

Fuel Tank Replacements

OE AUTHORIZED

These reproduction fuel tanks are manufactured to factory specifications from stamped steel and are available in a variety of finishes to suit your build. Basic zinc coated steel tanks are a great value, offering strong corrosion resistance at a reasonable price. Ni-terne steel tanks provide an OE quality appearance for discerning restorers. For show quality builds, stainless steel tanks offer superior corrosion resistance with a spectacular polished finish.

Aluminum Fuel Tank ⚠

Featuring an all new design, this baffled aluminum fuel tank is a high capacity replacement for the factory fuel tank. This fuel tank mounts to the frame and not the trunk floor, allowing for a firm anchor point and also retains use of the factory spare tire well. Our newly redesigned aluminum gas tanks fit between the frame rails, are fully baffled and have an internal fuel trap. They can run an internal or external fuel pump, there is an extra fuel port into the fuel trap so they work great either with carburetor or with fuel injection. Tank measures 28" x 34" x 9-1/2" and includes frame mount cross bar, fuel filler hose, and hardware. Requires use of screw-on style sender part #TF500021 sold separately (compatible with your factory fuel gauge).

Important: Will not work on wagon models. Some drilling to the frame is required. Some vehicles with a 1 piece filler tube may need to shorten the filler tube for the filler hose.

Note: *For aftermarket non-factory style fuel tank. Shipped double oversize.

1955-57 Stainless Steel Fuel Tank ⚠

Direct replacement stainless steel fuel tanks for 1955-57 models. Hand formed from 304 grade stainless steel and TIG welded construction. Features a unique baffle system that controls fuel slosh. All tanks include stainless steel mounting straps and hardware and feature a brushed finish for easy upkeep. Tanks accept any aftermarket sending unit (sold separately). Fuel tanks for carbureted engines feature 3/8" NPT fuel supply. Fuel tanks for fuel injected engines include in-tank fuel pump already installed and feature -6 AN supply and return. In-tank fuel pump is rated at 13.5 Volts, 51 psi and will flow 41 gph.

Note: 22 gallon fuel tanks fit seamed and seamless frames, except narrowed frames. Shipped double oversize.

Fuel Tank Replacements

Features:

- Tank is coated galvanized steel then powder coated silver for total corrosion protection
- NPT Supply and Return line ports for easy fuel line connection and a barbed vent fitting
- Fuel level sender included with the correct Ohm range for your factory gauges
- Fits and looks like an OE tank when installed

EFI Conversion Fuel Tank with Fuel Pump

Holley and Sniper are here to help you to complete your EFI swap with new EFI conversion fuel tanks. Each tank is a direct fit for your application no modifications necessary. The kit includes the tank, a 255 lph fuel pump, internal baffling, a correct Ohm range fuel level sender, and the filler neck. The tank is powder coated for corrosion resistance and great looks. These tank kits are a complete solution for your EFI project!

Note: Not for wagon models. Shipped double oversize.

Emissions Note: (3) Non-CARB compliant (not legal for emission controlled vehicles).

Gold Standard Fuel Tank Sealer Set

Our 3 step fuel tank sealer set contains almost everything you might need to seal a tank of up to 25 gallons. The Gold Standard Tank Sealer is specifically formulated to stop rust and corrosion by forming a tough, fuel impervious coating while simultaneously sealing small pinholes and weld seams. The prep products are formulated to extend storage times by leaving a zinc phosphate film that prevents rust until you have a chance to seal the tank with the sealer. Complete set and individual items available.

3 Step Fuel Tank Sealer Set

Buy our fuel tank sealer set and save! Each fuel tank sealer set includes: 2 quarts of Klean (a water based, heavy-duty, cleaner/degreaser), 1 quart RustBlast (a powerful rust remover/metal etch), 1 quart Gold Standard Tank Sealer, gloves, instructions, and a stir stick.

Driven Carb Defender

Driven Carb Defender Fuel Additive has been formulated to protect against harmful ethanol deposits and corrosion in fuel and the induction system. Special inhibitors resist expensive damage and reduced performance from moisture accumulation from modern ethanol blended gasoline. This additive controls combustion chamber residue, cleaning and protecting fuel system and intake tract surfaces to keep carburetors functioning properly. Carb Defender is ideal for everyday drivers or classics that spend time in storage between cruises and special events. One bottle treats up to 25 gallons of ethanol blended fuel.

Fuel Pump Mounting Gasket

The genuine gasket mounts between the fuel pump and the engine block providing an air and water tight seal for the fuel pump. For use with small block or big block models.

G6993 all with mechanical pump 2.99 ea

PROFORM

Bow Tie Fuel Pump Block Off Plate

The Bow Tie never goes out of style and neither do these official Chevrolet chrome block off plates. Covers the hole on engine where fuel pump normally goes when using an electric fuel pump. Available for big blocks and small blocks. Includes a non-asbestos gasket.

D141210 small block 11.99 ea

1955-90 Fuel Pump Mounting Plate

gm

This plate is used to cover the large access area for the fuel pump pushrod, and provides a mounting surface for the fuel pump on 1955-57 V8 small block engines, or 348 and 409 engines. Features: 1 pump arm opening and 4 mounting holes.

Emissions Note: ③ Non-CARB compliant (not legal for emission controlled vehicles).

R2310 1955-90 6.99 ea

Fuel Pump Mounting Set

These are chrome-plated or stainless steel Hex head bolts for small block or big block fuel pumps. Includes a complete set for installation of one fuel pump.

AK116A polished chrome 11.99 set
AK116B polished stainless 19.99 set

Fuel Pump Mounting Hardware Set

Make sure that mechanical fuel pumps stay properly aligned by using ARP's durable black oxide finished chromoly or rustproof stainless bolts (both materials are rated at 170,000 psi and considerably stronger than Grade 8 hardware). Your choice of either conventional Hex heads or 12 point head. Washers are included.

AR13162 black oxide Hex head ... 7.99 set
AR13161 black oxide 12 point 8.99 set
AR43162 stainless Hex head ... 9.99 set
AR43161 stainless 12 point 9.99 set

D - Bow Tie G - 350

Small Block Fuel Pump Bolt Set

Dress-up your Impala with these one of a kind dress-up bolt sets. The Chevrolet Bow Tie or 350 logo is stamped directly onto the head of the bolts. They are available in decorative chrome-plated or polished stainless steel versions. Each 4 piece set includes fuel pump and mounting plate bolts. Washers not included.

Note: Specify logo suffix: D-Bow Tie, G-350 logo.

E1791

Quiet-Flo Electric Fuel Pump

State-of-the-art electric fuel pumps offer maximum performance in a compact package for carbureted applications. Anodized aluminum housing and high-quality internals make it both strong and extremely durable. The E1791 electric fuel pump is factory set to 6.5 psi does not require a regulator. 3/8" inlet/outlet, 120 gph free flow, up to 600 HP. The E1792 electric fuel pump is preset to 12 psi and requires an external regulator. 1/2" inlet-outlet, 160 gph free flow, up to 1000 HP.

Important: For proper installation and voltage requirements, use fuel pump relay E1795.

E1791	6.5 psi.....	280.99 ea
E1792	12 psi.....	284.99 ea

Quiet-Flo Electric Fuel Pump

This anodized aluminum EFI fuel pump offers maximum performance in a compact package. The in-line design keeps the pump motor and components cool even under harsh conditions. Features -10AN inlet/outlet with a flow rate of up to 80 gph at 45 psi for high HP fuel injected applications. This fuel pump supports 835 HP at 12 Volts with a current draw of 12 amps at 45 psi. 10AN inlet/outlet 80 gph at 45 psi.

Important: Dimensions: 6-7/8" x 3-1/4".

E1790	798.99 ea
-------	-----------

In-Line Electric Fuel Pump

This in-line electric fuel pump is continuous duty rated and is ideal for EFI applications that require additional pumping capabilities for upgraded modifications. Works superbly as either an in-line booster pump or as a stand alone unit. Use with EFI regulator part #E1728 for adjustability from 35 to 90 psi. 57 gph, 3/8" hose barb fittings. Includes mounting bracket and 3/8" hose barb fittings.

E3594	307.99 ea
-------	-----------

Features:

- Solid-state worry free electronics
- Internal pressure regulating
- Universal design allows for easy installation
- No diaphragms or mechanical parts to wear out
- Hose barbs fit 5/16" fuel hose

Micro Electric Fuel Pump

This compact electric fuel pump features a solid state design that has a low current draw of around one amp and makes a good stand alone pump or booster pump. Designed for carbureted vehicles with a 12 Volt negative ground electrical system, this pump supports 4-7 psi at up to 35 gph. Includes: fittings, mounting hardware and instructions.

Note: Not for diesel applications.

71211	55.99 ea

H12880 6AN inlet/outlet 168.99 ea

AEROMOTIVE

EFI Bypass Regulator

Performance EFI regulator designed for medium to high horsepower applications. This regulator features Aeromotive's high flow design, superb pressure control and legendary durability. Features base pressure adjustable from 40-75 psi, gasoline and alcohol compatible, fuel pressure rises on a 1:1 ratio with boost, 1/8" National Pipe Thread taper (NPT) gauge port. Includes 2 o-ring boss fittings (ORB-06) inlet ports and 1 o-ring boss fitting (ORB-06) return port.

Emissions Note: (3) Non-CARB compliant (not legal for emission controlled vehicles).

A9713109 adjustable with EFI..... 216.99 ea

Universal Bypass Regulator

AEROMOTIVE

A dual purpose, universal regulator for EFI or for Carbureted street/strip applications. Features pressure adjustable from 3 to 20 psi with standard spring, (installed) or from 20 to 60 psi with high pressure spring (included). Offers the full flow and rock steady fuel pressure that only a dynamic, Aeromotive bypass regulator provides. Capable of regulating any fuel pump between 100 and 250 gph, fuel pressure rises on a 1:1 ratio when referencing boost. All ports are 3/8" National Pipe Thread taper (NPT), with one inlet and three outlets on the main body and one return port on the bottom. Bypass design provides the ultimate, dynamic fuel pressure control.

Note: Requires a return line to be installed from the bottom of the regulator to the top of the tank.

Emissions Note: (3) Non-CARB compliant (not legal for emission controlled vehicles).

3 Port 3/8" NPT

A9713301 216.99 ea

AEROMOTIVE

Carbureted Bypass Regulator

For use when converting from fuel injection to carburetion using the EFI pump in a carbureted application. Perfect for naturally aspirated or 'blow-through' supercharged engines. Features base fuel pressure adjustable from 3-15 psi, 1 o-ring boss fitting (ORB-10) inlet port and 1 o-ring boss fitting (ORB-08) return port, fuel pressure rises on a 1:1 ratio when referencing boost, bypass design provides the ultimate, dynamic fuel delivery system, ideal for converting from fuel injection to carburetion using the stock, in-tank pump. EFI conversions will require a larger than stock return line for proper low pressure control. Includes two o-ring boss fittings (ORB-06) outlet ports and 1/8" National Pipe Thread taper (NPT) gauge port.

Note: Requires Army/Navy fitting (AN-08) return line from bottom of regulator back to top of the tank.

Emissions Note: (3) Non-CARB compliant (not legal for emission controlled vehicles).

A9713204 2 port 226.99 ea

Fuel Pump Safety Switch

This safety feature is a must have for any electric fuel pump vehicle. This safety switch monitors the tach signal to limit when an electric pump can operate. When the key is first turned on, the fuel pump is allowed to run for three seconds, priming the fuel system. After that, it only operates if the engine is running. If the engine stops, so does the fuel pump. No plumbing into the oil lines or no extra priming button under the dash is required.

RE12003 64.99 ea

77872

Fuel Pump Safety Switch

This fuel pump safety switch shuts off fuel flow whenever oil pressure drops below 15 psi. This adds a safety factor in case of an accident or engine stall. Designed for 12 Volt electrical systems and can be tied into the oil pressure sending unit with an 1/8" NPT tee.

77872 36.99 ea

Edelbrock

Fuel Pump Relay

This universal fuel pump relay will ensure proper wiring which reduces the risk of damaging the fuel pump, and offers consistent fuel pressure. This relay is used with fuel pump part #E1791 or #E1792.

E1795 universal relay 79.99 ea

Performance Carburetors

Thunder Series Carburetor

Edelbrock Thunder Series carburetors share all the performance advantages of the popular Performer Series but with innovative new features.

E1906

These carburetors include all of the performance features of the Performer Series carburetors and also include distinctive black hardware, dual fuel inlets (shipped with left side plugged), lightweight ball burnished and CNC profiled body, and the Quick-Tune secondary. They're available in 650 cfm and 800 cfm sizes with manual or electric choke. There's even a 650 cfm version specifically designed for off-road vehicles. These Edelbrock carburetors bolt-on and run right out of the box! Simply dependable, proven performance for almost any carbureted vehicle. All Edelbrock carburetors include an installation kit and owners manual.

Emissions Note: * ③ Non-CARB compliant (not legal for emission controlled vehicles).

Performer Series Carburetor

By design, Performer Series square bore carburetors are refined to provide the widest possible torque range when matched

E1405

with Edelbrock Performer, Performer RPM, RPM Air Gap or Torker II manifold and camshaft combinations. However, these carburetors are not limited to these applications, they also match well with most stock and other manifolds of similar design. Performer Series square bore carburetors are all aluminum, ball burnished and lightweight. There are no power valves to blow out or plastic parts to break. The 2 piece construction resists warping and the metering rods can be changed in seconds without removing the carburetor. All Edelbrock carburetors come with an installation kit and owners manual.

Emissions Note: * ① CARB EO compliant (50 states legal). ** ③ Non-CARB compliant (not legal for emission controlled vehicles). † Black power coated.

750 CFM Carb Main Body

Direct replacement components to turn a street carburetor into a high-performance carb: get that extra performance out of your ride in less than 30 minutes! Add up to 25-50 HP with PROFORM's 100% new, high-performance carburetor main body (no re-built components). Easy swap-in, swap-out installation utilizing existing metering blocks, fuel bowls, and baseplate. Involves only 14 screws. Has adjustable screw-in air bleeds, high-performance down-leg boosters. Get maximum air flow with no air horn, choke tower, or choke control. Includes: instructions, all necessary non-stick replacement gaskets, and high-performance jet kit.

Note: Main body does not retain vacuum advance port in original metering block.

Emissions Note: ③ Non-CARB compliant (not legal for emission controlled vehicles).

New!

Race Series Carburetor

Edelbrock VRS-4150 race and performance carburetors are street friendly but race ready. The 3.75" tall cast aluminum main body fits all 4150 and 4500 carb flange manifolds without requiring an adapter plate. Multiple vacuum hook ups keep this carburetor usable on the street but still ready for the track with larger capacity fuel bowls and four circuit billet metering blocks. The floats have corner cuts to avoid shutting off the fuel flow during hard cornering, and jet extender notches and jet extenders in the rear to keep the jets covered in fuel under hard acceleration. The advanced idle circuit features interchangeable idle discharge jets in all four corners to allow for a smooth, clean idle with the use of big, low vacuum camshafts.

Emissions Note: Ⓢ Non-CARB compliant (not legal for emission controlled vehicles).

We offer billet aluminum or chromed copper fuel lines for Holley carburetors. Billet Aluminum line is an adjustable line for Holley 4150 or 4500 carburetors. It is manufactured with a -8 AN inlet and 3/8" NPT port at the rear with 7/8"-20 threads for the fuel ball inlets. The chromed hard lines are manufactured with seamless copper tubing and are double flared at the ends with 5/8"-18 inverted flare inlets that measure 9-1/4" center to center.

1957 Single Quad Carburetor Choke Cover

Reproduction carburetor choke cover for 1957 models.

TF700511 1957..... 59.99 ea

1957 Carburetor Complete Choke Assembly

To provide the rich fuel mixture required to sustain operation at low engine temperatures, a choke is used to restrict the flow of air at the entrance to the carburetor, before the venturi. With this restriction, extra vacuum is developed in the carburetor barrel, which pulls extra fuel through the main metering system to supplement the fuel being pulled from the idle and off idle circuits. This complete choke assembly includes 170AB238S choke cap set (see part #TF700490). Choke cap made from thermoplastic as original.

MADE IN USA

Universal Throttle Cable

All Lokar throttle cables are designed with a specially extruded liner to extend the life of the cable. Cables are equipped with aluminum fittings and aluminum ferrule to eliminate fraying. These cut-to-fit cables are available in 24", 36", or 48" lengths with a stainless steel inner wire, and your choice of a stainless steel, black stainless steel, or black nylon housing. Clevis is designed to eliminate cotter pins and set screws. Includes installation instructions.

Important: Remember to pull inner wire out before cutting outer housing.

Note: For 1986-93 EFI use TC10024.

Duo-Pak Throttle Cable Set

Lokar Duo-Pak throttle cable sets will easily adapt to most gas pedals and throttle assemblies. Sets feature Lokar's Hi-Tech throttle cable, stainless steel carburetor bracket, and return spring kit. Cables designed with aluminum fittings and aluminum ferrules to eliminate fraying and feature a "U-Cut-to-Fit" stainless inner wire and outer housing. Available in your choice of stainless steel, black stainless steel, or black nylon.

Note: Duo-Pak only available for carbureted applications with Holley, Edelbrock, AFB, Quadrajet and In-Line Dual Quad carbs.

Throttle Cable Bracket

Lokar throttle cable brackets are available for a variety of different motors including carbureted setups, LS1, Ram Jet 350, 502, and more. Finishes include stainless steel, black stainless steel, and billet aluminum were available. Carburetor brackets only fit Holley, Edelbrock, AFB, Quadrajet, Demon, and In-line Dual Quad carbs and mounts to the rear. Brackets for Tuned Port Injection are available with a single hole stud for throttle only, a dual hole stud for throttle and kickdown, and a triple hole stud for a throttle, kickdown and cruise control cables. Made in USA.

Important: Ram Jet 350 uses LS1 throttle cable TC30036 or TC30048.

Note: *Cruise control bracket set only.

In-Tank Pump Set ⚠

In-Tank Pump modules can be used on tanks with a depth of 6" to 15". The two fuel ports are threaded to accept -6 AN O-ring boss fittings for a secure, leak-free connection. An In-Tank 340 LPH pump is included along with gaskets, terminals, and clamps.

FF50015 In-Tank 244.99 set

Inline Pump Set ⚠

The Go EFI Inline frame mount fuel delivery set is supplied with our heavy-duty 255 LPH external fuel pump that is suitable to support engines producing up to 600 horsepower. Set includes: 40 feet of high pressure fuel hose, 2 fuel filters including a serviceable 10-micron filter, fittings, mounts, and clamps.

FF50001 Inline Pump 297.99 set

Force Fuel Mini Pump Set ⚠

The compact design of the new Mini Force Fuel fits easily under the hoods of street rods and smaller engine compartments. The reservoir of the Mini is equipped with an efficient 255-LPH pump and internal regulator to deliver a consistent 58-psi of fuel pressure for your EFI system. Supplied with high pressure fuel hose, AN fittings, return line fitting bung and liquid filled gauge

FF50006 Force Fuel Mini..... 479.99 set

Force Fuel Pump Set ⚠

The Force Fuel System mounts under the hood and is fed with the original mechanical or electric fuel pump then supplies the EFI system with the required high pressure through the use of an internal 340 LPH pump. Set includes: 5' of high pressure fuel hose, 10-micron fuel filter, AN fittings, return line fitting bung, and liquid filled gauge.

Chevrolet Headers

1955-57 Patriot Headers

These headers accommodate the GM 605 power steering box conversion and fit most motor mounts. Extra ground clearance makes "slammed" vehicles driveable and above frame rail exhaust system installation easy. Available in raw finish for individual customizing or with Patriot's metallic ceramic coating. Unlike paint or chrome, metallic ceramic coating is easy to keep clean, resist rust and corrosion and will not discolor. Metallic ceramic coating also reduces underhood temperatures. All Patriot headers include installation hardware, collector reducers, gaskets, and instructions.

Note: Be sure to read the important notes listed on the bottom of this page pertaining to each header system for correct application. Shipped oversize.

Emissions Note: ③ Non-CARB compliant (not legal for emission controlled vehicles).

Patriot Header Notes

- Does not fit angle plug heads.
- Fits with stock or 605 steering boxes, aftermarket side engine mounts and rear trans crossmember.
- Fender well exit.
- Shorty design for maximum ground clearance.
- Universal block hugger design.
- May require smaller front tires to avoid contact.
- 1955-57 Chevy applications require alteration of emergency brake rod.
- Can be used with most oil filter systems or transmission and starter combination.
- Fits most angle plug heads.
- Check motor mount position before ordering.
- Will not fit if engine is more than 3/4" forward for HEI firewall clearance.
- Fits D-Port cylinder heads including ZZ4 crate engines.
- Fits standard deck big blocks only.
- Fits with manual and auto trans floor shifts only.
- Will not work with 168 tooth flywheels or kick out aftermarket starters.
- Fits with either 3/4" forward or stock location side mounts, rear transmission mount or equivalent and stock or 605 steering box. Stock mid-mount and ears

on the frame must be removed.

- O2 bungs are welded on both collectors.
- Will fit most angle plug heads including factory Chevrolet "Bow Tie" heads.
- Original bellhousing frame mounts must be removed.
- Requires use of Street & Performance (or equivalent) billet aluminum adaptors, along with D & P classics (or equivalent) Chevy frame stands.
- LS1/LS6 engines require the use of a LS1 oil pan for proper header fit.
- Will fit with 605 power steering box.
- Header is designed to fit cars using original V8 pitman arm not 6 cylinder pitman arm. Aftermarket pitman arms must be same as OE for proper header fit.
- Designed to fit with Maval/Unisteer rack and pinion steering systems.
- Will not fit manual transmission vehicles with factory Z bar clutch linkage.

Patriot Emission Notes

- Legal only for off-highway use (except in California or states that have adopted California emission standards), racing use or for use on pre-emission controlled motor vehicles/motor vehicle engines (pre-1974 domestic vehicles certified to California standards, pre-1974 domestic vehicles certified to federal standards and all pre-1974 foreign vehicles), per the manufacturer's application guide.

Fenton 6 Cylinder Headers

Classic Fenton high-performance headers are here. These quality cast iron headers split single 6 cylinder exhaust systems into a high flow, high-performance dual exhaust system. Fits all 1937-62 Chevrolet 6 cylinder 216, 235, and 261 cid engines.

Chevrolet Headers

1955-57 Hedman Hedders™

Classic Industries® stocks a full line of Hedman Hedders™ for 1955-57 Chevrolet passenger car models. These units are designed to replace the heavy and restrictive factory manifolds with tubular steel headers. Hedman Hedders™ are not only lighter, but will also increase your Chevrolet's performance. Tork-Step headers feature an innovative design that allows for and increased overall torque curve. Sets are complete and ready to bolt-on. Includes collector and header to head gaskets, collectors, and bolts. Get more performance from your Chevrolet without breaking the bank and do it with a name you can trust in the header business "Hedman™".

Note: Available in black. Be sure to read the important notes listed on the bottom of this page pertaining to each header system for correct application. Shipped oversize.

Emissions Note: ③ Non-CARB compliant (not legal for emission controlled vehicles).

Hedman Hedder Notes

- 1) Without smog injection or injection heads.
- 3) Front motor mounts only.
- 6) Modification to stock exhaust required to retain catalytic converter.
- 15) Shortie Hedder (Max. ground clearance).
- 25) Engine swap, all parts must be factory stock.
- 103) Will fit with angle plug heads - Chevrolet aluminum only.

- 208) Due to aluminum cylinder heads on GEN VI engines, 502 BB Chevy will have clearance problems on some applications. Bottom of header flanges may hit head bolts. Notching may be necessary.

Hedman Hedder Emissions Notes

- C) For vehicles 1964 through 1974 without A.I.R. system, considered as OE replacement parts when existing emission controls are not removed from vehicle.

1955-57 Doug's Headers

Header design and development is complex and requires a substantial amount of time and resources to do the job right. Doug's has made that commitment, and their name has become synonymous with quality. There's no compromise at Doug's. Every header is tuned with the proper tube size and length to efficiently remove all the exhaust from each cylinder, reducing pumping losses for dramatic gains in horsepower and torque. Doug's headers are carefully developed on the vehicles they are intended to fit and are checked and rechecked numerous times during the design and manufacturing process. Doug's headers are available for 1955-57 Chevrolet passenger car models with small block or big block V8 engines and console or column shifters as noted. Once you check the heavy-duty 1/2" to 5/8" thick machined and finished header flanges, the smooth mandrel bent tubes, and the attention paid to assembly, you'll want Doug's. Metallic Ceramic Thermal Barrier Coating (MCTBC) is simply the best header finish on the market, and is the standard finish on all Doug's headers. MCTBC protects and extends the life of headers by creating a thermal barrier that significantly lowers underhood temperatures, while protecting substrate metal from thermal fatigue. Doug's finishes their headers with a vibratory finishing process that compresses and activates the coating, significantly increasing surface hardness to produce a coating 60% more corrosion resistant than standard header coating. This coating is easy to maintain and will not change color under normal operating conditions. Once you check the options, you'll buy Doug's.

Note: Be sure to read the important notes listed on the bottom of this page pertaining to each header system for correct application. Shipped oversize.

Emissions Note: ③ Non-CARB compliant (not legal for emission controlled vehicles).

Wedge Locking Header Bolts

Wedge locking header bolts were designed to keep bolts from backing off. These bolts feature special washers with hardened serrated teeth. The washers bite into the bolt head and the top surface of the header. After being self-locked in this manner, any loosening rotation is blocked by a wedge locking action. They are reusable and you can count on them to not fail. Grade 8.

1955-57 Exhaust Manifold Bolt Washer Set

Reproduction stainless steel thick style exhaust manifold washers used on 1955-57 passenger car models. 12 piece set.

EMW001	1955-57	12 piece.....	12.99 set
--------	---------	---------------	-----------

Exhaust Components

10781

Tru-X Pipe

MagnaFlow's stamped X-pipe incorporates a gentler inner radius that allows for better exhaust scavenging, noise cancellation and better balance between cylinder banks. With this design, power is increased while decibel levels are decreased.

Note: For use on vehicle's with headers.

X-Pipe

10781	2-1/2" dual in/out x 9.5" long	146.99 ea
10782	3" dual in/out x 13.2" long.....	153.99 ea

10790

10792

Crossover Pipe

MagnaFlow's stainless steel Tru-X crossover pipe represents a significant leap forward in technology over traditional H-Pipes. The gentler radius allows for better exhaust gas scavenging and noise cancellation

Note: For use on vehicle's with stock exhaust manifolds.

Crossover

10790	2-1/4" dual in/out x 12" long..	131.99 ea

P1065

Tunnel X-Crossover

Since a V8 fires alternately, exhaust exits in pulses rather than a steady flow. While one pipe is filled with pressure the other pipe is relatively pressureless, but connecting the two pipes in a Siamese pattern allows pressure to be equalized between the two tailpipes. This action allows the exhaust to pass through quicker for better breathing that increases horsepower. The Pypes crossover product line is defined by a high-quality, exceptionally versatile design. They are a proven winner when it comes to bumping up the horsepower of your daily driver or race car. Pypes tunnel X-crossover fits 1955-57 Tri-Five models with easy installation. All crossovers are made of 409 stainless steel with dual reinforcement plates at the welds where they are needed most. All pipes are mandrel bent to allow for the maximum flow of exhaust gasses, which boosts acceleration. Limited lifetime warranty.

Important: If using stock, cast iron manifolds, add a set of down pipes to connect your original manifolds to the header back system.

Note: Shipped oversize.

Low Line Lake Pipes... The Look is Back!

Get the retro look with a set of chrome lake pipes on your vehicle! This look was popular in the late 1950's and early 1960's. When setup as a functional feature, it allowed the racer to uncap or "dump" the exhaust for increased exhaust flow when racing. The use of a cap was allowed for quieter operation during street driving. It also provided the vehicle with a lower "lead sled" look. These pipes do not incorporate any silencing materials and are recommended for nonfunctional use only. Choose from three styles – slanted outlet without cap, triple outlet with caps or single outlet with cap. Available in 3 lengths to suit your needs. Chrome pipe measures 2" in diameter. Mounting clamps sold separately.

Note: Shipped oversize.

Tailpipe Expander

Used to remove clamp grooves and round out crushed or bent exhaust pipes to ensure a tight fit, eliminating exhaust leaks. The Hex end allows the use of a combination wrench to remove clamp grooves or small imperfections, or an impact wrench to expand pipes. Imperfections are forced outward rather than forward, eliminating possible damage to component parts. No holding fixture is necessary.

X3442 1-13/16" to 2-1/2" pipes 44.99 ea

Exhaust Repair Kit

Complete Permatex exhaust repair kit for repairing cracks and splits in mufflers tailpipes and exhaust pipes. Withstands temperatures over 1000 degrees F. The kit contains ready to use foil packed bandage and support wire.

S80334 8.99 ea

Oxygen Sensor Fitting

Weld-in oxygen sensor fitting for all fuel injection systems. Fits TBI, TPI, CMFI, LT1, LSX, 5.0L, and most other oxygen sensors.

Important: This part requires welding for installation. Professional installation is recommended.

60406 9.99 ea

Oxygen Sensor Plug

Many headers for late model engines are equipped with a oxygen sensor bung in each header. When retrofitting a carburetor on late model engines, an oxygen sensor is not necessary. This plug seals the oxygen sensor bung on headers and exhaust manifolds. Made from trivalent chromium-plated steel with a M-18 thread size to fit most stainless headers.

Emissions Note: ③ Non-CARB compliant (not legal for emission controlled vehicles).

222734 M-18 thread oxygen sensor plug.. 16.99 ea

Dual Drive Oxygen Sensor Wrench

Tool includes both 1/2" and 3/8" drive. Attach a 1/2" breaker bar on the end of the tool to initially loosen stuck sensors. Use a 3/8" ratchet on the top for fast removal and installation. Fits oxygen sensor applications with a heat shield. Slotted body allows clearance for wire harness. Forged, heat treated steel with six point design will withstand high torque removal applications.

Super 10 Series Muffler

Looking for the most aggressive sound available? Flowmaster's new Super 10 series mufflers are so aggressive, they aren't recommended for street driven vehicles. Best suited to racing applications, these feature the same Delta Flow performance technology used in the highly popular Super 40 and Super 44 series Flowmaster mufflers. Manufactured from durable 409S stainless steel for long-life and offered in a variety of configurations. Backed by a limited lifetime manufacturer's warranty, these short, single chamber mufflers deliver the closest thing to open pipe sound possible. If you want high impact sound, the Super 10 series mufflers are the answer. Measures: 6-1/2" x 9-1/2" x 4".

Note: These mufflers are recommended for off-highway use, not for street driven vehicles.

F42441

40 Series — Original Flowmaster Tone

This is the most “aggressive” sounding street/strip muffler that Flowmaster offers. If you’re looking for attention, this one will get you noticed. The standard 40 series has an “aggressive rumble” and will generally resonate inside the vehicle around 1800-2000 RPM’s, and again at 2400-2600 RPM’s. Constructed of 16 gauge aluminized steel and fully MIG welded for maximum durability.

50 Series Muffler

The SUV/Performance muffler is a larger version of Flowmasters 50 Series Delta Flow muffler and is specially designed for trucks, light SUVs and high horsepower vehicles. The larger H-chamber reduces interior resonance to a minimum. Constructed of 16 gauge aluminized steel and fully MIG welded for maximum durability.

Delta Flow 50 Series

This is the latest design of the 50 series muffler that utilizes Flowmasters patented “Delta Flow” technology along with an “H-Chamber” to eliminate most all interior resonance and still have that famous Flowmaster sound outside the vehicle. Constructed of 16 gauge steel and fully MIG welded for maximum durability.

H3010

The Sound of the Fabulous Fifties! ⚠

The world's oldest performance muffler, a Smithy's glasspack is now available for your full size Chevrolet models! Get the muffler your dad used to impress his friends, and yes, it's still guaranteed not to blow out or leak. Double end cap construction and 3-1/2" hammertone finished cases assure the original Smithy look. A great tone for your fifties or sixties sled.

Screamer Twintronic Muffler ⚠

With the success of QTP's electric cutout they took it to the next level, A dual mode muffler with a single inlet with a dual outlet. One outlet is a straight pipe with a valve at the end on a 360 degree floating flange for total adjust ability. When the valve is open you get the loud and free flowing exhaust system. Close the valve and the exhaust gases are diverted through the muffled section to get the quiet mild mannered sound. This is the only system out there that can give you exactly what you want. Other systems that make the power are loud and drone all the time which gets old. Other systems are on the quieter side, which lacks the power. With all the noise restrictions coming out The Screamer is the only system that gets you the power and sound you desire! All systems are stainless steel for clean look and made in the USA.

MWA High Performance Muffler

The Gibson MWA Muffler delivers maximum sound and the best muffler flow period! This straight-thru design promotes exhaust gases to flow at the highest rates flowing only 3 cfm less than a 3" straight pipe, improving power potential while keeping interior drone to a minimum. The MWA muffler has no internal packing or weak baffles, allowing it to maintain a lightweight design with a unique and powerful sound. The MWA muffler is Made in the USA and is constructed of high-quality stainless steel. When its time to make your Hot Rod or Sport Truck sound and perform as good as it looks, there is no other choice than Gibson's MWA, "Muffler With Attitude".

CFT Superflow Muffler

Gibson's CFT Superflow muffler with Convergent Flow Technology actually tunes your exhaust by using resonance chambers, directional louvered tuning ports and angular induction to draw exhaust gases into the muffler and expel it at a higher velocity. The result is a muffler that doesn't have packing to wear out, yet delivers more power and a performance sound. This muffler features a chambered and louvered core, to ensure no sound degradation overtime, and fully welded solid internal construction. This result delivers more power with a deep tone.

Exhaust Systems

Original Style Exhaust System — Aluminized

OE style aluminized exhaust systems for 1955-57 Chevrolet passenger car models. These original style exhaust systems are manufactured in heavy 16 gauge aluminized steel (mufflers aluminized inside and out) in correct size 23" body for 1955 Chevrolet models and 1955-57 convertibles and 29" body size for 1957 (except convertibles). All systems feature notched tip tailpipes as-original and all exhaust systems are mandrel bent for improved performance and exhaust flow. Each system includes the exhaust header pipes and two header pipe flange gaskets as required.

Important: 1957 exhaust pipes do not have the crossover holes drilled in the pipe. This allows the customer to decide if they want the exhaust to flow through the crossover pipe or not.

Note: Clamp and hanger set sold separately. Special rate shipping charges apply.

Original Style Exhaust System — Stainless Steel

OE style replacement exhaust systems for all 1955-57 Chevrolet passenger car models. Manufactured in 304 grade stainless steel, each replacement exhaust system is designed to closely duplicate and replace the original system. The mufflers are correct size 23" body for 1955 Chevrolet models and 1955-57 convertibles and 29" body size for 1957 (except convertibles). All systems feature notched tip tailpipes as-original and all exhaust systems are mandrel bent for improved performance and exhaust flow. Each system includes header pipes and two header pipe flange gaskets as required.

Important: 1957 exhaust pipes do not have the crossover holes drilled in the pipe. This allows the customer to decide if they want the exhaust to flow through the crossover pipe or not.

Note: Clamp and hanger set sold separately. Special rate shipping charges apply.

Exhaust Systems

1955-57 Tri-Five Crossmember Back Exhaust System

The classic of all classics. You should be proud of it but don't short change the ultimate classic with anything but the ultimate exhaust system. Upgrade your exhaust system! Performance exhaust system for your Chevrolet Tri-Five is a treat for the eyes when you see how easy it is to install, your ears when you fire it up and your ego when you step on the gas. These systems include an X-Pipe or X-Change pipe that has side dumps that you may install electric cutouts for "flip of the switch" convenience, performance matched mufflers or without mufflers, stainless steel hangers, and a set of tailpipes that allow for straight out the back or side exit.

Note: Shipped double oversize.

1955-57 Crossmember Back Performance Exhaust

Every performance mod for your Chevrolet model is designed for one thing. To put more power to the ground! Magnaflow's Chevrolet systems start with mufflers specifically designed with internal paths that ensure fast, equalized exhaust flow so that both sides flow the same. The Crossmember back systems are built with fast flowing mandrel bent stainless steel tubing that feature Magnaflow's Tru-X crossover pipe. Plus, Magnaflow's wide open performance mufflers outflow OEM chamber style mufflers by as much as 167%, all of which reduces engine heat and back pressure and improves exhaust scavenging from the combustion chamber for much stronger performance. These complete systems minimize the power robbing effects of the OEM system to maximize torque and horsepower from the engine. These exhaust systems offer multiple exit options. Magnaflow is the wide open performance muffler with a smooth, deep tone!

Performance Exhaust

Universal Dual Electric Cutout Set

The optional electric exhaust cutouts make uncorking your exhaust as easy as flipping a switch. Electric cutout set includes: 2 valves, wire harness, switch, mounting hardware, and 2 gaskets. Limited lifetime warranty. Available with or without Y-pipes. Made in USA.

Note: *Connects to any 2-1/2" exhaust with a straight section of approximately 12" in length and enough clearance for the motor/valve assemblies.

For use with 2-1/2" or 3" Y-Pipes (Dump Legs)
P1074 cutout set only 428.99 set
Includes 2-1/2" Y-Pipes (Dump Legs)
P1074K* cutout set with Y-pipes 550.99 set

Stainless Steel Electric Cutout

These cutouts feature a rugged 12 Volt DC motor and rotating gate for a leak proof seal every time the cutout is opened and closed. When fully opened, these cutouts do not create exhaust flow obstructions that can create a leaky gasket sound, unlike butterfly style cutouts. A pre-wired harness with an illuminated rocker switch is supplied for easy installation. Uncork your exhaust with the flip of a switch from your dash. The cutouts are ideal for race tracks that don't require mufflers. Available individually, in pairs, or in complete kits with Y-Pipes for easy installation. Made in USA.

Important: Not recommended for vehicles equipped with catalytic converters.

Electric Exhaust Cutout

Don't crawl under your vehicle to uncork your exhaust ever again by switching to electric cutouts. Keep them closed and quiet for the street, wide open for the strip, or anywhere in between with the flip of a switch. You control the volume and the power! Available in sizes 2-1/4" to 4" and a low profile oval design for applications with limited ground clearance. Fits 2-1/4" to 3" round exhaust pipe. Built with high-quality materials CNC 6061 aluminum body and motor plate, stainless steel shaft and butterfly plate, high torque DC gear driven motor, weather tight wiring connectors, and custom illuminated toggle switch.

Note: Match valve size with cutout size for optimal fit and performance.

Xtreme Temperature Coating

XTC is a high temperature/heat resistant coating formulated specifically to protect metal surfaces operating at temperatures from 500 to 1500 degrees F. With proper preparation, XTC provides outstanding adhesion, film integrity, weathering, and thermal shock resistance throughout this entire temperature range, and is guaranteed not to burn off! Available in your choice of a wide variety of colors and sizes.

Note: 8 oz. will coat approximately 3 sets of automotive exhaust manifolds with 2 coats or coat a set of shorty headers with 2 coats. Pints will coat a set of full size headers with 2 coats or coat a complete automotive exhaust system with 2 coats.

Xtreme Temperature Coating

Important: When ordering, select the part number for the size of the can you need, then add the two digit numerical color code to the end of the part number to specify your desired color.

Xtreme Temperature Primer

XTC Silicone Zinc Primer prevents corrosion of metal surfaces exposed to high heat, high humidity, condensation, and salt air. It functions much like galvanizing as it locks itself to bare metal surfaces leaving a perfect primed surface for top coating. Available in a wide variety of sizes.

KB65100	12 oz. net weight	primer	24.99 ea
KB65400	one quart	primer	125.99 ea
KB65500	one gallon	primer	379.99 ea

Hi-Heat Coating

The coating will protect the wrap from abrasion and harmful liquid spills. Extra resins and binders toughen the surface, extend the life of wrap by protecting it from friction, and seal the pores to minimize the penetration of harmful liquids. The coating also works excellent as a paint directly on metal surfaces.

Note: Shipped within the continental U.S. only. Shipped ground only.

Exhaust Components

Reduce Underhood Temperatures! ⚠

Increased exhaust scavenging is produced, along with lower intake temperatures. Exhaust Insulating Wrap™ withstands continuous heat up to 2000 degrees F, and contains no asbestos. Will not over insulate a system when properly installed due to a proprietary coating developed by Thermo-Tec® Thermal Conduction Technology (TCT) that conducts heat across the wrap's surface. The 1/16" thick wrap is available in 1 inch or 2 inch widths in 15' or 50' rolls. Choose from off-white or graphite black.

Reduce Underhood Temps Up to 70%! ⚠

The new quick wrap, high velocity Exhaust Jackets™ are an innovative way to insulate and block radiant heat. The jackets cover the header tubes vertically allowing for a consistent fit. The fit allows the exhaust system to expand as it comes up to operating temperatures without restrictions and provides air space for added insulation. This product uses Thermal Conduction Technology (TCT), developed by Thermo-Tec®, and can be applied with the headers in the vehicle.

TT1015	4-6 cylinder	82.99 ea
TT1016	8 cylinder	93.99 ea

This Flexible Heat Shield Clips Into Place! ⚠

The Header Manifold Blanket provides excellent heat retention for exhaust headers and manifolds. This flexible heat shield simply clips into place on the upper portion of the header. The fabric side of the material should be facing the heat source, and the aluminized side facing away – offering protection from abrasion and harmful liquid spills. The Header Manifold Blanket is available in 2 sizes: two 20" by 24" blankets for V6 and V8 applications, and one 36" by 40" blanket for straight 6 and 4 cylinder engines.

TT1017	V6-V8 applications	99.99 pr
TT1018	straight 6 or 4 cyl models	84.99 ea

Vermiculite Coated Header Wrap ⚠

Insultherm Header Wrap is an extremely high temperature resistant wrap used to insulate hot gases in automotive exhausts. Manufactured from texturized fiberglass yarns that are woven into a strong, flexible wrap with vermiculite coating. Resists gasoline and engine chemicals and withstands temperatures up to 1200 degrees F (maximum continuous temperature of 1000 degrees F). Available in black or natural in 50' or 25' rolls.

1" Header Wrap

HW719301	black	1" x 50'	26.99 ea
HW719302	natural	1" x 50'	18.99 ea
HW719303	black	1" x 25'	13.99 ea
HW719304	natural	1" x 25'	14.99 ea

2" Header Wrap

HW719311	black	2" x 50'	26.99 ea
HW719312	natural	2" x 50'	25.99 ea
HW719313	black	2" x 25'	21.99 ea
HW719314	natural	2" x 25'	21.99 ea

Turbo Insulating Set ⚠

The turbo insulating set is designed to protect and improve performance of the turbo. This universal set will help reduce turbo lag. The cut-to-fit set includes a substantial amount of material to cover turbos from the smallest automotive application to heavy-duty truck applications.

TT15002	6 or 8 cylinder set	133.99 set
TT15003	turbo insulation cover only	38.99 ea

Shield Plastic or Rubber Hoses and Wiring from Radiant Heat! ⚠

Thermo-Shield™ protects hoses and wires from radiant heat. Unprotected, rubber hoses and plastic or rubber insulated wiring can dry out, melt or crack over time. Thermo-Shield™ is used in applications where it is difficult or not practical to disconnect one end of the hose or wire. The adhesive backed composite construction tape can easily be wrapped around the hose or wire to make a clean, professional appearance. Reflects radiant heat up to 2000 degrees F. Provides a barrier against the extreme conditions that underhood components are exposed to. Wrap your fuel lines and say good-bye to vapor lock.

TT1019	1-1/2" x 15' feet	16.99 ea
TT1051	2" x 50' feet	47.99 ea

Floor and Tunnel Shield II ⚠

Ten mil aluminum bonded to woven glass fiber with a hi-temp adhesive backing. Designed to withstand temperatures up to 1750 degrees F. The adhesive backing adhere to almost anything while withstanding temperatures over 450 degrees F. Ideal for firewalls, floor pans, transmission tunnels, and under hoods.

Note: Cool-Tape recommended for seams and edges.

Floor and Tunnel Shield with Adhesive Backing

DE050501	21" x 2'	41.99 ea
DE050502	21" x 4'	83.99 ea
DE050503	42" x 4'	141.99 ea

Floor and Tunnel Shield without Adhesive Backing

DE050506	42" x 2'	39.99 ea
DE050520	42" x 4'	85.99 ea

Cool-Tape

DE010408	1-1/2" x 15' roll	15.99 ea
DE010416	1-1/2" x 30' roll	28.99 ea
DE010468	2" x 30' roll	32.99 ea

An Extremely Versatile Heat Barrier™! ⚠

The Aluminized Heat Barrier™ is made up of woven silica with a flexible aluminized finish. The highly reflective surface of the material is capable of withstanding radiant temperatures in excess of 2000 degrees F. Installed using standard rivets with a backup washer, or with weather strip adhesive. The Snap Straps (sold separately) can be used to hold the blanket in place for manifolds or exhaust systems.

TT1008	36" x 40", 10 sq. ft.	85.99 ea
