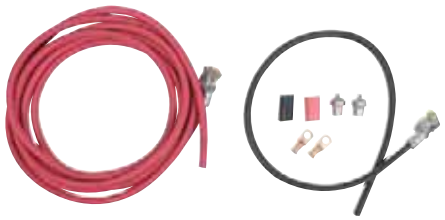

Remote Mount Battery Cable Set

Perfect for trunk mounted batteries. Both positive and negative cables are 1 gauge and 16 feet in length which allows for them to be attached to the engine for maximum starting current. Helps prevent voltage drop to the engine. Eliminates the need for heavy cable connections between the engine and frame. Set includes side post adapters and high amp crimp ring terminals with heat shrink.

40105 universal ..... 165.99 set

PAINLESS

Battery Cable Set

This set has only the highest quality components. Set includes 16 feet of red #1 gauge positive cable and 3 feet of black #1 gauge cable, both with heavy-duty battery terminals already installed capable of handling over 250 amps. Set also includes side post adapters and high amp crimp ring terminals.

BM2428

Battery Mat – Acid Neutralizer ⚠

The Battery Mat offers protection against undetected battery acid leaks. Once installed, the mat will trap and neutralize any battery acid that leaks from the terminals or top side of the battery, preventing corrosion and expensive damage. Each mat is made of super absorbent polypropylene needle punch felt, with one side heat treated to give it additional strength. The mat is inserted under the battery between the battery and the battery tray. It can easily be installed at any time either when replacing the battery tray or battery.

Cell Saver Battery Insulation Kit ⚠

DEI cell saver battery insulation kit is designed to solve the problem of heat soak into batteries preventing premature failure due to heat. Batteries are very susceptible to heat and vibration that could cause premature failure and hazardous leaks. Cell Saver is very capable of damping vibration and will absorb and neutralize any damaging leaky battery acids. Cell Saver is easy-to-install and excess material can be trimmed to accommodate batteries of most sizes and shapes.

Battery Accessories & Tools

Protect Your Vehicle from Corrosive Battery Acid!

Prolong battery life and protect your vehicle's battery tray, underhood and radiator support area with the world's only acid-neutralizing heat barrier mat. It reflects over 90% of radiant heat, traps and neutralizes battery acid, protects against corrosion, is recyclable, protects the environment, and is inexpensive and easy-to-install. The Battery Heat Barrier™ set is completely safe to handle before and during installation. So effective, it is used by all branches of the United States military. Set consists of: one 8" x 40" acid absorbing/neutralizing felt and one adhesive backed 8" x 40" aluminized thermal barrier to wrap around the battery, plus an 8" x 12" acid absorbing/neutralizing pad to put beneath the battery. Install one on your vehicle NOW, before it's too late.

OE Style Wiring Harnesses

OE Style Reproduction Wiring Harnesses

Reproduced using the original General Motors schematics and feature the correct attachment connectors and wire in the correct gauge sizes and coloration (when available) to match your original and maintain authenticity. When ordering wiring harnesses is it essential to supply as much information as possible regarding your Nova's optional equipment including the year, engine size, transmission type, or any and all factory options. This will ensure you are getting the correct harness for your particular application.

OE Style or Universal?

Wiring harnesses are labeled either OE style or universal. OE style are reproduced using the original General Motors schematics and feature the correct attachment connectors and wire in the correct gauge sizes and coloration (when available) to match your original and maintain authenticity. Universal may not be reproduced in this manner, and may require modification to fit your specific application.

A 1962-76 OE Style Front Lamp Harnesses

This harness is one of two main harnesses located in the engine compartment. It provides wiring for the main battery power lead, headlamps, parking lamps, 1968-76 side marker lamps, horn relay, alternator, voltage regulator, temperature sensor, brake warning, and ammeter gauge. These harnesses are produced as closely as possible to original specifications including correct colored wire.

OE Style Wiring Harnesses

OE Style Reproduction Wiring Harness

Reproduced using the original General Motors schematics and feature the correct attachment connectors and wire in the correct gauge sizes and coloration (when available) to match your original and maintain authenticity. When ordering wiring harnesses is it essential to supply as much information as possible regarding your Nova's optional equipment including the year, engine size, transmission type, or any and all factory options. This will ensure you are getting the correct harness for your particular application.

OE Style or Universal?

Wiring harnesses are labeled either OE style or universal. OE style are reproduced using the original General Motors schematics and feature the correct attachment connectors and wire in the correct gauge sizes and coloration (when available) to match your original and maintain authenticity. Universal may not be reproduced in this manner, and may require modification to fit your specific application.

A 1962-74 OE Style Under Dash Wiring Harnesses

Classic Industries® now offers an under dash wiring harness to completely replace your existing dash harness. Includes everything you need for applications listed below. No more searching the wrecking yards for a harness that might work! Get exactly what you need without the guess work. All under dash harnesses are manufactured specifically for your Nova.

*Note: *With seat belt warning. **Includes back-up light.*

B Rear Body Lamp Harnesses

These reproduction rear body light harnesses are produced to exact factory specifications including the correct color wiring and factory connectors. Each harness will replace the original exactly and bring your rear lighting section including the tail lamps and side marker lamps (where required) back to showroom condition. We offer a comprehensive selection of rear body light harnesses for 1962-74 Chevy II and Nova models.

Important: 1963-68 models with manual trans requires the use of a back-up switch wiring harness, sold separately. 1969-72 models require the use of a jumper harness to complete the rear body light harness.

*Note: *With under dash courtesy lights (sockets not included).*

NV58937

1963-76 Console Wiring Harness

If you are rewiring your console lamps, or neutral safety switch, these harnesses will let you do it the easy way, with one complete harness. Each of these console gauge harnesses is a perfect duplication of the original, including the correct color and gauge wires. Perfect for replacing damaged originals or as part of a console gauge conversion for a Nova not originally equipped with gauges.

Important: *In order to correctly convert your Nova to console gauges, you must also replace your under dash, engine and front light harnesses.*

1962-67 Cigarette Lighter Wiring Harness

The cigarette lighter fuse adapter includes a pre-assembled pigtail with factory connectors for both types of GM lighter sockets. Simply cut off the factory lighter connector, crimp on the supplied female terminal and plug into the adapter. Our adapter uses connectors and terminals that would have been available in 1967, so it makes for a "period correct" modification. Includes 10 amp glass fuse and installation instructions.

1962-72 – 16 Fuse, 20 Circuit Wire Harness

RON FRANCIS Wiring

These wiring harnesses are built specifically for 1962-72 Chevy II/Nova models. They feature wiring for the entire car and will work with most stock GM steering columns, as well as aftermarket columns such as ididit and Flaming River. Will wire full gauge sets including tach and will address HEI, points and aftermarket distributors, neutral safety switches. Also includes: wiring for high and low beams, indicator lights, parking lamps, turn signal lamps and brake lamps. Will readily accept fuel injection. The wiring is high temperature, fire resistant and color coded. Features the circuit printed on each wire. All sets include a headlight switch, isolated cooling fan relay and color coded instructions. A unique serial number for each harness enables Ron Francis to technically support the installation to you or any subsequent owner.

1994-02 Fuel Injection Engine Swap Wiring Harness Set

For maximum power with exceptional driveability nothing beats electronic fuel injection. And the easiest way to install a modern fuel injected engine is with one of these proven FI engine wiring harnesses. These harness sets are designed to allow you to properly wire your engine swap from a donor car or crate motor. A variety of harnesses are available to suit 1994-up LT1, LS1 and GM crate engine applications. Each of these sets include detailed instructions and illustrations.

The Detail Zone Wiring

RON FRANCIS Wiring

Each set includes the sensor connectors installed on 20 foot lengths of wire for custom installations, connectors for the sensor wires, and a Telorvek panel with installed wiring and connectors to plug into the factory computer. Designed to work with a specific transmission, so be sure to select the correct application from the listing below. Other non-computer controlled automatic and manual transmissions can be used but typically requires ECM reprogramming for best results. 1998-02 ECMs require use of all emissions sensors or a trouble code will occur unless the ECM is reprogrammed.

***Note:** *Corvette engines must use the Camaro/Firebird ECM in order to use this wiring kit. Also requires use of the 1998 Camaro throttle body for accelerator cable control. This engine utilizes the OBD II diagnostic system and if all emissions sensors are not used, trouble codes will set in a factory programmed ECM.*

Trunk Mount Chassis Harness

In many street rods and custom cars there is little or no room to mount the fuse block under the dash, forcing modifications to either the vehicle or the harness. Our 12 circuit trunk mount wiring harness provides additional wire from the fuse block to the dash and from the fuse block to the front end, allowing the remote installation of the fuse block in the trunk or behind the rear seat. Like all Painless kits, these fuse blocks come completely pre-wired and terminated for a simple, painless installation. Includes GM column mounted ignition and turn signal plugs.

Universal Wiring Harnesses

Universal Chassis Wiring Harness

Starting from a blank slate is a daunting task, especially with wiring. Trying to keep your electrical systems running smoothly on a patchwork of old wiring can be a troubleshooting hassle and possibly even a fire hazard. Whether you are planning a series of electrical upgrades or simply need to replace aging, brittle wiring, build your electrical system on a fresh foundation with a quality universal harness. For basic builds, start with a simple kit with wiring provisions for all lamps, horn, fan, wiper, gauges, and all lamps. For more elaborate builds, choose from a selection of advanced wiring solutions. Need to integrate your aftermarket AIR conditioning? Need extra circuits for a multitude of electronic accessories? With Classic Industries®, there's no limit to what you can do with your wiring.

25 Circuit Universal Chassis Harness

The Painless Pro Series gives you everything you need to wire up your Pro-Touring or custom ride right the first time! Ample length is provided for each circuit, providing you the freedom to route and hide your wiring how you choose. Once you've got the harness fit how you like it, included are over 25 GM factory style connectors found on most '60s to early '90s GM switches, allowing you to turn the Pro Series harness into a direct fit harness for your application. LED ATC bladed fuses get you away from the old hard-to-find glass fuses, and will light up if blown making troubleshooting a painless task. The 6 gauge charge wire and midi fuse (no more problematic fusible link!) will keep up with today's high amperage alternators, and the provided front and rear ground harnesses making grounding your lighting circuits a breeze! Provided with many GM connectors and terminal, insulated and non-insulated butt splices, heat shrink, grommets, cable ties, ground straps, and cable tie clips, the Pro Series brings a new meaning to truly Painless wiring and includes our lifetime guarantee.

GSE2100A

MADE IN USA

Electronic Exterior Door Handles

Elevate your vehicle's style with these electronic exterior door handles from Lokar! Each billet door handle utilizes a weatherproof 12 Volt pressure pad switch to supply power to an electronically actuated door latch (door popper). Its 2 piece design and available 0 degree or 10 degree mounting surface allows the insert to be removed, and door handle positioned for ultimate customization. The XL design provides 7/8" of clearance between the door and the switch, allowing for easier mounting and less modifications to the door. Made in the USA from 6061-T6 billet aluminum.

Important: *This requires electronic door latch actuators, which are not included.*

Note: **Installation requires hand pocket for clearance.*

Remote Battery Disconnect

With this setup, one click of the key fob completely shuts down your vehicle's entire electrical system. It's accomplished by routing your main battery cable through a remote cutoff solenoid that you've stashed in a place inaccessible to a thief. For even more security, the 4 channel "Safe-n-Sound" system not only shuts off all power from the battery, but will also control 3 other items, like closing the windows, triggering the power door locks, and interrupting electrical power to the fuel pump, all separate from the main battery cutoff. The 4 channel package can handle up to 30 amps worth of electrical equipment.

Universal Integrated Turn Signal Set

A common problem faced by rodders and kit car builders is where to mount turn signals since many aftermarket steering columns are not designed to accommodate the necessary wiring and switches. Problem solved, with this new integrated turn signal set from Painless. The toggle switches for both turn signals and flashers can be mounted anywhere. Because the set is designed to be an integrated system, turn signals will work in conjunction with brake lamps.

Thermo-Flex Hose and Wiring Covering

The combination of aluminum, silica, and stainless steel is combined to produce a sleeve that is flexible lightweight, and strong. The aluminum-silica combination can be slit for applications such as wire looms or hose covering, without disconnecting the ends of the wire or hoses. Thermo-Flex aluminum can withstand extreme temperatures up to 750 degrees F.

Semi-Rigid Wrappable Split Braided Tube

Clean up and protect any wiring harness with this black braided wire wrap. The semi-rigid tube opens along a lateral split to accommodate a variety of harness configurations, then simply closes without any need for fasteners. A 25% overlap ensures complete coverage. Retains shape and rigidity from -94 degrees to 257 degrees F. For 18-14 gauge wire.

Express Sleeve

TT1125

Express sleeving is a combination of a high temperature insulation material and a highly reflective Mylar foil with a Velcro closure. The sleeving is designed to simply and effectively protect wire, hoses, and cables from harmful effects of radiant heat. Just pull apart the Velcro, wrap around the wire, and re-close the sleeve. Express Sleeves reflect over 90% of radiant heat bursts up to 2000 degrees F, and can easily withstand direct temperatures up to 750 degrees F.

XT100 XT101 XT102 XT103

X-Treme Tape

X-Treme Tape was developed for the military and has some very unusual properties. The silicone based tape will stick only to itself, and only when placed under tension. Once wrapped around an object, it forms a non-conductive, air and watertight, insulating seal that remains flexible within a temperature range of -60 degrees to 500 degrees F. Insulates to 8000 Volts. Stretches to 3X's its length. Conforms to irregular shapes. When wrapped upon itself, it bonds together immediately and becomes completely fused after 24 hours at room temperature.

VISIT OUR NEW SHOWROOM!

Conveniently Located in Huntington Beach, CA!

- 10 minutes from the beach
- 20 minutes from Knott's Berry Farm
- 20 minutes from John Wayne Airport
- 30 minutes from World-Famous Disneyland

Bring the Family!

Step past the featured display car and take a seat in front of our entertainment center, designed to create a comfortable atmosphere for enthusiasts, their children, and their significant others.

Discover Our Products

Browse our unparalleled selection of restoration, performance parts and accessories at these convenient computer terminals. Discover the latest products from Classic Industries® for your project.

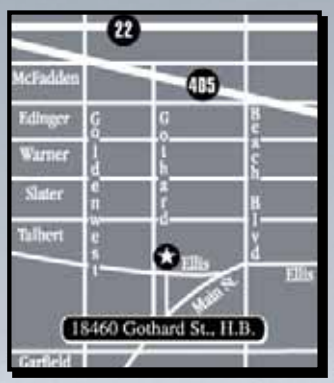

Save on Shipping with Will Call

Want to pickup your order at the showroom and save the shipping costs? With our immense inventory of parts, we are SoCal's biggest parts store for classic GM and Mopar models.

Automotive enthusiasts seeking personal service have always been invited and encouraged to visit our location in Huntington Beach, California. We have recently expanded our showroom facility to make the experience worth the trip for our customers and their families.

More than mere parts counter, our new showroom has something for everyone. A rotation of show cars is on display, including award-winning Classic Industries restorations such as the "TWISTED" Duster, "CAMOTION" Camaro, and "INNOVATION" Nova. Information kiosks let you browse electronically while our entertainment center keeps spouses and younger enthusiasts occupied. Naturally, the latest gift and apparel items are presented along with the newest reproduction parts. Our friendly, knowledgeable staff is ready and able to help with questions and ideas to make your restoration project smooth and easy.

Four Ways to Order!

ORDERING BY PHONE

TOLL FREE 800•854•1280

In the continental United States, Hawaii and Alaska.
Outside the U.S. call 714.847.6887.

Mon-Fri 8:00-5:00 **Sat 10:00-3:00, P.S.T.**
(Closed Sundays and holidays)

Information you'll need when ordering by Phone:

Customer Number
Found on back cover of your catalog above your name, this number allows Classic Industries® to quickly access your information. If you do not have a customer number, a new one will be given to you when placing your order.

Billing and Shipping Address
Please have the billing and shipping address available. Credit card orders are verified by name and address before shipping. Your order can be shipped to a different address, provided the cardholder's name and address match the credit card used. You may be asked to contact your credit card company to have the shipping address added to your account.

Year and Model of Vehicle
To provide the best possible service, we may require the year and model of your vehicle. This helps verify that the parts you order are correct for your car.

Part Numbers
All Classic Industries® products are listed with a part number. If possible, please have the part numbers of the products you're ordering available before calling to make the ordering process faster and more convenient.

ON-LINE ORDERING

www.classicindustries.com

Classic Industries® offers on-line ordering directly through our website. Log on to classicindustries.com and order on-line. On-line ordering is available 24 hours a day 7 days a week for your convenience.

Service Excellence from the Restoration Leaders!

ORDER WORRY FREE #1 Classic Industries WITH

You No Longer Have To:

- ✖ Pay excessive fees to protect your merchandise
- ✖ Contact the carrier yourself
- ✖ File a damage claim yourself to have the carrier inspect the damaged items
- ✖ Send the damaged items back at your expense

With Classic Industries® the worry is eliminated!

PROCEDURE FOR RETURNING SHIPPING DAMAGES

We handle the claim so you don't have to! If any part you receive is damaged during shipping and handling, simply contact our customer service department toll-free at 800.854.1280 within two business days.

After verifying the damage, Classic Industries® will issue a pickup call tag through the carrier that shipped the products. The carrier will pickup the damaged goods from your address and return them to us at no expense to you. After the product has been inspected, our customer service department will send a replacement part.

In order to ensure replacement of damaged products, please return items in their original box and packaging. Failure to do so may result in the claim being denied. Someone must be available at the pickup address to supply the damaged products when the carrier arrives. If the carrier in unable to pickup the products for any reason, the customer may be required to return the products at their expense.

Note: Some products are excluded from damage call tag pickup. Call a customer service representative for information about products that are not eligible.

ENJOY THE BENEFITS!

Money Back Guarantee

At Classic Industries®, we take pride in the quality of the products we offer and back it up with a 100% Money Back Guarantee. If for any reason you are not satisfied with a product or purchase, you can return the product within 30 days of receipt for a full refund, credit or exchange.

Not all restoration parts are created equal. But at Classic Industries®, we research each and every product we sell to make sure our customers are getting the highest quality products in the market. We have decades of experience in product selection and we painstakingly scrutinize every product we offer for quality manufacturing, materials, and craftsmanship before we will offer it in any of our catalogs. Many of our employees are automotive enthusiasts themselves. In fact, many were customers prior to becoming employees, so we understand the needs of the modern classic car enthusiast. Our product procurement specialists have made it their goal to select restoration products that have been manufactured using modern technology and materials with an emphasis on originality, longevity, and attention to detail. What else would you expect from the company that started it all? Classic Industries® is the name you can trust, and we'd like for you to consider us as your partner in restoration. When a company continually offers a quality product for a reasonable price and backs up every sale with the best customer service in the industry, people come back! That's why Classic Industries® has been the leader in restoration for almost four decades. So, if you haven't already decided for yourself that Classic Industries® is the most logical choice as your restoration parts supplier, then check out our Money Back Guarantee. If for any reason you are not 100% satisfied with a product or purchase, you can return the product within 30 days of receipt for a full refund, credit, or exchange.

OER ORIGINAL EQUIPMENT REPRODUCTION · GM RESTORATION · Classic Industries Authentic Quality Reproductions Guaranteed · RESTORER'S CHOICE™

Price Match Guarantee

If you find it for less we'll match the price!

Classic Industries® will match any competitors current advertised price for an identical product. Simply send us a copy of the competitor's current advertised price from a catalog, advertisement or website (with URL) and we'll match the price. The price match guarantee is available at the time the order is placed and for in-stock merchandise only. Price matching will be determined by a competitor's most current retail published price and is limited to competitors within the Restoration Industry.

Important: In an effort to provide our retail customers with the most competitive pricing available, we will match our current competitor's pricing. Price matching will be determined by a competitor's most current retail published price and is limited to competitors within the "Restoration Industry". Performance parts and special orders are exempt from price matching policy. Classic Industries® reserves the right to decline price matching if pricing is deemed to be a special offer, a sale or closeout price, or a non-current price. Competitors sale pricing, inventory reductions, close outs, special promotional offers, etc. may be exempt from the "price match" guarantee. The guarantee is subject to the terms and conditions of Classic Industries® current policies.

Classic Industries® will generally contact competitors to confirm that the published price is current due to market changes, demand or availability. Price matching supersedes all other promotional offers and on sale pricing. If Classic Industries® matches a price from a competitor, additional discounts on that product or products may not apply. If the standard retail price of a product is higher than the competitor's price and an applied discount reduces the price below the competitor's pricing, the now discounted or sale pricing will prevail. We reserve the right to change or revoke this offer at any time without notice. Classic Industries® reserves the right to decline price matching.

Think Of Us As Your Partner In Restoration!

A restoration can take years! We understand the complications and problems that can occur when ordering precious parts for your project car. If you are like most people, you want perfection. The many different elements that make up a restoration isn't just limited to the parts you install. You sometimes need to rely on other outside elements such as body shops, painters, upholstery specialists and parts suppliers. That's where we come in. We offer the quality parts you want without all the guesswork. We carry one of the largest inventories of restoration products and accessories the market has to offer. What's more, you can rely on our nearly 40 years of experience to help you through the rough spots when you need it. Our tech advisors are always ready and willing to discuss any problem you may have concerning the parts for your vehicle and your restoration. Unlike other companies, we give you knowledgeable sales representatives, one of the largest inventories in the business, quick and efficient delivery, Toll Free ordering, and the experience to back it up. If you're not absolutely 100% satisfied with the products you receive. We'll refund 100% of your money! Classic Industries® – your partner in restoration!

Form of Payment

CREDIT CARDS
Classic Industries® accepts *Visa, Mastercard, American Express, Optima*, and *Discover* for your convenience. When placing your order, be sure to indicate the card holders name, address, home phone, business phone, credit card number and expiration date and billing address *(if different from person placing order)*. A security code is required for credit card purchases. Please have your credit card readily available when placing your order. Minimum order is $20.00. New or 1st time customers who are paying by credit card must have the order shipped to the cardholders billing address for the first order. Invalid or non-matching billing addresses could delay your shipment.

CERTIFIED CHECKS
Classic Industries® will accept certified checks for your mail order. Be sure to include customer number and/or reference invoice number. Contact your bank to issue a certified check in the amount due for your order. All orders paid by certified check are held up to 15 days pending clearance.

PERSONAL CHECKS
To use personal checks or business checks on prepaid orders, the name, address, and check number must be preprinted on the check. Be sure to include customer number and/or reference invoice number. Only first party checks will be accepted. All orders paid by personal check are held up to 15 days pending clearance.

MONEY ORDERS/CASHIERS CHECKS
To use money orders or cashiers checks on prepaid orders be sure to include customer number and/or reference invoice number. All orders paid by money order are held up to 15 days pending clearance. Once released the order will leave within 24 hours of clearance.

Make Personal Checks or Money Orders payable to:
Classic Industries®

PAYPAL
Classic Industries® now accepts payments via Paypal! Simply complete your order over the phone with a customer service representative, get your invoice number and then send your payment to paypal@classicindustries.com through Paypal's "Send Money" feature and select "Goods and Services" for payment reason. Be sure to include your invoice number in the "Special Instructions" tab at checkout for fastest service. Orders are generally shipped within 72 hours or less of payment receipt. Contact our customer service department for additional details.

How to Order

MAIL ORDERS
Fill out the order form located in the back section of this catalog. For quick service use your credit card, money order, or cashiers check. Personal checks are held for 15 days from date of receipt pending clearance. All mail orders must be prepaid including freight *(when applicable)*. COD orders through the mail will not be accepted. If you have any questions regarding product information or availability, contact our sales representatives during regular business hours at 800.854.1280.

ORDER BY PHONE
Classic Industries® employs knowledgeable sales representatives to assist you when placing your order. Our sales representatives are trained to answer your questions regarding restoration and the parts listed in this catalog. Call during regular business hours Mon-Fri 8:00-5:00, Sat 10:00-3:00, P.S.T. Closed Sundays and holidays. Our convenient **Toll Free** number allows you to place your order with confidence to assure you get exactly what you want when you want it! Inter-continental U.S. 800.854.1280. Outside U.S. country code + 1.714.847.6887

ON-LINE ORDERING
Classic Industries® offers online ordering directly through our website. Log on to classicindustries.com and order online. Online ordering is available 24 hours a day 7 days a week for your convenience.

WWW.CLASSICINDUSTRIES.COM

FOREIGN ORDERS
All foreign orders must be prepaid before the products can be shipped. The Classic Industries® staff will check with the various freight companies that deliver to your country and area to determine the best possible rates available for your order. Once your order is rated, you'll be contacted by e-mail or phone to approve the rate. After approval and payment is received, the order will be shipped. The Shipping & Handling field for foreign orders will state "TBD" (To Be Determined). Rates are subject to change once the order has been packed and is ready to ship. Rates are calculated based on estimations of weight, dimensions and other factors. Should changes in freight costs occur once the order is packed and ready to ship, Classic Industries® will notify the customer immediately before the shipment is sent. If you have any questions or concerns, please direct your inquiries to info-desk@classicindustries.com.

General Information

Sales Tax Information
Classic Industries® collects and remits sales tax based on state and local requirements. The sales tax laws have changed due to a Supreme Court ruling in 2018. The appropriate sales tax will be applied to your order and remitted based on your state's requirements. If your order is shipped, or picked up in a specific state that requires sales tax, the appropriate amount will be added to your order.

Accuracy Of Descriptions
Classic Industries® makes every effort to verify the accuracy of all information published in this catalog. Each item is represented with information that is accurate to the best of our knowledge at the time the catalog is printed. Classic industries® is not responsible or liable for mistakes, print errors or inaccurate information that may lead to, or result in labor costs or damages to any vehicle under any circumstances.

Kit Products
All Classic Industries® Parts and Accessories catalogs include kits which contain a variety of products. On occasion we may run out of an item supplied with a kit. If this happens we will generally ship what is in stock and back order the item(s) which are not in stock. You may contact our sales department by phone to verify which items are not in stock at the time the order is placed. The customer may decide whether to accept the partial kit or have the entire kit back ordered until the kit is completed and all the items can be shipped at the same time. If the customer decides to accept partial delivery of the kit, then the full price of the kit will be charged to the customer and the back ordered items will be shipped no charge when they arrive at our warehouse. Customers will be charged the appropriate freight fees when applicable. Cancellation of products from a kit will be accepted at 25% below the actual current retail price of the item. On COD orders the price of the kit is charged in full and the back ordered items are shipped on a COD freight only basis.

Rights and Lefts
Some items in this catalog are presented as left or right hand products (left side – driver) (right side – passenger). LH or RH sides are determined by sitting in the vehicle, not standing in front of the vehicle.

Color Matches
Due to multiple manufacturers of products Classic Industries® provides, color variations may occur. Slight color variations are common especially amongst interior products and does not constitute a defect. These products are not eligible for return for this reason.

Pricing
Current product pricing and our pricing policy can be found by visiting our website. Prices in this catalog were in effect at the time of printing and supersede all prices in any previous publication. Classic Industries® makes every effort to honor the prices contained herein. Due to constantly changing costs in raw materials, supply chain issues, and other unforeseen circumstances, pricing on products are subject to change. We reserve the right to change prices without notice. For current pricing, please go to Classicindustries.com, or contact a Classic Industries® sales representative during normal business hours. Eligibility of products for discounts are subject to change without notice.

Trademark and Copyright
Classic Industries® Parts and Accessories catalog is copyrighted. No part of this publication including text, photos or illustrations may be reproduced without the prior written permission of Classic Industries®. The following names and/or symbols: *Mopar, Dodge, Plymouth, Barracuda, Belvedere, Coronet, Challenger, Charger, 'Cuda, Dart, Duster, Fury, GTX, Hemi, Polara, Road Runner, Six Pack, Super Bee, Scamp, Valiant* are registered trademarks of Chrysler Group, LLC and are used for reference purposes only unless specified otherwise.

Product Availability
Availability of all items in this catalog are subject to change without notice. We reserve the right to discontinue products, services or accessories without notice.

Shortages
Always check the contents of your delivery to assure all the parts ordered were received. If you are missing any item(s) be sure to check for back orders notated on your invoice before calling our customer service department *(see back orders)*. If a shortage has occurred, contact our customer service department within 2 working days of delivery to assure a prompt replacement. Classic Industries® assumes no liability after this period.

Shipping Information

ALASKA, HAWAII, GUAM & PUERTO RICO

Orders being shipped to Alaska, Hawaii, Guam or Puerto Rico, are shipped via Ground, Overnight or 2-Day delivery whenever possible. All orders must be prepaid with credit card, money order, or check. No COD orders are accepted. Rates depend on the items being shipped. Contact our sales department for exact rates.

Important: Promotional shipping offers do not apply to Alaska, Hawaii, Guam, Puerto Rico, Canada or any foreign destination.

APO/FPO

Parcel post is the only means of shipping to an APO or FPO address. Due to size restrictions the maximum shipping box can be no larger than 72" width and girth combined. All military personnel must write or call to determine what size box will be used for the shipment. Once this is determined, Classic Industries® will call or write to let you know if the order can be shipped by Parcel Post, and the correct amount required. All orders that exceed these limitations will be shipped in accordance with customer approval.

INSURANCE

Each order is charged an insurance fee of $3.50. This fee will insure the entire order and protect you completely from damages or loss. The order forms located in the rear of this catalog include this fee in the indicated column when your order is being totaled.

COD ORDERS

COD orders are gladly accepted on all normal ground shipments, excluding truck freight orders. COD orders will require cash only upon delivery of your order. All COD orders are shipped by FedEx. Personal checks, business checks, money orders and certified checks are not accepted. COD orders are not accepted through the mail. COD orders must be placed by phone during regular business hours. The appropriate shipping fees will be added. COD orders are exempt from discounts and free shipping promotion. The customer will pay all appropriate fees in accordance with current policies and freight rates. A fee of $11.95 per box will be added to all COD orders. Oversize and/or overweight boxes will be charged in accordance with the rate chart located on the order blank. Classic Industries® reserves the right to change shipping rates in accordance with rate increases by freight companies. COD orders are limited to $999.00. If the COD order should be returned to Classic Industries® for non-acceptance/ non payment, the customer will be responsible to reimburse Classic Industries® for any and all freight charges related to the order. In addition, a 25% restocking fee will be applied to the returned products. All outstanding charges must be paid before any additional orders will be accepted.

SPECIAL RATE SHIPPING FEES/DROP SHIP FEES

Some items we offer may require a mandatory shipping or drop ship fee. This fee may also apply to products sold over the counter at Classic Industries® Showroom location. Contact our sales department for actual additional shipping fees.

Important: Products with special rate shipping fees or drop ship fees are excluded from promotional shipping offers.

EXPRESS SHIPPING

Classic Industries® offers Overnight and 2-Day air delivery service in the Continental U.S., Alaska, Hawaii, Guam and Puerto Rico. Pre-payment with a credit card is required before shipments can be sent. Simply call in your order before 2:00 p.m. Pacific Time, Monday-Friday during regular business hours and your Overnight order will arrive the following business day (pending availability). Saturday delivery is available only on Overnight service. A $16.95 fee will be added to Overnight fees for Saturday delivery. 2-Day orders will arrive within 2 business days (pending availability). 3-Day service is available within the contiguous 48 states. Your order will usually leave within 24 hours and will arrive within 3 business days of ship date (pending availability). A $9.95 service fee for any of these options will be added in addition to shipping fees. Contact our sales department for rates regarding air service delivery. Rates depend on the items being shipped. Some products are charged at dimensional weight as opposed to actual weight.

Important: Air service does not guarantee your order will arrive on the expected date of delivery. Under normal circumstances, air service is guaranteed. However, due to adverse weather conditions, natural disasters or unforeseen circumstances, there may be delays. Classic Industries® is not responsible for deliveries that are delayed. Air service orders are excluded from promotional shipping offers.

TRUCK FREIGHT

Products in this catalog that require truck freight are typically indicated with a "Truck Freight" icon. This indicates that the product is too large for ground delivery and must be shipped by motor freight. There may be items listed herein that are not indicated as truck freight. These items must be prepaid, including freight charges, before the shipment can be sent. Truck freight rates may vary depending on products being ordered, fuel surcharges, and the shipping destination. Residential deliveries require an additional fee assessed by the carrier due to the additional coordination and transit outside of normal routes. Some Truck Freight shipments may require special handling (e.g., lift gate service, re-routing, additional freight charges, etc.). Acceptance of truck freight shipment, rate and applicable fees is acknowledged at time of order. For additional information visit us online at help.classicindustries.com or contact our customer service department during regular business hours.

OVERSIZE-OVERWEIGHT

These are the designations for Ground or Standard packages that meet one of the following specifications for billing purposes: Oversize 1 (OS1) designates a combined length and girth exceeding 84", but less than 108". Actual weight is less than 30 lbs. and is billed at 30 lbs. Oversize 2 (OS2) designates a combined length and girth exceeding 108" but less than 130". Actual weight is less than 70 lbs. and is billed at 70 lbs. Oversize 3 (OS3) designates a combined length and girth exceeding 130" but less than 165". A handling fee will be added to all (OS3) orders. Overweight 1, 2, and 3 designates actual weight is less than 90 lbs. and is billed at >90 lbs. as appropriate. We reserve the right to charge Oversize and Overweight fees on any order containing oversize and overweight products, even if it is not indicated in the catalog. For additional information visit us online at help.classicindustries.com or contact our customer service department during regular business hours.

FOB WAREHOUSE – "FREE ON-BOARD"

All Classic Industries® orders are shipped based on FOB Warehouse. Unless otherwise specified, Classic Industries® is not responsible for freight charges, shipping charges, or damages once the shipment leaves our warehouse.

General Information

Back Orders

The invoice located in the packing slip of your order will notate any items that were out of stock at the time of shipping. The unavailable items will be back ordered unless otherwise specified on your order form or verbally to a sales representative when placing your order by phone. Back orders are usually shipped when the products arrive at our warehouse without prior notification. Classic Industries® will make an effort to contact the customer if the backorder is more than 90 days old. If you wish to cancel a back order, please notify our customer service department immediately. The customer will be responsible for a 25% restocking fee and freight charges if the back order is cancelled or returned after the items are shipped.

Damage Claims

Always check the contents of your shipment in the presence of the person delivering the merchandise. Should any damage occur, immediately notify Classic Industries® customer service dept. so that all steps necessary will be taken to ensure a prompt replacement of any damaged goods. Accurate instructions will be given on damaged goods replacement. Classic Industries® is not responsible if no notification is given within 2 working days of receipt of goods (excluding Sundays and Holidays). Classic Industries® will file a claim with the carrier in most cases. If the customer files a claim with the carrier, Classic Industries® will not be responsible for replacing damaged products and the customer will be responsible to pay for any replacements until the carrier pays the claim. Any replacement parts due to sales errors or customer errors in ordering will be sent using the same shipping method as the original order when possible. Please follow these instructions to avoid any problems or misunderstandings associated with damaged products and freight claims.

Refusals

All refused COD orders will be subject to a 25% restocking fee. Classic Industries® will consider the entire order cancelled and void with no notification to the customer. The customer will be billed 25% plus all freight charges to and from the destination. Contact our customer service department for more information.

Policies

All policies in Classic Industries® current catalog supersede any and all policies in any previous catalog or publication.

Sales Errors/Ordering Errors

Classic Industries® is not responsible for customer errors or employee sales errors. Every effort is made to insure that the products you are ordering are accurate. Should an error occur, we will make every effort to resolve the issue. Replacement products will be shipped the same method as the original order whenever possible. Classic Industries® assumes no responsibility or liability for damages, fees, storage charges, or any other inconvenience that may be associated with sales errors or customer ordering errors.

Returns

Products may be returned for a full refund on the product, credit or exchange within 30 days of receipt. All returns are subject to a 25% restocking fee after 30 days. Should you need to return a part for refund, exchange or credit, please contact our customer service department for a return authorization number and instructions. Classic Industries® will not accept returned goods without prior authorization. Customer will pay freight on all return orders. Allow up to 3 weeks to process refund or credit.

Important: Gift certificates have no cash value and must be redeemed for merchandise only. Literature, CDs, videos, printed materials, stencil kits, stripes, electrical parts, gauges, wiring harnesses, switches, etc. are non-returnable. All special order products must be prepaid in full and are non-returnable. No returns on partial kits or sets. There is no guarantee on moving parts such as engines, transmissions, rear ends, steering gears, water pumps, distributors, wiper motors, etc. If any product is modified, altered, painted, installed or disassembled in any way without Classic Industries® expressed written permission, the item is non-returnable. Classic Industries® always recommends professional installation on all products. Any item which has been altered, painted, installed or deemed non-resalable by Classic Industries® will be returned to the customer at the customers expense. Classic Industries® is not responsible or liable for labor fees associated with the installation, removal, modification, painting or repair of any product purchased regardless of the circumstances. Classic Industries® is not responsible for any damage or discoloration incurred in relation to chemical products being used including cleaners, waxes, polishes, paints, etc.

OER AUTHORIZED

1968-72 Quarter Panel Skin

Reproduction quarter panel skin for 1968-72 Chevy II/Nova models. The skin extends to the top crease of the original quarter panel and is cut so it extends from the door jamb to the bumper area and includes precut side marker openings. The panel offers a good fit, will install with minimal refitting and will allow application of the wheel opening moldings. Each panel requires welding for installation. Professional installation is recommended to ensure proper fit.

Pickup Layers of Dust with One Sweep!

An easy way of keeping your vehicle clean and free of dust, looking like it was just washed. It's specially treated cotton fibers lift dust off the surface without scratching the paint, even delicate lacquers. The more you use it, the better it works! Regular use can significantly reduce the frequency of washings.

FREE Lock Kit and Storage Bag With Car Cover Purchase A $20.00 Value!

OER AUTHORIZED WeatherBlocker™ Plus

Available in Gray or Tan

Soft cotton lining for protection against door dings and scratches.

Outdoor Use
Four Layer Material

Designed for outdoor use, OER's WeatherBlocker Plus covers are manufactured using a durable 4 layer non-woven material that provides a high level or protection from the elements and features a soft cotton backing which helps protect against scratches and dings. Each cover is sewn with double-stitched seams to add strength and durability to the cover and Neoprene elastic is sewn into the front and rear hems to help secure the cover. Breathable and lightweight, WeatherBlocker Plus covers offer excellent water resistance and protection from the sun's UV rays. Covers feature mirror pockets on both sides of the cover when applicable and non-scratch grommets have been installed onto each side of the cover to allow the use of a tie strap or lock. Specify gray or tan.

Note: Please add 2 digit color code when ordering.
