Modern Technology with an Authentic OE Appearance!

BY12016

1955-57 Delco® Energizer Battery

The ultimate in underhood detailing! After hundreds of hours of rebuilding, scrubbing, painting, and sanding why settle for an ugly modern battery from one of those big national chain stores? Turn back the hands of time and restore the appearance of your Tri-Five to stock by replacing a period incorrect battery with this original style reproduction. Manufactured by the nation's leading antique auto battery experts, these authentic reproduction Delco Energizer® batteries offer you true "tar top" appearance, using a special patented Poly-Tar® formulation, while eliminating the sticky hot weather disadvantages of a tar-top! Each battery is correct in every detail including acid resistant, screw-in or push-in type caps featuring Delco lettering or circles and are finished in the proper trim. Classic Industries® restoration professionals have a keen eye for originality, so we've ensured that all batteries have the correct caps and the exclusive "Delco-Eye" feature that was used to check electrolyte fluid level on applicable units. Each case has been manufactured to OEM dimensions, which vary depending on model ordered. Other details include: reproductions of the assembly line battery decal, featuring white label with red text attached to the battery post as well as correct Delco Energizer® lettering on the top casing! These reproduction batteries are the professional Restorer's Choice™ in engine compartment detailing for the street or concours restorations!

CAUTION: Maintenance-Free batteries are Gel-Cell type batteries and DO NOT require adding electrolyte (battery acid). Don't forget to check the battery tray for rust or corrosion, replacement now will ensure cleaner battery installation.

*Includes six screw-in yellow caps with "Delco" lettering. All batteries measure 10-1/4" x 6-3/4" x 9".

Note: Batteries carry a 48-month manufacturer's warranty. Shipped overweight.

Yellow Top Battery

With premium cranking power, low internal resistance, and unparalleled cycling capability (rechargeability), the Yellow Top AGM battery is a true dual purpose automotive battery. It handles deep power drains and recharges to full capacity so it can power plenty of electronics and still start the engine time after time. Perfect for vehicles with multiple electronic systems or high demand audio.

Battery Mat – Acid Neutralizer

The Battery Mat offers protection against undetected battery acid leaks. Once installed, the mat will trap and neutralize any battery acid that leaks from the terminals or top side of the battery, preventing corrosion and expensive damage. Each mat is made of super absorbent polypropylene needle punch felt, with one side heat treated to give it additional strength. The mat is inserted under the battery between the battery and the battery tray. It can easily be installed at any time either when replacing the battery tray or battery.

Cell Saver Battery Insulation Kit

DEI cell saver battery insulation kit is designed to solve the problem of heat soak into batteries preventing premature failure due to heat. Batteries are very susceptible to heat and vibration that could cause premature failure and hazardous leaks. Cell Saver is very capable of damping vibration and will absorb and neutralize any damaging leaky battery acids. Cell Saver is easy-to-install and excess material can be trimmed to accommodate batteries of most sizes and shapes.

Battery Accessories & Tools

Protect Your Vehicle from Corrosive Battery Acid!

Prolong battery life and protect your vehicle's battery tray, underhood and radiator support area with the world's only acid-neutralizing heat barrier mat. It reflects over 90% of radiant heat, traps and neutralizes battery acid, protects against corrosion, is recyclable, protects the environment, and is inexpensive and easy-to-install. The Battery Heat Barrier™ set is completely safe to handle before and during installation. So effective, it is used by all branches of the United States military. Set consists of: one 8" x 40" acid absorbing/neutralizing felt and one adhesive backed 8" x 40" aluminized thermal barrier to wrap around the battery, plus an 8" x 12" acid absorbing/neutralizing pad to put beneath the battery. Install one on your vehicle NOW, before it's too late.

TT1001 battery heat shield..... 29.99 set

Battery Switch

These battery switches are easy-to-install on the negative battery post and disconnect the battery by simply loosening the knob a few turns. To reconnect just retighten the knob. The knob can be removed completely to deter theft. Rated at 500 amps surge and 125 continuous at 12 Volts. Available with a 15 amp fused bypass that maintains computer settings, radio, clock etc., while the battery is disconnected.

W20309 top post with fused bypass 16.99 ea
W20308 top post w/o fused bypass .. 11.99 ea
W20307 side post w/o fused bypass .. 10.99 ea

Lifeline Memory Retention System

The Lifeline enables users of a Master Disconnect Switch to retain a small amount of power for memory circuits common in fuel injection computers, radio presets and clocks. The Lifeline is a memory circuit retainer that will automatically reset after the electrical load is significantly reduced or if the Master Disconnect Switch has been switched to the on position. Available for standard or remote battery disconnects.

500778 standard disconnect 32.99 ea
500837 remote disconnect..... 41.99 ea

Quick-Disconnect Battery Terminal

This brass, quick-disconnect battery terminal isolates the vehicle's battery, allowing the clock, radio etc., to remain functional when combined with a fused bypass. Designed for both round and square battery lugs.

W203507 6.99 ea

Master Disconnect Battery Switch

Taylor's 2 post battery disconnect switch completely shuts off all of the current from the battery in the event of an accident or electrical short. The 2 post switch is rated at 180 amps continuous capacity and is especially useful when charging the battery. Includes vinyl on/off decal.

Note: The NHRA requires a master battery disconnect switch on all modified and super stock class vehicles to comply with their rule 8.4.

TP1032 180 amps..... 44.99 ea

Battery Cutout Switch

Make sure your battery maintains the precious power you need by disconnecting the battery from the vehicle during storage. Your choice of an inexpensive standard duty cutout or a heavy-duty unit. Works on any 12 Volt system or vehicle. Splices into positive battery cable to provide a switch for turning power on or off.

W203047 standard duty 34.99 ea
T4988 heavy-duty 104.99 ea

Disconnect Position Ring

For disconnect switches to identify the correct position of the switch (ON or OFF). Eliminates the question of which direction is the safe one.

Universal Wiring Harnesses

Instrument cluster wiring is designed with a "cluster harness disconnect" system for easy service and assembly. All original terminals, connectors, and light sockets are also supplied for original cluster gauges. Any aftermarket gauge system can be easily and neatly wired in.

Engine wiring includes connectors for points type and HEI distributors. Power and tach connectors supplied for GM HEI distributors. Alternator connectors supplied for GM "SI" series internal regulator alternators.

Engine wiring includes starter and gauge sender leads for water temp, oil pressure, and tach. Heavy 8 gauge alternator leads are supplied. Power circuits are fusible link protected.

1955-57 Classic Update Wiring Harness Set

Designed to make wiring "that easy", Classic Update Wiring Harness sets allow you to easily convert to HEI ignition, use modern audio equipment, add power windows or even add AC to your vehicle. Engineered for specific year, make and model configurations, these update harnesses include all of the original style lamp bulb sockets, connectors and terminals. This wiring harness set boasts 19 features, making these one of the most advanced systems of their kind.

1955-57 Tri-Five Chassis Wiring Harness

This 27 circuit kit is designed to fit the 1955-57 Tri-Five model series passenger vehicle. In addition to factory circuits, this kit includes additional circuits for modern day power options and accessories. This harness features a factory location mounting plate for the fuse block, front and rear lighting sockets, factory and aftermarket instrument cluster harness, and dash and turn signal connectors. This harness utilizes GM color coded high grade TXL wire with the circuit identification printed on it for easy installation. The kit includes a 150 page installation manual written specifically for Tri-Five installation.

1955-57 20 Circuit Wiring Harness Set

These wiring harnesses are built specifically for 1955-57 passenger car models. They feature wiring for the entire car and will work with most stock GM steering columns, as well as aftermarket columns such as idditt and Flaming River. Will wire full gauge sets including tach and will address HEI, points and aftermarket distributors, neutral safety switches. Also includes wiring for high and low beams, indicator lights, parking lamps, turn signal lamps, and brake lamps. Will readily accept fuel injection. The wiring is high temperature, fire resistant and color coded. Features the circuit printed on each wire. All sets include a headlight switch, isolated cooling fan relay and color coded instructions. A unique serial number for each harness enables Ron Francis to technically support the installation to you or any subsequent owner.

1994-02 Fuel Injection Engine Swap Wiring Harness Set

For maximum power with exceptional driveability nothing beats electronic fuel injection. And the easiest way to install a modern fuel injected engine is with one of these proven FI engine wiring harnesses. These harness sets are designed to allow you to properly wire your engine swap from a donor car or crate motor. A variety of harnesses are available to suit 1994-up LT1, LS1 and GM crate engine applications. Each of these sets include detailed instructions and illustrations.

The Detail Zone Wiring

Each set includes the sensor connectors installed on 20 foot lengths of wire for custom installations, connectors for the sensor wires, and a Telorvek panel with installed wiring and connectors to plug into the factory computer. Designed to work with a specific transmission, so be sure to select the correct application from the listing below. Other non-computer controlled automatic and manual transmissions can be used but typically requires ECM reprogramming for best results. 1998-02 ECMs require use of all emissions sensors or a trouble code will occur unless the ECM is reprogrammed.

Note: *Corvette engines must use the Camaro/Firebird ECM in order to use this wiring kit. Also requires use of the 1998 Camaro throttle body for accelerator cable control. This engine utilizes the OBD II diagnostic system and if all emissions sensors are not used, trouble codes will set in a factory programmed ECM.

| | | | |

Painless Wiring

The engineers at Painless have worked out all of the connection and routing problems so all you have to do is follow the straight forward instructions for a painless installation. Feature TXL high temp wire that is color coded and labeled with each application for ease of installation. Harnesses for the LS1 applications require 1998 Camaro computer G8606 and a mechanical throttle body.

Important: *Includes a module to bypass the vehicle anti theft system (VATS) incorporated in the computer. Does not include any emissions related connections.

6.0L LS2 EFI Harness

You have to thank GM for making the great LS2 motor available at a reasonable price. Now, PAINLESS has developed a harness to bring it to life. This harness is designed to work with an OEM LS1 computer and keep the throttle by wire feature. This harness has no emissions provisions.

Important: Requires use of factory 2002-03 Corvette LS6 ECM, accelerator pedal, and TAC module.

Universal Wiring Harnesses

Universal Chassis Wiring Harness

Starting from a blank slate is a daunting task, especially with wiring. Trying to keep your electrical systems running smoothly on a patchwork of old wiring can be a troubleshooting hassle and possibly even a fire hazard. Whether you are planning a series of electrical upgrades or simply need to replace aging, brittle wiring, build your electrical system on a fresh foundation with a quality universal harness. For basic builds, start with a simple kit with wiring provisions for all lamps, horn, fan, wiper, gauges, and all lamps. For more elaborate builds, choose from a selection of advanced wiring solutions. Need to integrate your aftermarket air conditioning? Need extra circuits for a multitude of electronic accessories? With Classic Industries®, there's no limit to what you can do with your wiring.

*Fuse Styles:
A: ATO Fuses
M: Mini Fuses

Universal Wiring

Highway Series Modular Fuse Panel Systems

Each universal fuse panel is constructed in heat resistant nylon and features anti-push back locks and single side wire access with self-locking, screw down connections. Includes a starter/alternator 175 amp mega fuse for extra protection. The panel is fed through an 8 gauge power feed wire and features a battery and accessory stud connection. Includes: color coded wiring for ignition, alternator, headlight, steering column, accessories and gauges, relays, fuses, flashers, circuit breakers, and all necessary power connections and terminals. Also includes a full color schematic and step-by-step instructions.

- Composite Panel Base
- Nylon Panel Components
- Color Coded Wire
- Easy-to-Read Wire Labeling
- Self-Locking Screw Clamp Interface
- 8 Gauge Alternator Feed
- 175 Amp MegaFuse
- Full Color, Step-by-Step Instructions

Highway 15 Modular Fuse Panel System

Features 15 power outputs in 8 fuses and 1 circuit breaker. Gauge cluster disconnect for easy maintenance. Includes: ignition, headlight, and dimmer switches.

PAINLESS

18 Circuit Harness Includes:

- Accessory
- Brake Lamps
- Charging
- Electric Choke
- Emergency Flashers
- Fused Power Source
- Fan Relay
- Headlamps
- Horn
- Ignition Coil
- Instrument Panel
- Park Lamps
- Radio/Clock
- Starting
- Tail Lamps
- Third Brake Lamp
- Turn Signals
- Wipers

18 Circuit Universal Chassis Harness

This Painless 18 circuit harness may be just what you need. This compact harness has all the basic circuits to get you rolling in no time. This harness has an extra 8 feet of wire in the tail section and 7 feet in the headlight section to take care of longer wheelbase vehicles.

10308 276.99 ea

PAINLESS

20 Circuit Harness Includes:

- Horn relay, floor dimmer, courtesy light connections.
- Standard brake light connections w/third brake light.
- Heavy gauge main fuse panel feed wire.
- Complete engine compartment wiring for lighting and engine management.
- Complete rear body wiring for lighting & fuel tank.
- Heavy gauge alternator, main power, and starter solenoid wires.
- Heat and air conditioning lead wires as well as accessory radio and battery clock leads.
- Long ignition, accessory, and battery leads for the ignition switch. A separate alternator exciter lead wire is wired in.
- Plug-in steering column connector for 1969 and later GM columns. Original columns can also be wired by using the supplied mating connector and terminals.

20 Circuit Universal Chassis Harness

The Power Plus series is a complete deluxe integrated fuse box wiring system utilizing a complete factory style pre-wired fuse box. Power Plus series wiring kits are designed to offer an economical and convenient wiring solution. By eliminating the disconnects and sub-harness assemblies and implementing direct run technology to the switches, fuse panel, and end locations, this set offers a more streamlined installation and less work for you!

510008 1969-75 20 circuit 436.99 ea

RON FRANCIS
Wiring

24 Circuit Harness Includes:

- 24 fuses – You won't run out
- 4 are Select-A-Circuit™ – choose ignition or battery fed circuits by moving the fuse in the slot
- No excessive unused wires hanging out if you don't need them
- Electric fuel pump relay included (or other use up to 20 amps)
- Cost savings for LED users
- Quickly attach 4 more relays for a total of 7 with pre-wired ignition feeds
- Panel measures 5-3/8" long x 3-1/4" wide x 3-3/8" high

MADE IN USA

24 Circuit Universal Chassis Harness

This newly engineered fuse system from Ron Francis Wiring, known as the ACCESS 24/7 comes standard with 24 fuses and 3 relays, along with a unique mounting system and room for 4 additional relays. The ACCESS 24/7 covers all the bases and allows you to consolidate even additional aftermarket product's relays to really clean up the under dash board area. The "24" means fuse capacity, the "7" refers to its capacity for up to 7 relays and the ACCESS 24/7 name is derived from the fact that you can actually reach under your dashboard and bring the fuse panel out in plain view for checking a fuse, servicing, etc. There is so much to this small package it is hard to list. When you want to add an accessory or additional wires leading to the fuse panel, they simply plug in specially labeled connectors in the kick panel or behind upholstery. This is very similar to the terminal block design of the EXPRESS or BARE BONZ except they plug in instead. Talk about limited time under the dash. This works great! Made in USA.

TF900215 1955-57 24 circuit 689.99 set

PAINLESS

28 Circuit Harness Includes:

- GM Engineered Fuse Block and Painless Mounting Bracket
- GM Steering Column Ignition Switch Connection
- GM Steering Column Turn Switch Connectors
- Two Headlight Pigtales
- 10SI and 12SI Alternator Connectors
- Dimmer Switch Connector
- HEI Power and Tach Connectors
- 20 Extra 56 Series Terminals

1955-57 Twenty-Eight Circuit Harness

This 28 circuit kit includes most all the power accessory circuits you have been looking to add to your vehicle. This universal harness will work on carbureted or any stand alone fuel injected engine with any type transmission.

TF900629

Remote Battery Disconnect

With this setup, one click of the key fob completely shuts down your vehicle's entire electrical system. It's accomplished by routing your main battery cable through a remote cutoff solenoid that you've stashed in a place inaccessible to a thief. For even more security, the 4 channel "Safe-n-Sound" system not only shuts off all power from the battery, but will also control 3 other items, like closing the windows, triggering the power door locks, and interrupting electrical power to the fuel pump, all separate from the main battery cutoff. The 4 channel package can handle up to 30 amps worth of electrical equipment.

| TF900628 | 4 channel | 265.99 ea |

30204

Remote Master Disconnect

We offer two Master Disconnect sets with 250 amp continuous duty solenoids designed for use with high amperage alternators. Remote master disconnect set 30204 uses a small toggle switch to activate the solenoid. This switch can be hidden anywhere in the vehicle as a theft deterrent. Master disconnect with emergency push button is perfect for drag race applications as it allows you to install a large emergency push button in easy reach if you need to shut down your vehicle's electrical system in a hurry. Remote master disconnect with mechanical latching solenoid is ideal for everyday vehicle applications and is a simple and effective anti-theft deterrent. It uses a 110 amp continuous duty solenoid which is activated by an easy to hide momentary push button.

RON FRANCIS Wiring

Timed Cooling System Shutdown

Timed cooling system shutdown features adjustable relays that keep power to the cooling fan and electric water pump (if equipped) when the key is shut off. This reduces the block temperature as much as possible without the risk of killing the battery. This is a timed circuit and does not use a thermostat or other fan control to operate.

Note: Not compatible with probe style fan sensor controls that mount on the radiator or radiator support.

Wiring Accessories

Easy Loom Split Wire Sleeve

DEI Easy Loom is the answer to those ugly plastic stock wire looms. These split loom sleeves from DEI offer a clean, classy way to protect exposed wires, cables, and hoses. They are easy-to-install and resistant to abrasion, chemicals, and the elements. Available in 8 different diameters and include a 2 foot roll of silicone tape to seal the ends.

Individual Rolls

Thermo-Flex Hose and Wiring Covering

The combination of aluminum, silica, and stainless steel is combined to produce a sleeve that is flexible lightweight, and strong. The aluminum-silica combination can be slit for applications such as wire looms or hose covering, without disconnecting the ends of the wire or hoses. Thermo-Flex aluminum can withstand extreme temperatures up to 750 degrees F.

Semi-Rigid Wrappable Split Braided Tube

Clean up and protect any wiring harness with this black braided wire wrap. The semi-rigid tube opens along a lateral split to accommodate a variety of harness configurations, then simply closes without any need for fasteners. A 25% overlap ensures complete coverage. Retains shape and rigidity from -94 degrees to 257 degrees F. For 18-14 gauge wire.

Express Sleeve

Express sleeving is a combination of a high temperature insulation material and a highly reflective Mylar foil

with a Velcro closure. The sleeving is designed to simply and effectively protect wire, hoses, and cables from harmful effects of radiant heat. Just pull apart the Velcro, wrap around the wire, and re-close the sleeve. Express Sleeves reflect over 90% of radiant heat bursts up to 2000 degrees F, and can easily withstand direct temperatures up to 750 degrees F.

HT719307

Fabric Heat Shrink Tubing

Shrinkflex fabric tubing is the only product of its kind. The unique weave of poly olefin and polyester easily installs over wiring harness bundles, connectors and splices, as well as rubber hoses and plastic pipes. When heated to 176 degrees, it shrinks to 1/2 the original diameter while remaining flexible, even at high temperatures!

XT100

XT101

XT102

XT103

X-Treme Tape

X-Treme Tape was developed for the military and has some very unusual properties. The silicone based tape will stick only to itself, and only when placed under tension. Once wrapped around an object, it forms a non-conductive, air and watertight, insulating seal that remains flexible within a temperature range of -60 degrees to 500 degrees F. Insulates to 8000 Volts. Stretches to 3X's its length. Conforms to irregular shapes. When wrapped upon itself, it bonds together immediately and becomes completely fused after 24 hours at room temperature.

Reproduction wiring grommet. Used to guide the wire harness through the firewall and through the radiator support.

| | | |
|-------|-------|----------|
| W1027 | | 15.99 ea |
|-------|-------|----------|

Universal Wire Grommet

Sometimes you are forced to punch a hole in your firewall to get additional wires into the engine compartment, but that hole you cut is sharp and can potentially sever wires. To help prevent this, install one of these universal wire grommets. In addition to the added protection, these grommets also give the hole in the firewall a cleaner appearance.

Note: *Can be drilled out up to a 1/4" opening.
